01 Introduction

Thanks to scientific advances in recent years, the survival of patients with digestive tumors has improved, especially in the case of colon tumors in the field of immunotherapy. Early detection, more efficient surgery and more precise treatment have enabled this progress. For example, in the screening of hepatocellular carcinoma generally associated with liver cirrhosis, protocols have been refined to make them more effective. Because of all these advances, it is essential that the specialist is trained and up to date with the methods, techniques and tools to diagnose and treat the patient effectively. TECH, at the forefront of higher education, has created this 100% practical program precisely in order to meet this need, where, in an intensive face-to-face stay, the professional will be able, for 3 weeks, to implement all their knowledge and skills in terms of Digestive Oncology. Always under the guidance of a team of experts and the accompaniment of an assigned tutor.

TECH offers you a series of prestigious hospitals where you can take this Internship Program in Digestive Oncology for 3 weeks"

Cancer is the leading cause of death worldwide. In 2020, 916,000 deaths out of 1.93 million detected cases were attributed to colorectal cancer and 830,000 deaths were attributed to liver cancer. These are alarming figures that should make the population even more aware of the preventive issue and maintain periodic health check-ups, in order to verify in time any anomaly that may arise and to be able to deal with it satisfactorily, thanks to the constant advances in medicine.

The continuous sophistication of imaging methods, advances in some surgical techniques, a greater hierarchy of certain pathological findings, the inclusion of molecular biology in clinical practice or the incorporation of personalized medicine make care processes of greater quality, precision and therefore more sensitive in its execution. For this reason, it is essential for physicians to constantly update their knowledge and skills with practical programs such as this one.

Through this 100% practical program, the specialist will be able to put in value all the knowledge regarding Digestive Oncology, with real cases in a specialized center to attend patients both in the diagnostic stage and in treatment. You will be updated on changes in many therapeutic approaches, new ways of administering radiotherapy, the incorporation of immunotherapy and new combined modalities.

On the other hand, you will be able to deal with complex cases where the care of patients with digestive tumors is a much more thorough activity. Thanks to the possibility of sharing this experience with medical experts in the area for 3 weeks and in a center with the appropriate equipment. The professional will be able to respond in an effective and advanced manner according to the evolution of science and technology in his or her field.

02

Why Study an Internship Program?

Increasing the quality and improvement of medical procedures in accordance with current technological and scientific advances is the goal of every health professional. Through this Internship Program, the professional will be able to achieve it, since it contemplates all the advances in Digestive Oncology and how to apply them in an effective way. Thus, during 3 weeks you will be able to share with a team of specialists in the area and verify the medical practice in a real and avant-garde scenario. A study method based on the latest scientific evidence to perfect your work methodology. An exclusive academic opportunity only possible with TECH, which has established agreements with the best hospitals in the country and internationally, allowing you to choose the one that best suits your interests.

With this Internship Program you will get up to date with the latest advances in Digestive Oncology"

1. Updating from the latest technology available

Colon cancer screening by fecal occult blood test or colonoscopy, hepatocellular carcinoma screening or the combination of Atezolizumab and Bevacizumab in liver cancer immunotherapy are some of the advances in Digestive Oncology that the specialist must master. For this reason, TECH with this Internship Program brings the health professional closer to the most updated work methodology in the area to apply it in a prestigious hospital center.

2. Gaining In-Depth Knowledge from the Experience of Top Specialists

Thanks to the accompaniment of a tutor appointed by TECH for the specialist to advance in his Internship Program and the team of experts that make up the chosen hospital center, an unprecedented seal of guarantee of updating is provided. The working method will allow you to see real patients in a state-of-the-art environment, incorporating the most effective procedures and approaches in Digestive Oncology into your daily practice.

3. Entering First-Class Clinical Environments

TECH exhaustively selects all available centers for Internship Programs. Thanks to this, the specialist will have guaranteed access to a prestigious clinical environment in the area of Digestive Oncology. This will allow you to keep up to date with the methods, techniques and scientific advances in Digestive Oncology.

4. Putting the acquired knowledge into daily practice from the very first moment

The intention of this 100% practical program is that the specialist can immediately put into practice all his knowledge of Digestive Oncology. To this end, he has developed an exclusive work model that will allow him to work the 120 hours of intensive working hours from Monday to Friday in a comfortable way and with the maximum use of resources and time.

5. Expanding the Boundaries of Knowledge

Thanks to globalization and the use of new educational models, TECH has surpassed the frontiers of education. Now with this 100% practical program, it opens the doors of the best specialized centers in different parts of the world, so that its students can get up to date with the best professionals and the best equipment.

*You will have full practical immersion
at the center of your choice"*

03

Objectives

The general objective of the Internship Program in Digestive Oncology is to ensure that the professional updates the diagnostic and therapeutic procedures of the specialty in an exclusively practical way, through a hospital stay designed with clinical and academic rigor, under the guidance of renowned professionals in a hospital center of the highest scientific quality and technological innovation. In this Internship Program the professional will address the main interventions of the specialist, which will allow him to improve and enhance his skills in the medical care of patients with digestive oncologic pathology.

General Objectives

- Update on therapeutic methodology regarding immunotherapy for gastric cancer, combinations in clinical development, strategies for dose selection and trial design, clinical pharmacology and regulatory considerations
- Master the latest techniques, modern scientific postulates and application of state-of-the-art technologies in Digestive Oncology
- Incorporate the most effective methods, approaches and clinical analyses into daily work, backed by a team of prestigious experts in the field of Digestive Oncology

Specific Objectives

- Apply knowledge of immunotherapy in clinical practice, as an example of clear scientific progress in translational research, and one of the most promising lines of research in cancer treatment
- Apply the therapeutic algorithm for the management of each esophageal and gastric tumor at different stages
- Review the performance and usefulness of each of the tests used in the diagnosis of oesophageal and gastric tumours
- Evaluate in practice the usefulness and performance of PET/CT with F18-FDG in the diagnosis, staging, treatment control and follow-up in esophageal tumors
- Apply the evolution of surgical techniques up to minimally invasive and robotic surgery that allow complex interventions with small incisions, preserving as much tissue as possible and with an accelerated recovery with less discomfort
- Work with the National Registry of Advanced Gastric Cancer (AGAMENON)
- Determine the positioning of antiangiogenic agents to treat stomach cancer
- Discuss the effectiveness of different tests proposed for colon and rectal cancer screening
- Apply knowledge of adjuvant and neoadjuvant treatment of colon and rectal cancer
- Apply advances in personalized management of colon cancer based on the growing understanding of molecular biology
- Discuss the recent incorporation of immunotherapy in the management of colon and rectal cancer, which will change the diagnostic and therapeutic approach
- Evaluate the various therapeutic options available for low incidence digestive tumors such as appendiceal tumors, peritoneal carcinomatosis, anal cancer, gastrointestinal stromal tumors, digestive neuroendocrine tumors and intestinal lymphomas
- Use the latest imaging tests for the diagnosis and staging of pancreatic cancer
- Provide an update on the treatment of pancreatic, biliary tract and advanced hepatocarcinoma cancer
- Learn the new therapeutic arsenal for the management of the main comorbidities of patients with digestive tumors and to know the therapeutic objectives in order to avoid poor control, therapeutic interactions or overtreatment
- Use the different online platforms available that can help us to follow up patients and create a professional network
- Apply the virtues of the collaborative world that will help us create a network and improve clinical management

With this Internship Program you will acquire the knowledge and skills necessary for the correct treatment of patients with special nutritional needs"

04

Educational Plan

The Internship Program consists of a practical stay in a hospital of great recognition and prestige in the care of oncology patients, for 3 weeks in 8-hour days from Monday to Friday. You will be next to an adjunct specialist who will act as a tutor and you will be able to see real patients alongside a team of reference professionals in the area of Digestive Oncology, applying the most innovative diagnostic procedures and planning the latest generation of therapy for each pathology.

In this completely practical Internship Program, the activities are aimed at developing and perfecting the skills necessary to provide healthcare care in areas and conditions that require highly qualified professionals, and are oriented towards specific expertise for practicing the activity, in a safe environment for the patient and with highly professional performance.

It is undoubtedly an opportunity to learn by working in the innovative hospital of the future where real-time health monitoring of patients is at the heart of the digital culture of its professionals. This is a new way of understanding and integrating health processes, and makes this program an ideal teaching scenario to carry out this innovative experience in the improvement of professional medical competencies for the 21st century.

The practical teaching will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of teachers and other fellow trainees to facilitate teamwork and multidisciplinary integration as transversal competencies for the practice of clinical medicine (learning to be and learning to relate).

The procedures described below will form the basis of the practical part of the training, and their completion is subject to both the suitability of the patients and the availability of the center and its workload, with the proposed activities being as follows:

Receive specialized education in an institution that can offer you all these possibilities, with an innovative academic program and a human team that will help you develop your full potential"

Module	Practical Activity
Care for tumors of the upper and lower gastrointestinal tract	Apply videoendoscopic therapy of upper and lower gastrointestinal cancers such as polyps and advanced lesions.
	Perform conventional surgical approach with latest techniques for upper and lower gastrointestinal cancer.
	Perform endoscopic ultrasonography (EUS) and Magnetic Resonance Imaging in the staging of Rectal Cancer.
	Participate in minimally invasive and robotic surgery of upper digestive cancer.
	Participate in Laparoscopic Surgery vs. Surgery in Colon Cancer
Molecular Biology and Translational Oncology	Applying Next Generation Sequence (NGS) in clinical practice.
	Extract samples for immunohistochemical liquid biopsies.
	Use of tumor markers
	Perform histological diagnosis of digestive cancer
Pancreatic Cancer, Biliary Tract Tumors and Hepatocarcinoma	Use of endoscopic retrograde cholangiopancreatography (ERCP) in patients with pancreatic masses and bile duct obstruction.
	Use of endoscopic ultrasonography (EUS) in patients with pancreatic cancer or pancreatic masses.
	Perform endosonographic cholangiopancreatography (CEPEUS) on pancreatic masses.
	Perform distal pancreatectomy by laparoscopy.
	Perform cephalic Duodenopancreatectomy with pylorus preservation vs. Whipple in pancreatic cancer
	Perform drainage of malignant biliary obstruction by interventional radiology.
From clinical management to networking	Debate on enhanced recovery programs in colon surgery
	Update the use of technological platforms for patient follow-up and control.
	Review the advantages of the collaborative online world
	Employing decision support systems in oncology based on artificial intelligence.

05

Where Can I Do the Internship Program?

In order to offer an updated Internship Program based on the latest scientific evidence, TECH has selected several reference hospitals equipped with everything necessary to be updated in diagnostic and surgical techniques in Digestive Oncology.

Take your Internship Program in a prestigious clinical center and start working immediately with the best professionals in the sector"

The student will be able to do this program at the following centers:

Medicine.

Hospital HM Modelo

Country City
Spain La Coruña

Address: Rúa Virrey Osorio, 30, 15011,
A Coruña

Network of private clinics, hospitals and specialized centers
distributed throughout Spain.

Related internship programs:

- Anaesthesiology and Resuscitation
- Palliative Care

Medicine.

Hospital Maternidad HM Belén

Country City
Spain La Coruña

Address: R. Filantropía, 3, 15011, A Coruña

Network of private clinics, hospitals and specialized centers
distributed throughout Spain.

Related internship programs:

- Update in Assisted Reproduction
- Hospitals and Health Services Management

Medicine.

Hospital HM Rosaleda

Country City
Spain La Coruña

Address: Rúa de Santiago León de Caracas,
1, 15701, Santiago de Compostela, A Coruña

Network of private clinics, hospitals and specialized centers
distributed throughout Spain.

Related internship programs:

- Hair Transplantation
- Orthodontics and Dentofacial Orthopedics

Medicine.

Hospital HM La Esperanza

Country City
Spain La Coruña

Address: Av. das Burgas, 2, 15705, Santiago
de Compostela, A Coruña

Network of private clinics, hospitals and specialized centers
distributed throughout Spain.

Related internship programs:

- Oncology Nursing
- Clinical Ophthalmology

Medicine.

General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this educational entity undertakes to take out civil liability insurance to cover any eventuality that may arise during the stay at the internship center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship agreement for the program are as follows:

1. TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR STUDIES Some centers may require a certificate of previous studies for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07 Certificate

This **Internship Program in Digestive Oncology** contains the most comprehensive and up-to-date program in the professional and academic landscape.

After the student has passed the assessments, they will receive their corresponding Internship Program Certificate issued by TECH Technological University via tracked delivery*.

The certificate issued by TECH will state the score obtained in the test.in the test.

Program: **Internship Program in Digestive Oncology**

Duration: **3 weeks**

Attendance: **Monday to Friday, shifts of 8 consecutive hours.**
