01

Introduction

Medical specialization training in minimally invasive surgery in the field of gynecology, including laparoscopy, hysteroscopy and pelvic floor surgery, is moderately short and insufficient due to lack of time to delve into it. Because of this, many active specialist medical professionals and those in training are demanding more training in this area.

“

Improve your knowledge through this program, where you will find the best didactic material with real clinical cases. Learn here about the latest advances in the specialty to be able to perform a quality medical practice”

Furthermore, from the clinical point of view, laparoscopic and hysteroscopic surgery in gynecology is clearly displacing conventional surgery, and that is why in most of the healthcare centers in our country there is a tendency and an attempt to introduce this type of surgical modality to a greater extent.

The increasing complexity of laparoscopic procedures has reached a point where practically 95% of gynecological surgery can be performed through minimally invasive surgery, which makes updating new techniques vital for proper patient care. In addition to all this, the constant development of instruments and new tools must be learned for greater surgical efficiency and to obtain the best clinical results.

The objective of this Postgraduate Certificate is to provide an update, with the use of the latest educational technology, to contribute to the quality and safety in medical decision making, diagnosis, treatment and prognosis of the patient with gynecological pathology, which can be performed by using minimally invasive surgery.

The **Postgraduate Certificate in Exploratory Laparoscopy and Benign Adnexal Pathology in Gynecology** contains the most complete and up-to-date scientific program on the market. The most important features of the Course are:

- Clinical cases presented by experts in Gynecology. The graphic, schematic, and eminently practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice.
- Latest developments in diagnoses and treatments in **Exploratory Laparoscopy and Benign Adnexal Pathology in Gynecology**.
- An algorithm-based interactive learning system for decision-making in the clinical situations presented throughout the course.
- Special emphasis on test-based medicine and research methodologies in surgical gynecology.
- All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments.
- Content that is accessible from any fixed or portable device with an Internet connection

Expand your knowledge through the Postgraduate Certificate in Exploratory Laparoscopy and Benign Adnexal Pathology in Gynecology in a practical way adapted to your needs"

“

This Postgraduate Certificate may be the best investment you can make in the selection of a refresher program for two reasons: in addition to updating your knowledge of Exploratory Laparoscopy and Benign Adnexal Pathology in Gynecology, you will obtain a Postgraduate Certificate from TECH Technological University”

Forming part of the teaching staff is a group of professionals in the world of surgical gynecology, who bring to this course their work experience, as well as a group of renowned specialists, recognised by esteemed scientific communities.

The multimedia content developed with the latest educational technology will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive training program to train in real situations.

Problem-Based Learning underpins this program design, and the medical professional must use it to try to solve the different professional practice situations that arise throughout the Course. For this reason, you will be assisted by an innovative, interactive video system created by renowned and experienced experts in the field of Gynecology with extensive teaching experience.

This Postgraduate Certificate includes real clinical cases and exercises to bring the course experience closer to clinical practice in Gynecology.

Don't miss the opportunity to update your knowledge of Exploratory Laparoscopy and Benign Adnexal Pathology in Gynecology to improve patient care.

02 Objectives

The main objective of the program is the development of both theoretical and practical learning, so that the gynecologist can rigorously and practically master Exploratory Laparoscopy and Benign Adnexal Pathology in Gynecology.

“

This refresher program will generate a sense of confidence in the gynecologist, which will help them grow both personally and professionally”

General Objective

- Become familiar with all the instruments available for endoscopic and hysteroscopic surgery.
- Learn how to prepare the operating room for endoscopy.
- Learn about general aspects such as ergonomics in the laparoscopic operating room and electrosurgery for use in gynecological procedures.
- Apply the different appropriate techniques in each specific clinical case.
- Gain in-depth knowledge of female pelvic and abdominal anatomy.
- Learn about hysteroscopic techniques and their application in uterine pathology.
- Become acquainted with the treatment of benign uterine pathology.
- Become familiar with the different advanced techniques in gynecologic oncology for minimally invasive treatment.
- Learn how to use tools for solving complications in gynecologic endoscopy.
- Understand the economic aspects related to the use of endoscopic techniques.
- Learn new technologies in endoscopy such as robotic surgery, single-port and mini-laparoscopy.

Specific Objectives

- Learn laparoscopic management of remaining ovarian syndrome.
- Learn to manage uterine myomas.
- Learn the strategy to decrease bleeding in laparoscopic myomectomy.
- Learn the different laparoscopic techniques for uterine morcellation and myomas in an airtight way to avoid the possibility of dissemination in case of uterine sarcoma.
- Acquire the skills to apply endoscopy in different modalities of hysterectomy complexity.

Take the opportunity and take the step to get up to date on the latest developments in Exploratory Laparoscopy and Benign Adnexal Pathology in Gynecology"

03

Course Management

Reinforced by an international figure of high academic and clinical prestige, this Postgraduate Certificate contains a Masterclass that adequately delves into the most advanced Laparoscopic techniques currently available. The wide merits of the teaching staff itself, as well as its multiple international recognitions, guarantee that the specialist is accessing a first level teaching content.

“

This Postgraduate Certificate will allow you to delve, in an exhaustive way and with quality assurance, into the most effective Exploratory Laparoscopy in the current gynecological field"

International Guest Director

As one of the pioneer surgeons in Brazil by introducing advanced techniques of **Laparoscopic Oncologic Surgery** in Paraná, Dr. Reitan Ribeiro is one of the most prolific figures in this specialty. So much so that he has even received recognition as an **honorary citizen** of the city of Curitiba, highlighting his work in the creation and development of the technique of **Uterine Transposition**.

The IJGC, International Journal of Gynecologic Cancer, has also recognized the outstanding work of Dr. Reitan Ribeiro. His publications on **Uterine Robotic Transposition in Cervical Cancer**, Uterine Transposition after Radical Trachelectomy and directed research in the technique of Uterine Transposition for patients with gynecological cancers who want to preserve fertility are highlighted. He has received the **national award for medical innovation** for his research in the field of Uterine Transposition, highlighting these advances in the preservation of the patient's fertility.

His professional career is not without success, as he holds **numerous positions of responsibility** in the prestigious Erasto Gaertner Hospital. He directs the research program in Gynecologic Oncology of this center, being also director of the Fellowship program in this specialty, in addition to coordinating the training program in Robotic Surgery focused on Gynecologic Oncology.

At the academic level, he has completed internships at numerous prestigious centers, including Memorial Sloan Kettering Cancer Center, McGill University and the National Cancer Institute of Brazil. He balances his clinical responsibilities with consulting work for leading medical and pharmaceutical companies, mainly Johnson & Johnson and Merck Sharp & Dohme.

Dr. Ribeiro, Reitan

- ♦ Research Director, Gynecologic Oncology Department - Erasto Gaertner Hospital - Brazil
- ♦ Director of the Fellowship Program in Gynecologic Oncology at the Erasto Gaertner Hospital.
- ♦ Director of the Robotic Surgery Training Program of the Gynecologic Oncology Oncology Department of the Erasto Gaertner Hospital.
- ♦ Senior Surgeon in the Department of Gynecologic Oncology, Erastus Gaertner Hospital.
- ♦ Director of the Resident Oncologist Program at the Erasto Gaertner Hospital.
- ♦ Consultant at Johnson & Johnson and Merck Sharp & Dohme
- ♦ Degree in Medicine at the Federal University of Porto Alegre
- ♦ Fellowship in Gynecologic Oncologic Surgery at Memorial Sloan Kettering Cancer Center
- ♦ Fellowship in Minimally Invasive Surgery, McGill University
- ♦ Internships at Governador Celso Ramos Hospital, National Cancer Institute of Brazil and Erasto Gaertner Hospital.
- ♦ Certification in Oncologic Surgery by the Oncologic Surgery Society of Brazil.

Thanks to TECH you will be able to learn with the best professionals in the world"

04

Structure and Content

The structure of the contents has been designed by a team of professionals knowledgeable about the implications of training in daily medical practice in Exploratory Laparoscopy and Benign Adnexal Pathology in Gynecology, aware of the relevance of current training to be able to act before the patient with gynecological surgical pathology, and committed to quality teaching through new educational technologies.

“

The Postgraduate Certificate in Exploratory Laparoscopy and Benign Adnexal Pathology in Gynecology contains the most complete and up-to-date scientific program on the market”

Module 1. Exploratory Laparoscopy and Benign Adnexal Pathology

- 1.1. General Considerations in the Operating Room
- 1.2. Laparoscopy Indications Entry Techniques
- 1.3. Physiological Aspects of Performing Pneumoperitoneum
- 1.4. Adnexial Masses Preoperative Assessment
- 1.5. Cystectomy and Adnexectomy in Benign Ovarian Tumors
- 1.6. Complex Non-Endometriotic Adnexal Cysts Management
- 1.7. Laparoscopic Salpingectomy Ectopic Pregnancy
- 1.8. Pelvic Abscess and PID
- 1.9. Special Cases

“

*A unique, key, and decisive
training experience to boost your
professional development”*

05 Methodology

This training program provides you with a different way of learning. Our methodology uses a cyclical learning approach: ***Re-learning***.

This teaching system is used in the most prestigious medical schools in the world, and major publications such as the ***New England Journal of Medicine*** have considered it to be one of the most effective.

“

Discover Re-learning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization”

At TECH we use the Case Method

In a given situation, what would you do? Throughout the program, you will be presented with multiple simulated clinical cases based on real patients, where you will have to investigate, establish hypotheses and, finally, resolve the situation. There is abundant scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you can experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gervas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching potential or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in professional medical practice.

“

Did you know that this method was developed in 1912 at Harvard for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only grasp concepts, but also develop their mental capacity by evaluating real situations and applying their knowledge.
2. The learning process has a clear focus on practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Re-Learning Methodology

At TECH we enhance the Harvard case method with the best 100% online teaching methodology available: Re-learning.

Our University is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

The physician will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Re-learning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best Spanish-speaking online university (Columbia University).

With this methodology we have trained more than 250,000 physicians with unprecedented success, in all clinical specialties regardless of the surgical load. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Re-learning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (we learn, unlearn, forget, and re-learn). Hence, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

In this program you will have access to the best educational material, prepared with you in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Latest Techniques and Procedures on Video

We introduce you to the latest techniques, to the latest educational advances, to the forefront of current medical techniques. All this, in first person, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This unique multimedia content presentation training system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides. in our virtual library you will have access to everything you need to complete your training.

06 Certificate

The Postgraduate Certificate in Exploratory Laparoscopy and Benign Adnexal Pathology in Gynecology guarantees, in addition to the most rigorous and up-to-date training, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this training and receive your university degree without travel or laborious paperwork”

The Postgraduate Certificate in Exploratory Laparoscopy and Benign Adnexal Pathology in Gynecology contains the most complete and up-to-date scientific program on the market.

After students have passed the assessments, they will receive by certified mail their **Postgraduate Certificate** issued by **TECH Technological University**.

The certificate issued by **TECH Technological University** will specify the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.
