Introduction

Like any globalized product, cosmetics have to go through the regulatory process of being accepted internationally, for which the different legal frameworks of the countries that want to adopt the product must be reviewed. That is why, from the medical field, professionals must update their knowledge to comply with current regulations when formulating any cosmetic product for different medical treatments. This program, which arises to cover this need to know the legislation in the USA as well as in Europe, Latin America or Asia, will be developed in a 100% online format, which will allow the medical professional to adapt their schedules and download from the Virtual Campus the content of the program. Thus, you can delve into the topics of interest in International Legislation of Cosmetic Products from any mobile device with internet connection.

“

This program will help you update your knowledge on the latest developments in the International Legislative Framework and Cosmetic Production"

Cosmetic Products, like pharmaceutical drugs, have to go through a demanding evaluation process, otherwise there would be too many products with sanitary issues. That is why, to mitigate the risk and make each product effective, the medical professional must update their knowledge of the regulatory laws for distribution and commercialization of cosmetics.

This program in International Legislation of Cosmetic Products will help the professional to update their information on the international legislative framework, since it is the main path to the success of a product. To this extent, if the professional knows which products are valid under the legal framework, he/she will know how to identify the best ones for each particular case. That is why this program will provide all the up-to-date information on cosmetics and its international legislation.

In this way, it will be easier to identify the new guidelines that determine the approval of a cosmetic product, justifying the effort of postulates and scientific processes of great importance to the field of medicine. That is why TECH has designed this program so that the professional can update their knowledge 100% online, so you can take the program without the need to attend classes in person, with access to the virtual campus and the ability to access from any mobile device with internet connection.

This innovative program contains a timely and effective thematic breakdown of important aspects of international cosmetic product legislation. Nourished by first class theoretical and practical content, specifically selected to bring out the highest potential of its graduates.

This **Postgraduate Certificate in International Legislation on Cosmetic Products** contains the most complete and up-to-date scientific program on the market. The most important features include:

- ♦ Practical cases presented by experts in Cosmetic Science and Technology
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where the self-assessment process can be carried out to improve learning
- ♦ Emphasis on innovative methodologies
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

A program designed for you to update your knowledge and identify the requirements followed by importers, distributors and manufacturers of cosmetic products"

“

Expand your knowledge of the international legislation applicable to cosmetics by accessing comprehensive topics on laboratory requirements and good practice manuals”

A specialized program for you, on the international legislative standards that regulate the use of cosmetic products in the medical sector.

Access all the virtual content from any mobile device with internet access.

The program includes, in its teaching staff, professionals from the sector who bring to this program the experience of their work, in addition to recognized specialists from prestigious reference societies and universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the academic year. For this purpose, the student will be assisted by an innovative interactive video system created by renowned and experienced experts.

02 Objectives

The main objective of TECH for this Diploma is to give informative support of the different medical updates that serve to regulate the use of cosmetic products in the international field. In this way, the professional of the medical sector will be able to know about the new updates and know the legislative reality of the different skin treatments prescribed for the dermatological alterations that are presented, having a wide catalog of products.

“

A program designed for medical personnel who wish to broaden their knowledge in the use of cosmetic products for the resolution of dermatological problems"

General Objectives

- ♦ Develop and analyze the trajectory of European and Extra-European Cosmetic Legislation
- ♦ Analyze ingredient inventory: examine the nomenclature ingredient and identify basic functions of ingredients
- ♦ Determine what a cosmetic laboratory is and the requirements of its activities
- ♦ Analyze cross-cutting legislation

Specific Objectives

- Identify the figure of the person in charge
- Comprehend Cosmetic Regulation from a practical point of view
- Define the functions of the Cosmetic Regulation department
- Analyze and present the Natural Products standard: ISO-Certifications
- Identify and apply CPNP Registration requirements

“

In this program, you will find the best academic tools so that you can achieve your objectives in a guaranteed way”

03

Course Management

The teaching staff of this Diploma in International Legislation of Cosmetic Products has been selected by TECH under a rigorous and selective process of educational excellence, since they are active professional experts Highly qualified professors who belong or have belonged to major scientific institutions In this way, the physician will update his knowledge based on his extensive professional experience, being able to apply it to his different cases and diagnoses in particular that require the use of cosmetic products.

“

This teaching chart will help you to update your knowledge on the correct use of cosmetic products and their regulation in the legislative framework"

Management

Dr. Mourelle Mosqueira, María Lourdes

- ◆ Expert researcher in Cosmetic Science
- ◆ Technical Director at Balcare
- ◆ Researcher of the FA2 group of the Applied Physics Department of the University of Vigo
- ◆ Author of publications on Cosmetic Science
- ◆ Lecturer in undergraduate and graduate programs related to Cosmetic Science
- ◆ President of the Iberoamerican Society of Thalassotherapy
- ◆ Secretary of the Galician Society of Thermal Peloids
- ◆ PhD in Applied Physics, University of Vigo
- ◆ Degree in Pharmacy, University of Santiago de Compostela
- ◆ Diploma in Nutrition and Dietetics, University of Granada

Professors

Ms. Aguado Ruiz, Belén

- ◆ Cosmetic Safety Advisor at ABAR Cosmetics
- ◆ Technical R&D Manager at Larrosa Laboratorios
- ◆ Quality Department Director at Gaher Química
- ◆ Cosmetic Safety Supervisor at LAB&CLIN ALLIANCE
- ◆ Expert Cosmetics Technician at Bellssan Healthcare
- ◆ International Master's Degree in Toxicology, Official College of Chemists of Seville
- ◆ Degree in Chemistry from the University of Alcalá de Henares

04

Structure and Content

The syllabus of this diploma has been designed by a team of experts who know the new updates in the medical sector. Thanks to this, it has been possible to create a detailed program with accurate information that will help the title professional in the different processes involving cosmetic products. This is a course full of informative, pedagogical and multidisciplinary content, where in addition to deepen on the latest updates and postulates, will provide the necessary tools for correct product identification and labeling.

“

This program is designed to bring you up to date with all the updates in medicine, delving especially into cosmetic products”

Module 1. International Legislation on Cosmetic Products

- 1.1. Regulations in Europe
 - 1.1.1. European Regulations-Legislation
 - 1.1.2. Regulation 1223/2009
 - 1.1.3. Borderline Products
- 1.2. Cosmetics Manufacturing Laboratory Requirements in Europe
 - 1.2.1. Registering Manufacturing Activities
 - 1.2.2. Good Manufacturing Practices
 - 1.2.3. Standard Operating Procedures
- 1.3. Requirements for Importers, Distributors and Providers Placing the Product on the Market
 - 1.3.1. Definitions Based on European Legislation
 - 1.3.2. Obligation Based on European Legislation
 - 1.3.3. Product Notification Portal Registration
- 1.4. Cosmetic Laboratory Areas
 - 1.4.1. Department Definitions
 - 1.4.2. Materials and Personnel Flow
 - 1.4.3. Industrial Equipment and Instrumentation
- 1.5. Regulatory Department: Function
 - 1.5.1. Safety Assessor
 - 1.5.2. Safety Assessment and Product Dossier
 - 1.5.3. Safety Assessment: Studies
- 1.6. ISO Standards and Certifications
 - 1.6.1. Good Manufacturing Practices
 - 1.6.2. Natural Cosmetic Products
 - 1.6.3. Quality
- 1.7. Regulations: The USA, Latin America and Asia
 - 1.7.1. USA Legislation
 - 1.7.2. Latin American Legislation
 - 1.7.3. Legislation in Asia
 - 1.7.4. Export Requirements

- 1.8. Transversal Legislation
 - 1.8.1. REACH Legislation
 - 1.8.2. CLP Legislation
 - 1.8.3. Other Legislation: Toys, Biocides, Others
- 1.9. Other legislation
 - 1.9.1. European Legislation: Borderline Products
 - 1.9.2. Personal Care Products
 - 1.9.3. Aerosol Legislation
- 1.10. Registration Requirements for Cosmetic Products in Other Countries (FDA, USA)
 - 1.10.1. Customs Services
 - 1.10.2. Labeling Requirements
 - 1.10.3. Differences in Definition between Cosmetics and Medication

“*You decide when and from where to connect: you will be able to access the virtual campus from any device with internet connection without a defined schedule*”

05

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the physician's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that evaluate real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

Professionals will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology, more than 250,000 physicians have been trained with unprecedented success in all clinical specialties regardless of surgical load. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Surgical Techniques and Procedures on Video

TECH introduces students to the latest techniques, the latest educational advances and to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence on the usefulness of learning by observing experts. The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06 Certificate

The Postgraduate Certificate in International Legislation on Cosmetic Products guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

*Successfully complete this program
and receive your university qualification
without having to travel or fill out
laborious paperwork”*

This **Postgraduate Certificate in International Legislation on Cosmetic Products** contains the most complete and up-to-date scientific program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The diploma issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Certificate International Legislation on Cosmetic Products**

Official N° of hours: **150 h.**

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
