Introduction

The audiovisual industry is an industry in which the passage of time has become a process of strengthening and development without brake. At the present time, the proliferation of diverse workspaces and communication in this field determine an extreme need for specific education to maintain competitiveness and get the business niche that ensures the viability of a project. This program has been developed so that the professional is fully prepared in this field, with the solvency and seriousness of the largest online educational institution in the world.

“

*A comprehensive program of the highest quality,
which will allow you to acquire the personal and
professional work tools necessary to master the
MBA in Audiovisual Business Management"*

The audiovisual industry is developing at a dizzying pace, feeding intensively on the social, economic and cultural changes of the international environment. Management in this context is the essential guideline to give real chances of success, in the practical sense of the term, to any project.

In order to be able to work in this field in a precise and solvent way, the professional will need a personal background of broad but specific knowledge in the different fields and contexts of the audiovisual sector.

This Professional Master's Degree has been developed with the clear and concrete objective of providing the necessary professional tools to be able to organize and manage the management processes of the different work fields involved. With this approach in mind, we will begin by covering the concepts of industry and culture, studying cultural journalism and the way it works.

The technical part, focused on the development of the projects, from the theoretical and practical points of view, will take the students through the journey from the idea to the staging. This approach, which will give you theoretical knowledge and the ability to apply it in practice, will be present throughout the entire education in the different subjects. In this way, everything you will learn will be converted into real working skills that will allow you to boost your capacity intensively. Therefore, you will learn the structure of the audiovisual system and the way in which the production of this type of content contemplates its financing and its valuation of investment in costs and benefits.

Another relevant aspect refers more directly to the most creative part of the sector. You will learn the basics that determine the direction of actors in fiction and the creation of narrative discourse. This data will allow you to continue advancing towards the understanding of the cultural industry and the new communication models that are currently being developed. In this sense, an in-depth knowledge of the new genres and formats that are being used in TV is a *Must*. A domain that will give you the necessary perspective to position it in your own way of creating and therefore reach your target audience.

This **MBA in Audiovisual Business Management** contains the most complete and up-to-date educational program on the market. The most important features include:

- ♦ The latest technology in online teaching software
- ♦ A highly visual teaching system, supported by graphic and schematic contents that are easy to assimilate and understand
- ♦ Practical cases presented by practising experts
- ♦ State-of-the-art interactive video systems.
- ♦ Teaching supported by telepractice
- ♦ Continuous updating and recycling systems
- ♦ Autonomous learning: full compatibility with other occupations
- ♦ Practical exercises for self-assessment and learning verification
- ♦ Support groups and educational synergies: questions to the expert, debate and knowledge forums.
- ♦ Communication with the teacher and individual reflection work
- ♦ Content that is accessible from any fixed or portable device with an Internet connection
- ♦ Supplementary documentation databases are permanently available, even after the course

A Professional Master's Degree that will take you through an intense and comprehensive educational journey"

“*A contextualized and real educational program that will allow you to put your learning into practice through new skills*”

Our teaching staff is made up of working professionals. In this way, TECH ensures that it delivers the educational update objective it is aiming for. A multidisciplinary team of qualified and experienced teachers in different environments, who will impart the theoretical knowledge in an efficient way, but, above all, will put at the service of the program the practical knowledge derived from their own experience: one of the differential qualities of this program.

This mastery of the subject is complemented by the effectiveness of the methodological design of this MBA. Developed by a multidisciplinary team of e-Learning experts, it integrates the latest advances in educational technology. In this way, you will be able to study with a range of comfortable and versatile multimedia tools that will give you the operability you need in your education.

The design of this program is based on Problem-Based Learning: an approach that views learning as a highly practical process. To achieve this remotely, TECH will use telepractice: with the help of an innovative, interactive video system, and Learning from an Expert you will be able to acquire the knowledge as if you were facing the scenario you are learning at that moment. A concept that will allow students to integrate and memorize what they have learnt in a more realistic and permanent way.

The different scenarios of the management of the audiovisual industry are developed with clarity and effectiveness to give our students a boost.

A practical and real program that will allow you to advance gradually and safely.

02 Objectives

The objectives that TECH proposes in each of the educational programs are focused on achieving a global impulse to the development of the students, not only in the academic field, in which the highest quality standards are set, but also in the personal field. To this end, a stimulating and flexible development is offered that allows you to achieve the satisfaction of completing your goals effectively.

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“*At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world*”

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career*”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.
