Introduction

Education is the best way to change minds and prevent criminal acts. Therefore, the areas of crime prevention must focus on social and educational intervention. If you want to receive advanced training in this field, don't hesitate and enroll in this training program with us. It's a unique study opportunity that you can't miss.

“

Train with us and discover how social and educational intervention can prevent criminal acts, creating a safer society”

At TECH, we have created this comprehensive Postgraduate Certificate in Social and Educational Intervention with the goal of helping law graduates and professionals who wish to specialize in this field acquire advanced training that will enhance their daily practice. This high-level education will enable them to position themselves among the best in their profession.

To achieve this, it is crucial to understand that education is the primary way to prevent crime, both juvenile and adult. Understanding the behavior of offenders and analyzing the sociocultural context that surrounds them is fundamental to developing appropriate criteria and theories about their conduct. This will enable more effective criminal analysis, aiding in the resolution of potential criminal cases.

Specifically, this course provides in-depth information on education, social exclusion and marginalization, inmate rehabilitation, and other everyday issues in the criminal justice field. These topics will be highly beneficial for professionals working in this area.

Moreover, its 100% online format allows students to update their knowledge in a convenient way, without the need to travel to a physical center. Each student can manage their study time independently, meaning they won't have to set aside work obligations or personal commitments in order to receive high-quality, up-to-date training suited to today's professional environment.

This **Postgraduate Certificate in Social and Educational Intervention** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ The development of practical cases presented by experts in the field
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where self-assessment can be used to improve learning
- ♦ Special emphasis on innovative methodologies in social and educational intervention
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an internet connection

We offer you a unique opportunity to specialize in social and educational intervention. A high-level training for professionals who wish to work toward controlling crime"

“

Law professionals who wish to specialize in behavior, crime, and society will find in this course the perfect opportunity to acquire high-quality knowledge”

The program includes a faculty of professionals from the field of criminology, who bring their practical work experience into this training, along with renowned specialists from leading societies and prestigious universities.

Its multimedia content, created with the latest educational technology, will provide professionals with a situated and contextualized learning environment, meaning a simulated setting that offers immersive training designed to prepare them for real-life situations.

The design of this program focuses on Problem-Based Learning (PBL), where the specialist must work to resolve the various practical work situations presented throughout the academic course. To assist in this, the professional will have access to an innovative interactive video system developed by recognized experts in social and educational intervention with extensive experience.

Don't miss the opportunity to take this course with us. It's the perfect chance to advance your career.

This course is the best investment you can make when selecting a program to update your knowledge in social and educational intervention.

02 Objectives

The Postgraduate Certificate in Social and Educational Intervention is designed to enhance the professional's ability to acquire and understand the latest developments in this field of study.

“

This training includes the best educational material, enabling a contextual study approach that will facilitate your learning”

General Objectives

- ♦ Know how to appropriately analyze criminal behavior, with a focus on social and educational intervention
- ♦ Gain multidisciplinary training that allows students to understand and apply the necessary tools to address crime and criminal behavior comprehensively

This 100% online Postgraduate Certificate allows you to balance your studies with your professional work while enhancing your knowledge in this field"

Specific Objectives

- ♦ Study social intervention programs from various approaches
- ♦ Examine the most common areas of behavior and social exclusion
- ♦ Distinguish the elements of antisocial behavior in order to use them as fundamental principles for social intervention
- ♦ Develop intervention and education programs that promote effective social reintegration and rehabilitation

This is the best option to gain an in-depth understanding of the most relevant aspects of social and educational intervention

03

Structure and Content

The structure of the content has been designed by the leading professionals in the criminology sector, with extensive experience and recognized prestige in the profession.

“

A unique opportunity to dive into the world of crime and receive advanced training in the field”

Module 1. Social and Educational Intervention

- 1.1. Education
 - 1.1.1. Concept of Social Education and Pedagogy
 - 1.1.2. Concept and Object of Intervention
 - 1.1.3. Prosocial Behavior
- 1.2. Social Exclusion, Social Deviation, and Social Marginalization
 - 1.2.1. Definition
 - 1.2.2. Methodology of Social and Educational Intervention Work
- 1.3. Most Frequent Areas of Social Exclusion and Functional Diversity
 - 1.3.1. Dependency
 - 1.3.2. Minors
 - 1.3.3. Drug Dependency
 - 1.3.4. Homeless People
 - 1.3.5. People with Mental Health Issues and Intellectual Disabilities
- 1.4. Prisoner Treatment
 - 1.4.1. Differences in the Treatment of Adult and Minor Offenders
 - 1.4.2. European Prison Rules (2006)
 - 1.4.3. The Minor Offender in the International Penitentiary Field of the United Nations Congresses on Crime Prevention and the Treatment of Offenders

- 1.5. Philosophy of Behavioral Intervention
 - 1.5.1. Behavior Modification
 - 1.5.2. Effectiveness Studies
- 1.6. Social and Educational Intervention Intervention in the Penitentiary Field
 - 1.6.1. Object
 - 1.6.2. Treatment Programs for Offenders
 - 1.6.3. Treatment Programs for Minor Offenders
- 1.7. Penitentiary Treatment
 - 1.7.1. Objective
 - 1.7.2. Treatment Evaluation
- 1.8. Legal (Penal) Mechanisms of Social Exclusion: Criminalization
- 1.9. Formal Social Control Mechanisms Leading to Exclusion
- 1.10. Restorative Justice
 - 1.10.1. Mediation and the Role of the Mediator
 - 1.10.2. Systematic Equation of Bloom's Prevention

We have the most complete and up-to-date scientific program on the market. We strive for excellence and for you to achieve it too"

04

Study Methodology

TECH is the world's first university to combine the **case study** methodology with **Relearning**, a 100% online learning system based on guided repetition.

This disruptive pedagogical strategy has been conceived to offer professionals the opportunity to update their knowledge and develop their skills in an intensive and rigorous way. A learning model that places students at the center of the educational process giving them the leading role, adapting to their needs and leaving aside more conventional methodologies.

“

TECH will prepare you to face new challenges in uncertain environments and achieve success in your career”

The student: the priority of all TECH programs

In TECH's study methodology, the student is the main protagonist.

The teaching tools of each program have been selected taking into account the demands of time, availability and academic rigor that, today, not only students demand but also the most competitive positions in the market.

With TECH's asynchronous educational model, it is students who choose the time they dedicate to study, how they decide to establish their routines, and all this from the comfort of the electronic device of their choice. The student will not have to participate in live classes, which in many cases they will not be able to attend. The learning activities will be done when it is convenient for them. They can always decide when and from where they want to study.

“

*At TECH you will NOT have live classes
(which you might not be able to attend)”*

The most comprehensive study plans at the international level

TECH is distinguished by offering the most complete academic itineraries on the university scene. This comprehensiveness is achieved through the creation of syllabi that not only cover the essential knowledge, but also the most recent innovations in each area.

By being constantly up to date, these programs allow students to keep up with market changes and acquire the skills most valued by employers. In this way, those who complete their studies at TECH receive a comprehensive education that provides them with a notable competitive advantage to further their careers.

And what's more, they will be able to do so from any device, pc, tablet or smartphone.

“*TECH's model is asynchronous, so it allows you to study with your pc, tablet or your smartphone wherever you want, whenever you want and for as long as you want*”

Case Studies and Case Method

The case method has been the learning system most used by the world's best business schools. Developed in 1912 so that law students would not only learn the law based on theoretical content, its function was also to present them with real complex situations. In this way, they could make informed decisions and value judgments about how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

With this teaching model, it is students themselves who build their professional competence through strategies such as Learning by Doing or Design Thinking, used by other renowned institutions such as Yale or Stanford.

This action-oriented method will be applied throughout the entire academic itinerary that the student undertakes with TECH. Students will be confronted with multiple real-life situations and will have to integrate knowledge, research, discuss and defend their ideas and decisions. All this with the premise of answering the question of how they would act when facing specific events of complexity in their daily work.

Relearning Methodology

At TECH, case studies are enhanced with the best 100% online teaching method: Relearning.

This method breaks with traditional teaching techniques to put the student at the center of the equation, providing the best content in different formats. In this way, it manages to review and reiterate the key concepts of each subject and learn to apply them in a real context.

In the same line, and according to multiple scientific researches, reiteration is the best way to learn. For this reason, TECH offers between 8 and 16 repetitions of each key concept within the same lesson, presented in a different way, with the objective of ensuring that the knowledge is completely consolidated during the study process.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

A 100% online Virtual Campus with the best teaching resources

In order to apply its methodology effectively, TECH focuses on providing graduates with teaching materials in different formats: texts, interactive videos, illustrations and knowledge maps, among others. All of them are designed by qualified teachers who focus their work on combining real cases with the resolution of complex situations through simulation, the study of contexts applied to each professional career and learning based on repetition, through audios, presentations, animations, images, etc.

The latest scientific evidence in the field of Neuroscience points to the importance of taking into account the place and context where the content is accessed before starting a new learning process. Being able to adjust these variables in a personalized way helps people to remember and store knowledge in the hippocampus to retain it in the long term. This is a model called Neurocognitive context-dependent e-learning that is consciously applied in this university qualification.

In order to facilitate tutor-student contact as much as possible, you will have a wide range of communication possibilities, both in real time and delayed (internal messaging, telephone answering service, email contact with the technical secretary, chat and videoconferences).

Likewise, this very complete Virtual Campus will allow TECH students to organize their study schedules according to their personal availability or work obligations. In this way, they will have global control of the academic content and teaching tools, based on their fast-paced professional update.

The online study mode of this program will allow you to organize your time and learning pace, adapting it to your schedule”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that assess real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

The university methodology top-rated by its students

The results of this innovative teaching model can be seen in the overall satisfaction levels of TECH graduates.

The students' assessment of the teaching quality, the quality of the materials, the structure of the program and its objectives is excellent. Not surprisingly, the institution became the top-rated university by its students according to the global score index, obtaining a 4.9 out of 5.

Access the study contents from any device with an Internet connection (computer, tablet, smartphone) thanks to the fact that TECH is at the forefront of technology and teaching.

You will be able to learn with the advantages that come with having access to simulated learning environments and the learning by observation approach, that is, Learning from an expert.

As such, the best educational materials, thoroughly prepared, will be available in this program:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Practicing Skills and Abilities

You will carry out activities to develop specific competencies and skills in each thematic field. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop within the framework of the globalization we live in.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides... In our virtual library you will have access to everything you need to complete your education.

05 Certificate

This Postgraduate Certificate in Social and Educational Intervention guarantees students, in addition to the most rigorous and up-to-date education, access to a diploma for the Postgraduate Certificate issued by TECH Global University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This private qualification will allow you to obtain a **Postgraduate Certificate in Social and Educational Intervention** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** private qualification is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

TECH is a member of the National Criminal Justice Association (NCJA), which promotes the development of diverse justice systems internationally. The NCJA provides its members with multiple opportunities for growth through forums and top-notch documentation issued by professionals of the highest standards, directly benefitting students by providing access to exclusive research material and resources.
