01 Introduction

Healthcare has been undergoing a transformation in recent years. The great benefits that digital transformation has brought, as well as scientific research, have made it possible to raise satisfactory proposals for specialized services in specialties such as Gynecologic Oncology, especially from the private sector. Cervical cancer, endometrial cancer, ovarian cancer and, less frequently, vaginal and vulvar cancer are some of the pathologies that, through adequate controls and new treatments, manage to reduce their mortality rate. It is essential for all physicians in the area to keep their knowledge up to date, not only in terms of theories, but also in the use of the appropriate equipment and new procedural techniques. For this reason, TECH has developed this eminently practical program for on-site preparation. Thanks to the agreements established with the best clinical centers specialized in the area, you will enjoy an intensive 120-hour face-to-face session with the most experienced specialists.

“

You will live a unique professional experience with a multidisciplinary team of specialists in Gynecologic Oncology in a prestigious center”

Both Gynecology and Oncology are facing increasingly complex challenges associated with the development of diagnostic and therapeutic techniques, as well as technological and informatics innovations. These new developments force the specialist to constantly update his knowledge, to study the available evidence and to develop new competencies, which allow him to keep up with the technological and social changes to improve the health of patients.

The social and emotional burden that gynecological cancer has on today's society means that scientific and professional interest in this discipline is on the rise. But advances in surgery and gynecologic oncology make it essential for specialists to maintain constant training in order to continue providing quality care. This program offers the opportunity to update knowledge and skills in a practical and effective way.

TECH presents this Internship Program that will allow you to develop, with a real patient and in a hospital setting with state-of-the-art resources, the maximum potential and growth in the area of gynecologic oncology. You will approach patients with oncological pathology by the hand of the best specialists, using the latest techniques based on scientific evidence, and achieving results previously difficult to achieve.

Thus, for 3 weeks the graduate will be part of a team of specialists of the highest level, with whom they will work actively in the management of the different patients who come to their respective offices during this period. In this way, you will be able to update yourself, not only on the most effective medical strategies, but you will also be able to implement the most assertive and approachable communication skills to deliver both good and bad news. In this way, you will not only participate in a program that will elevate your clinical talent to the highest level, but also increase your human and empathic quality.

02

Why Study an Internship Program?

Women are increasingly aware of the need for recurrent health checks to screen for any type of cancer or malformation in their reproductive system. Constant advances in medicine, supported by communication technologies, have allowed this awareness to expand. Therefore, physicians must be prepared to take on the new challenges of this process and the new health care behavior of users. In this program the student will be able to specialize in all the analysis techniques, diagnostics, tests and treatments for the different types of pathologies in Gynecologic Oncology and thus provide the best possible service to their patients. From a reference hospital center chosen exhaustively by TECH to provide this practical training, the specialist will be able to share a space of discernment with other experts and verify in the front row all the latest aspects on the subject of study.

Only with TECH will you be able to live this type of practical academic experience for your professional development in Gynecologic Oncology”

- 1. TUTOR:** During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.
- 2. DURATION:** The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.
- 3. ABSENCE:** If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

You will have full practical immersion at the center of your choice"

03

Objectives

The general objective of the Internship Program in Gynecologic Oncology is to ensure that the professional updates the diagnostic and therapeutic procedures of the specialty in an exclusively practical way, through a hospital stay designed with clinical and academic rigor, under the guidance of renowned professionals in a hospital center of the highest scientific quality and technological innovation.

General Objectives

- Master the procedures and techniques performed in Gynecologic Oncology, incorporating the latest advances in the discipline to increase the quality of their daily medical practice.
- Incorporate the most effective methods, approaches and clinical analyses into daily work, backed by a team of prestigious experts in the field of Gynecologic Oncology.
- Delve into the different pathologies that occur in the clinical setting. of Gynecologic Oncology

Specific Objectives

- Identify the basis for the use of chemotherapeutics in gynecologic oncology, as well as their adverse effects and complications
- Participate in the evaluation of cancer patients in Gynecologic Oncology to apply the most appropriate treatments in each case
- Correct application of early diagnosis methods together with the multidisciplinary team
- Verify patients at risk for gynecologic cancer and participate in accurate preoperative diagnosis
- Apply the most appropriate surgical or chemotherapy treatment for each case of cancer
- Assess the most appropriate management for each case of the disease
- Participate in surgical procedures in Gynecologic Oncology together with the team of specialists
- Determine the different fertility preservation techniques in young patients and their oncological implications
- Identify the different types of less common genital tumors and the corresponding treatment and evolution
- Apply the basics of palliative and end-of-life care in oncologic disease
- Addressing the evolution of knowledge in cancer genetics
- To establish epigenetic changes and oncogenes related to genital tract tumor pathology
- Identify the action mechanisms of antineoplastic agents
- Recognize and interpret the different imaging tests, markers and molecular tests necessary for the diagnosis and staging of endometrial cancer
- To test the different applications of the surgical approach both by laparotomy and laparoscopy in endometrial cancer, and to update knowledge on the application of robotic surgery in endometrial cancer
- To update the different imaging techniques for the diagnosis of cervical cancer such as magnetic resonance imaging and scanning, as well as to assess the role of positron emission tomography and tumor markers such as SCC
- Acquire up-to-date knowledge of the treatment for preinvasive cervical lesions including surgery and immunotherapy

This Internship Program in Gynecologic Oncology will prepare you to take on new challenges in the area and improve the quality of life of your patients”

04

Educational Plan

The Internship Program's Internship Program consists of a practical stay in a prestigious clinical center, from Monday to Friday, with 8 consecutive hours of practical training with an associate specialist. This stay will allow you to see real patients alongside a team of professionals of reference in the area of Gynecologic Oncology, applying the most innovative diagnostic procedures and planning the latest generation therapeutics for each pathology.

In this completely practical Internship Program, the activities are aimed at developing and perfecting the skills necessary to provide healthcare care in areas and conditions that require highly qualified professionals, and are oriented towards specific expertise for practicing the activity, in a safe environment for the patient and with highly professional performance.

It is undoubtedly an opportunity to learn by working in the innovative hospital of the future where real-time health monitoring of patients is at the heart of the digital culture of its professionals. This is a new way of understanding and integrating health processes, making it the ideal teaching scenario for this innovative experience in the improvement of professional medical competencies for the 21st century.

The practical teaching will be carried out with the active participation of students performing the activities and procedures of each area of competence (learning to learn and learning to do), accompanied and guided by professors and other fellow trainees, which will facilitate teamwork and multidisciplinary integration as transversal competences for the praxis of Clinical Analysis Care Medicine Medicine (learning to be and learning to relate).

The procedures described below will form the basis of the practical part of the training, and their completion is subject to both the suitability of the patients and the availability of the center and its workload, with the proposed activities being as follows:

Module	Practical Activity
Diagnostic Gynecologic Oncology	Perform colposcopy, hysteroscopy, cystoscopy, rectoscopy, colonoscopy or tissue biopsy as appropriate
	Interpret the results obtained from diagnostic tests
	Evaluate the use of complementary tests when necessary
	Assess the nutritional status of the patient and possible complications of parental nutrition
Surgical procedures in the Gynecologic Oncology Unit	Proceed with the pre-surgical preparation of the patient, determining the possible position of the ostoma and indication of antibiotics and anticoagulant therapy
	Inform the patient and family in an appropriate manner, indicating possible antibiotics and anticoagulants
	Involvement in surgical procedures such as hysterectomies, radical ovarian cytreduction, vaginectomy, vulvectomy, etc
	Manage the main postoperative complications and perform an adequate follow-up of the patient
Chemotherapy treatments and other therapies	Use the most up-to-date pharmacology in chemotherapy processes
	Management of antineoplastic toxicity in the patient
	Analyze the genetic mechanisms involved in cancer in order to establish a solid working basis
	Evaluate the use of antineoplastic agents
Endometrial, cervical, ovarian and vulvar cancer	Classify and screen the different types of cancer that may present in the Gynecologic Oncology practice
	Use molecular diagnostic techniques, tumor markers and imaging to identify the type of cancer
	Addressing precancerous lesions through surgery and immunotherapy
	Use of hormone therapy in cases of endometrial cancer
	Use laparotomy or minimally invasive surgery as required for surgical treatment

05

Where Can I Do the Internship Program?

To ensure that the updating process is the best possible, TECH proposes the realization of this on-site stay in a prestigious center that can provide the doctor with the latest advances in the field of Gynecologic Oncology. This is a very complex and broad field, so it requires updating by the specialist, and the role of the hospital institutions proposed here is vital in this process, since they will offer the most advanced knowledge in the specialty.

“

You will obtain the most advanced knowledge in the field of Gynecologic Oncology”

The student will be able to do this program at the following centers:

General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship agreement for the program are as follows:

1. TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. Prior Studies Some centers may require a certificate of previous studies for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. 3.- DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include lodging, transportation to the city where the internship takes place, visas or any other benefits not described.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07 Certificate

This **Internship Program in Gynecologic Oncology** contains the most complete and up-to-date program in the professional and academic landscape.

After the student has passed the assessments, they will receive their corresponding Internship Program diploma issued by TECH Technological University via tracked delivery*.

The diploma issued by TECH will reflect the grade obtained in the test.

Title: **Internship Program in Gynecologic Oncology**

Duration: **3 weeks**

Attendance: Monday to Friday, shifts of 8 consecutive hours.
