### tech 06 | Introduction

The UN (United Nations) is responsible for ensuring human rights, basic and essential rights to guarantee the life and development of each and every person in the world. However, this organization cannot work alone, so there are many non-governmental organizations and public and private entities that contribute to this fight, which aims to improve the living conditions of people living in the most disadvantaged regions, promoting equality between men and women. In this field of action, the work of physicians is fundamental, since in addition to their role in health care, they are of great importance in everything related to the education of the population in the field of International Cooperation

This program will present the main violations of human rights in the world, the reasons for human mobilizations and will make an approach to International Humanitarian Law, its fundamental objectives and strategic lines as an essential area of work in this field

This program combines basic knowledge in international development cooperation applied to the field of medicine, tools that allow the development worker to seek to improve the performance of their work in those areas that people and communities demand, guide them to change and focus them on the present situation through the cooperation tools and resources

In addition, as it is a 100% online program, the physician will be able to combine the study of this very complete program with the rest of their daily obligations, choosing at all times where and when to study. A high-level qualification that will take the medical professional to the highest level in their field of practice

This **Postgraduate Certificate in Human Rights and International Humanitarian Law** contains the most complete and up-to-date program on the market. The most important features of the program include:

- The development of case studies presented by experts in international cooperation of peoples
- Its graphic, schematic and practical contents are designed to provide scientific and practical incapacitation on those disciplines that are essential for professional practice
- Latest developments in Human rights and International law Humanitarian
- Practical exercises where the self-assessment process can be carried out to improve learning
- Emphasis on innovative methodologies in International Development Cooperation
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection work
- Content that is accessible from any fixed or portable device with an Internet connection

Doctors who wish to work in the field of International Cooperation will find in this very complete program the most relevant information on human rights"

Enter international humanitarian law, learn all its fundamental objectives and strategic lines and lead the change in the role of the physician facing this situation"

The program's teaching staff includes professionals from the sector who contribute their work experience to this training program, as well as renowned specialists from leading societies and prestigious universities

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive training programmed to train in real situations

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise throughout the program. This will be done with the help of an innovative system of interactive videos made by renowned experts

You will learn about the main violations of human rights in the world and the reasons for human mobilizations.

Study with TECH where, when and how you want. This Postgraduate Certificate is online and is available 24/7, adapting to your way of life.

### tech 10 | Objectives

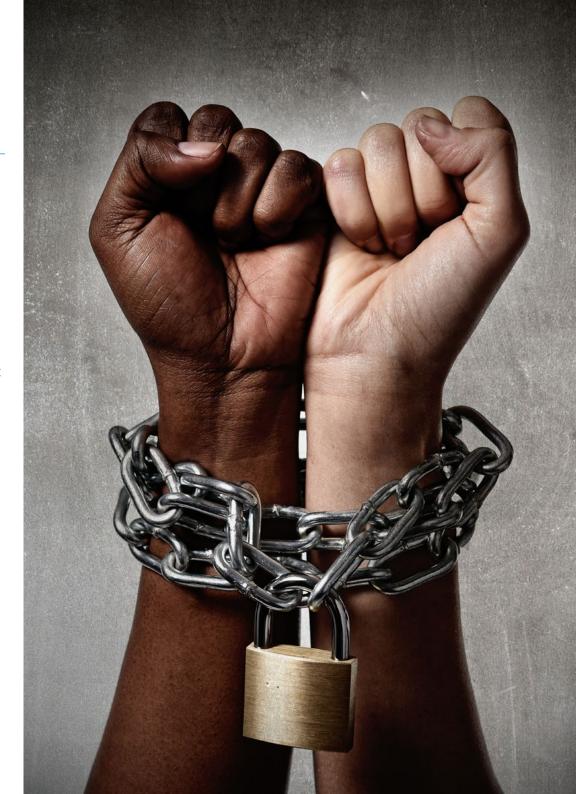

### **General Objectives**

- Provide students with advanced specialized training based on theoretical and instrumental knowledge in international cooperation
- Acquire and develop the skills necessary to obtain a qualification as an International Cooperation professional
- Provide the student with basic knowledge of the cooperation and development process based on the latest advances in policies on the sustainability processes involved in both economic and social aspects
- Improve professional performance and develop strategies for adapting and solving the problems of today's world by means of scientific research in cooperation and development processes
- Disseminate the basics of the current system and develop the critical and entrepreneurial spirit necessary to adapt to political changes, within the framework of international law

Get up to date on the latest developments in International Development Cooperation"

### **Specific Objectives**

- Understand, provide or collaborate in humanitarian activities directed to the victims of armed conflicts under the coverage of International Humanitarian Law
- Qualify the different types of armed conflicts by distinguishing them from other situations
  of armed violence; identify and classify the victims of such conflicts; know and understand
  the victim protection system and be able to apply it
- Be aware of the limitations that humanitarian law imposes on combatants in relation to the conduct of hostilities, respect for zones, places and installations marked with a protection sign, and the requirement of a code of conduct relating to victims, medical and religious personnel, and humanitarian organizations
- Identify situations and persons who are particularly vulnerable in armed conflicts, knowing the protection afforded to them by International Humanitarian Law
- Respond to crisis and humanitarian emergency situations by assessing the urgency of the situation and planning and developing actions to deal with them
- Stimulate the participation of the people and groups with whom cooperation activities are developed, enabling them to identify their problems and needs, lead their processes of change, assess their evolution and decide on new courses of action
- Meet the current requirements of specialization in social communication in view of the diversification and revaluation of communication
- Train social communicators who can apply their knowledge at the following levels
- Facilitate the functioning of primary organizations, acting, for example, in the field of family or youth
- Participate in the institutional communications of companies and organizations, with the public and with other organizations, for example, in the field of consumer or corporate image; political and electoral communications

- Be part of governmental and non-governmental organizations that work for the population in general, or for certain sectors of it, for example, in the areas of health, education, leisure activities, community development, social integration, among others
- Identify, understand and know how to use sources, statistical techniques and computer tools to organize selected information and plan development and cooperation reports, analyses and actions
- Conduct an ethical reflection on cooperation, incapacitation, images and their applicability in specific contexts and information sources
- Understand the concepts and definitions of NGOs
- Know the diversity of NGOs and their field or work
- Internalize the legislation of national and international NGOs, associations and foundations
- Learn the broad outlines of NGO management
- Work in multidisciplinary and multicultural teams as an expert in international development cooperation
- Identify, understand and know how to use sources and tools to identify international development cooperation projects

### tech 14 | Course Management

#### **Guest Director**

### Ms. Rodríguez Arteaga, Carmen

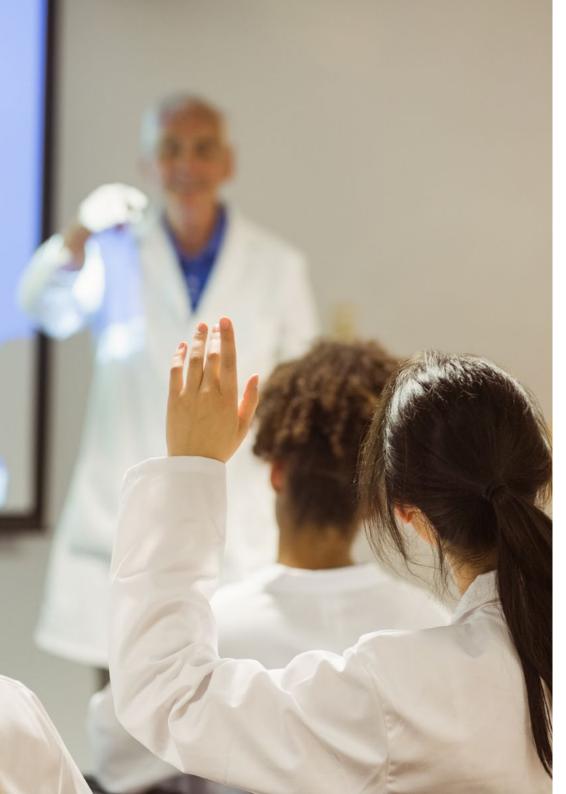

- Degree in Philosophy and Educational Sciences at UCM
- Expert in Educational Evaluation at OE
- Expert in Educational Indicators and Statistics at UNEI
- Expert in Development Cooperation in Education at the University of Barcelona
- Specialist in Knowledge Management
- Career Civil Servant

**Co-Direction** 

### Ms. Romero Mateos, María del Pilar

- Social Educator
- Postgraduate Diploma in International Development Cooperation
- Employment training teacher
- Gender Equality Agen
- Author and collaborator in educational projects at Abile Educativa

### Course Management | 15 tech

#### **Professors**

#### Ms. Sánchez Garrido, Araceli

- Degree in Geography and History with a major in Anthropology and Ethnology of America Complutense University of Madrid
- Deputy Head of Cultural Cooperation, Department of Cultural Cooperation and Promotion, Directorate of Cultural and Scientific Relations Since 2013

2.10.10. Save the children

### tech 26 | Methodology

#### At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the physician's professional practice.

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method"

#### The effectiveness of the method is justified by four fundamental achievements:

- Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that evaluate real situations and the application of knowledge.
- 2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
- 3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
- 4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

### Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

Professionals will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

### Methodology | 29 tech

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology, more than 250,000 physicians have been trained with unprecedented success in all clinical specialties regardless of surgical load. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

#### **Study Material**

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

#### **Surgical Techniques and Procedures on Video**

TECH introduces students to the latest techniques, the latest educational advances and to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

#### **Interactive Summaries**

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

#### **Additional Reading**

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

#### **Expert-Led Case Studies and Case Analysis**

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

#### **Testing & Retesting**

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

#### Classes

There is scientific evidence on the usefulness of learning by observing experts.

The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

#### **Quick Action Guides**

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

### tech 34 | Certificate

This **Postgraduate Certificate in Human Rights and International Humanitarian Law** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery\*.

The diploma issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees .

Title: **Postgraduate Certificate in Human Rights and International Humanitarian Law** Official N° of Hours: **300 h.** 

<sup>\*</sup>Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
