Introduction

Fashion, beauty and luxury companies need to constantly adapt their communication strategies to keep up to date in an industry that is constantly changing its paradigms. In this sense, this program will teach communication and journalism professionals the right way to generate successful communication plans that boost business results in the sector. Therefore, as specialized journalists or collaborators within a press department, the professional will revalue their profile and will become a very important asset for companies in this field.

“

With this Postgraduate Diploma, you will acquire the necessary knowledge to generate successful communication plans and business strategies that enhance the results of companies in the sector"

The fashion, beauty and luxury sector is constantly fluctuating and, consequently, its correct treatment in the communicative field needs continuous updating by professionals in the sector. For this reason, this Postgraduate Diploma will provide an approach to the business strategies that can be implemented with the aim of boosting the growth of companies in the sector. Therefore, the professional will acquire the necessary skills to position themselves as a successful communication director in this field.

In the same way, they will also delve into the management of communication from a global perspective that will help the company to obtain better positioning in the sector. Likewise, this aspect will delve into crisis management for companies in the fashion, beauty and luxury sector. Therefore, the communication professional will be prepared to carry out a comprehensive management in those cases where the reputation of the company is at stake due to an event that has come to public light.

In this same sense, and understanding the importance of reputation for companies in these sectors, the Postgraduate Diploma program will also address the right way to enhance the company's online and offline image. To this end, it will teach students the different techniques that help to build a positive reputation for the public, which will increase the company's reach and improve results.

Finally, during this Postgraduate Diploma, the importance of strategic communication in the beauty and fashion sector will be discussed in depth. To this end, professionals will be taught how to design and implement a complete communication plan where the context in which the company is developing is thoroughly investigated and the relevant actions are implemented to make it successful. It should be noted that the program is 100% online, which facilitates the professional's development, allowing them to manage their time and schedule.

This **Postgraduate Certificate in Business Strategies and Communication Plan in Fashion, Beauty and Luxury** contains the most complete and up-to-date program on the market. Its most notable features are:

- ♦ Practical cases presented by experts in fashion journalism, beauty and luxury

 - 3.9.3. Integration of the Action Plan into the Strategy as a Whole
- 3.10. Evaluation of the Communication and Strategy Plan
 - 3.10.1. Main Metrics for the Evaluation of the Communication Plan
 - 3.10.2. Advanced Analysis of the Communication Plan
 - 3.10.3. Reformulation of the Communication Strategy

“ *A comprehensive program that will take you through the necessary education to compete with the best in your profession* ”

05

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career*”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning. Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

06
