Radio, as a medium that does not require visual attention, allows audiences to consume information while they are engaged in other activities, which increases its versatility and convenience. In addition, its ability to transmit news in real time provides unparalleled immediacy, keeping people up to date with events. In fact, this form of journalism has a massive reach, reaching remote areas where other media might have difficulties. For this reason, TECH has developed this program that combines theory, 100% online, with a practical internship of 3 weeks, so that graduates have the opportunity to expand their skills with the best experts.

tech 06 | Introduction

The sound and narrative approach of Radio Journalism allows audiences to tune in and receive news anytime, anywhere, offering flexibility to those seeking information on their daily commute. In addition, this audio nature enhances the ability to tell stories in a vivid and immersive way, allowing journalists to use tone, intonation and sound effects to add depth and emotion to news stories. Likewise, it encourages the listener's imagination, allowing to visualize the events through the detailed description.

In this context, TECH has developed this Hybrid Professional Master's Degree in Radio Journalism, addressing, first, the ethical and theoretical principles that guide journalistic practice, passing through the audiovisual narrative, which allows understanding how to structure and present stories effectively through the sound media. Informative documentation will also be essential for the graduate to acquire skills in research, compilation and rigorous verification of information.

Likewise, we will analyze how advertising is inserted in this type of media, providing a vision of how these messages are intertwined with the radio narrative. In addition, the student will delve into the techniques of voice-over, production and management of technical equipment for the production of high quality news content, covering genres such as sports and cultural journalism. Finally, the journalist will be immersed in the management of the news company, as well as in the understanding of public opinion to understand how audiences receive and perceive information.

TECH introduces a revolutionary program with a unique educational approach. This Hybrid Professional Master's Degree has been developed with an approach divided into two distinct phases. In the first stage, it will focus on theory and will be taught through a 100% online platform. The second stage, on the other hand, will take the professional to carry out an intensive practical experience of 3 weeks in a prestigious radio media.

This **Hybrid Professional Master's Degree in Radio Journalism** contains the most complete and up-to-date program on the market. The most important features include:

- Development of more than 100 case studies presented by journalism professionals, radio communication experts and university professors with extensive experience in this field
- Its graphic, schematic and eminently practical contents provide essential information on those tools and techniques that are indispensable for professional practice
- Presentation of practical workshops on the techniques and tools most commonly used in Radio Journalism
- Algorithm-based interactive learning system for decision aking in the situations that are presented to the student
- Practice guides on journalistic communication through radio
- All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection
- Furthermore, you will be able to carry out a internship in one of the best companies

You will spend an intensive 3-week internship in a prestigious radio media and acquire the knowledge you need to grow personally and professionally"

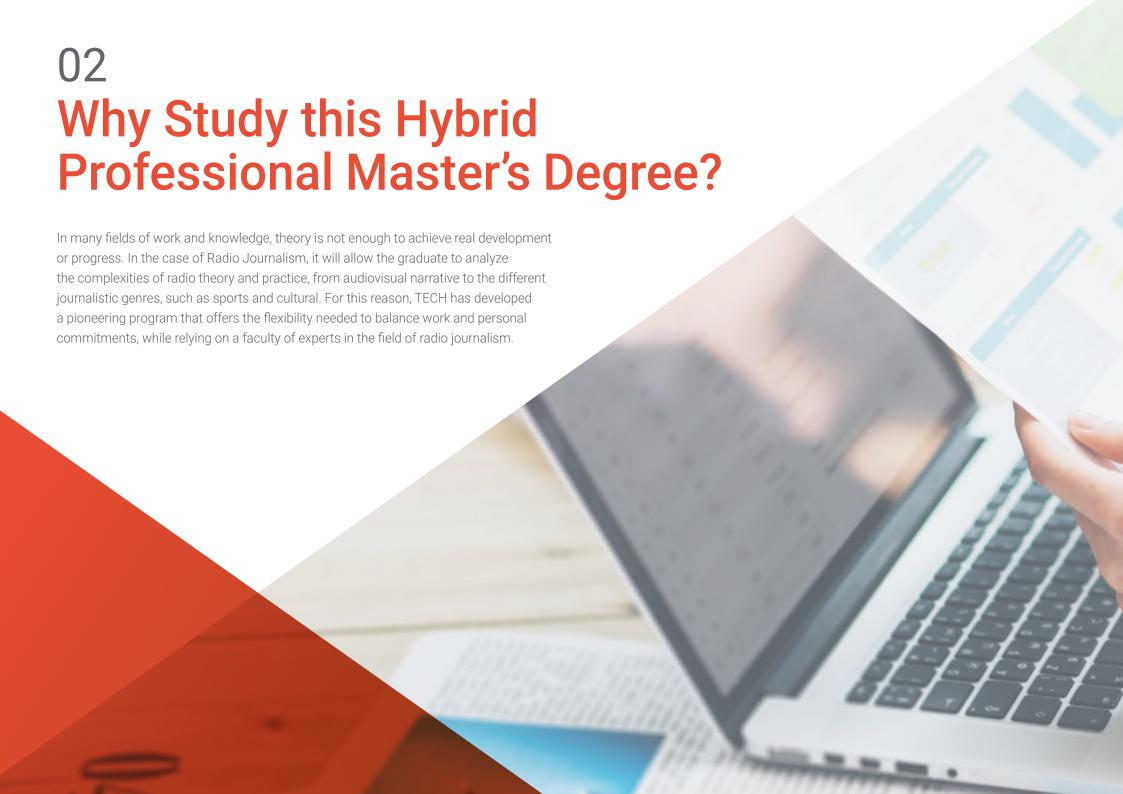

In this program, of a professionalizing nature and blended learning modality, the program is aimed at updating journalism professionals who develop their functions in the radio media, and who require a high level of qualification. The contents are oriented in a didactic way to integrate theoretical knowledge into journalistic practice, and the theoretical-practical elements will facilitate the updating of knowledge.

Thanks to their multimedia content developed with the latest educational technology, they will allow the journalism professional to learn in a situated and contextual way, that is to say, a simulated environment that will provide immersive learning programmed to prepare for real situations. This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise throughout the program. For this purpose, the students will be assisted by an innovative interactive video system created by renowned and experienced experts.

You will delve into the importance of creating mental images and the use of sound elements to generate impact in the radio media.

You will acquire new knowledge and perfect your skills through the Hybrid Professional Master's Degree in Radio Journalism, in a practical way and adapted to your needs.

tech 10|WhyStudythisHybridProfessionalMaster'sDegree?

1. Updating from the latest technology available

Technological evolution in Radio Journalism plays a fundamental role in the creation of dynamic and relevant content. The latest technology available not only allows for more agile and sophisticated production, but also enables real-time news capture, improved sound quality and transmission, as well as the expansion of platforms to reach a wider audience. This technological innovation has transformed the way information is presented, enriching the listening experience for listeners and offering a more immersive and up-to-date radio journalism.

2. Gaining in-depth knowledge from the experience of top specialists

The large team of professionals that will accompany the specialist throughout the entire practical period is a first-class and an unprecedented guarantee of updating. With a specifically designated tutor, the student will be able to work in a real radio media, in a state-of-the-art environment, which will allow them to incorporate into their daily practice the most innovative techniques and tools in Radio Journalism.

3. Entering first-class professional environments

TECH carefully selects all available centers for Internship Programs. As a result, the specialist will have guaranteed access to a prestigious radio station to develop their journalistic practice. In this way, you will be able to see the day-to-day work of a demanding, rigorous and exhaustive work area, always applying the latest techniques and tools in its work methodology.

WhyStudythisHybridProfessionalMaster'sDegree?|11 tech

4. Combining the Best Theory with State-of-the-Art Practice

The educational market is plagued by teaching programs that are poorly adapted to the journalist's daily work and that require long teaching hours, often not very compatible with personal and professional life. TECH offers a new learning model, 100% practical, that allows you to take the lead in innovative projects in the field of Radio Journalism and, best of all, to put it into professional practice in just 3 weeks.

5. Opening the door to new opportunities

The expansion of online platforms, podcasts and mobile apps has democratized the production of radio content, allowing journalists to reach global audiences with relative ease. These new opportunities have not only expanded the reach of radio journalism, but have also encouraged experimentation with innovative formats, the creation of tailored content and direct connection with specific audiences. In addition, interactivity and the ability to explore more specialized topics have created fertile ground for the development of unique narratives.

tech 14 | Objectives

General Objective

• The general objective of the Hybrid Professional Master's Degree in Radio Journalism is to boost graduates' careers to new heights by providing them with the specialized skills and knowledge necessary to excel in the world of radio journalism. Through the syllabus, journalists will nurture their creativity, hone their technical skills and broaden their theoretical understanding. In fact, this program will not only qualify professionals in the production of quality radio content, but also in their adaptation to the latest trends and technologies that define the industry

This program will give you a sense of confidence in your journalistic practice, which will help you grow personally and professionally"

Specific Objectives

Module 1. Theory of Journalism

- Master the journalistic tradition from its origins to the present day, focusing on the main media outlets, journalists and important news coverage
- Analyze the types of newspapers that exist and their contents
- Know the main journalistic tools and their selection criteria
- Know and analyze the elements of the newspaper

Module 2. Audiovisual Narrative

- Understand the importance of audiovisual narrative in today's communication environment
- Master the basic guidelines that govern audiovisual communication for the elaboration of the different radio genres
- Know the particularities of audiovisual discourse
- Know the fundamental concepts of visual narrative

Module 3. Informative Documentation

- Identify the professional profiles of journalists, as well as the main skills required in the performance of their professional practice
- Locating, retrieving and using information, as well as providing an overview of the current situation of documentation in its different facets
- Documenting news processes and handling new technologies related to the treatment of documents
- Provide a practical vision of the work performed by a documentalist in the media
- Master the elements of the information and knowledge society

tech 16 | Objectives

Module 4. Advertising Theory

- Understand the theories of advertising, marketing, public relations and corporate communication
- Know the origin, evolution and economic and social impact of advertising
- Know how to describe the structure of advertising agencies
- Know the basic notions about advertising and marketing
- Define each of the functions for the management of the information company, highlighting their main applications

Module 5. Radio Communication

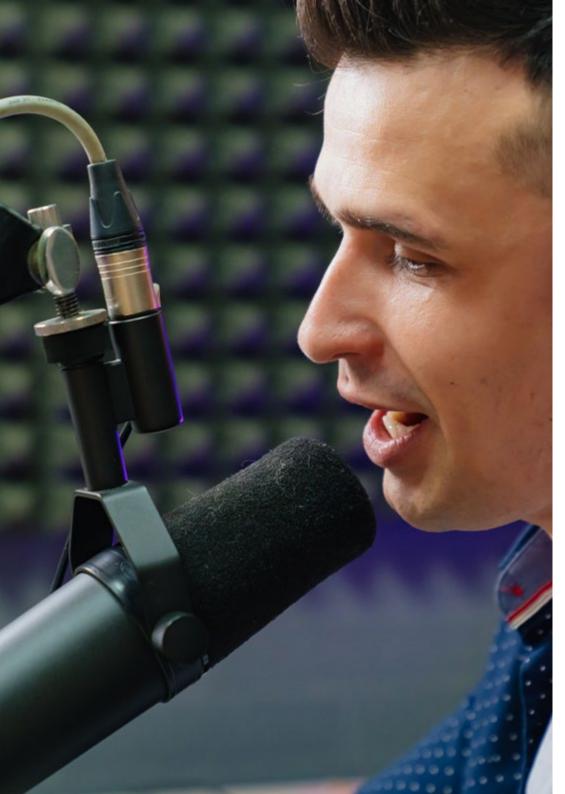

- Use informative and communicative technologies and techniques, in the different media or combined and interactive media systems
- Bring knowledge, ideas and debates of informative content to society through the different journalistic modalities and the different media
- Gain knowledge about the history of broadcasting at the international level, as well as its impact on society
- Get to know and understand the structure of the radio landscape and its particularities in the current environment
- Master the basic guidelines governing radio communication for the development of different radio genres
- Know the main milestones in the history of radio broadcasting

Module 6. Broadcast Journalism

- Understand the structure of the media and their main formats, as expressions
 of the lifestyles and cultures of the societies in which they perform their
 public function
- Gain knowledge of the historical evolution of contemporary European and international journalistic modes and traditions based on the analysis and research of the messages they transmit and their social impact
- Act as a communication professional in accordance with the legal and deontological rules of the profession
- Distinguish the elements involved in the elaboration of the radio message
- Distinguish the types of radio programs and their composition
- Know the evolution of radio information

Module 7. Sports Journalism

- Write sports journalistic pieces according to the specifications of the different informative (news), interpretative (chronicle, interview and report) and opinion (editorial, column, article, etc.) genres
- Know the ins and outs of the sports press
- Analyze sports programming on the radio
- Analyze trends in sports programming on radio

Module 8. Cultural Journalism

- Understand the importance of culture in the field of journalism
- Analyze journalistic texts related to the cultural and artistic field
- Analyze cultural contents in different communication channels
- Write texts according to the different journalistic genres of information, interpretation and opinion, closely related to the dissemination of culture

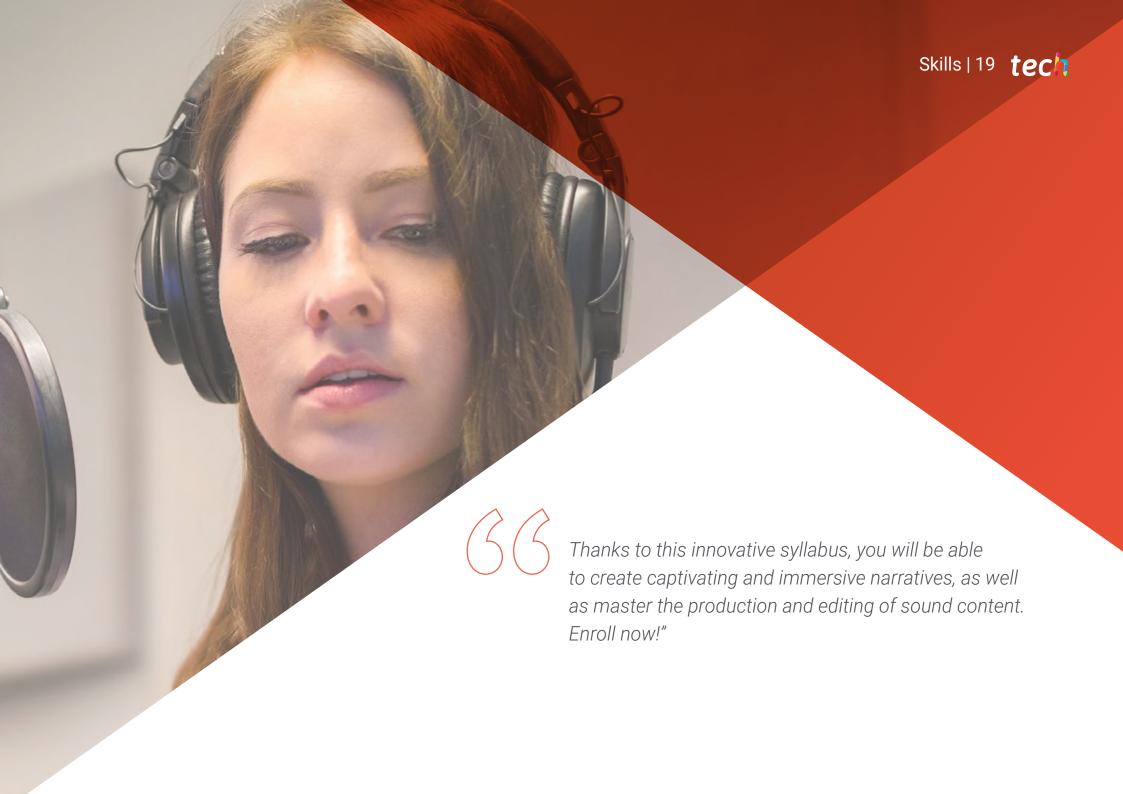

Module 9. Informative Company

- Identify the functions and strategies deployed by organizations to be present in the media or to favor better communication with their customers, suppliers and employees
- Understand the mechanisms necessary at the organizational level, to develop
 the different aspects of a communication company and its performance
 in a globalized context
- Understand the types of media companies that exist
- Know how an information company is structured

Module 10. Public Opinion

- Situate the public function of the journalist as a guide of the public opinion and in relation to the role of the newspaper as a political actor and social mediator
- Know and identify the multiple expressions, phenomena and processes of public opinion
- Reflect with theoretical soundness and empirical rigor on the processes by which the journalistic profession helps to build and express public opinion
- Express and act on public opinion, using all the methods, languages and technological supports available to journalism today
- Know the concept of public opinion

tech 20 | Skills

General Skill

• Write, announce and transmit information through radio

You will develop a holistic perspective that will enhar perspective that will enhance your ability to inform, all through the exploration of journalism theory and critical analysis of radio communication"

Specific Skills

- Identify the main journalistic tools and use them when writing information
- Write and voice journalistic pieces in different genres
- Know the origins and historical evolution of journalism at the international level
- Know the world history and how it was reported
- Use audiovisual discourse and narrative in journalistic creations
- Research in order to develop your own information

You will combine theory and professional practice through a demanding and rewarding educational approach"

tech 24 | Educational Plan

Module 1. Theory of Journalism

- 1.1. Definition and Tpes of Newspapers
 - 1.1.1. Introduction: The Study of Communication as a Social Science
 - 1.1.2. Key Concepts: Communication, Information and Journalism
 - 1.1.3. The Media and its Relationship with the Community
 - 1.1.4. Newspapers and Their Relationship with Other Media
 - 1.1.5. Definition and Characteristics of the Journal
 - 1.1.5.1. History
 - 1.1.5.2. Themes
 - 1.1.5.3. Selling Price
 - 1.1.5.4. Format
 - 1.1.6. The Contents of the Journal
 - 1.1.6.1. Sections
- 1.2. Main Journalistic Tools
 - 1.2.1. Introduction
 - 122 Main Journalistic Tools
 - 1.2.3. Selection Criteria
 - 1.2.3.1. What Are They?
 - 1.2.3.2. Classification
 - 1.2.3.3. Relationship With the Present Time
- 1.3. Elements of the Newspaper
 - 1.3.1. Introduction
 - 1.3.2. Elements of the Newspaper
 - 1.3.3. Different Elements
- 1.4. Journalists and Their Journalistic Skills or Abilities
 - 1.4.1. Introduction
 - 1.4.2. Journalists and Their Journalistic Skills or Abilities
 - 1.4.3. Debate on the Journalistic Profession
 - 1.4.4. Attitudes
 - 1.4.4.1. Practical Attitudes
 - 1.4.4.2. Intellectual and Moral Attitudes

- 1.5. The Organization of a Newspaper
 - 1.5.1. Introduction
 - 1.5.2. Two Structures in One: The Company and the Editorial Staff
 - 1.5.3. Editorial Principles
 - 1.5.4. Editorial Statutes
 - 1.5.4.1. Editorial Roles
 - 1.5.5. Epilogue: From the Digital Version to the Digital Edition
- 1.6. Journalistic Work
 - 1.6.1. Introduction
 - 1.6.2. Journalistic Work
 - 1.6.3. What Is an Editorial Department and How Is It Organized?
 - 1.6.4. On a Daily Basis
 - 1.6.5. Long-Term Planning
 - 1.6.6. Individual and Collective Work
 - 1.6.6.1. Individual Work
 - 1.6.6.2. Collective Work
 - 1.6.6.3. Style Books
- 1.7. Journalistic Ethics
 - 1.7.1. Introduction
 - 1.7.2. Origin and Historical Evolution
 - 1.7.2.1. The Hutchins Commission
 - 1.7.2.2. The MacBride Report
 - 1.7.3. A Way to Regulate the Profession
 - 1.7.4. Functions of Self-Regulation
 - 1.7.5. Codes of Ethics
- 1.8. Types of Journalism
 - 1.8.1. Introduction
 - 1.8.2. Investigative Journalism
 - 1.8.2.1. Qualities of The Investigative Journalist
 - 1.8.2.2. Williams Scheme
 - 1.8.2.3. Research-Innovation Techniques
 - 1.8.3. Precision Journalism
 - 1.8.3.1. Specializations of Precision Journalism

	1.8.4.	Service Journalism			
		1.8.4.1. Thematic Features			
	1.8.5.	Journalistic Specialization			
	1.8.6.	Development of Specialized Information			
1.9.	Journal	ism and Rhetoric			
	1.9.1.	Introduction			
	1.9.2.	Information-Opinion Separation			
	1.9.3.	Theories of Journalistic Genres			
	1.9.4.	Contributions of Rhetoric			
	1.9.5.	The Elocutio or Elocution			
1.10.	Journalism as a Political Actor				
	1.10.1.	Introduction			
	1.10.2.	The Newspaper According to Theoreticians			
	1.10.3.	The Newspaper, Actor of Conflict			
		1.10.3.1. The Newspaper as Communication			
		1.10.3.2. The Newspaper at the Extra, Inter and Intra levels			
	1.10.4.	The Newspaper as Peacemaker			
		1.10.4.1. Alarm Mechanism			
		1.10.4.2. Creator of Atmospheres, Mobilizer for Peace			
	1.10.5.	The Newspaper as a Complex Problem-Creation and Problem-Solving System			
	1.10.6.	The Newspaper as a Missionary Institution			
	1.10.7.	The Newspaper as the Apex of a Triangle of Love-Hate Relationships			
	1.10.8.	The Newspaper as a Narrator and Participant in Conflicts			
1.11.	Journalism as a Social Actor				
	1.11.1.	Introduction			
	1.11.2.	The Newspaper as Interpreter and Mediator			
	1.11.3.	The Newspaper as a Member of the Political System and as a Parapolitical System			
	1.11.4.	The Newspaper as Informer and Pseudo-Political Communicator			

1.11.5. The Newspaper as an Addressee of the Communication Policies of Other

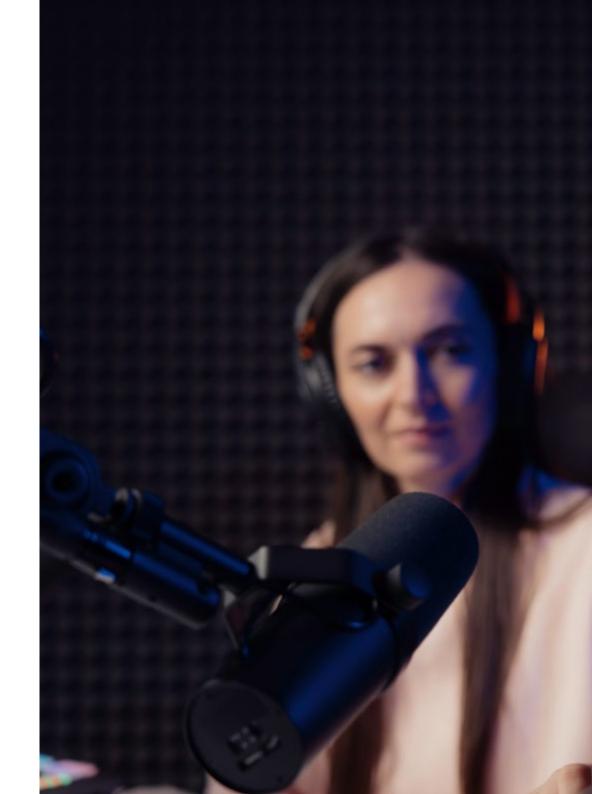

Social Actors

Module 2. Audiovisual Narrative

- 2.1. The Audiovisual Narrative
 - 2.1.1. Introduction
 - 2.1.2. Fundamental Concepts of Audiovisual Narrative
 - 2.1.3. A Methodological Approach
 - 2.1.4. Particularities of Audiovisual Discourse
 - 2.1.5. Audiovisual Language
 - 2.1.6. The Image
 - 2.1.7. Sound
- The Discourse and the Enunciating Stages
 - 2.2.1. Introduction
 - 2.2.2. The Functions of the Narrative
 - 2.2.3. The Construction of the Narrative Text
 - 2.2.4. The Enunciating Instances
 - 2.2.5. Typologies of Narrators
 - 2.2.6. Focalization
 - 2.2.7. The Narrator
- 2.3. The Story and the Axes of the Narrative
 - 2.3.1. Introduction
 - 2.3.2. The History
 - 2.3.3. The Narrative Action
 - 2.3.4. Time
 - 2.3.5. The Space
 - 2.3.6. Sound
- The Construction of the Audiovisual Discourse: The Script
 - 2.4.1. Introduction
 - 2.4.2. The Script
 - 2.4.3. The Idea
 - 2.4.4. The Genres
 - 2.4.4.1. Fantastic and Horror Films
 - 2.4.4.2. War Films
 - 2.4.4.3. Comedy Films
 - 2.4.4.4. The Musical
 - 2.4.4.5. Documentaries

tech 26 | Educational Plan

- 2.4.5. Characters and Dialogue
- 2.4.6. The Literary Script vs. The Technical Script
- 2.5. Theory and Analysis of Film Editing
 - 2.5.1. Introduction
 - 2.5.2. Assembly Definition
 - 2.5.3. The Basic Units of Film Narrative
 - 2.5.4. First Theoretical Approaches
 - 2.5.5. Types of Montage
 - 2.5.6. The Invisible Assembly Glossary on Mounting
- 2.6. The Cinematographic Narrative: From Origins to Post-Modernism
 - 2.6.1. Introduction
 - 2.6.2. The Origins of Cinema
 - 2.6.3. The Film of Origins: Spatial-Temporal Articulation-Organization
 - 2.6.4. The Avant-Garde and The Cinema
 - 2.6.5. The Hollywood Cinema
 - 2.6.6. The Art Cinema and The Essay
 - 2.6.7. Contemporary Cinema
- 2.7. The Informative Cinema: From Newscasts to Documentaries
 - 2.7.1. Introduction
 - 2.7.2. Informative Cinema
 - 2.7.3. The Cinematographic Newsreels
 - 2.7.4. Documentaries
 - 2.7.5. The Informative Fiction Cinema
 - 2.7.6. The Value of Newsreels as a Historical Source
- 2.8. Television Discourse: Information and Entertainment
 - 2.8.1. Introduction
 - 2.8.2. Television Discourse
 - 2.8.3. Narratology of Audiovisual Information
 - 2.8.4. Audiovisual Information Genres
 - 2.8.5. Infotainment
 - 2.8.6. Entertainment Programs
 - 2.8.7. Fiction Television Storytelling

Educational Plan | 27 tech

- 2.9. The Audiovisual Advertising Discourse: Spot, Trailer and Videoclip
 - 2.9.1. Introduction
 - 2.9.2. Advertising Narrative in the Audiovisual Media
 - 2.9.2.1. Spot
 - 2.9.2.2. Trailer
 - 2.9.2.3. Videoclip
- 2.10. New Media and Narrative Structures in the Digital Era
 - 2.10.1. Introduction
 - 2.10.2. The Digital Paradigm
 - 2.10.3. The New Media of the 21st Century
 - 2.10.4. New Media Practices
 - 2.10.5. The Post-Media Condition

Module 3. Informative Documentation

- 3.1. Introduction to Documentation as a Science
 - 3.1.1. Introduction
 - 3.1.2. The Information and Knowledge Society
 - 3.1.3. Information and Documentation
 - 3.1.4. Definition of Documentation
 - 3.1.5. The Birth of Documentation as a Science
 - 3.1.6. Documentation Centers
- 3.2. History and Characteristics of Information Documentation
 - 3.2.1. Introduction
 - 3.2.2. History of Informative Documentation
 - 3.2.3. General Characteristics of Informative Documentation
 - 3.2.4. Principles of Informative Documentation
 - 3.2.5. Functions of Informative Documentation
- 3.3. Sources and the Document
 - 3.3.1. Introduction
 - 3.3.2. Sources of Information
 - 3.3.3. The Documents
 - 3.3.4. Types of Documentary Sources

tech 28 | Educational Plan

3.4.	Documentary Analysis I					
	3.4.1.	Introduction				
	3.4.2.	The Documentary Chain				
	3.4.3.	Documentary Selection				
	3.4.4.	Documentary Analysis				
	3.4.5.	Cataloging

tech 38 | Internship

The Internship period of this program in Radio Journalism consists of an intensive stay in a prestigious radio station, lasting 3 weeks, from Monday to Friday of 8 consecutive hours, always with an assistant specialist. This internship will allow the graduate to work in a real media, alongside a team of professionals of reference in radio journalism. In this way, you will optimally apply the most innovative techniques and master the use of the most commonly used tools in audio recording and editing.

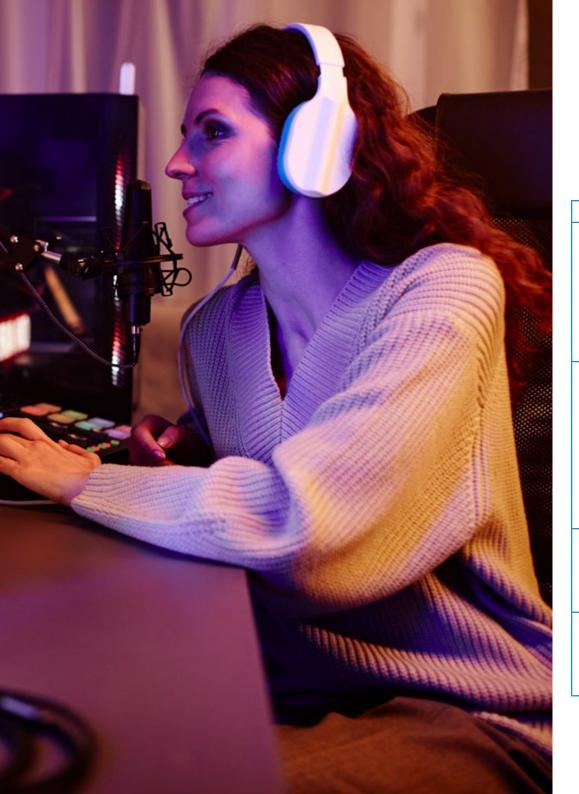

In this learning proposal, completely practical in nature, the activities are aimed at developing and perfecting the skills necessary for the development of journalistic projects for Radio, which require a high level of qualification. In fact, the internships will be oriented to the specific knowledge for the exercise of the activity in any radio media.

In this way, this program is presented as a unique opportunity to learn by working. It is a new way of understanding and integrating journalistic procedures, all in ideal teaching scenarios, for this innovative experience in the improvement of their professional skills.

The practical part will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of professors and other fellow trainees who facilitate teamwork and multidisciplinary integration as transversal competencies for the practice of Radio Journalism (learning to be and learning to relate).

The procedures described below will be the basis of the practical part of the program, and their implementation will be subject to the center's own availability and workload, the proposed activities being the following:

Module	Practical Activity
Copywriting and Voice-Over	Writing and editing scripts for radio programs
	Participate in the writing and voice-over of news for news bulletins
	Writing articles for the media's website
	Conduct interviews with various personalities
	Conduct live coverage
Production	Produce content for radio programs
	Apply radio production techniques
	Coordinate content programming
	Collaborate with other teams for the production of contents
	Participate in the creation of podcasts or special programs
	Manage the social networks and digital platforms of the radio media
Research	Gather information for news stories and features
	Monitor news and trends to update information
	Maintain contact with information sources and experts in different areas
Use of technical equipment and tools	Edit audio material for broadcast with programs such as Adobe Audition and Audacity
	Use of radio-specific technical sound equipment
	Record reports and on-location coverage

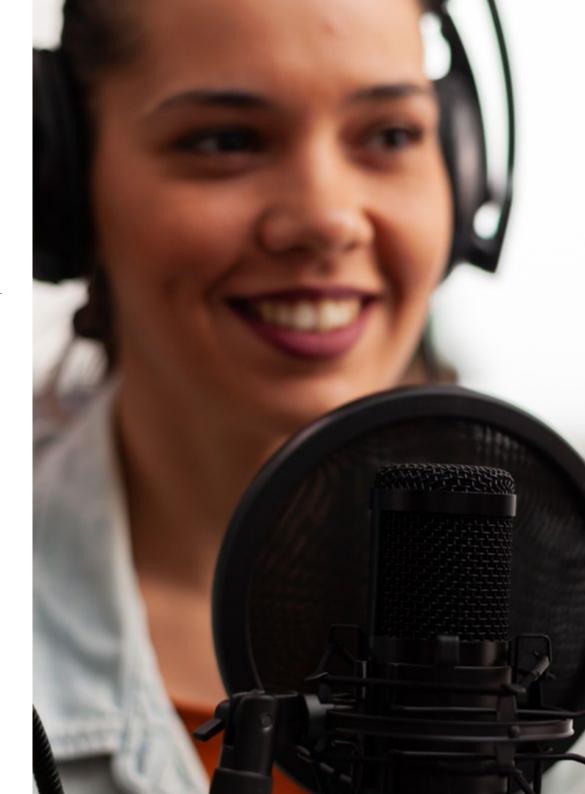

tech 40 | Internship

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventual ity that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical learning period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship agreement for the program are as follows:

- 1. TUTOR: During the Hybrid Professional Master's Degree, students will be assigned two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both practical and academic.
- 2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.
- 3. ABSENCE: If the students does not show up on the start date of the Hybrid Professional Master's Degree, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

- **4. CERTIFICATION**: Professionals who pass the Hybrid Professional Master's Degree will receive a certificate accrediting their stay at the center.
- **5. EMPLOYMENT RELATIONSHIP:** the Hybrid Professional Master's Degree shall not constitute an employment relationship of any kind.
- **6. PRIOR EDUCATION:** Some centers may require a certificate of prior education for the Hybrid Professional Master's Degree. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.
- **7. DOES NOT INCLUDE**: The Hybrid Professional Master's Degree will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

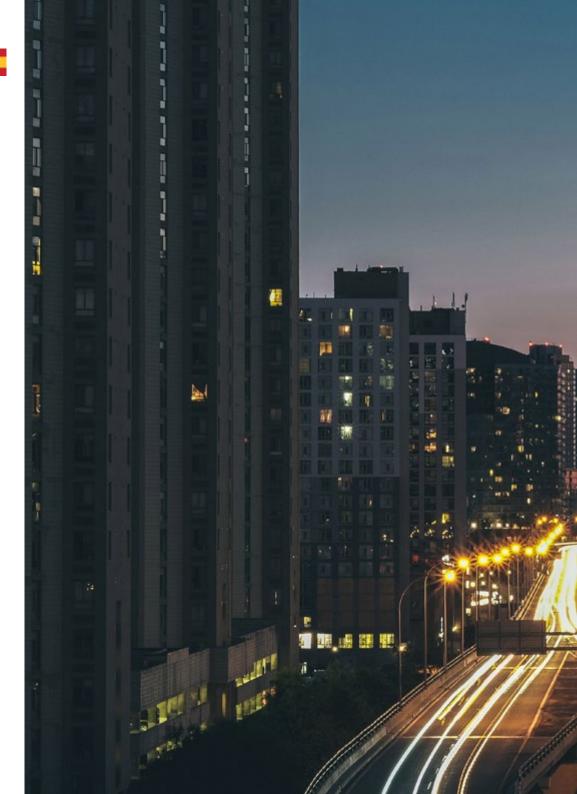

tech 44 | Where Can I Do the Internship?

The student will be able to complete the practical part of this Hybrid Professional Master's Degree at the following centers:

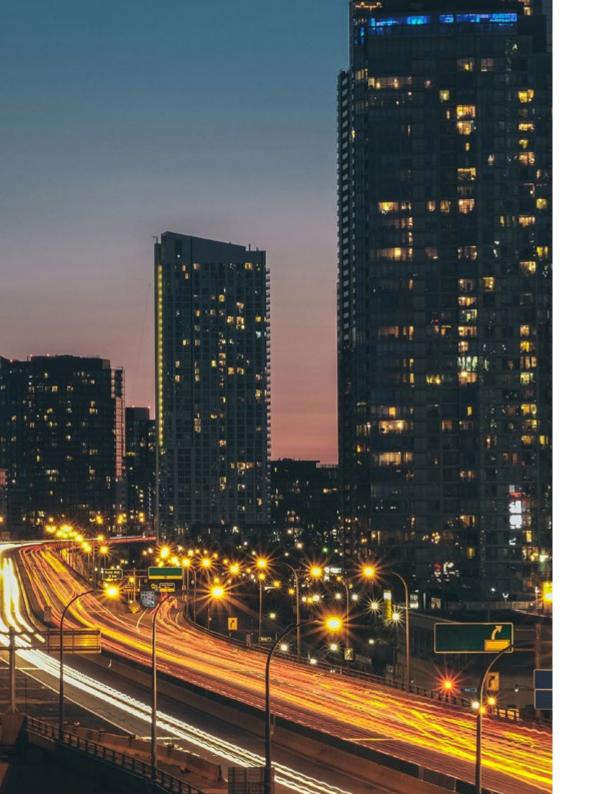

Boost your career path with holistic teaching, allowing you to advance both theoretically and practically"

tech 48 | Methodology

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career"

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

tech 50 | Methodology

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

Methodology | 51 tech

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

20%

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

4%

tech 56 | Certificate

This program will allow you to obtain your **Hybrid Professional Master's Degree diploma in Radio Journalism** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra (*official bulletin*). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: Hybrid Professional Master's Degree in Radio Journalism

Course Modality: Hybrid (Online + Clinical Internship)

Duration: 12 months

Certificate: TECH Global University

Recognition: 60 + 5 ECTS Credits

^{*}Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH Global University will make the necessary arrangements to obtain it, at an additional cost.
