Introduction

The latest scientific evidence shows that approximately one billion people in the world suffer from some type of mental disorder. Among the most common are schizophrenia, delusional pathologies or acute and transient psychotic illnesses. These figures highlight the need for effective psychiatric health care in the communities, which allow for the development of quality of life. Faced with this situation, physicians have the duty to constantly renew their knowledge. However, this is a complex task due to the existing over-information. For this reason, TECH has developed a revolutionary program that combines the current approach to psychotic disorders. And all in a 100% online comfortable methodology.

“

You will master mechanical restraint and its peculiarities in Mental Health thanks to this 100% online university program"

Cultural attitudes toward mental health and psychotic disorders can have a major impact on patients. For example, some cultures interpret their symptoms as a manifestation of spiritual possession. As a result, stigma is created, which can result in people with mental illness not seeking appropriate help or accessing appropriate treatment. Faced with this situation, psychologists can promote social awareness of psychotic illnesses. In this way, they will help to debunk false myths and beliefs about conditions such as Psychotic Depression.

For this reason, TECH implements a complete program that will provide experts with new perspectives and approaches in Psychotic Disorders. With the support of an experienced teaching staff, the curriculum will offer the evolution that women in mental health have experienced. Likewise, the syllabus will delve into the new conceptualization of "Psychiatric asylum", taking into account the most contemporary ideological proposals. On the other hand, didactic materials will explore new social policies in this area and the multidisciplinary model in the therapeutic approach. In this way, graduates will be able to make the most appropriate diagnostic approaches to psychotic disorders. Students will also be able to innovate by establishing new lines of scientific research in these mental illnesses.

It should be noted that, in order to consolidate these contents, TECH offers a 100% online educational environment, adapted to the needs of busy professionals seeking to advance their careers. In addition, it will employ the *Relearning* methodology, based on the repetition of key concepts to fix knowledge and facilitate learning. In this way, the combination of flexibility and a robust pedagogical approach makes it highly accessible. In fact, students will be able to access a library full of multimedia resources in different audiovisual formats, such as interactive summaries, photographs, explanatory videos, real clinical cases and infographics.

This **Postgraduate Certificate in Psychotic Disorders Today** contains the most complete and up-to-date scientific program on the market. Its most notable features are:

- The development of practical cases presented by experts in Psychotic Disorders.
- The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice.
- Practical exercises where self-assessment can be used to improve learning.
- Its special emphasis on innovative methodologies
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

This comprehensive program addresses the main scientific advances in substance use and the correlation of psychotic disorders"

“

*the correlation of psychotic disorders"
Want to delve into new lines of
research on schizophrenia, delusions
and hallucinations? Get it in just over
6 weeks with this university program"*

The program's teaching staff includes professionals from the sector who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the academic year. For this purpose, the students will be assisted by an innovative interactive video system created by renowned and experienced experts.

*Enrich your professional practice with
a new approach based on the gender
perspective in Psychotic Disorders.*

*You will have at your disposal at all times
the Relearning, an exclusive system that
facilitates the assimilation of complex
contents in a progressive and rigorous way.*

02

Objectives

Through 150 hours of learning, the graduates will update the cultural and gender aspects in the approach to psychotic disorders. In this way, students will master the different diagnostic techniques and their respective novelties in these pathologies. Likewise, students will have a broad vision of the legal aspects concerning psychotic entities. In this way, they will be able to make the leap to the most prestigious international health institutions.

“

A unique, key and decisive academic opportunity to boost your professional development: this is the TECH program"

General Objectives

- ♦ Delve into the current classification of Psychotic Disorders in the different manuals: DSM-5 and ICD-11
- ♦ Consolidate the fundamental clinical aspects of Psychotic Disorders
- ♦ Gain knowledge about the evolution of Psychotic Disorders over time
- ♦ Identify the different types of Psychotic Disorders, their clinical characteristics and diagnosis
- ♦ Delve into the different diagnostic techniques and their new developments in Psychotic Disorders
- ♦ Perform a correct diagnostic approach to Psychotic Disorders
- ♦ Master the different pharmacological and psychotherapeutic approaches to Psychotic Disorders
- ♦ Detail and know the bio-psycho-social influence of Psychotic Disorders in children and adolescent, adult and elderly stages
- ♦ Learn about new approaches to intervention in the rehabilitation of schizophrenia and psychotic disorders
- ♦ Delve into new lines of scientific research in psychotic disorders

Specific Objectives

- Enable the student to discuss new issues and debates on Psychotic Disorders
- Update the cultural and gender aspects and their influence on the approach to psychotic disorders
- Deepen in the legal aspects concerning psychotic entities

You will be able to access the Virtual Campus at any time and download the contents to consult them whenever you wish”

03

Course Management

With the aim to offer educational maximum excellence, TECH has a prestigious teaching faculty. In addition, these professionals have an extensive work background, which has allowed them to be part of teams belonging to distinguished hospitals. Therefore, the syllabus is characterized by having the most updated and complete contents on Psychotic Disorders. In addition, they provide students with the most advanced technological tools to contribute to the well-being of their patients.

“

TECH provides you with quality education thanks to the specialized teaching team with extensive professional experience”

Management

Dr. Soto Laguna, Marta

- Psychiatrist Expert in Anxiety Disorders
- Psychiatrist at Enova Medical Center
- Author and co-author of book chapters related to Psychiatry
- Co-author of articles for scientific journals
- Speaker at congresses and conferences in her specialty
- Master's Degree in Legal Psychiatry from the Complutense University of Madrid.

04

Structure and Content

Designed by a highly qualified teaching team in Psychiatric Medicine, this curriculum will focus on the psychotic entity today. In this way, the syllabus will delve into the different connotations that psychotic disorders have in different cultures. Likewise, the academic materials will address the legal issue and how the law influences certain issues of this type of mental pathology. On the other hand, an approach to the multidisciplinary model in these diseases will be offered. New studies and future scientific lines will also be analyzed so that graduates can face future challenges.

“

Do you want to experience a leap in quality in your career? With TECH you will acquire an original vision on the Psychotic Disorders in force in society"

Module 1. Psychotic Disorders Today

- 1.1. The Psychotic Entity and its Shift of Focus in the Social Paradigm
- 1.2. Gender Perspective in Psychotic Disorders
 - 1.2.1. The Evolution of Women in Mental Health
- 1.3 Current Approach to Psychotic Disorders in Mental Healthcare
 - 1.3.1. New Studies
- 1.4. The Cultural Influence on the View of the Psychotic Spectrum
- 1.5. Internment of Psychotic Disorders
 - 1.5.1. New Conceptualization of "Psychiatric"
 - 1.5.2. New Voices and Ideological Proposals
- 1.6. The Law and Psychotic Disorders
 - 1.6.1. Mechanical Restraint and its Peculiarities in Mental Health
- 1.7. New Social Policies in Mental Health and their Impact on the Psychotic Spectrum
- 1.8. Multidisciplinary Model in the Therapeutic Approach to Psychotic Disorders
- 1.9. New Perspectives and Diagnostic Approaches in the Psychotic Spectrum
- 1.10. Future Challenges
 - 1.10.1. Current Lines of Research in Psychotic Disorders

“

No rigid schedules or evaluation timelines. That's what this TECH university program is all about"

05

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the physician's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that evaluate real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

Professionals will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology, more than 250,000 physicians have been trained with unprecedented success in all clinical specialties regardless of surgical load. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Surgical Techniques and Procedures on Video

TECH introduces students to the latest techniques, the latest educational advances and to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence on the usefulness of learning by observing experts. The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06 Certificate

The Postgraduate Certificate in Psychotic Disorders Today guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This **Postgraduate Certificate in Psychotic Disorders Today** contains the most complete and up-to-date scientific program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via **tracked delivery***.

The diploma issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees.

Title: **Postgraduate Certificate in Psychotic Disorders Today**

Official N° of Hours: **150 h.**

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
