01

Introduction

Bariatric surgery treatment techniques are areas of knowledge in constant development in recent years. This program reviews the levels of evidence available, and then addresses the indications and contraindications for such surgery, based on the 2017 Clinical Pathway for Bariatric Surgery developed by SECO (The Spanish Society for Obesity Surgery).

“

*Improve the quality of care for your patients
with this innovative specialization in Obesity”*

Obesity, the true epidemic of the 21st century until the arrival of COVID-19, represents a major global health problem. The WHO estimates that it could affect 650 million people worldwide, with a mortality rate of some 2.8 million people each year.

It is a heterogeneous syndrome with constantly changing pathophysiology and etiopathogenesis (genetics, epigenetics, new hormonal control mechanisms, nutrigenomics, microbiomics, etc.). These advances are helping us to better understand the factors that affect the processes involved in energy homeostasis and in the development of obesity.

Obesity is a permanent focus of concern due to the ever-increasing number of cases and the related comorbidities. These lead to a significant increase in mortality, especially from cardiovascular illnesses and cancer. Furthermore, the various medical and surgical treatments available and the exponential increase in health care costs related to obesity, also makes it a focus of attention.

With this in mind, preventing obesity is essential. Through the use of a multidisciplinary approach, the aim is to implement lifestyle changes, in particular physical activity and diet, and these measures should be introduced as early on in the process as possible.

Professionals should know how to correctly diagnose obesity and the associated complications and propose appropriate treatment strategies for the three main areas of action: nutrition, physical exercise and attitudes towards food. Drugs and bariatric surgery may be added to this list for patients who demonstrate appropriate indications for such treatments.

In the last decade, there have been enormous advances in the understanding of obesity. This has brought Precision Medicine to the forefront of treatment, requiring the professional to be adequately prepared to provide new therapeutic responses. The enormous development of new technologies such as health apps, brought about by COVID-19, allows patient empowerment and decision-making support.

This **Postgraduate Certificate in Surgical Treatment for Obesity** contains the most complete and up-to-date scientific program on the market. The most important features include:

- ♦ Practical cases presented by experts in Obesity
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional development
- ♦ The latest information on Obesity
- ♦ Practical exercises where the self-assessment process can be carried out to improve learning
- ♦ A special emphasis on innovative methodologies in Obesity
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an internet connection

*This training is the best option
you can find to specialize in
Surgical Treatment for Obesity"*

“

This Postgraduate Certificate is the best investment you can make when selecting a refresher program for two reasons: In addition to updating your knowledge in Obesity, you will obtain a qualification endorsed by TECH Global University”

The teaching staff includes professionals from the field of Obesity, who bring their experience to this specialization program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive training programmed to train in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise throughout the program. For this purpose, the professional will be assisted by an innovative interactive video system created by renowned and experienced experts in Obesity with extensive medical experience.

*Take the step and join our team.
You will find the best educational material to enhance your studies.*

*This 100% online Postgraduate Certificate
will allow you to combine your studies
with your professional work while
increasing your knowledge in this field.*

02 Objectives

The Postgraduate Certificate in Surgical Treatment for Obesity is designed to facilitate the performance of medical professionals by providing them with the latest advances and the most innovative treatments in the sector.

“

*This is your opportunity to learn about
the latest treatments in Obesity”*

General Objectives

- Update the physician's knowledge on new trends in human nutrition in both health and pathological situations through evidence-based medicine
- Promote work strategies based on the practical knowledge of the new trends in nutrition and its application to child and adult pathologies, where nutrition plays a fundamental role in treatment
- Encourage the acquisition of technical skills and abilities, through a powerful audiovisual system, and the possibility of development through online simulation workshops and/or specific training
- Encourage professional stimulation through continuing education and research

An opportunity created for professionals who are looking for an intensive and effective Postgraduate Certificate with which to take a significant step forward in their profession"

Specific Objectives

- ♦ Correctly address the indications and contraindications of bariatric surgery
- ♦ Establish the preoperative protocol, with surgical risk stratification
- ♦ Recognize all the techniques of bariatric surgery
- ♦ Identify the appropriate technique for each patient
- ♦ In-depth knowledge of the endoscopic therapies currently in use, their indications and clinical management
- ♦ Knowing how to indicate metabolic surgery
- ♦ Postoperative care of the patient
- ♦ Identify the possible reasons for urgency after bariatric surgery
- ♦ Familiarization in the follow-up of pregnancy after bariatric surgery

03

Course Management

The program includes in its teaching staff leading experts in Obesity, who contribute their work experience to this academic program. Additionally, other recognized specialists participate in its design and preparation which means that the program is developed in an interdisciplinary manner.

“

*Leading professionals in the field
have come together to teach you
the latest advances in Obesity"*

International Guest Director

Considered as a reference in the treatment of **Metabolic Diseases** and **Obesity**, Dr. Samuel Szomstein is a prestigious **surgeon** who accumulates an extensive professional background of more than 25 years. In this way, he has been part of renowned institutions such as the Cleveland Clinic in the United States, where he has significantly optimized the quality of life of many patients with chronic disorders such as **Diabetes**.

Among his main achievements, his role as **Director of the Institute of Advanced Laparoscopic and Bariatric Surgery** stands out. Under his leadership, this institution has been a pioneer in the use of **minimally invasive techniques**, which has improved the patient experience by promoting a faster recovery. At the same time, these methods have considerably reduced the risk of additional complications such as infection, postoperative anemia and deep vein thrombosis. In this sense, it has contributed to the training of **70 professionals**, who have subsequently carried out more than **6,000 bariatric interventions** to treat excess weight.

On the other hand, he has balanced this work with his facet as a **Clinical Researcher**. In fact, he has published 25 chapters of specialized books and 280 scientific articles on subjects such as **new technologies** to enhance the safety of surgical procedures. In turn, his meticulous studies on the impact of Bariatric Surgery have allowed him to develop advanced strategies to optimize the **mental and physical well-being** of individuals after their operations.

In his commitment to healthcare excellence, he has participated in various international conferences to share the latest therapeutic advances in matters such as the most innovative **laparoscopic techniques** to reduce pain or the use of **robotics** in order to visualize in detail the anatomy of the users. This has made it possible for specialists to acquire a **multidisciplinary approach** to increase the effectiveness of their clinical results.

Dr. Szomstein, Samuel

- Director of the Institute for Metabolic and Bariatric Surgery at Cleveland Clinic, United States
- President of the International Committee of the American Society for Metabolic and Bariatric Surgery
- General Surgery Residency at Long Island Jewish Medical Center, United States
- Residency in General Surgery at New York Hospital Medical Center of Queens, United States of America
- Medical Degree from the Central University of Venezuela
- Member of: Committee of the International Federation for the Surgery of Obesity and Metabolic Disorders, Bariatric Surgical Practice and Patient Care, Iberoamerican Bariatric and Metabolic Surgery, Editorial Board of Bariatric Times

“

Thanks to TECH, you will be able to learn with the best professionals in the world”

Management

Dr. Puigdevall Gallego, Víctor

- ♦ Doctor of Medicine and Surgery
- ♦ Specialist in Endocrinology and Nutrition in Soria Hospital Complex
- ♦ Associate Professor in Valladolid University (academic courses 2005-2021)

Professors

Dr. Fernández Fernández, Luis

- ♦ Doctor of Medicine and Surgery
- ♦ Specialist in General Surgery in Soria Hospital Complex

04

Structure and Content

The structure of the content has been designed by leading professionals in the field of Obesity, with extensive experience and recognized prestige in the profession, backed by the volume of cases reviewed, studied, and diagnosed, and with extensive knowledge of new technologies applied to anesthesiology.

“

*This Postgraduate Certificate contains
the most complete and up-to-date
scientific program on the market”*

Module 1. Surgical Treatment for Obesity

- 1.1. Evidence Levels
- 1.2. Indications and Contraindications
- 1.3. Preoperative Assessment and Patient Selection
- 1.4. Surgical Techniques
 - 1.4.1. Malabsorptive
 - 1.4.2. Restrictive
 - 1.4.3. Mixed
- 1.5. Metabolic and Adaptive Surgery
- 1.6. Complications of Bariatric Surgery
- 1.7. Bariatric Surgery Emergencies
- 1.8. Postoperative Aftercare
- 1.9. Gestation After Bariatric Surgery
- 1.10. Future of Bariatric Surgery

“

*This training will allow you to advance
in your career comfortably"*

05 Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the physician's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that evaluate real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

Professionals will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology, more than 250,000 physicians have been trained with unprecedented success in all clinical specialties regardless of surgical load. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Surgical Techniques and Procedures on Video

TECH introduces students to the latest techniques, the latest educational advances and to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

06 Certificate

The Postgraduate Certificate in Surgical Treatment for Obesity guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Global University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This program will allow you to obtain your **Postgraduate Certificate in Surgical Treatment for Obesity** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
