Introduction

The essence of Public Relations is to know, manage and investigate the different audiences that an organization has, through advertising campaigns in different media, to create a need and encourage them to purchase. Therefore, the profile of publicists and public relations is highly valued today, being the goal to which many graduates of journalism and communication to which this TECH program is aimed. In this way, throughout these months, the students will learn to identify the professional profiles in the area of advertising and public relations, as well as the main skills that are required in the performance of their professional practice.

“

A Postgraduate Diploma that will enable you to work in all the fields of Advertising and Public Relations with the solvency of a high-level professional”

Public Relations is a discipline which has an essential presence within organizations because it contributes to the strategic management of any organization's communication. This is a department that is becoming increasingly important, as it has been more than demonstrated that it has a significant influence on improving the income of companies.

For this reason, access to these departments by professionals with extensive qualifications in the field is indispensable nowadays. Many of the people who decide to work in this field are professionals in journalism and communications who, aware of their good command of the language, find a new career path in this field.

For this reason, TECH has gone a step further to improve the qualifications of these professionals and has designed this specific program on advertising and public relations, with which they will be able to turn their careers around. Thus, thanks to this program, students will be able to go through the basics of advertising theory with a global vision of the advertising system, its history, its protagonists, the creative process, planning and its potential social effects.

Undoubtedly, a program of high educational level that will be essential to make the final leap to the labor level and that also has the advantage of being offered in a 100% online format, which will be an added plus for students who have to combine their study with the rest of their daily obligations, whether professional or personal.

This **Postgraduate Diploma in Advertising and Public Relations** contains the most complete and up-to-date program on the market. Its most outstanding features are:

- ♦ The use of the latest technology in e-learning software
- ♦ The teaching system, intensely visual, supported by graphic and schematic contents that are easy to assimilate and understand
- ♦ Practical case studies presented by practising experts
- ♦ State-of-the-art interactive video systems
- ♦ Teaching supported by *telepractice*
- ♦ Continuous updating and recycling systems
- ♦ Self-regulated learning, which makes the program completely compatible with other commitments
- ♦ Practical exercises for self-assessment and learning verification
- ♦ Support groups and educational synergies: questions to the expert, debate and knowledge forums
- ♦ Communication with the teaching team and individual reflection work
- ♦ Content that is accessible from any fixed or portable device with an Internet connection
- ♦ Complementary resource banks that are permanently available

Thanks to this program you will be able to learn, in a practical way, how is the real work in the Advertising and Public Relations departments of companies”

“

The methodological design of this innovative program in Advertising and Public Relations will take you through different teaching approaches to allow you to learn in a dynamic and effective way”

Its teaching staff includes professionals belonging to the world of written journalism, who bring to this program the experience of their work, as well as recognized specialists from prestigious reference societies and universities.

Its multimedia content, developed with the latest educational technology, will enable the professional to contextual and situated learning, i.e. a simulated environment that will provide immersive learning programmed to prepare in real situations.

This program is designed around Problem-Based Learning, whereby the professionals must try to solve the different professional practice situations that arise throughout the program. In order to do this, the professionals will be assisted by an innovative interactive video system developed by renowned experts in the field of written journalism and with extensive experience.

Study with an active group of professionals who have compiled the latest information in this field.

Acquire the necessary qualifications to be able to access relevant positions in the field of Advertising and Public Relations.

02

Objectives

TECH's main objective is to prepare highly qualified professionals for work experience. An objective that is complemented, moreover, in a global manner, by promoting human development that lays the foundations for a better society. This objective is focused on helping professionals reach a much higher level of expertise and control. A goal that our students can achieve in only a few months with a highly intensive and accurate program.

“

If your goal is to become an Expert in Advertising and Public Relations, don't miss this high level educational program”

- 4.7. Relations with External Stakeholders
 - 4.7.1. Advertising Agency Relations
 - 4.7.2. Media Agency Relations
 - 4.7.3. End Consumer Agency Relations
- 4.8. Types of Growth Strategies
 - 4.8.1. Holdings
 - 4.8.2. Value Chain
 - 4.8.3. Challenges of Organizational Growth
- 4.9. Internal Organization Chart of an Advertising Agency
 - 4.9.1. Agency Management Model
 - 4.9.2. Accounts Department
 - 4.9.3. Creative Department
 - 4.9.4. Media Department
 - 4.9.5. Production Department
- 4.10. Team Management
 - 4.10.1. Motivation
 - 4.10.2. Change Management and Leadership
 - 4.10.3. Internal Communication

A unique, key, and decisive educational experience to boost your professional development”

04

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career*”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

05

Certificate

The Postgraduate Diploma in Advertising and Public Relations guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Diploma issued by TECH Technological University.
