01 Introduction

Physicians who wish to reach a managerial level in a clinical or healthcare center must have an updated profile and be at the forefront of the new administrative and technological methods that exist. herefore TECH, in its efforts to create useful training for the improvement of processes and development of society, has designed this eminently practical Internship Program MBA in Clinical Management, Medical and Healthcare Administration, where in 3 weeks of on-site internship in a clinical center of reference will have the technical and human team necessary to catch up on developments in the field and put them into practice efficiently. They will delve directly into all the processes related to the planning and control of healthcare organizations, clinical management processes and protocols, people and talent management, among many other essential aspects for good medical management.

“

With TECH, you will enjoy a highly practical and advanced study method, guided by renowned specialists who will accompany you throughout the process”

In the healthcare structure, the medical division is crucial for the development of clinical and care management. More and more professionals wish to approach healthcare in a sustainable and modern way, making it essential to update clinical management methods. In this regard, TECH, at the forefront of education, has created this practical Internship Program where, on-site, the professional will address all aspects related to organizational division, task planning, and management in a healthcare facility. They will work on real cases with the guidance of specialists who will accompany them.

Currently, there are many challenges faced by both public and private healthcare centers in managing technical and human resources: from relationships between professional groups, the public, and suppliers while maintaining a productive organizational climate, to the development of new health technologies, the need to increase service efficiency, and assuming team leadership. Therefore, to reach positions of responsibility in care management, whether in middle management or medical-care management positions, this MBA Internship Program will update the professional's curriculum profile.

In this way, over the course of 3 weeks, the student will observe in a real-world setting the organizational dynamics and various processes addressed in Clinical Management, Medical and Healthcare Administration, preparing them to manage change, decision-making, and resource management in an advanced way. The student will develop efficient daily practice, implementing new methods they will learn from professionals who will guide them during the 120 hours of on-site training.

From a modern environment, they will experience, Monday through Friday during the 8 hours of daily practice, the functioning of a clinical facility, gaining new competencies and communication and leadership skills, taking their talent to the next level, as well as enhancing their human and empathetic qualities. Additionally, they will receive guidance and support from an assistant tutor who will accompany them in achieving their objectives.

02

Why Study an Internship Program?

This MBA Practical Training contains everything needed to acquire the skills and abilities that a modern manager requires. TECH, considering the ongoing professional development needs of those who face new challenges daily, has designed this program with a multidisciplinary team that will guide you in Clinical Management, Medical and Healthcare Administration. This innovative learning method offers today's professionals the opportunity to choose a cutting-edge healthcare facility, equipped with all the necessary tools to provide advanced healthcare services. For 3 intensive weeks, you will integrate into a multidisciplinary team, where you will witness firsthand how clinical management protocols are implemented in general. A unique academic opportunity that only TECH offers, with no limits or boundaries, and with the quality needed to build a solid professional foundation.

Revolutionize your world with this MBA Internship Program, which opens up a wide range of possibilities for your professional development”

1. Updating from the latest technology available

Propose innovative solutions to establish a cutting-edge professional medical assistance service. This will be possible after completing this Internship Program. You will stay up-to-date with technological advancements and the most specific protocols for proper Clinical Management, Medical and Healthcare Administration. Currently, healthcare centers face various challenges, with digital transformation being one of the most important. In this regard, this program will facilitate the advancement of the professional leading the management efforts, allowing them to achieve the best possible results.

2. Gaining in-depth knowledge from the experience of top specialists

TECH collaborates with an unprecedented team of professionals, specialists in each study area, who have an extensive record of successful cases, guaranteeing the professional preparation. The student will always have the guidance of an assigned tutor, who will assist them with any doubts that may arise within the clinical setting, ensuring the training process flows smoothly and satisfactorily.

3. Entering first-class clinical environments

For the Internship Programs, TECH selects the best healthcare centers. We partner with cutting-edge teams so that students can obtain the greatest possible learning experience. Thanks to the modern, dynamic, and specialized setting of the clinical center where the practical phase will take place, the student will acquire the experience required to elevate their level of professionalism.

4. Putting the acquired knowledge into daily practice from the very first moment

Thanks to the study methodology offered by TECH, the professional can immediately apply improvements to their daily practice. In this program, you will enjoy an on-site stay from Monday to Friday, with 8-hour intensive sessions for 3 consecutive weeks, which will prepare your professional profile to face the most significant challenges of your career.

5. Expanding the boundaries of knowledge

TECH offers all professionals around the world the opportunity to complete this Internship Program to elevate their level of professionalism. To achieve this, we select reference centers that will provide the professional with an unprecedented experience. In this way, the specialist will be able to expand their horizons and stay up to date with the best professionals, related to the healthcare sector, and with various perspectives. A unique opportunity that only TECH could offer.

*You will have full practical immersion
at the center of your choice”*

03 Objectives

The goal of this Internship Program MBA in Clinical Management, Medical and Healthcare Administration is to enable the professional to update the procedures for managing health processes in an exclusively practical manner, through a hospital placement designed with clinical and academic rigor. Alongside recognized professionals in a clinical center of the highest scientific quality and technological innovation. In this Internship Program, the professional will address the main interventions of the medical director, which will allow them to refine and enhance their competencies in medical care within the center and for its patients.

General Objectives

- ♦ Master the theories and models regarding the organization and functioning of healthcare systems, focusing on their political, social, legal, economic foundations, and organizational structure
- ♦ Master the methodological and practical tools to apply in the critical areas of healthcare management and direction, both institutional and day-to-day operations
- ♦ Approach Clinical Management from the perspectives of effectiveness, efficiency, efficacy, equity, performance, profitability, and the resolution of problems through the proper use of information systems

Specific Objectives

- ♦ Improve knowledge and professional skills in health management from the viewpoint of clinical management, knowing the practical methodological tools to apply in the critical areas of health management and direction, both institutional and day-to-day
- ♦ Master the principles of clinical management that allow for planning, organization, management and evaluation of a center, service or care unit
- ♦ Improve problem-solving and decision-making in daily clinical and care management
- ♦ Describe, compare and interpret characteristics and performance data of different health models and systems
- ♦ Contextualize the medical and care division within the interdisciplinary team and understand the new challenges facing the healthcare sector
- ♦ Understand, interpret, transmit and apply regulatory norms for the activities and functions of health professionals in Clinical Management, in accordance with the legal framework of the health sector
- ♦ Recognize and know how to apply and interpret health law in order to contextualize clinical practice in terms of professional and social responsibility, as well as the ethical aspects associated with health care
- ♦ Conduct an economic analysis of the functioning of healthcare institutions and the economic behavior of the agents involved in healthcare systems
- ♦ Recognize, apply, and evaluate the usefulness of different management and leadership tools that can be applied to the context of clinical practice
- ♦ Lead quality and patient safety systems, applied to the context of clinical management units
- ♦ Develop methodological and instrumental skills in epidemiological research and the evaluation of centers, services, technologies and health programs
- ♦ Design proposals for improvement, innovation, and transformation in units, services, and centers
- ♦ Integrate leadership skills into the daily processes of healthcare management
- ♦ Manage scientific databases for carrying out reviews and bibliographic searches of scientific studies

This Internship Program MBA in Clinical Management, Medical and Healthcare Administration will prepare you for a leadership position as a department or section head in a nationally or internationally recognized hospital"

04

Educational Plan

The Internship Program MBA of this program consists of a practical placement at a prestigious institution, lasting 3 weeks, from Monday to Friday with 8 consecutive hours of hands-on training alongside an attending specialist. This placement will allow you to learn the latest management methods and train in the area of medical direction and service management, applying the latest trends in healthcare administration and planning the healthcare processes developed within healthcare institutions.

In this completely practical Internship Program, the activities are aimed at developing and perfecting the skills necessary to provide healthcare in areas and conditions that require highly qualified professionals, and are oriented towards specific expertise for practicing the activity, in a safe environment for the patient and with highly professional performance.

It is undoubtedly an opportunity to learn by working in the innovative hospital of the future where real-time health monitoring of patients is at the center of the digital culture of its professionals. This is a new way of understanding and integrating healthcare processes, and it turns the hospital into the ideal educational setting for this innovative experience in the enhancement of 21st-century professional medical competencies.

The practical teaching will be done with the accompaniment and guidance of professors and other fellow trainees that facilitate teamwork and multidisciplinary integration as transversal competencies for medical praxis (learning to be and learning to relate).

The procedures described below will be the basis of the specialization, and their realization will be subject to the center's own availability, its usual activity and workload, the proposed activities being the following:

Module	Practical Activity
Strategies in Clinical Management and Medical Administration	Manage advanced information systems to facilitate the proper management of the electronic medical record
	Utilize knowledge management and communication tools in Clinical and Healthcare Administration
	Analyze quality, efficiency, safety, and hospital harmony standards to identify potential areas for improvement
	Cooperate with the executive team in decision-making and general coordination
Clinical Management	Integrate into the leadership of new Clinical Management models, such as interhospital units
	Manage pharmacological prescription systems, both electronic and for complementary tests
	Evaluate the performance and functioning of various hospital services
	Participate in designing preventive measures and emergency action plans in the event of a hospital emergency
	Prepare reports summarizing key clinical activity data
Personnel, Talent, and Communication	Refine communication and leadership skills in multidisciplinary and complex clinical teams
	Enhance the management and coordination of different hospital workgroups
	Participate in the planning of work for the various hospital units and services
	Promote talent and quality through incentive programs and performance evaluation
	Study the accounting, logistics, and financial management of the healthcare center
Leadership in Clinical Management	Practice executive coaching specific to the clinical environment
	Manage meetings to maximize their effectiveness
	Mediate potential conflicts
	Engage with various hospital committees
	Be involved in the centralized decision-making process, making decisions both individually and as a group

05

Where Can I Do the Internship Program?

To ensure that the update process is as effective as possible, TECH proposes completing this on-site training at a prestigious institution that can provide the physician with the latest advancements in the field of high-level medical management. This is a very complex and broad field, requiring continuous updates from the specialist, and the role of the proposed hospital institutions is vital in this process, as they will provide the most advanced knowledge in the specialty.

“

You will acquire the most advanced knowledge in the field of high-level medical management”

General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the Internship Program period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship agreement for the program are as follows:

1. TUTOR: During the Internship Program, students will be assigned two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the student does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. 3.- DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07 Certificate

This private qualification will allow you to obtain a diploma for the **Internship Program MBA in Clinical Management, Medical and Healthcare Administration** endorsed by TECH Global University, the world's largest online university.

TECH Global University, is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** private qualification, is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
