Introduction

In medical practice, knowledge of languages becomes a powerful vehicle for improving communication between professionals and their patients. If we talk about the English language, this situation becomes even more latent because, having competence in this language not only serves as a communicative tool, but also helps the health professional to grow in their field, even being able to practice in other countries. Therefore, this program is unique in that it offers the students the possibility of increasing their competencies in this language, being prepared to face the B2 level test in English. All this, in 100% online mode, so that you can balance your language studies with your daily work.

AMBULANCE

“

This Master's Degree will allow you to continue to grow as a doctor not only for your professional skills, but also for your ability to communicate in a language as important worldwide as English”

Speaking Shakespeare's language has become a great tool at the service of multiple professional categories. In the medical field, the use of English can be applied in various fields such as the care of English-speaking patients, access to scientific documentation, publication of research results, participation in scientific events, dissemination of information and communication between the different members of the health team (professionals, patient professionals, patient groups, etc.), membership in international working groups, etc.

Understanding the importance of speaking fluent English for the professional environment of the doctor, TECH has designed this Master's Degree in which a wide variety of topics related to the relationship between doctors and other health professionals are addressed. All of this, prioritizing the quality of communication in the English language.

The content focuses on the practice of real situations that may occur every day in the healthcare environment and includes a wide variety of dialogues, activities, videos, American and British series, audios and specific lexicon that will provide you with the necessary tools to perform your tasks properly and successfully overcome any communication shortfalls.

Following the methodology used in the CEFR (Common European Framework of Reference for Languages), in only 12 months, the professional will be able to take the B2 level test in English. In this way, the physicians will become independent professionals, and will be able to maintain efficient and effective communication with English-speaking patients, presenting a wide variety of situations in which they may find themselves immersed when working abroad or dealing with English-speaking patients and/or colleagues.

All this, compiled in a 100% online Master's Degree that allows the physicians to continue to increase their language skills without having to give up their professional activity. A unique opportunity for growth that will place the professionals at the forefront of their sector.

This **Master's Degree in Medical English** contains the most complete and up-to-date scientific program on the market. The most important features include:

- ♦ The development of practical cases presented by medical experts in the English language
- ♦ The graphic, schematic and eminently practical content of the system provides practical and updated information that helps to acquire the skills that are essential for professional practice
- ♦ Practical exercises where to perform the self-assessment process to improve language learning
- ♦ Its special emphasis on innovative methodologies
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an internet connection

Healthcare institutions continually demand physicians with high language skills. If you want to be the one who opts for this job promotion, then this Master's Degree is for you"

Thanks to this Master's Degree you will improve the relationship with your patients through your ability to maintain a close and fluent communication with them in English"

The program's teaching staff includes professionals from the sector who contribute their work experience to this training program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive training programmed to train in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise throughout the program. For this purpose, the student will be assisted by an innovative interactive video system created by renowned and experienced experts.

Place yourself at the forefront of the industry by having the knowledge that will enable you to practice medicine globally.

As the program is taught in an online format, the physicians can study wherever and whenever they want, without having to give up the rest of their obligations.

02 Objectives

With the aim of expanding the language skills of doctors, TECH has designed the most complete and up-to-date Master's Degree in Medical English. As such, and after 1500 hours of intensive study, the medical professionals will be able to incorporate into their daily work the confidence that comes from being able to maintain a fluent conversation in English with their patients, working at a global level.

“

Welcome to the Master's Degree that will allow you to grow as a doctor and that will take your knowledge of English to another level"

General Objectives

- Enable the physician to work in an English-speaking environment in any hospital in any country in the world
- Achieve comprehensive care for English-speaking patients, in accordance with the educational and professional demands required in institutions with openings in medical positions
- Improve the general level of the physician to be able to cope in English with day-to-day situations when moving to work outside the home country

“

You will learn from professionals of renown and you will be able to accredit the B2 level in English after completing your studies in the Master's Degree”

Specific Objectives

Module 1. Working Life!

- ♦ Manage and know how to use specific vocabulary related to the job search
- ♦ Be able to cope with medical selection processes in English

Module 2. Costumes and Traditions

- ♦ Use specific vocabulary related to traditions such as weddings, vacations, etc.

Module 3. Health and Illness

- ♦ Delve into concepts related to general health

Module 4. Emotions

- ♦ Be able to communicate in English about situations related to the emotional domain
- ♦ Be able to communicate appropriately in sensitive situations such as death

Module 5. The Fashion World

- ♦ Be able to deal with situations in English where the use of a specific vocabulary related to fashion is essential

Module 6. Culture and Entertainment

- ♦ Use specific vocabulary related to museums, cinema or theater

Module 7. News and Media

- ♦ Know how to communicate correctly in English in situations involving the use of new technologies

Module 8. Social Issues

- ♦ Deal with concrete situations of social problems in English

Module 9. The Environment

- ♦ Correctly use specific vocabulary about the environment in English

Module 10. Studies and Training

- ♦ Communicate appropriately in school situations in English

Module 11. Economy

- ♦ Correctly handle specific economic vocabulary

Module 12. Problems of Everyday Life

- ♦ Delve into day-to-day issues and how to deal with them in English

Module 13. Politics

- ♦ Correctly handle specific political vocabulary

Module 14. Events

- ♦ Manage vocabulary on events such as eclipses, natural disasters, etc.

Module 15. Travel Trips

- ♦ Know how to communicate adequately in English in different types of trips

Module 16. Next Stop, etc. Your New Home

- ♦ Know how to handle specific transfer vocabulary in English

Module 17. Your First Day at the Hospital

- ♦ Know the name of the various departments in English
- ♦ Know how to use specific vocabulary about health equipment

Module 18. Patient Interview

- ♦ Know both the vocabulary and the correct way to conduct a job interview in English

Module 19. "What's Up Doc?" Diagnosis and Treatment

- ◆ Know how to explain a treatment to a patient in English
- ◆ Be able to assertively communicate bad medical news in English

Module 20. Checkup, Step by Step

- ◆ Know and handle body parts vocabulary in English appropriately
- ◆ Manage mental health concepts in English

Module 21. Good Administration of the Treatment

- ◆ Manage specific vocabulary on pharmacological treatments in English
- ◆ Know how to use surgical concepts in English

Module 22. Taking Care of the Patient

- ◆ Be able to communicate correctly with the patient in English during the different stages (pre and post surgery, first visit, etc.)

Module 23. Medical Specialties

- ◆ Know the specific vocabulary of the different medical specialties in English

Module 24. How to Prepare for Oral Communication in English

- ◆ Be able to make a complete presentation in English

Module 25. How to Improve Your Oral Communication in English

- ◆ Be able to communicate fully in English

Module 26. ICT for Health Sciences

- ◆ Manage scientific concepts in English

03 Skills

After passing the assessments of this Master's Degree, the physician will have acquired the necessary skills to maintain a fluent conversation in English, therefore improving the care provided to their patients. As a result, after completing the program, you will not only have improved your English language skills, but you will also improve in your daily practice as a physician due to the confidence that comes from having a high level of English.

“

*Increase your language skills by
studying at TECH and start seeing
your job opportunities multiply”*

General Skills

- ♦ Master the tools necessary to maintain a fluent conversation in English
- ♦ Increase the student's general vocabulary in English
- ♦ Learn how to cope with everyday situations that a doctor moving abroad might face
- ♦ Know general aspects of culture, society, lifestyle and its specific vocabulary in English
- ♦ Be able to pass the B2 level accreditation exam in English
- ♦ Acquire knowledge and vocabulary specific to personal situations in English

“

You will be able to provide excellent health care not only in your native language, but also in English”

A close-up photograph of a hospital sign. The sign is divided into three horizontal sections. The top section is blue with the word 'HOSPITAL' in large, white, sans-serif capital letters. The middle section is white and is mostly obscured. The bottom section is red with the words 'DISORDERS UNIT' in white, sans-serif capital letters. In the foreground, there is a field of purple lavender flowers.

HOSPITAL

DISORDERS UNIT

Specific Skills

- ♦ Acquire specific knowledge and vocabulary for adapting to professional life in English
- ♦ Be able to deliver a full presentation in English
- ♦ Know the name of the hospital equipment and the implements of medical work
- ♦ Learn what the different medical departments and professional specialties are called in English
- ♦ Be able to conduct a medical interview in English to collect various data about the patient's health
- ♦ Have specific vocabulary that enables the physician to request specific diagnostic tests
- ♦ Know how to express emotions and feelings in English
- ♦ Manage specific surgical vocabulary in English
- ♦ Be able to explain a given pharmacological, surgical, physical or chemical treatment in English to a patient
- ♦ Be able to maintain a fluent conversation in English to facilitate patient care
- ♦ Manage specific vocabulary on complementary health services and outpatient services in English language

04

Structure and Content

TECH's years of experience in language education and the professional prestige of the faculty that makes up this university have made it possible to design, for this Master's Degree, the most complete and up-to-date syllabus on the market in the field of English teaching for doctors. Therefore, after 12 months of intensive and eminently practical education, the health professional will be able to work in this language comfortably and fluently.

“

TECH's objective? Your professional growth”

Module 1. Working Life!

- 1.1. Applicant Profile
- 1.2. Self-Employed or Employed
- 1.3. I Want a Promotion
- 1.4. Future Projects

Module 2. Costumes and Traditions

- 2.1. Wedding Mode!
- 2.2. Tomorrow's Holiday!
- 2.3. Sunday's Market
- 2.4. Let's get a Bite!

Module 3. Health and Illness

- 3.1. Baby on the Way
- 3.2. Is that Contagious?
- 3.3. I'm on a Diet
- 3.4. Can You Do Me a Favor?

Module 4. Emotions

- 4.1. Grandma Has Died
- 4.2. What a Surprise!
- 4.3. Memories
- 4.4. I'm Tired

Module 5. The Fashion World

- 5.1. Tailormade Suit
- 5.2. Tones and Textures
- 5.3. Advertising
- 5.4. The Fashion World

Module 6. Culture and Entertainment

- 6.1. Museums and Exhibitions
- 6.2. Film or Theater?
- 6.3. Tomorrow, My Favorite Band Plays
- 6.4. We Play the Final Today

Module 7. News and Media

- 7.1. Christmas Lottery
- 7.2. I Want to Hire a Landline
- 7.3. Shall We Make a Video Conference?
- 7.4. We Are in the Cover of the Newspaper

Module 8. Social Issues

- 8.1. In the Employment Office
- 8.2. Disability
- 8.3. Third Age
- 8.4. Political Organization

Module 9. The Environment

- 9.1. Climate Change
- 9.2. Garbage Collection and Recycling
- 9.3. Energy Saving

Module 10. Studies and Training

- 10.1. I've Been Given a Scholarship
- 10.2. I Don't Agree With My Mark
- 10.3. Today She Reads Her Doctoral Thesis

Module 11. Economy

- 11.1. My Savings Account
- 11.2. Buy or Rent
- 11.3. The Income Statement
- 11.4. Request a Budget

Module 12. Problems of Everyday Life

- 12.1. My Car has Been Pounded
- 12.2. I Want to File a Claim
- 12.3. I Have Had an Accident

Module 13. Politics

- 13.1. Today We are Going to Vote
- 13.2. Cooperation
- 13.3. Immigration

Module 14. Events

- 14.1. Reality or Fiction
- 14.2. There is an Eclipse Today
- 14.3. Flooding and Other Natural Disasters

Module 15. Travel Trips

- 15.1. Choose Accommodation
- 15.2. They Have Lost My Bags
- 15.3. Kinds of Transport

Module 16. Next Stop, etc. Your New Home

- 16.1. At the Airport
- 16.2. From the Airport to the Town
- 16.3. "How Do I get To, etc.," Asking for Directions
- 16.4. Looking for Accommodation
- 16.5. "I'd Like to Open a New Bank Account"

Module 17. Your First Day at the Hospital

- 17.1. Hospital Departments
- 17.2. Health Equipment
- 17.3. Get To Know your Colleagues
- 17.4. External Services and Institutions

Module 18. Patient Interview

- 18.1. Are you Ready for the Interview
- 18.2. Taking the Patient's Data
- 18.3. History Taking
- 18.4. "What's the Matter" Symptoms
- 18.5. Physical Examination

Module 19. "What's Up Doc?" Diagnosis and Treatment

- 19.1. Explaining the Treatment
- 19.2. How to Deal with Bad Medical News
- 19.3. Answering Questions
- 19.4. Asking for More Tests
- 19.5. The Diagnosis
- 19.6. Considering Various Options for Treatment

Module 20. Checkup, Step by Step

- 20.1. Body Parts
- 20.2. Body Systems
- 20.3. Checking Up
- 20.4. Mental and Physical State

Module 21. Good Administration of the Treatment

- 21.1. Pharmacological Treatment
- 21.2. Psychological Treatment
- 21.3. Physical Treatment
- 21.4. Surgical Treatment
- 21.5. Other Treatments

Module 22. Taking Care of the Patient

- 22.1. Scheduled Visits
- 22.2. Unscheduled Visits
- 22.3. Pre-op Visits
- 22.4. Post-op Visits
- 22.5. The Discharge

Module 23. Medical Specialties

- 23.1. Medical Specialties I
- 23.2. Medical Specialties II
- 23.3. Medical Specialties III
- 23.4. Surgery and Healthcare Services
- 23.5. Complementary Care Services

Module 24. How to Prepare for Oral Communication in English

- 24.1. Before the Presentation
- 24.2. The day of the Presentation
- 24.3. Managing Difficult Situations During Presentations

Module 25. How to Improve Your Oral Communication in English

- 25.1. After the Presentation
- 25.2. Common Errors
- 25.3. Style
- 25.4. Phonetics and Intonation

Module 26. ICT for Health Sciences

- 26.1. "I Can Do It!" Improve your English Online
- 26.2. Online Medical Encyclopedias
- 26.3. Videos and Tutorials
- 26.4. Prescription Links for Your Patients
- 26.5. Patient Forums and Communities
- 26.6. Useful Apps

05 Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the physician's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that evaluate real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

Professionals will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology, more than 250,000 physicians have been trained with unprecedented success in all clinical specialties regardless of surgical load. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Surgical Techniques and Procedures on Video

TECH introduces students to the latest techniques, the latest educational advances and to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

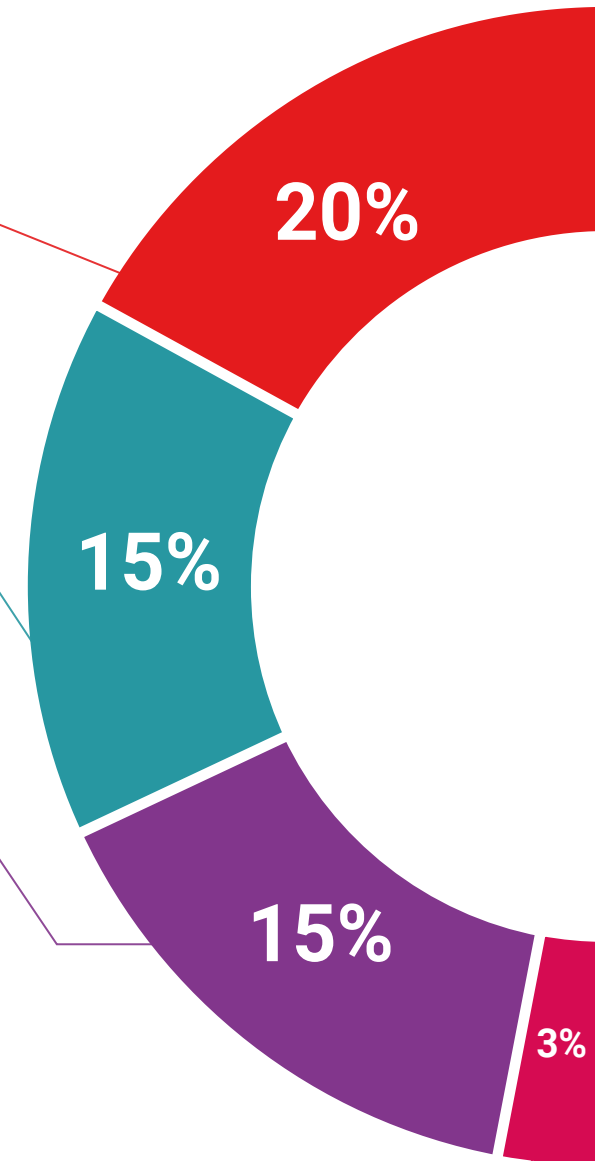

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

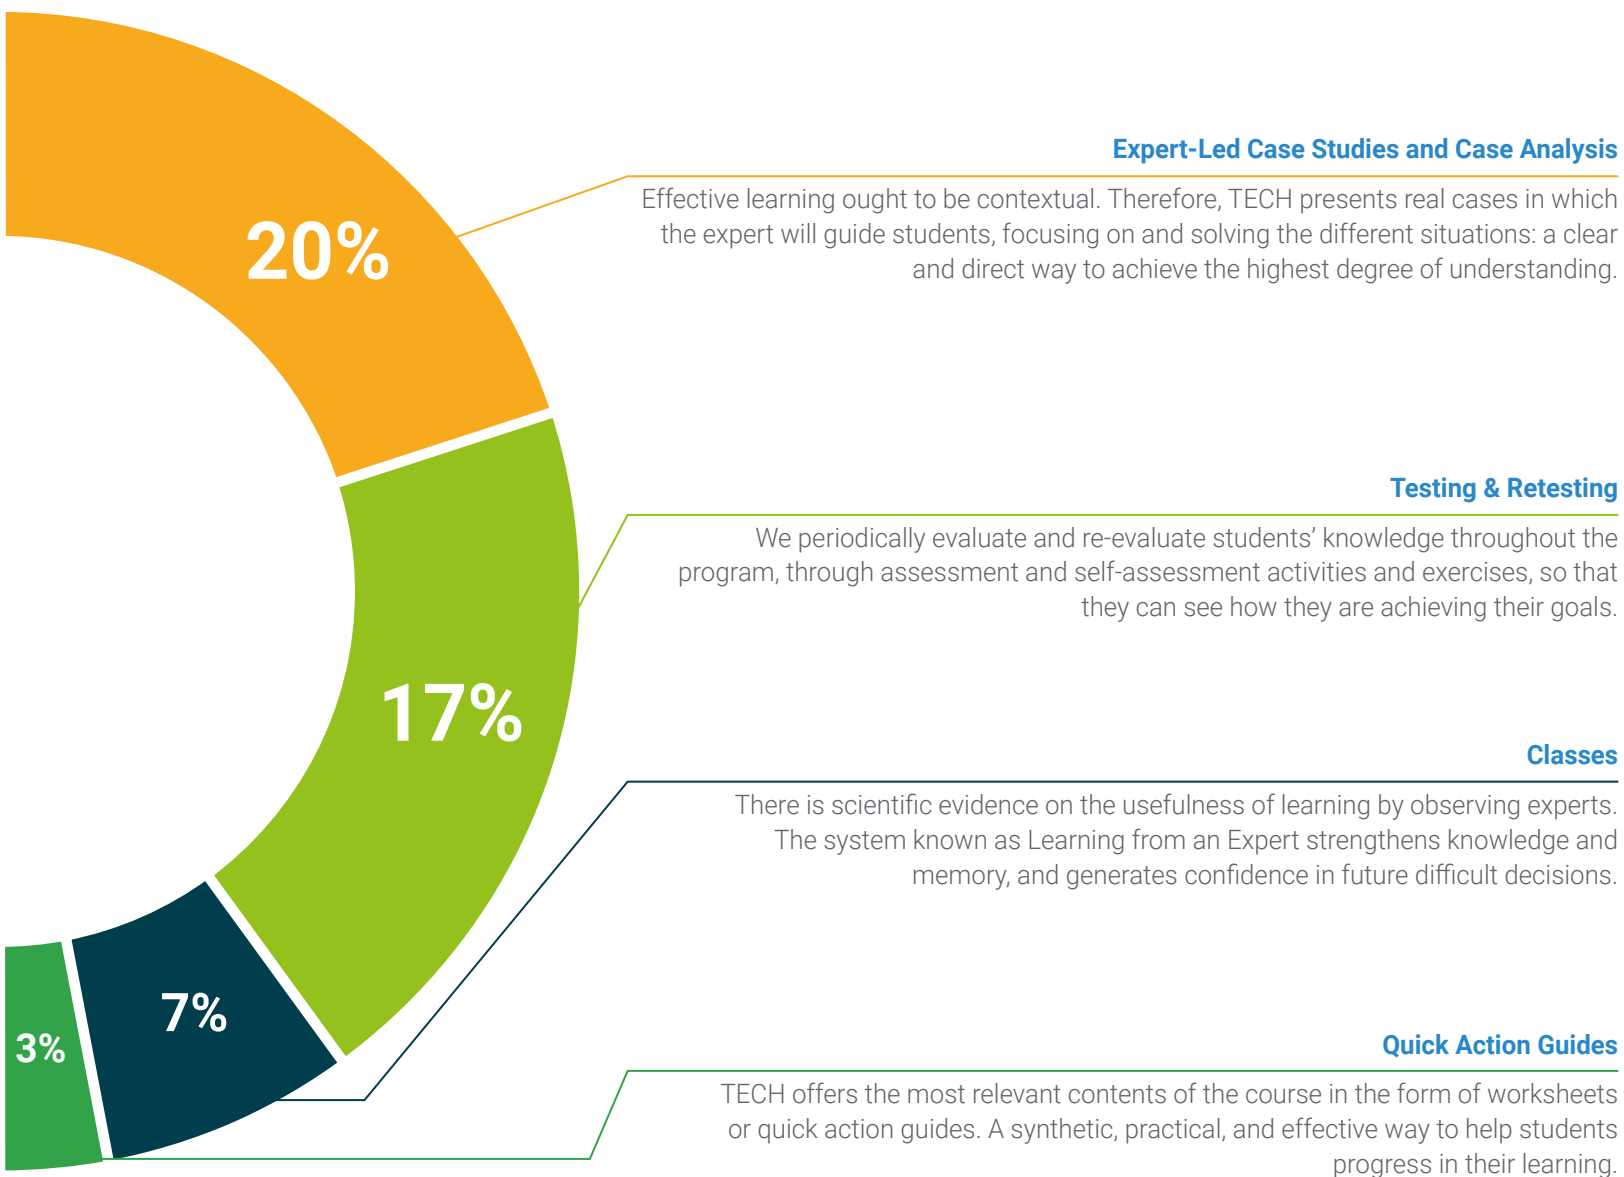

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

06 Certificate

The Master's Degree in Medical English guarantees students, in addition to the most rigorous and up-to-date education, access to a Master's Degree diploma issued by TECH Global University.

“

*Successfully complete this program
and receive your university qualification
without having to travel or fill out
laborious paperwork"*

This program will allow you to obtain your **Master's Degree diploma in Medical English** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

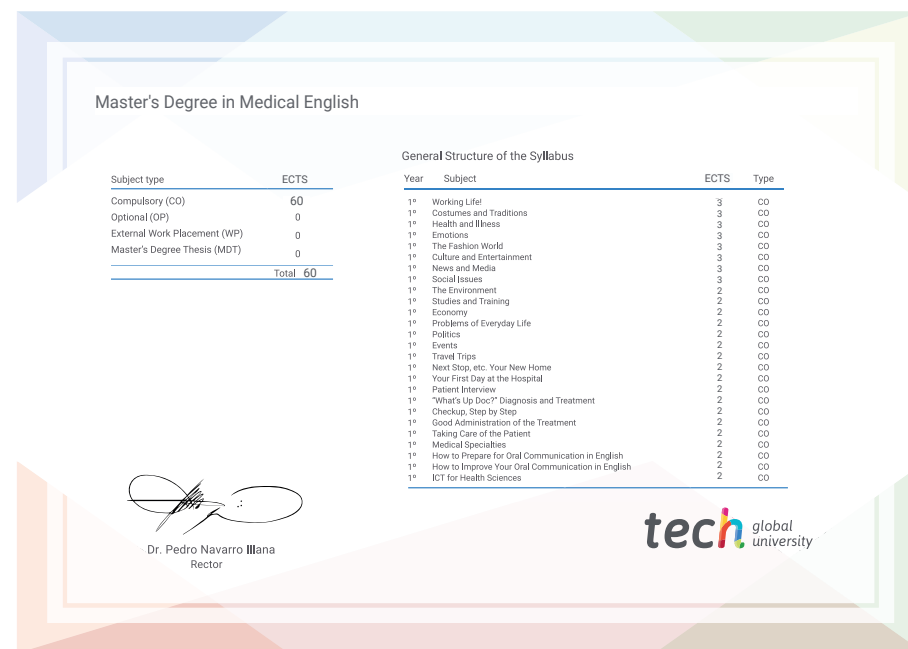

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
