01

Introduction

The Postgraduate Certificate in Infectious and Oncologic Emergencies includes the main urgent infectious pathologies and those related to the oncological process, which may occur in family physician patients in the Primary Care Emergency Department. It also includes updated care procedures to correctly identify, treat and refer patients, as well as reduce possible future sequelae.

This Postgraduate Certificate addresses the main aspects of infectious and oncologic primary care emergencies, so that you will be able to face situations that can compromise a patient's life. Learn how to identify, initially care for and eventually transfer patients with infectious or oncologic problems from primary care to a hospital center”

This Postgraduate Certificate in Infectious and Oncologic Emergencies in Primary Care is a complete program that includes comprehensive plans of systematized care for emergencies in patients who come to the Primary Care center suffering from an infection or oncological process, and which family physicians must face in their usual clinical practice. In order to help them make prompt and accurate decisions to improve prognosis and reduce potential infectious pathology sequelae, whatever its cause.

It includes patient care procedures for H.I.V. infection, urinary tract infections or infections of unknown origin. It also establishes updated procedures for basic patient management in oncological emergencies: febrile syndrome in oncological patients, with special attention to febrile neutropenia, acute complications of chemotherapy treatment, asthenia-anorexia-cachexia syndrome or pain management and terminal sedation, using the latest educational technology that adapts to the needs of practicing physicians.

The program contents are based on the latest scientific evidence and the experience of renowned professionals in the field of Primary Care, which makes it practical and easy to transfer to routine clinical work.

Expand your knowledge through the Postgraduate Certificate in infectious and oncologic Emergencies in Primary Care in a practical way adapted to your needs”

This **Postgraduate Certificate in Infectious and Oncologic Emergencies in Primary Care** is the most complete and up-to-date scientific program on the market. The most important features of the Postgraduate Certificate are:

- Clinical cases presented by experts in the different specialties. The graphic, schematic, and eminently practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice.
- New diagnostic and therapeutic innovations in patient management for UTI, idiopathic fever or AIDS. It also includes updated procedures for basic patient management of oncologic emergencies and febrile syndrome in oncologic patients.
- Presentation of procedures and techniques to manage patients potentially exposed to contaminating material. EVE Code. And the approach to pain in oncology patients and terminal sedation.
- Algorithm-based interactive learning system for decision-making in the presented clinical situations.
- With a special emphasis on evidence-based medicine and research methodologies in emergencies.
- All this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments.
- Content that is accessible from any fixed or portable device with an Internet connection.

“

This Postgraduate Certificate may be the best investment you can make when choosing a refresher program for two reasons: in addition to updating your knowledge of infectious and oncologic emergencies in Primary Care, you will obtain a qualification from TECH - Technological University”

Forming part of the teaching staff is a group of professionals in the field of Primary Care emergencies, who bring to this training their work experience, as well as renowned specialists recognized by esteemed scientific communities.

The multimedia content developed with the latest educational technology will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive training program to train in real situations.

This program is designed around Problem Based Learning, whereby the physician must try to solve the different professional practice situations that arise during the course. For this reason, you will be assisted by an innovative, interactive video system created by renowned experts in the field of the primary health care emergencies with extensive teaching experience.

This Postgraduate Certificate includes real clinical cases and exercises to bring the development of the program closer to clinical practice”

Take the opportunity to update your knowledge of infectious and oncologic emergencies in Primary Care to improve patient care and family assistance.

02 Objectives

The main program objective is to develop theoretical and practical learning, so that physicians can practically and rigorously master life support maneuvers and invasive emergency techniques in primary health care.

“

This program will provide you with the skills to carry out your medical praxis with confidence, which will help you grow both personally and professionally”

General Objective

- Provide action rules for dealing with the infectious and oncologic emergencies that family physicians must face in their daily clinical practice, helping them to make prompt and accurate decisions.

Specific Objectives

- Establish the risk of exposure to potentially contaminating material.
- Describe the components of the EVD Code.
- Define the types of fever according to origin.
- Describe the most frequent urinary tract infections in Primary Care.
- Establish the typical clinical features of fever in HIV patients.
- Point out the precipitating agents in urinary tract infections.
- Determine how to proceed with patients that present psychomotor agitation.
- Address patient management after EVD code activation.
- Define the diagnosis for exanthema.
- Describe the signs and symptoms of oncology patients.
- Address the management of febrile neutropenia in oncologic patients.
- Define terminal sedation.
- Explain the types of pain that oncologic patients may suffer.
- Classify pain treatment according to the WHO analgesic ladder.
- Point out the appropriate techniques for the reduction of complications in chemotherapy treatment.

Seize the opportunity and take the step to get up to date on the latest developments in infectious and oncologic emergencies in Primary Care.

04

Course Management

This program includes in its teaching staff health professionals of recognized prestige who belong to the field of infectious patient care or oncological processes in Primary Care, and who pour into this training the experience of their work. In addition, renowned specialists, members of prestigious national and international scientific communities, are involved in designing and preparing the program.

“

Learn the latest advances in medical procedures for infectious and oncologic emergencies in primary health care from leading professionals”

Management

Dr. Roig D' Cunha, Francisco Vicente

- Degree in Medicine from the University of Valencia
- Specialist via MIR in Family and Community Medicine
- Assistant Physician of the Emergency Medicine Department at the Clinical University Hospital of Valencia.
- Professor of Human Anatomy at the European University of Valencia.
- Physician at the Valencia Health and Community Foundation.
- Doctor for the ASCIRES group

Professors

Dr. Brasó Aznar, José Vicente

- ◆ Hospital Emergency Physician
- ◆ Associate Professor of Emergency Medicine at the Faculty of Medicine of the University of Valencia.
- ◆ Head of Department Emergency Medicine. Ribera University Hospital

05

Structure and Content

The content structure has been designed by a team of professionals who recognize the implications of training in daily medical practice in infectious or oncological emergencies in Primary Care, who are aware of the relevance of current training to be able to treat infectious and oncological patients, and who are committed to quality teaching through new educational technologies.

“

This Postgraduate Certificate in Infectious and Oncologic Emergencies in Primary Care is the most complete and up-to-date scientific program on the market”

Module 1. Infectious Emergencies

- 1.1. Risk Exposure and Exposure to Potentially Contaminating Material EVD CODE
- 1.2. Fever in H.I.V. Infected Patients
- 1.3. Fever of Unknown Origin
- 1.4. Urinary Tract Infections
- 1.5. Fever and Rashes

Module 2. Oncologic Emergencies

- 2.1. Basic Management of Patients with Oncologic Emergencies
- 2.2. Febrile Syndrome in Oncology Patients (Special Attention to Febrile Neutropenia)
- 2.3. Pain and Terminal Sedation
 - 2.3.1. Types of Pain
 - 2.3.2. Pain Treatment
 - 2.3.3. Terminal Sedation
- 2.4. Acute Complications of Chemotherapy Treatment
 - 2.4.1. Mucositis
 - 2.4.2. Acneiform Rash
 - 2.4.3. Nausea and Vomiting
 - 2.4.4. Diarrhea
 - 2.4.5. Cachexia-Anorexia-Asthenia Syndrome.

“

*A unique, key, and decisive
Training experience to boost your
professional development”*

05

Methodology

This training provides you with a different way of learning. Our methodology uses a cyclical learning approach: Re-learning.

This teaching system is used in the most prestigious medical schools in the world, and major publications such as the *New England Journal of Medicine* have considered it to be one of the most effective.

“

Discover Re-learning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization”

At TECH we use the Case Method

In a given situation, what would you do? Throughout the program you will be presented with multiple simulated clinical cases based on real patients, where you will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you can experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gervas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching potential or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the physician's professional practice.

“

Did you know that this method was developed in 1912 at Harvard for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only grasp concepts, but also develop their mental capacity by evaluating real situations and applying their knowledge.
2. The learning process has a clear focus on practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Re-learning Methodology

At TECH we enhance the Harvard case method with the best 100% online teaching methodology available: Re-learning.

Our University is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

The physician will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Re-learning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best Spanish-speaking online university (Columbia University).

With this methodology we have trained more than 250,000 physicians with unprecedented success, in all clinical specialties regardless of the surgical load. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Re-learning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (we learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

In this program you will have access to the best educational material, prepared with you in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Latest Techniques and Procedures on Video

We introduce you to the latest techniques, to the latest educational advances, to the forefront of current medical techniques. All this, in first person, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This unique training system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides... in our virtual library you will have access to everything you need to complete your training.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, we will present you with real case developments in which the expert will guide you through the care provided and the resolution of different situations: a clear and direct way to achieve the highest level of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate your knowledge throughout the program, through assessment and self-assessment activities and exercises: so that you can see how you are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an expert strengthens knowledge and memory, and generates confidence in our difficult future decisions.

Quick Action Guides

We offer you the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help you progress in your learning.

06 Certificate

The Postgraduate Certificate in Infectious and Oncologic Emergencies in Primary Care guarantees, in addition to the most rigorous and updated specialization, access to a qualification issued by **TECH - Technological University**.

Successfully complete this training and receive your diploma without the hassle of travel or paperwork"

This **Postgraduate Certificate in Infectious and Oncologic Emergencies in Primary Care** is the most complete and up-to-date scientific program on the market.

After the student has passed the evaluations, they will receive by mail with acknowledgment of receipt their corresponding **certificate** issued by TECH Technological University.

The certificate issued by TECH - Technological University will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation.

Title: **Postgraduate Certificate in Infectious and Oncologic Emergencies in Primary Care**

ECTS: 3

Official Number of Hours: 75

*Apostille Convention. In the event that the student wishes to have their paper diploma Apostilled, TECH EDUCATION will make the necessary arrangements to obtain it at an additional cost of €140 plus shipping costs of the Apostilled diploma.
