# Introduction

COVID-19 infections can cause serious respiratory illnesses in affected patients, above all when they already have a pre-existing pathology that could be affected by the illness. That's why the use of respiratory physiotherapy in this field is essential to improve the health of these patients as well as favoring their recovery. At TECH we have designed this innovative academic program to improve the training of rehabilitation physicians in this currently very highly-demanded field.

“

*Learn the main tools for treating patients with COVID and help them to recover their respiratory ability”*

The COVID-19 virus has interrupted our lives. Although it is a great unknown in the health field, what has been demonstrated is the need for respiratory physiotherapy for the treatment of this infection and its subsequent sequelae, since this infection considerably affects respiratory capacity. Logically, the studies on this illness are completely new, but research hasn't stopped since this infection appeared in society.

Therefore, training in respiratory physiotherapy in COVID treatment is necessary for all medical professionals working with patients with coronavirus, but especially for rehabilitation physicians, as their intervention can drastically help in the improvement of a patient's condition.

Respiratory physiotherapy is part of physiotherapy, but focusing on the pathophysiology of the respiratory system, both medical and surgical, requiring a demanding knowledge of the respiratory system and the existing techniques for its treatment, healing and stabilization. For this reason, highly trained professionals are required to offer personalized treatments that allow patients to recover effectively.

The Postgraduate Certificate has specialised teaching staff in Respiratory Physiotherapy, who contribute both their practical experience from their day-to-day work in practice, as well as their extensive experience in teaching at a national and international level. In addition, it has the advantage of being a 100% online training, so the student can decide from where to study and at what time. This way, you will be able to flexibly self-direct your study hours.

This **Postgraduate Certificate in Respiratory Physiotherapy in COVID for Rehabilitation Physicians** contains the most complete and up-to-date scientific program on the market. The most important features of the program include:

- Clinical cases presented by experts in Respiratory Physiotherapy.
- The graphic, schematic, and eminently practical contents with which they are created, provide scientific and healthcare training on those medical disciplines that are essential to professional practice.
- The presentation of practical workshops on procedures and techniques.
- An algorithm-based interactive learning system for decision-making in the clinical situations presented throughout the course.
- Action protocols and clinical practice guidelines, which cover the most important and latest developments in this specialist area.
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments.
- Special emphasis on test-based medicine and research methodologies.
- Content that is accessible from any fixed or portable device with an Internet connection.

*This Postgraduate Certificate is the best option you can find to increase your knowledge on Respiratory Physiotherapy and add another dimension to your professional career"*

**“** *This program is the best investment you can make when studying a specialist course to update your knowledge in Respiratory Physiotherapy”*

*This 100% online Postgraduate Certificate will allow you to study from anywhere in the world. All you need is a computer or mobile device with an internet connection*

*Our innovative teaching methodology will allow you to study as if you were dealing with real cases, and therefore increasing your training*

The teaching staff includes a team of prestigious urologists, who bring their experience to this training program, as well as renowned specialists from leading scientific societies.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive training experience designed to train for real-life situations.

This program is designed around Problem Based Learning, whereby the physician must try to solve the different professional practice situations that arise during the academic course. For this reason, you will be assisted by an innovative, interactive video system created by renowned and experienced experts in the field with extensive teaching experience.

# 02 Objectives

The Postgraduate Certificate in Respiratory Physiotherapy in COVID for Rehabilitation **Physicians** is aimed at facilitating the medical professional's performance with the latest advances and most innovative treatments in the sector. Its objective is to take you through a training that will allow you to acquire the most updated knowledge for the most advanced and competitive praxis in this field.

“

*With a real practical objective, this course will allow you to achieve your training goals by boosting your CV to a higher level of excellence"*

## General Objectives

---

- ♦ To promote specialization in respiratory physiotherapy.
- ♦ To update knowledge and manage physiotherapy in different patients with respiratory pathologies.
- ♦ Possess knowledge of the pathophysiology and advanced exploration of the respiratory system.
- ♦ Execute, direct and coordinate the respiratory physiotherapy intervention plan for each patient.

“

*Highly specialized objectives in a training course created to train the best professionals in Respiratory Physiotherapy"*

### Specific Objectives

- ♦ Manage respiratory physiotherapy treatment in COVID-19 critical care units.
- ♦ Apply the correct respiratory physiotherapy treatment in the ward.
- ♦ Become familiar with new scenarios of physical therapy intervention in the post-COVID era.

# 03 Course Management

The materials in the course have been created by a team of leading professionals in Respiratory Physiotherapy, who work in the main reference hospitals, bringing to the program the experience they have gained in their jobs throughout their careers.

“

*The best professionals in this area  
have joined forces to offer you the  
most specialized and up-to-date  
knowledge in the field"*

## Management

### García Coronado, Luis Pablo

- Physiotherapist at La Paz University Hospital
- Supervisor of the Physiotherapy Department at La Paz University Hospital.
- Specialist in sports Physiotherapy, Re-training, electrotherapy, Pilates and Therapeutic exercise.
- Director at Fisioespaña C. B.
- Director at Fisioganas S.L.
- Director at Pilates Wellness & Beauty S.L.

## Professor

### **Pérez-Esteban Luis-Yagüe, Teresa**

- Physiotherapist at Gregorio Marañón General University Hospital. November 2019-20 septiembre 2020
- Specialist in Respiratory Physiotherapy. University of Castilla La Mancha-Toledo
- Master's Degree in Manual Physical Therapy of the Locomotor System. University of Alcalá-Madrid
- Degree in Physiotherapy. Pontificia University of Salamanca, Salus Infirmorum-Madrid
- Online course of Basic Radiology for Physical Therapists.
- Therapeutic exercise update program by the Consejo Gral. Colegios de Fisioterapeutas de España (Spanish General Council of Physiotherapists' Associations)

# 04

## Structure and Content

The structure of the syllabus has been designed by a team of professionals who are knowledgeable regarding the implications of medical training in the approach to patients, aware of the relevance of current training and committed to quality teaching through new educational technologies.

“

*A very complete syllabus that will take you gradually through each and every one of the lessons that the Respiratory Physiotherapy professional needs. With an added bonus: the commitment to excellence that characterizes us"*

## Module 1. Respiratory Physiotherapy in COVID

- 1.1. Introduction
  - 1.1.1. Covid-19 Origin
  - 1.1.2. Evolution of the Coronavirus Epidemic
  - 1.1.3. Confinement and Quarantine
- 1.2. Vision Development
  - 1.2.1. Clinical Picture
  - 1.2.2. Methods and Detection Tests and Analyses
  - 1.2.3. Epidemiological Curve
- 1.3. Aisilation and Protection
  - 1.3.1. P.P.E. Personal Protective Equipment
  - 1.3.2. Types of Respiratory Protection Masks
  - 1.3.3. Hand Washing and Personal Hygiene
- 1.4. Pathophysiology in Covid-19
  - 1.4.1. Desaturation and Worsening from the Physical Therapy Point of View
  - 1.4.2. Complementary Tests
- 1.5. Patient Admitted to Hospital Pre-ICU/Post-ICU
  - 1.5.1. Risk Factors and Aggravating Factors
  - 1.5.2. Criteria for Patient Admission to an Inpatient Unit
  - 1.5.3. Critical Care Unit Admission
- 1.6. Critically Ill Covid-19 Patient
  - 1.6.1. Characteristics of Critical Patients Average Length of Stay
  - 1.6.2. Monitoring of Mechanical Ventilation VMI/VMNI
  - 1.6.3. Weaning Methods in Case of Improvement of the Clinical Picture

- 1.7. After-effects of Critical Patients
  - 1.7.1. Barthel's Scale
  - 1.7.2. DAUCI Post-ICU Acquired Weakness
  - 1.7.3. Swallowing Disorders
  - 1.7.4. Basal Hypoxemia
- 1.8. Separ Guide
  - 1.8.1. Research in COVID
  - 1.8.2. Scientific Articles and Bibliographic Reviews
- 1.9. Respiratory Physiotherapy Treatment
  - 1.9.1. Manage COVID-19 Respiratory Physiotherapy Treatment in Critical Care Units
  - 1.9.2. On-site Respiratory Physiotherapy Treatment.
  - 1.9.3. Discharge Recommendations.
- 1.10. Post-Covid-19 Era
  - 1.10.1. New Scenarios of Intervention in Physiotherapy.
  - 1.10.2. Preventative Actions

“ A unique, key, and decisive training experience to boost your professional development”

# 05 Methodology

This training provides you with a different way of learning. Our methodology uses a cyclical learning approach: ***Re-learning***.

This teaching system is used in the most prestigious medical schools in the world, and major publications such as the ***New England Journal of Medicine*** have considered it to be one of the most effective.

“

*Discover Re-learning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"*

## At TECH we use the Case Method

In a given situation, what would you do? Throughout the program you will be presented with multiple simulated clinical cases based on real patients, where you will have to investigate, establish hypotheses and, finally, resolve the situation. There is abundant scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

*With TECH you can experience a way of learning that is shaking the foundations of traditional universities around the world*

According to Dr. Gervas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching potential or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the physician's professional practice.

“

*Did you know that this method was developed in 1912 at Harvard for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”*

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only grasp concepts, but also develop their mental capacity by evaluating real situations and applying their knowledge.
2. The learning process has a clear focus on practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

## Re-Learning Methodology

At TECH we enhance the Harvard case method with the best 100% online teaching methodology available: Re-learning.

Our University is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

*The physician will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning*

At the forefront of world teaching, the Re-learning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best Spanish-speaking online university (Columbia University).

With this methodology we have trained more than 250,000 physicians with unprecedented success, in all clinical specialties regardless of the surgical load. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

*Re-learning will allow you to learn with less effort  
and better performance, involving you more  
in your training, developing a critical mindset,  
defending arguments, and contrasting opinions: a  
direct equation to success*

In our program, learning is not a linear process, but rather a spiral (we learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

In this program you will have access to the best educational material, prepared with you in mind:

#### Study Material

All the teaching materials are specifically created for the course by specialists who teach on the course so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

#### Latest Techniques and Procedures on Video

We introduce you to the latest techniques, to the latest educational advances, to the forefront of current medical techniques. All this, in first person, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

#### Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This unique multimedia content presentation training system was awarded by Microsoft as a "European Success Story".

#### Additional Reading

Recent articles, consensus documents, international guides. in our virtual library you will have access to everything you need to complete your training.

# 06 Certificate

The Postgraduate Certificate in Respiratory Physiotherapy in COVID for Rehabilitation Physicians guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Global University.

“

*Successfully complete this training and receive  
your university qualification without travel or  
laborious paperwork”*

This private qualification will allow you to obtain a **Postgraduate Certificate in Respiratory Physiotherapy in COVID for Rehabilitation Physicians** endorsed by **TECH Global University**, the world's largest online university.

**TECH Global University** is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** private qualification is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
