01

Introduction

Writing can be considered one of the pillars of journalism, since it is necessary to master the "art of the word" to be able to successfully develop this profession in any of its aspects. The program of Spanish Language is designed to specialize journalism professionals in knowledge of the this language: and to promote mastery, techniques and the most current trends.

“

*Become an excellent journalist
and learn how to tell what is
happening in the world”*

Journalism studies are one of the most demanded in all universities, since this profession has a great influence on the population and has gained great prominence since its beginnings. Journalism encompasses different branches: social, cultural, economic, sports, international, events, conflicts, etc. This makes it necessary for professionals in this field to specialize in order to tell stories in the most appropriate way in each case.

Additionally, the transmission of information can be carried out through different media. Specifically, this program aims to specialize students in Spanish Language. To do so, it is necessary to acquire a series of skills that allow you to put into practice all that has been learned.

The syllabus covers everything related to the Spanish language: semiotics, phonetics, morphology, syntax and semantics, among other aspects. The only way to communicate in the most accurate way possible is to know a language in depth.

This program is the most complete and directed so that the professionals in the field of Journalism and Communication reach a higher level of performance, based on the fundamentals and the latest trends in Journalism. Take advantage of the opportunity and become a professional with solid foundations through this academic program and the latest educational technology 100% online.

This **Postgraduate Certificate in Spanish Language** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ Practical case studies are presented by experts in Spanish Language
- ♦ The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where the self-assessment process can be carried out to improve learning
- ♦ Special focus on innovative methodologies in the study of Spanish Language
- ♦ Algorithm-based interactive learning system for decision-making in the situations that are presented to the student
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

This program will allow you to improve your skills and become a successful journalist”

“*Work with the best teaching professionals in this Postgraduate Certificate with curricular value of excellence*”

Its teaching staff includes professionals belonging to the world of journalism, who bring to this program the experience of their work, as well as recognized specialists from prestigious reference societies and universities.

Its multimedia content, developed with the latest educational technology, will enable the professional to contextual and situated learning, i.e., a simulated environment that will provide immersive learning programmed to prepare in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise throughout the program. For this purpose, the professional will be assisted by an innovative interactive video system developed by renowned experts in the field of Spanish Language and with great experience.

Don't miss the opportunity to increase your skills in Journalism thanks to the knowledge of the Spanish Language.

Learn the latest trends in Journalism and be the best in this field.

02

 - 1.1.6. Style Guides: Definition and Function
- 1.2. Semiotics
 - 1.2.1. Introduction
 - 1.2.2. Signs
 - 1.2.3. Sign Systems: Codes
 - 1.2.4. Linguistic Semiotics
 - 1.2.5. Language, Dialect, Speech and Norms
- 1.3. Phonetics and Phonology of Spanish
 - 1.3.1. Introduction
 - 1.3.2. Phonetics and Phonology: Objective of Study
 - 1.3.3. Spanish Vowel System: The Vowels of the Spanish Language
 - 1.3.4. Spanish Consonant System: The Consonants of the Spanish Language
 - 1.3.5. Vowel and Consonant Subsystems of Spanish
 - 1.3.6. The Supra-segmental Elements: Stress and Intonation
 - 1.3.7. The Spelling Rules: Main Changes in the New Orthography of the Spanish Language of the RAE (2010)
- 1.4. The Spelling Rules: Main Changes in the New Orthography of the Spanish language of the RAE (2010)
 - 1.4.1. Introduction
 - 1.4.2. Morphology and Units of Morphological Analysis: Words, Morphemes and Lexemes
 - 1.4.3. Inflectional Morphology
 - 1.4.4. The Most Common Morphological Problems and Errors
- 1.5. Spanish Morphology: Derivational Morphology
 - 1.5.1. Introduction
 - 1.5.2. Formal Neological Mechanisms: Morphological Procedures of Word Formation in Spanish
 - 1.5.3. Doubts Related to Word Formation
 - 1.5.3.1. The Formation of the Plural in Compounds

- 1.6. Spanish Syntax: The Simple Sentence
 - 1.6.1. Introduction
 - 1.6.2. The Syntagma: Characteristics
 - 1.6.3. Types of Syntagma
 - 1.6.4. The Complements of the Verbal Nucleus: Syntactic Sentence Functions
 - 1.6.5. Other Functions of Enunciation
 - 1.6.6. Sentence Classification
 - 1.6.7. Errors of a Syntactic Nature
- 1.7. Spanish Syntax: The Compound Sentence
 - 1.7.1. Introduction
 - 1.7.2. Coordination
 - 1.7.3. Subordination
 - 1.7.4. Errors of a Syntactic Nature (Compound Sentence)
- 1.8. Semantics and Lexicology of Spanish
 - 1.8.1. Introduction
 - 1.8.2. Terminological Distinctions: Meaning
 - 1.8.3. Units of Semantic Analysis: The Componential Analysis of Meaning
 - 1.8.4. The Cognitive Paradigm: The Theory of Prototypes
 - 1.8.5. Semantic Relationships
 - 1.8.6. Semantic Change
 - 1.8.7. Lexicographic Tools: Dictionaries

 - 1.9.3. Austin and Searle: The Theory of the Act of Speech
 - 1.9.4. Grice: The Principle of Cooperation
 - 1.9.5. Sperber and Wilson: The Theory of Relevance
 - 1.9.6. Beyond Sentence Boundaries: The Utterance and the Text
- 1.10. Beyond Sentence Boundaries: The Utterance and The Text
 - 1.10.1. Introduction
 - 1.10.2. Spanish as a Network of Varieties
 - 1.10.3. Diatopic Varieties of Spanish
 - 1.10.4. Diastratic Varieties of Spanish
 - 1.10.5. Diaphasic Varieties of Spanish
 - 1.10.6. The Pan-Hispanic Standard of Spanish: Spanish as a Polycentric Language

04

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career*”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

05

Certificate

The Postgraduate Certificate in Spanish Language guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This **Postgraduate Certificate in Spanish Language** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The diploma issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees.

Title: **Postgraduate Certificate in Spanish Language**

Official N° of Hours: **150 h.**

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
