Introduction

From David Ogilvy's magnum opus "Confessions of a Copywriter" to today's age of continuous exposure to ads, advertising has come a long way. In fact, copywriting is more necessary than ever in the digital age, with millions of people consuming written content on a daily basis. At this juncture, TECH has launched this specialized program in Copywriting, aimed at professionals seeking to enhance their persuasive writing. Therefore, they will delve into the use of ChatGPT for the creation of copy, how to improve the experience of web users through texts or how to develop a career as a freelance copywriter. All this, moreover, in a 100% online way, without face-to-face classes or fixed schedules.

“

Take the step with TECH and become an exceptional Copywriter in just 12 months. Enroll now”

Advertising and persuasive copywriting, despite seeming to be a recent discipline, has existed for more than a century. An example of this is the first *copywriter* in history, John Emory Powers, who developed in this field in the 1870s. Since then, the advertising medium and formats have evolved in almost unthinkable ways, having a potential audience of millions of people around the world.

This has generated a boom in the number of professionals dedicated entirely to the writing and creation of advertising copy, but also with skills in the creation of websites, email marketing and even direct customer service. Given the transversal capacity that the modern *copywriter* must have, TECH has launched this Professional Master's Degree in Copywriting, focused on the most current content to advance decisively in this field.

The student will delve into persuasive *copywriting*, going from the most prolific *copywriting* techniques to specific areas such as the use of emotional language, *storybrand*, creation of product sheets, video scripts or metrics analysis. In addition, you will perfect the use of innovative tools such as ChatGPT, while analyzing success stories of leading companies such as Amazon, Apple, Zara or British Airways.

All of this is reinforced with a distinguished library of multimedia content, available 24 hours a day on the Virtual Campus. The entire degree is developed in a 100% online format, convenient and flexible, without requiring the student to travel or be present in person. In this way, students can distribute the course load according to their own interests, being able to combine it with the most demanding personal or professional responsibilities.

This **Professional Master's Degree in Copywriting** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ Case studies presented by experts in digital marketing and Copywriting Communications
- ♦ The graphic, schematic and practical contents of the book provide technical and practical information on those disciplines that are essential for professional practice
- ♦ Practical exercises where self-assessment can be used to improve learning
- ♦ Its special emphasis on innovative methodologies
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

Boost your copywriting productivity by incorporating advanced tools like ChatGPT into your workflow"

“

Do you know how to make your copy inclusive and diversity compliant? Specialize in UX Writer with this academic option”

The program includes in its teaching staff, professionals from the sector who pour into this program the experience of their work, in addition to recognized specialists from prestigious reference societies and universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the academic year. This will be done with the help of an innovative system of interactive videos made by renowned experts.

With no fixed class schedules or attendance, this Professional Master's Degree is perfectly compatible with your daily activities.

You will be an expert in Copywriting for Content Marketing and Social Media thanks to this 100% online program.

02

Objectives

This university degree is designed to offer students a comprehensive specialization in Copywriting, which will allow them to launch their own career as *freelancers* or bet on joining the most prestigious communication agencies in the world. Whatever the goal, TECH provides a syllabus with a theoretical and practical approach developed by an excellent team of experts in this sector. Its long experience in this field and its proximity will allow the graduate to achieve a really effective learning and solve any doubts they may have about the content of this program.

“

The situation cases with real clients will allow you to integrate the best techniques for reporting the results of a marketing campaign into your day-to-day work"

10.10.3. The Tools

10.10.4. How to Sell it to the Client

“

Get all the keys to create your own website, your email marketing campaigns and achieve positive results in return on sales"

06

Methodology

This program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization”

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career*”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then adapted in audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high-quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practicing Skills and Abilities

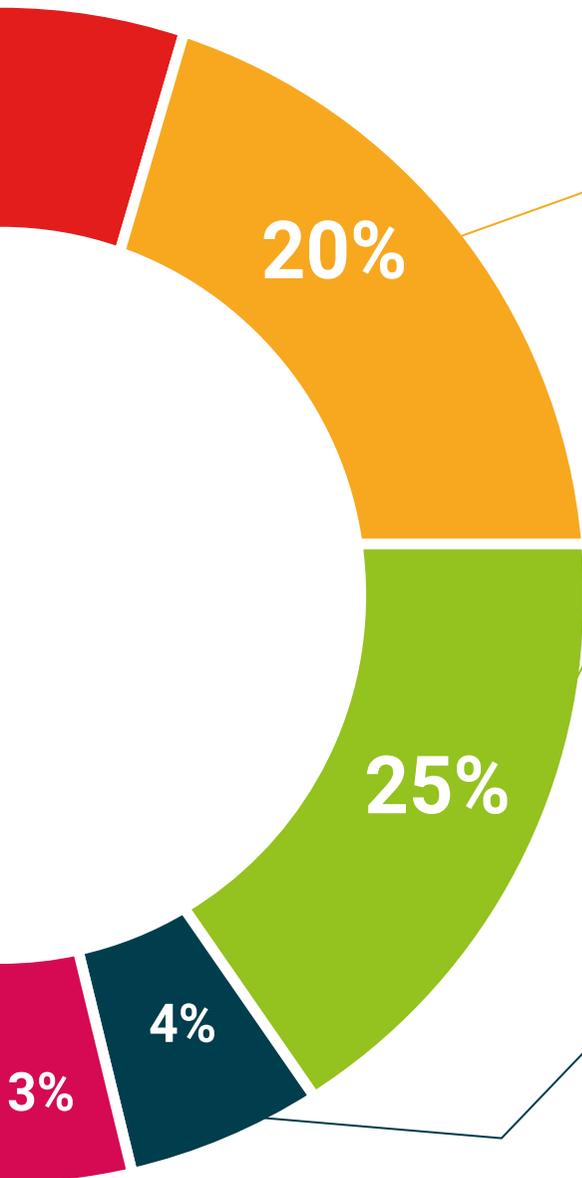

They will carry out activities to develop specific competencies and skills in each thematic field. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically assess and re-assess students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

07

Certificate

The Professional Master's Degree in Copywriting guarantees you, in addition to the most rigorous and up-to-date education, access to a Professional Master's Degree issued by TECH Global University.

“

*Successfully complete this program
and receive your university qualification
without having to travel or fill out
laborious paperwork"*

This program will allow you to obtain an **Professional Master's Degree diploma in Copywriting** endorsed by **TECH Global University**, the world's largest online university.

Tech Global University is an official European University publicly recognized by the Government of Andorra (*official bulletin*). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **Tech Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: **Professional Master's Degree in Copywriting**

Modality: **online**

Duration: **12 months**
