Introduction

In an era characterized by globalization and digitalization, branding has become a key aspect for success in all walks of life. While organizations seek to create a unique identity to stand out in the market, individuals also have the opportunity to stand out in a highly competitive society. For this, optimal tools are needed to achieve the proposed objectives. In this context, TECH has implemented an innovative program that comprehensively covers the process of creating a brand. In addition, its didactic resources, which are 100% online, allow students to complete their studies with ease, requiring only a device with Internet access.

“

Thanks to this Postgraduate Certificate you will enhance the development of a brand with the most modern digital tools"

Nowadays, we live in an interconnected society where most of the population is present both on the Internet and on social media. Consequently, personal branding has become a key element to stand out from others and demonstrate your knowledge in the areas of expertise you master. To achieve this successfully, it is necessary to have effective tools to manage and enhance your brand.

For this reason, TECH has an innovative program to guide graduates through the creation of the brand. To this end, the academic itinerary addresses a series of creative strategies to design advertising content effectively. Likewise, the syllabus defines the Brand Wheel technique to graphically summarize the essence of the brand and position itself adequately in the market.

Likewise, the syllabus defines the Brand Wheel technique to graphically summarize the essence of the brand and position itself adequately in the market. In addition, it offers a range of creative strategies used in advertising and marketing to capture the public's interest. In line with this, the entire academic itinerary provides different psychological advertising models in order to explore the creative currents of the commercial message.

On the other hand, the university degree has a 100% online methodology so that the student can complete the program with ease. You will only need a device with Internet access to deepen your knowledge in a sector that offers many job opportunities. In addition, the syllabus is supported by the innovative Relearning method: a teaching system based on repetition, which guarantees that knowledge is acquired in a natural and progressive way, without the effort of memorizing.

This **Postgraduate Certificate in Brand Creation** is the most complete and up-to-date educational program on the market. Its most outstanding features are

- ♦ Practical cases presented by experts in Brands of
- ♦ The graphic, schematic and eminently practical contents with which it is conceived provide cutting- Therapeutics and practical information on those disciplines that are essential for professional practice.
- ♦ Practical exercises where the self-assessment process can be carried out to improve learning

- 1.10. Current context of brands
 - 1.10.1. Advertising in the digital environment
 - 1.10.2. Customer experience
 - 1.10.3. Conclusions

05

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: Relearning.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the New England Journal of Medicine have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career*”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

06

Certificate

The Postgraduate Certificate in Brand Creation guarantees students, in addition to the most rigorous and up-to-date education, the access to at Postgraduate Certificate issued by TECH Technological University.

A photograph of several black graduation caps (mortarboards) against a bright blue sky with light, wispy clouds.
