01
Introduction

Today's society is marked by greater recognition of gender diversity and the struggle for equal rights. This is manifested in the support of civil guarantees for the LGBTIQ+ community, women and other minority groups. Furthermore, these changes require professionals who are highly proficient in the most up-to-date policies and regulations. For this reason, TECH offers legal professionals a rigorous academic preparation through this program. Its syllabus delves into the legislation concerning this aspect to curb discrimination. In addition, to facilitate the mastery of these contents, graduates have the Relearning methodology that allows immediate incorporation of the most complex concepts to their daily practice.

> *Take your career to the next level with this 100% online specialization in Gender and Human Rights"*

Contemporary society has witnessed a significant transformation in the perception and recognition of gender identity, sexual diversity and the need to protect the fundamental rights of women and the LGBTIQ+ community. On a global scale, multiple initiatives are being added to extend the main civil guarantees to all of them, reducing structural discrimination and other types of abuses.

For this reason, the need for experts trained in the legislation that regulates these aspects is growing at a dizzying rate. In this context, TECH will provide legal professionals with a unique opportunity to update their theoretical knowledge and skills. Through a disruptive syllabus, students will delve into the different regulations that promote the international protection of women. They will also learn about the organizations that are guarantors of these agreements, such as the UN and the CEDAW Convention.

In turn, the university program will examine the conventional and updated mechanisms for the knowledge of transsexual people. It will also delve into the categories and references that allow individuals to freely express their gender identity.

Likewise, the syllabus adapts to the diversity of students' schedules and needs by offering a 100% online modality, which facilitates access to specialized knowledge without geographical restrictions. Participants can explore at their own pace and with flexibility, which is essential in a diverse and constantly changing world. In parallel, a wide range of academic materials are available, including multimedia resources such as explanatory videos, interactive summaries and infographics.

This **Postgraduate Certificate in Gender, Identity and Human Rights** contains the most complete and up-to-date program on the market. The most important features include:

- The development of practical cases presented by experts in Gender, Identity and Human Rights
- The graphic, schematic and eminently practical contents of the book provide updated and practical information on those disciplines that are essential for professional practice
- Practical exercises where the self-assessment process can be carried out to improve learning
- Its special emphasis on innovative methodologies
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

Enroll now in the world's top-rated university by its students on the Trustpilot platform".

"Do you want to advance your career? Join this Postgraduate Certificate and offer protection to the LGTBI+ community, historically unprotected"

This Postgraduate Certificate is a unique opportunity to specialize with a teaching team of the highest level.

Get updated in the legislation concerning Gender Identity with the largest digital university in the world.

The program's teaching staff includes professionals from sector who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

Its multimedia content, developed with the latest educational technology, will provide the professionals with situated and contextual learning, i.e., a simulated environment that will provide an immersive education programmed to learn in real situations.

The design of this program focuses on Problem-Based Learning, by means of which the professionals must try to solve the different professional practice situations that are presented throughout the academic course. For this purpose, the students will be assisted by an innovative interactive video system created by renowned experts.

02
Objectives

The growing demand for professionals trained in the promotion and application of legislation related to Gender Identity is undeniable. This program aims to provide the students with the essential tools to understand and advocate for justice and equality in a diverse and constantly evolving world.

The Postgraduate Certificate focuses on an exhaustive analysis of the entities in charge of guaranteeing this protection, as well as on the updating of the protocols of action.

A program specially created to propel you towards professional recognition at the international level"

General Objectives

- Examine the foundations of International Human Rights Law and the transformations it has introduced in Public International Law

- Identify the different mechanisms of guarantee of Human Rights for the protection of women and the LGTBIQ+ community

- Delve into the international and European legal framework that regulates cyberspace, with special emphasis on the protection of Human Rights

- Investigate the relationship between business activity and Human Rights

- Broaden your knowledge of International Humanitarian Law

Specific Objectives

- Analyze the historical evolution of human rights in the field of gender
- Examine the main international cases of the protection of the human rights of women and the LGTBIQ+ community

"Conquer your career goals right now. Sign up and get access to an innovative and 100% online program"

03
Course Management

This Postgraduate Certificate has been meticulously designed by an outstanding teaching team, composed of experts in the field of Gender Identity and Human Rights. Each member contributes their vast experience and knowledge, enriching the theoretical and practical training of each student. The content of the program is specially designed to address the current challenges in this field, fostering the development of critical thinking. The extensive experience and passion of this team are the maximum guarantee of the quality of the syllabus.

Become an expert in Gender Identity by the hand of great professionals with an impeccable track record in the defense of Human Rights"

Management

    1.4.3. International practice

1.5. Gender identity and expression: Equality
    1.5.1. Categories and conceptual differences
    1.5.2. Gender identity
    1.5.3. Intersexuality

1.6. Transsexuality: recognition and international protection
    1.6.1. Terms and classifications
    1.6.2. International legal framework
    1.6.3. Protection through international jurisprudence

Specialize in Gender Identity and Human Rights. Enroll and seize your opportunity to create change"

05
Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**
This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

Our program offers a revolutionary method of skills and knowledge development. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

"

At TECH, you will experience a way of learning that is shaking the foundations of traditional universities around the world"

Our university is the first in the world to combine Harvard Business School case studies with a 100% online learning system based on repetition.

The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments.

A learning method that is different and innovative.

This intensive Law program at TECH Technological University will prepare you to face all the challenges in this area, both nationally and internationally. Its main objective is to promote personal and professional growth by helping you achieve success. For this purpose, we rely on Harvard Business school case studies with which we have a strategic Convention that allows us to use the materials used in the most prestigious university in the world.

❝

We are the only online university that offers Harvard materials as teaching materials on its courses"

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the course, students will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

Our university is the first in the world to combine the Harvard University case studies method with a 100% online learning system based on repetition, combining 8 different didactic elements in each lesson.

We enhance Harvard case studies with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only university in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

01 learning from evidence

02 relearning from evidence

03 testing

04 learning from an expert

05 neurocognitive context dependent learning

06 Von-Restorff effect

07 case based learning through storytelling

08 competencies testing (retesting)

In our program learning is not a linear process, but rather, a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.
Practising Skills and Abilities

They will carry out activities to develop specific competencies and skills in each thematic area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

30%

3%

Case Studies

They will complete a selection of the best case studies in the field used at Harvard. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training tExclusive system was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

06
Certificate

The Postgraduate Certificate in Gender, Identity and Human Rights guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"

This **Postgraduate Certificate in Gender, Identity and Human Rights** contains the most complete and up-to-date educational program in the market.
