Introduction

The use of conventional medicine to treat certain pathologies, especially chronic ones, has revealed its limitations, reinforcing the complementary therapeutic practice of integrative specialties. Diet therapy, physical activity, acupuncture, homeotherapy and many other techniques have made it possible to considerably improve the health of patients suffering from cancer, arthritis, diabetes or hypertension, among others. For this reason, medical professionals are paying more and more attention to this field and are committed to including strategies based on non-conventional methods in their practice, something our students will be able to work on with this 100% online program. They will have 450 hours of the best theoretical, practical and additional content to update their knowledge through the latest developments in the approach to frequent chronic diseases using integrative medicine.

Update your practice according to the latest developments in integrative medicine and offer your patients effective and innovative alternatives to treat chronic pathologies based on the latest advances in the field”

When a patient is diagnosed with any type of chronic disease, their lifestyle changes and is affected by a series of limitations that force them to adapt their routine to their new needs given their pathology. In these cases, conventional medicine usually administers palliative treatment to reduce pain without advocating a cure, which is what integrative medicine focuses on. This specialty combines traditional and natural strategies, reinforcing the approach to physiological, psychological, nutritional and social care. For this reason, the practice is increasingly used in clinical settings, usually centered around the highly beneficial results it has obtained in terms of non-invasive health promotion.

To provide specialists or newcomers in this field with the latest and most exhaustive information on its advances in recent years, TECH has developed a perfect program for this purpose. This is an innovative and dynamic academic experience that will allow our students to delve into the clinical management of common chronic diseases in integrative medicine, through the knowledge of the latest therapies that have been implemented in specialized practice. They will also be able to keep up with the latest developments in bioethics and the legal aspects that regulate the application of Traditional, Complementary and Integrative Medicine (TCIM) today.

To that end, we offer 425 hours of the best theoretical, practical and additional content, which will be presented in a convenient and flexible 100% online format. All this to guarantee medical specialists an academic experience that is perfectly compatible with their professional practice. Students will also be able to download all the material on any device with an internet connection, so they can access it whenever they want or need to, even after the six-month program has concluded.

This **Postgraduate Diploma in Approach to Chronic Diseases from Integrative Medicine** contains the most complete and up-to-date scientific program on the market. The most important features include:

- ♦ Case studies presented by experts in integrative medicine
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where self-assessment can be used to improve learning
- ♦ Its special emphasis on innovative methodologies
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

TECH offers you a 100% online course where you will find the latest news on preventive healthcare through proper nutrition and physical activity”

“

You will have access to an updated catalog of the main frequent chronic diseases and the most effective therapeutic techniques and approaches in clinical practice”

The teaching staff is made up of prestigious and renowned Spanish professionals, including experts from the field of integrative medicine and health, with a long career in health care, teaching and research, who have worked in different hospitals throughout the country, developing professional and teaching experience that they deliver in an extraordinary way in this Postgraduate Diploma.

The methodological design of this diploma has been developed by a multidisciplinary team of e-learning experts. Integrating the latest advances in educational technology for the creation of numerous multimedia educational tools that allow the professional, based primarily on the problem-based learning method, to address real problems in their daily clinical practice. This will allow them to advance by acquiring knowledge and developing skills that will impact their future professional work.

This program is designed around Problem-Based Learning, whereby the physician must try to solve the different professional practice situations that arise during the course. For this purpose, the physician will be assisted by an innovative interactive video system created by renowned and experienced experts in the field of integrative health and medicine and other related disciplines, with extensive teaching experience.

TECH will provide you with a state-of-the-art Virtual Campus, which you can access from any device with an internet connection.

A course for you to delve into the approach to oncological, nutritional, hepatic and renal pathologies, among others, using the most effective alternative and natural strategies.

02 Objectives

Integrative medicine as an alternative to natural treatments is becoming more and more common as patients demand attention that focuses not only on alleviating pain, but also on treating the origin of the pathology. For this reason, TECH has developed a complete program for specialists to work on updating their knowledge of approaches to chronic diseases. The program is designed to enable them to reach their highest professional expectations by offering a clinical practice based on the latest advances in complementary health promotion.

“

Whatever your goals, TECH will provide you with the necessary resources to not only achieve them, but to surpass them in less than the six months”

General objectives

- Provide the most avant-garde information on integrative medicine and preventive health
- Develop a series of clinical guidelines based on health innovation that increase the effectiveness and efficiency of the approach to patients with chronic diseases

“Would you like to implement in your practice the up-to-date use of community networks as a pillar of prevention and health promotion? Then this program is perfect for you. What are you waiting for?”

Specific objectives

Module 1. Approach to Frequent Chronic Diseases in Integrative Medicine I

- ♦ Review the degree of access to complementary medicine therapies in hospital settings
- ♦ Address the need to incorporate integrative medicine into health systems
- ♦ Reflect on the reduced expenditure and the improvement in quality of life related to the introduction of integrative medicine

Module 2. Approach to Frequent Chronic Diseases in Integrative Medicine II

- ♦ Understand what can be disclosed, to whom, for what reason and what is needed for disclosure
- ♦ Reflect on the need for academic and professional organization according to the regulatory framework of certain European countries
- ♦ Discuss the right of the individual as a patient to free access to integrative medicine
- ♦ Review the legal context of the application of Integrative Medicine, how to assess risk and mitigate cases of malpractice

03

Course Management

One of the characteristic features of this type of program is the inclusion of a teaching staff of the highest level in its curriculum, whose members have been selected on the basis of their long and extensive professional experience. Our students will thus benefit from their essential support, since they possess detailed knowledge of the field, and they will be available to resolve any doubts that may arise throughout the academic experience.

“

Having the support of a teaching team versed in integrative medicine will allow you to obtain a critical and personal vision of the current state of the profession”

International Guest Director

Dr. Chiti Parikh is a leading medical figure with an impressive career in Integrative Medicine. She began her clinical career at New York Presbyterian Hospital, where she soon rose to the position of executive director of the Integrative Health and Wellness program. In this role, Dr. Parikh oversees a team of more than 30 clinical and non-clinical staff members, providing a comprehensive set of services including nutrition, acupuncture, massage, health coaching, psychotherapy, pilates, meditation and yoga. She developed and launched a clinical fellowship in integrative medicine for physicians trained in family medicine and internal medicine, and incorporated integrative medicine education into the curriculum at Weill Cornell Medicine, in addition to establishing important collaborations with the department of oncology, pain management and palliative care to provide a holistic and compassionate treatment experience.

Dr. Parikh has also played a leading role in promoting awareness of integrative medicine, collaborating with professional societies and making regular contributions to media outlets such as the Dr. Oz Show, NBC News and VICE News. She has demonstrated a strong commitment to teaching and mentoring, providing learning and mentorship opportunities for medical students, residents, fellows and physicians interested in learning more about integrative medicine.

It is also important to note Dr. Parikh's international contribution in the field of human rights. As a volunteer medical evaluator for Physicians for Human Rights, she has conducted forensic medical evaluations for torture victims seeking asylum around the world. In addition, she has volunteered and consulted at the Weill Cornell Center for Human Rights, where she has guided students in conducting medical evaluations and educated them about human rights violations. These important contributions have elevated the relevance of her work in the international arena and reinforce her commitment to justice and human welfare.

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gervas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the physician's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that evaluate real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

Professionals will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology, more than 250,000 physicians have been trained with unprecedented success in all clinical specialties regardless of surgical load. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Surgical Techniques and Procedures on Video

TECH introduces students to the latest techniques, the latest educational advances and to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence on the usefulness of learning by observing experts. The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06 Certificate

The Postgraduate Diploma in Approach to Chronic Diseases from Integrative Medicine guarantees you, in addition to the most rigorous and up-to-date training, access to a Postgraduate Diploma issued by TECH Technological University.

“

Successfully complete this program and receive your university degree without travel or laborious paperwork”

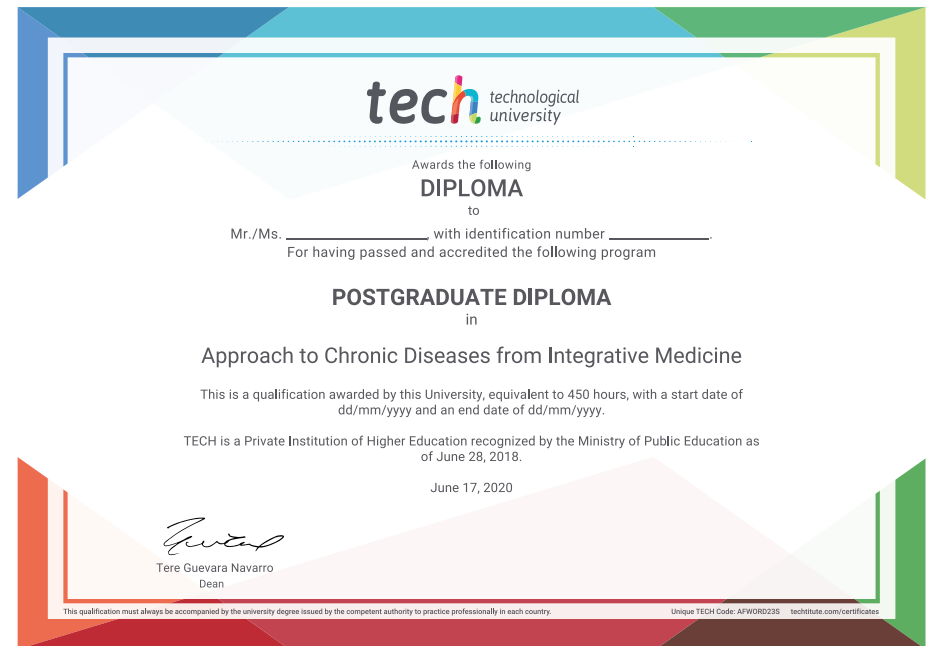

This **Postgraduate Diploma in Approach to Chronic Diseases from Integrative Medicine** contains the most complete and up-to-date scientific program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Diplomado** issued by **TECH Technological University** via tracked delivery*.

The diploma issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Diplomado, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Diploma in Approach to Chronic Diseases from Integrative Medicine**

Official N° of hours: **450 h.**

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
