01

Introduction

In the field of ophthalmology, Preoperative Evaluation in Refractive Surgery has become essential to guarantee a successful intervention and minimize risks. This has led health professionals to seek specialized training in this area. For this reason, TECH has developed a degree that focuses on patient selection, medical history, ophthalmologic history, preoperative studies, special considerations for each type of surgery and much more. Through a 100% online teaching methodology, which provides flexibility to organize academic resources and adapt to different schedules and learning styles. In addition to being based on Relearning, participants will acquire knowledge about the different aspects that must be taken into account before performing refractive surgery.

“

Do you want to know the most important aspects of the clinical history in the Preoperative Evaluation for Refractive Surgery? In this program, you will learn about current disease, personal and family history. Sign up now and become an expert in preoperative assessment!"

Refractive surgery has become an increasingly popular option for those who wish to correct their vision problems. However, before undergoing this procedure, it is important to perform a thorough preoperative evaluation to ensure that the patient is a suitable candidate and to minimize the risks associated with the surgery. In order to improve this quality of assessment, TECH has developed a Postgraduate Certificate that goes into all areas relevant to patient selection.

This program is essential for health professionals working in the field of Refractive Surgery. As more people opt for this procedure, it is critical that health care professionals are trained to perform accurate and thorough preoperative evaluations. In addition, it is necessary to keep up to date with the latest technologies and techniques in order to offer the best service to patients.

Therefore, the Postgraduate Certificate in Preoperative Evaluation in Refractive Surgery is a comprehensive program that covers all relevant aspects of patient selection, including medical history, ophthalmologic history, physical evaluation and preoperative studies. It also provides detailed information on the special considerations for each type of surgery. Participants will have access to the most up-to-date and rigorous scientific information on techniques and technological equipment used in this field.

the program a 100% online modality, which allows students to access lessons, moving from anywhere and at any time. The program has a 100% online modality, which allows participants to access the lessons from anywhere and at any time. Study materials include digital readings and case studies. At the end of the program, participants will be able to perform complete and accurate preoperative evaluations in Refractive Surgery.

This **Postgraduate Certificate in Preoperative Evaluation in Refractive Surgery** contains the most complete and up-to-date scientific program on the market. The most important features include:

- ♦ The development of case studies presented by medical experts focused on Preoperative Evaluation in Refractive Surgery
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where self-assessment can be used to improve learning
- ♦ Its special emphasis on innovative methodologies
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

Learn everything you need to select the perfect patient for Refractive Surgery In this degree in Preoperative Evaluation in Refractive Surgery. Enroll now!"

“

Get ready to perform a complete physical evaluation in the Preoperative Evaluation for Refractive Surgery thanks to this Postgraduate Certificate, where you will learn about visual acuity, keratometry and fundus”

With this program you will learn all about age, refractive defects, refractive stability and contraindications to make a proper Preoperative Evaluation in Refractive Surgery.

Enroll now and acquire the necessary knowledge to perform accurate and effective Preoperative Evaluations in Refractive Surgery.

The program's teaching staff includes professionals from sector who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

Its multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive education programmed to learn in real situations.

The design of this program focuses on Problem-Based Learning, by means of which the professional must try to solve the different professional practice situations that are presented throughout the academic course. For this purpose, the student will be assisted by an innovative interactive video system created by renowned experts.

02 Objectives

The aim of this degree is for students to acquire the necessary knowledge to perform a complete and detailed evaluation of each patient, in order to determine whether or not they are suitable to undergo Refractive Surgery. It is also intended that students are able to identify and evaluate possible complications that may occur during and after surgery, as well as to propose treatment alternatives when necessary. All this in order to provide comprehensive and quality care to patients who require these ophthalmological services.

“

Learn to identify the indications and contraindications necessary for a successful Refractive Surgery thanks to this Postgraduate Certificate in Preoperative Evaluation in Refractive Surgery”

General Objectives

- ♦ To delve into the basic principles of optics, as well as refractive defects and their treatment possibilities
- ♦ Describe the corneal morphology and function on which much of Refractive Surgery is applied
- ♦ To investigate the indications and contraindications of Refractive Surgery, as well as the algorithms used for the surgery
- ♦ Obtain an update on the studies to be performed on patients in order to correctly assess the indication for surgery
- ♦ Describe the processes of preparation for Refractive Surgery
- ♦ To deepen in the different techniques applied on the cornea for the correction of refractive errors
- ♦ Identify the surgeries that can be performed on the crystalline lens to eliminate the patients' graduation defects
- ♦ Be aware of the different lenses that are used for this surgery without acting on the cornea or lens
- ♦ To deepen the relationship between Glaucoma and Refractive Surgery

Specific Objectives

- ♦ Delve into in the indications and contraindications for surgery, both ocular, systemic and familial
- ♦ Describe the pre-surgery tests that are performed to obtain the suitability of a patient prior to surgery

“

Increase your knowledge in preoperative evaluation in Refractive Surgery and become a highly trained specialist in the field of ophthalmology”

03

Course Management

The team in charge of leading the Postgraduate Certificate in Preoperative Evaluation in Refractive Surgery is composed of highly trained specialists with a long history in the field of ophthalmology and refractive surgery. These professionals have been carefully selected for their experience in selecting patients for surgery and for their skill in performing surgical procedures in this area. They also have a strong research background and are committed to providing students with the most rigorous information on the techniques and technological equipment used in the preoperative evaluation of refractive surgery.

“

Students in this degree program can acquire a thorough and comprehensive knowledge that will enable them to perform accurate and effective preoperative assessment in this field"

Management

Dr. Román Guindo, José Miguel

- Ophthalmologist at Oftalvist Málaga
- Ophthalmologist at Vissum Madrid
- Ophthalmologist at Dubai International Medical Center
- Medical Director of Vissum Madrid Sur and Vissum Málaga
- Specialist in Ophthalmology at the San Carlos Clinical Hospital
- Doctor in Ophthalmology
- Degree in Medicine and Surgery General: from the Autonomous University of Madrid
- Member of Spanish Society of Ophthalmology, International Society of Ocular Inflammation, International Society of Ocular Inflammation

Dr. Alaskar Alani, Hazem

- ♦ Ophthalmologist at Oftalvist Málaga
- ♦ Surgical Director of Poniente University Hospital
- ♦ Head of the Ophthalmology Diseases Department, Poniente Hospital
- ♦ Specialist in Ophthalmology at the Puerta De las Nieves University Hospital
- ♦ Degree in Medicine and Surgery from the University of Valencia
- ♦ Doctor of Medicine and Surgery from the University of Almería
- ♦ Master's Degree in Health Management and Planning, European University of Madrid
- ♦ Master's Degree in Ophthalmology Medicine from Cardenal Herrera University
- ♦ Member of: European Retina Society EURETINA, SEDISA, The Spanish Society of Health Managers, Fellow of the European Board of Ophthalmology, FEBO European Society of Cataract and Refractive Surgery, ESCRS, Spanish Society of Implanto Refractive Surgery SECOIR, Andalusian Society of Ophthalmology SAO, Spanish Society of Retina and Vitreous SERV, Fellow of the European School of Retina and Vitreous Surgery EVRS

04

Structure and Content

The agenda of this Postgraduate Certificate addresses in detail the selection and evaluation of patients for Refractive Surgery. Among the main topics of the program are the evaluation of the patient's clinical history, including ophthalmologic history and previous medications, as well as the physical evaluation and the performance of preoperative studies, such as retinal analysis and other special studies. In addition, special considerations are provided for each type of surgery, including laser, intraocular lens and phaco-refractive surgery. All this 100% online, without the need for travel or strict schedules.

“

Learn in a 100% online and easily accessible training. What are you waiting for? Enroll now and get your degree in Preoperative Evaluation in Refractive Surgery"

Module 1. Preoperative Evaluation for Refractive Surgery

- 1.1. Patient selection for Refractive Surgery
 - 1.1.1. Age
 - 1.1.2. Refractive defects
 - 1.1.3. Refractive stability
 - 1.1.4. Presence of contraindications
- 1.2. Medical History
 - 1.2.1. Current disease
 - 1.2.2. Personal background
 - 1.2.3. Family Background
 - 1.2.4. Previous surgeries
- 1.3. Ophthalmologic History
 - 1.3.1. History of previous procedures
 - 1.3.2. History of personal ocular pathologies
 - 1.3.3. Family history of ocular pathologies
 - 1.3.4. History of contraindication in another center
- 1.4. Medications
 - 1.4.1. General Notions
 - 1.4.2. Amiodarone
 - 1.4.3. Venlafaxine
 - 1.4.4. Sumatriptan
 - 1.4.5. Isotretinoin
- 1.5. Expectations
 - 1.5.1. Patient Expectations
 - 1.5.2. What we can offer
 - 1.5.3. Alternatives to the treatment proposed by the patient
 - 1.5.4. Avoid problems
- 1.6. Physical Evaluation
 - 1.6.1. Visual acuity
 - 1.6.2. Keratometry
 - 1.6.3. Biomicroscopy
 - 1.6.4. Fundus

- 1.7. Preoperative studies
 - 1.7.1. Ocular surface analysis
 - 1.7.2. Corneal biomechanics analysis
 - 1.7.3. Biometry and pupils
 - 1.7.4. Optical Coherence Tomography (OCT)
- 1.8. Study of the retina
 - 1.8.1. Papilla
 - 1.8.2. Macula
 - 1.8.3. Vascular Disorders
 - 1.8.4. Peripheral retina
- 1.9. Other studies
 - 1.9.1. Endothelial count
 - 1.9.2. Meibography
 - 1.9.3. Contrast Sensitivity
 - 1.9.4. Aberrometry
- 1.10. Special considerations for each type of surgery
 - 1.10.1. Laser Refractive Surgery
 - 1.10.2. Refractive surgery with intraocular lens
 - 1.10.3. Phaco-refractive surgery
 - 1.10.4. Secondary implant surgery

“With a complete content prepared by TECH and based on the most cutting-edge studies and research in the field, you will learn about *Preoperative Evaluation in Refractive Surgery*”

05 Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gervas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the physician's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that evaluate real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

Professionals will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology, more than 250,000 physicians have been trained with unprecedented success in all clinical specialties regardless of surgical load. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Surgical Techniques and Procedures on Video

TECH introduces students to the latest techniques, the latest educational advances and to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

06 Certificate

The Postgraduate Certificate in Preoperative Evaluation in Refractive Surgery guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

*Successfully complete this program and
receive your university qualification without
having to travel or fill out laborious paperwork”*

This **Postgraduate Certificate in Preoperative Evaluation in Refractive Surgery** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TTECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Certificate on Preoperative Evaluation in Refractive Surgery**

Official N° of Hours: **150 h.**

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
