Introduction

Independent and quality international journalism has become the main tool to know what is happening in different parts of the world. Thanks to the work of thousands of professionals in this area, special envoys, embedded in war contexts or peace missions, information has crossed the borders of censorship in many countries. This is a highly demanded area of the journalistic profession, but it requires a broad and exhaustive knowledge, not only of international current affairs, but also of the history, causes, and consequences of the different contexts. For this reason, TECH and its team of communication experts have developed a degree that allows graduates interested in this field to specialize intensively through a program that combines the best content presented in a convenient 100% online format, with a practical stay of 120 hours in an important media.

“

The best program in the academic market to specialize in International Journalism through a content that combines theory and practice in a comfortable and versatile 12-month academic experience"

According to the Universal Declaration of Human Rights, "everyone has the right to receive and impart information and ideas through any media", and although this aspect is included in the vast majority of the world's constitutions, the truth is that dozens of countries violate it every day. China, North Korea, Equatorial Guinea, Saudi Arabia or Vietnam are examples where freedom of the press does not exist and the censorship imposed by their governments controls and misrepresents data for their own benefit.

For this reason, the work of international journalists in different contexts, whether warlike, social, economic, political or cultural, is essential for the rest of society to know the reality of what is happening in those places, with truthful and contrasted information. However, for this, the professional must have specialized knowledge of the context, as well as the most effective communication strategies to transmit this type of information, something that can work with this multidisciplinary and balanced Hybrid Master's Degree.

It is a complete and intensive academic experience that combines theory and practice in 12 months of training. First, the graduate will have access to 1,500 hours of the best content: a syllabus designed by experts in the sector and additional high quality material presented in different formats. This will enable you to delve into aspects of the world's geopolitical, social and economic framework and international relations, as well as the main current and historical global conflicts.

At the end of this period, TECH guarantees a practical stay of 120 hours in an important company of the sector, in which the student will actively participate in the news, interviews and in-depth reports. All this, under the supervision of a team of experts, who will do everything possible so that the student can obtain the best results from this academic experience. It is, therefore, a unique opportunity to specialize in an area of journalism in constant evolution and to add to your resume a distinctive asset that will make you stand out in any recruitment process.

This **Hybrid Master's Degree in International Journalism** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ Development of more than 100 cases presented by multimedia and digital communication professionals
- ♦ The graphic, schematic and practical contents with which they are conceived, gather practical information on those disciplines that are journalistic essential for professional practice
- ♦ Work in line with current communication structures, both in online and offline media
- ♦ The acquisition of a broad and exhaustive knowledge of the different branches of international communication, their tools, their applications, and the most effective recommendations to develop successful work adapted to the demands of today's society
- ♦ All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection
- ♦ In addition, you will be able to do an internship in a large company in the communication sector

The content will be available in the Virtual Campus from the beginning of the educational activity and can be downloaded to any device with an Internet connection for later consultation"

“

You will be able to delve into the conflicts that have marked a before and after in the different international contexts through an exhaustive knowledge of their causes and consequences”

In this Hybrid Master's Degree, with a vocational nature and hybrid learning modality, the program is aimed at updating Communication professionals who require a high level of qualification. The contents are based on the latest news of the area, and oriented in an educational way to integrate theoretical knowledge into practice, and the theoretical-practical elements will facilitate knowledge update and decision-making in project management in different areas.

Thanks to the multimedia content, developed with the latest educational technology, Communication professionals will benefit from contextual learning, i.e., a simulated environment that will provide immersive learning programmed to train in real situations. This program is designed around Problem-Based Learning, whereby the physician must try to solve the different professional practice situations that arise during the course. For this purpose, the students will be assisted by an innovative interactive video system created by renowned and experienced experts.

International Guest Director

Journalist Ioan Grillo has ventured into the coverage of crime, drugs and corruption in Mexico like few other professionals in the communications sector. His investigations on violence in this country earned him the recognition of Columbia University in New York, which awarded him the **Gold Medal of the Maria Moors Cabot Awards** in 2022.

In addition to freelancing for major international media and news agencies such as the **New York Times**, **France 24**, **Times Magazine**, **CNN**, **Reuters**, **Al Jazeera**, **National Geographic**, **GlobalPost**, **The Associated Press**, **The Sunday Telegraph** and **Time Magazine**, he is the author of a trilogy of books based on drug cartels and their funding. He has also brought his stories with great success to other formats such as podcasts and television series.

Throughout his more than two decades fully dedicated to journalism, Grillo has witnessed the beginning of the **war against cartels** implemented by former Mexican President Felipe Calderón and has been involved in monitoring and reporting from the hotspots of drug violence such as the states of Sinaloa and Michoacán.

Besides drug trafficking, as a reporter he has dealt with other relevant issues in Latin America such as the **struggle between the political forces** of the left and the right in countries like Venezuela and Honduras; natural disasters, the wave of emigration to the North or the **economic crisis**. An experience that has made him a recognized figure in this branch of specialized journalism.

Internship

Graduates of this Hybrid Master's Degree are guaranteed a 120-hour practical internship in a major company in the communications sector once the theoretical training period is complete. In this way, they will be able to perfect their professional skills through active work in the day-to-day work of a newsroom and the handling of the main tools that specialists in International Journalism must master.

“

A tutor specialized in the area will ensure that you get the best and most satisfactory experience from your practical stay"

TECH has designed this modern and dynamic degree in International Journalism with the objective that communication professionals have access to an experience through which they can acquire a high degree of specialization in the international geopolitical and sociological context with active work in a large company in the sector. It will be developed over 3 weeks, from Monday to Friday with 8-hour consecutive days in which you will be accompanied at all times by an assistant specialist, who will guide you through the stay and ensure that the previously established planning is fulfilled.

The eminently practical program will allow graduates to develop their professional skills and competencies, working with the most sophisticated tools in the sector and with the most reliable sources of information for consultation on this subject. In addition, being accompanied by a team of professionals with years of experience in the area, they will be able to learn from their own strategies, implementing the most effective writing and contextualization techniques to their journalistic praxis.

It is, therefore, a great opportunity to increase your knowledge and perfect your work skills by actively participating in communication teams that are currently working on large projects. In addition, this practical period will allow the graduate to complete a minimum number of hours in a large company in the communications sector. This experience can be included in your personal resume and will serve as a badge in any personnel selection process.

The practical part will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of professors and other fellow trainees who facilitate teamwork and multidisciplinary integration as transversal competencies for the practice of journalism and communication (learning to be and learning to relate).

The procedures described below will be the basis of the practical part of the training, and their implementation will be subject to the center's own availability and workload, the proposed activities being the following:

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions for Practical Training

The general terms and conditions of the internship agreement for the program are as follows:

- 1. TUTOR:** During the Hybrid Master's Degree, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.
- 2. DURATION:** The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.
- 3. ABSENCE:** If the students does not show up on the start date of the Hybrid Master's Degree, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship.
Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Hybrid Master's Degree will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Hybrid Master's Degree shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Hybrid Master's Degree. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Hybrid Master's Degree will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career*”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

10 Certificate

The Hybrid Master's Degree in International Journalism guarantees, in addition to the most rigorous and up-to-date qualification, access to a Hybrid Master's Degree issued by TECH Global University.
