# Introduction

In pediatric pathology, nutrition intervenes as an etiological factor and as a complication of other diseases.

Specialize in Artificial Nutrition in Pediatrics with this qualification that delves into the study of food and nutrition in the origin, treatment and support of a large number of pathologies in children.

“

*Improve your knowledge through this program, where you will find the best educational material supported by real clinical cases" Learn here about the latest advances in the specialty to be able to perform a quality medical practice"*

This program offers the student the possibility of deepening and updating knowledge, using the latest educational technology. It offers a global vision of artificial nutrition and child malnutrition while focusing on the most important and innovative aspects of pediatric nutrition and dietetics.

This program provides specialization in the field of child nutrition in pediatrics in areas of particular interest such as:

- ♦ Artificial nutrition at home
- ♦ Nutritional supplements
- ♦ Probiotics and prebiotics in infant feeding

This Postgraduate Certificate is methodologically designed for distance learning in order to guarantee optimal supervision.

With this program you will have the opportunity to study an educational program that brings together the most advanced and in-depth knowledge in the field, where a group of professors of high scientific rigor and extensive international experience offers you the most complete and up-to-date information on the latest advances and techniques in Artificial Nutrition in Pediatric Medicine.

This **Postgraduate Certificate in Artificial Nutrition in Pediatric Medicine** contains the most complete and up-to-date scientific program on the market. The most important features include:

- ♦ Clinical cases presented by experts in Artificial Nutrition in Pediatric Medicine
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Diagnostic and therapeutic novelties on Artificial Nutrition in Pediatric Medicine in Pediatric Medicine
- ♦ An algorithm-based interactive learning system for decision-making in the clinical situations presented throughout the course
- ♦ With a special emphasis on evidence-based medicine and research methodologies in Artificial Nutrition in Pediatric Medicine
- ♦ All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

*Learn with this Postgraduate Certificate in Artificial Nutrition in Pediatric Medicine"*

“ *This Postgraduate Certificate is the best investment you can make when selecting a refresher program, for two reasons: in addition to updating your knowledge in Artificial Nutrition in Pediatric Medicine, you will obtain a qualification from TECH Technological University”*

Its faculty includes health professionals belonging to the field of clinical nutrition, who contribute their work experience to this qualification, as well as renowned specialists belonging to leading scientific societies.

The multimedia content developed with the latest educational technology will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive training program to train in real situations.

This program is designed around Problem-Based Learning, whereby the pediatrician must try to solve the different professional practice situations that arise throughout the program. For this reason, you will be assisted by an innovative, interactive video system created by renowned and experienced experts in the field of radiology with extensive teaching experience.

*This Postgraduate Certificate allows training in simulated environments, which provide immersive learning programmed to train for real situations.*

*It includes clinical cases to bring the program as close as possible to the reality of care in medicine.*

02

# Objectives

The program's main objective is focused on theoretical and practical learning, so that the pediatrician is able to master artificial nutrition in pediatrics in both a practical and rigorous manner.

“

*This refresher program will provide the skills to generate a sense of confidence in your medical practice, which will help you grow both personally and professionally”*

## General Objectives

---

- Update the pediatricians knowledge on new trends in human nutrition, in both health and disease situations, through evidence-based medicine
- Promote work strategies based on the practical knowledge of the new trends in nutrition and its application to child pathologies, where nutrition plays a fundamental role in treatment
- Encourage the acquisition of technical skills and abilities, through a powerful audiovisual system, and the possibility of development through online simulation workshops and/or specific training
- Encourage professional stimulation through continued specialization and research.
- Train the professional for research into patients with nutritional problems

## Specific Objectives

---

- Identify children at nutritional risk who are eligible for specific support
- Assess and monitor the supervision of children on nutritional support
- Explain the new developments and available evidence on probiotics and prebiotics in infant feeding
- Identify children suffering from malnutrition
- Describe the correct nutritional support for a malnourished child
- Explain the nutritional requirements of a sick child and the applications of enteral and parenteral nutrition
- Define the indication for the type of artificial nutrition according to the child and their needs

*Seize the opportunity and take the step to get up to speed on the latest developments in Artificial Nutrition in Pediatric Medicine"*

03

# Course Management

TECH has selected a highly qualified teaching faculty to instruct students and to postulate them as elite professionals. This faculty, experts in Artificial Nutrition in Pediatric Medicine, have extensive prestige in the profession and are professionals with years of teaching experience who have come together to help you give your career a boost. To this end, they have developed this Postgraduate Certificate with the most recent updates on the subject that will enable students to be trained and increase their skills in the field.

“

*Learn from the best professionals  
and become a successful  
professional yourself”*

## Management

### Ms. Aunió Lavarías, María Eugenia

- Pharmacist and Clinical Nutrition Expert
- "Author of the reference book in the field of Clinical Nutrition "Dietetic Management of Overweight in the Pharmacy Office". (Panamerican Medical Publishing House)
- Pharmacist with extensive experience in the public and private sector
- Pharmacist in Valencia Pharmacy
- Pharmacy Assistant in the British pharmacy and health and beauty retail chain Boots, UK
- Degree in Pharmacy and Food Science and Technology. University of Valencia
- Director of the University Course "Dermocosmetics in the Pharmacy Office"

04

# Structure and Content

The structure of the contents has been designed by a team of professionals who know the implications of the program in the daily practice of pediatricians in nutrition, aware of the current relevance of training to be able to act before the pediatric patient with quality teaching through new educational technologies.

“

*This Postgraduate Certificate in Artificial Nutrition in Pediatric Medicine, contains the most complete and up-to-date scientific program on the market”*

## Module 1. Artificial Nutrition in Pediatrics

- 1.1. Concept of Nutritional Therapy
  - 1.1.1. Evaluation of Patients in Need of Nutritional Support
  - 1.1.2. Indications
- 1.2. General Information about Enteral and Parenteral Nutrition
- 1.3. Dietary Products Used for Sick Children or Children with Special Needs
- 1.4. Implementing and Monitoring Patients with Nutritional Support
  - 1.4.1. Critical Patients
  - 1.4.2. Patients with Neurological Pathologies
- 1.5. Artificial nutrition at home
- 1.6. Nutritional Supplements to Support the Conventional Diet
- 1.7. Probiotics and prebiotics in infant feeding

“

*A unique, key and decisive training experience to boost your professional development”*

# 05 Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

*Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"*

## At TECH, we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

*With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.*

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the physician's professional practice.

“

*Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method.*

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that evaluate real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

## Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

*Professionals will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.*

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology, more than 250,000 physicians have been trained with unprecedented success in all clinical specialties regardless of surgical load. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

*Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.*

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

#### Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then adapted in audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high-quality pieces in each and every one of the materials that are made available to the student.

#### Surgical Techniques and Procedures on Video

TECH introduces students to the latest techniques, the latest educational advances and to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

#### Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

#### Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

#### Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

#### Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

#### Classes

There is scientific evidence on the usefulness of learning by observing experts. The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

#### Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06

# Certificate

The Postgraduate Certificate in Artificial Nutrition in Pediatrics guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

*Successfully complete this program  
and receive your university degree  
without travel or laborious paperwork”*

This **Postgraduate Certificate in Artificial Nutrition in Pediatric Medicine** contains the most complete and up-to-date scientific program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees.
