Introduction

Antisocial Personality Disorder is a syndrome that seriously affects not only the patient who suffers from it, but those around them, due to the general pattern of disregard for the consequences and rights of others that these types of people usually present. Thanks to the advances in modern medicine and Psychiatry, specialists have more and more techniques and strategies for early diagnosis and specialized treatment, regularly obtaining better results. But to do this they must know in detail the latest developments and scientific evidence related to this field, aspects that you can work on with the course of this program. It is a qualification designed by experts and presented online that will allow you to update yourself exhaustively and through the most avant-garde pedagogical methodology in the university academic sector.

“

TECH presents this Postgraduate Certificate in Antisocial Personality Disorder as the best option to update your knowledge and perfect your professional skills 100% online”

Recklessness and disregard for the consequences that their actions have on the rights of others are two of the most characteristic features of the patient with Antisocial Personality Disorder. In this way, the clinical picture of these people is identified with indifference and the justification or rationalization of their behavior through exploitation, deception and carrying out illegal acts for their own benefit or personal pleasure without any type of remorse.

This syndrome, which can also lead to associated comorbidities such as hyperactivity, attention deficit or difficulty controlling impulses, seriously affects the quality of life of the patients and the people around them, which is why the intervention Urgent and effective specialist consultation is vital to prevent complications in your health and the well-being of your context. For this reason, and with the aim that the graduate can catch up on everything related to this disorder, TECH and its team of experts have developed this program. It is a degree that delves into its clinical innovations, through an exhaustive tour of its common characteristics, diagnostic criteria, prognosis and most effective treatments.

All this through a 100% online Postgraduate Certificate that includes 150 hours of the best theoretical syllabus, as well as high-quality additional material presented in different formats: real clinical cases, dynamic summaries, research articles, detailed videos and complementary readings. Furthermore, it has been developed based on the most innovative pedagogical methodology in the academic sector, an aspect that allows reducing the teaching load without giving up the academic quality of its content.

This **Postgraduate Certificate in Antisocial Personality Disorder** contains the most complete and up-to-date scientific program on the market. The most important features include:

- ◆ The development of practical cases presented by experts in Psychiatry
- ◆ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ◆ Practical exercises where the self-assessment process can be carried out to improve learning
- ◆ Its special emphasis on innovative methodologies
- ◆ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ◆ Content that is accessible from any fixed or portable device with an Internet connection

You will have access to 150 hours of the best theoretical and practical content based on current events in the Psychiatry sector”

“

You will be able to delve deeper into the DSM-5 classification and the ICD-10 through a syllabus prepared by practicing Psychiatry specialists”

You can access the Virtual Classroom 24 hours a day and from any device with an internet connection: PC, tablet or mobile, whatever is most convenient for you.

You will have dynamic summaries of each module, so you don't miss anything.

The program's teaching staff includes professionals from the sector who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the academic year. For this purpose, the student will be assisted by an innovative interactive video system created by renowned and experienced experts.

02 Objectives

The importance of the correct management of patients with Antisocial Personality Disorder, not only for their mental and physical health, but for the safety of their environment, is what has motivated TECH to design this program. For this reason, and given the serious consequences that can arise from suffering from this syndrome, the objective of the Postgraduate Certificate is to provide the graduate with the most up-to-date information, based on the latest scientific evidence and medical advances in the modern Psychiatry sector.

“

A program that will give you the keys to achieve and exceed your academic objectives of updating and perfecting skills in just 150 hours"

General Objectives

- ◆ Delve into the newest aspects of Antisocial Personality Disorder based on the latest scientific advances in Psychiatry
- ◆ Improve the diagnosis and treatment skills of the specialist through exhaustive and modern knowledge of the most current and effective techniques and strategies

“An accessible and dynamic Postgraduate Certificate, with which knowing in detail the latest developments in the differential diagnosis of Antisocial Personality Disorder will become an easy goal to achieve”

Specific Objectives

- ◆ Study the prevalence and incidence of Antisocial Personality Disorder
- ◆ Delve into the clinical subtypes of this pathology
- ◆ Review the main group and individual therapies
- ◆ Approach prognosis, its variables and clinical evolution

03

Course Management

Both the direction and teaching of this program are carried out by a team of experts in Psychiatry with years of experience in the management of patients with complex and diverse clinical conditions, among which are those who suffer from Antisocial Personality Disorder. The faculty will be available to the specialist to guide them during the academic experience and resolve any questions that may arise during the course through online and individualized tutoring.

“

In the Virtual Classroom you will find a debate forum in which you can give your opinion on the different topics that arise and learn what specialists from all over the world think”

Structure and Content

For the development of the content of this Postgraduate Certificate, TECH has used the innovative and effective Relearning methodology, based on the reiteration of the most important concepts throughout the syllabus. In this way, a gradual and natural updating of knowledge is encouraged, saving the graduate hours of study and memorization. In addition, in order to increase the dynamism of the program, in the Virtual Classroom you will find additional high quality material, including real clinical cases with which you can improve, in a practical way, your professional competencies and skills in the management of psychiatric patients.

“

Individual and group psychotherapy can also help improve patients with Antisocial Personality Disorder, therefore, in this Postgraduate Certificate you will find an exclusive module on these strategies”

Module 1. Antisocial Personality Disorder

- 1.1. Common Features of Disorder
- 1.2. International Diagnostic Criteria
 - 1.2.1. DMS-5 Classification
 - 1.2.2. ICD-10 Classification
- 1.3. Prevalence and Incidence
 - 1.3.1. Genetics
- 1.4. Etiology and Causes
 - 1.4.1. Etiopathogenesis
 - 1.4.2. Risk Factors
 - 1.4.3. Environmental Factors
 - 1.4.4. Genetic Factors
- 1.5. Clinical Characteristics and Symptomatology
- 1.6. Diagnosis and Differential Diagnosis
 - 1.6.1. Assessment
 - 1.6.2. Differential diagnosis with psychiatric pathologies
- 1.7. Prognosis
 - 1.7.1. Variables
 - 1.7.2. Evolution
- 1.8. Clinical Sub-types
- 1.9. Pharmacological Treatment
 - 1.9.1. Antipsychotics
 - 1.9.2. Antidepressants
 - 1.9.3. Anxiolytics
 - 1.9.4. Mood Stabilizers
- 1.10. Cognitive-Behavioral
 - 1.10.1. Individual Therapy
 - 1.10.2. Group

“

The best option to catch up on the latest news on Antisocial Personality Disorder is before you. Enroll now and don't let it pass you by”

05 Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the physician's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that evaluate real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

Professionals will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology, more than 250,000 physicians have been trained with unprecedented success in all clinical specialties regardless of surgical load. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Surgical Techniques and Procedures on Video

TECH introduces students to the latest techniques, the latest educational advances and to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence on the usefulness of learning by observing experts. The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06 Certificate

The Postgraduate Certificate in Antisocial Personality Disorder guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This **Postgraduate Certificate in Antisocial Personality Disorder** contains the most complete and up-to-date scientific on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The diploma issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Certificate in Antisocial Personality Disorder**

Official N° of Hours: **150 h.**

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
