Introduction

The use of conventional medicine to treat certain pathologies, especially chronic ones, has revealed its limitations, reinforcing the complementary therapeutic practice of integrative specialties. Therefore, through diet therapy, physical activity, acupuncture, homeotherapy and many other techniques, it has been possible to contribute to the considerable improvement of the health of patients with cancer, arthritis, diabetes or hypertension, among others. For this reason, medical professionals are paying more and more attention to this field and are committed to including strategies based on non-conventional methods in their practice, something they will be able to work on with the course of this 100% online program. You will have 450 hours of the best theoretical, practical and additional content to update your knowledge in relation to the latest developments in the approach to common chronic diseases through Integrative Medicine.

“

Upgrade your practice according to the latest developments in integrative medicine and offer your patients effective and innovative alternatives to treat chronic pathologies based on the latest advances in the field”

When a patient is diagnosed with any type of chronic disease, their lifestyle changes, being affected by a series of limitations that force them to adapt their routine to the new needs that have arisen due to the pathology. In this type of cases, conventional medicine usually prescribes a palliative treatment to reduce pain, but without advocating a cure, something that Integrative Medicine focuses on. This specialty combines traditional and natural strategies, reinforcing the approach to physiological, psychological, nutritional and social care. For this reason, the practice is increasingly used in clinical settings, usually centered around the highly beneficial results it has obtained in terms of non-invasive health promotion.

Based on this, and in order to provide specialists in this area or those interested in it with the latest and most comprehensive information on their progress in recent years, TECH has developed a perfect Postgraduate Diploma for it. This is an innovative and dynamic academic experience that will allow them to delve into the clinical management of common chronic diseases in Integrative Medicine, through the knowledge of the latest therapies that have been implemented in specialized practice. They will also be able to keep up with the latest developments in bioethics and the legal aspects that regulate the application of Traditional, Complementary and Integrative Medicine (TCIM) today. The program counts with the participation of a renowned international guest director, bringing her vast experience and world renown. Her knowledge in Integrative Medicine will enrich the *Masterclasses*, providing students with a global and current perspective on the key topics of the program.

To that end, we offer 425 hours of the best theoretical, practical and additional content, which will be presented in a convenient and flexible 100% online format. All this to guarantee medical specialists an academic experience that is perfectly compatible with their professional practice. In addition, you will be able to download all the material on any device with internet connection, so that you can access it whenever you want and need it, even when you have completed the 6 months of the degree.

International Guest Director

Dr. Chiti Parikh is a leading medical figure with an impressive career in **Integrative Medicine**. She began her clinical career at New York Presbyterian Hospital, where she soon rose to the position of **executive director of the Integrative Health and Wellness program**. In this role, Dr. Parikh oversees a team of more than 30 clinical and non-clinical staff members, providing a comprehensive set of services including nutrition, acupuncture, massage, health coaching, psychotherapy, pilates, meditation and yoga. Developed and launched a clinical fellowship in integrative medicine for physicians specializing in family medicine and internal medicine, and incorporated integrative medicine education into the curriculum at Weill Cornell Medicine, in addition to establishing important collaborations with the department of oncology, pain management and palliative care to provide a holistic and compassionate treatment experience.

Dr. Parikh has also played a leading role in promoting awareness of integrative medicine, collaborating with professional societies and making regular contributions to media outlets such as the Dr. Oz Show, NBC News and VICE News. She has demonstrated a **strong commitment to teaching and mentoring**, providing learning and mentorship opportunities for medical students, residents, fellows and physicians interested in learning more about integrative medicine.

Also, it is important to highlight the international contribution of the Dr. Parikh in the field of human rights. As a volunteer medical evaluator for Physicians for Human Rights, she has conducted forensic medical evaluations for torture victims seeking asylum around the world. In addition, she has volunteered and consulted at the Weill Cornell Center for Human Rights, where she has guided students in conducting medical evaluations and educated them about human rights violations. These important contributions have elevated the relevance of her work in the international arena and reinforce her commitment to justice and human welfare.

Structure and Content

The quality and prestige that define TECH and place it as one of the best digital universities worldwide have been the result of years of effort and struggle to form the best 100% online programs. And is that in each of them works a team versed in the area, which is responsible for selecting not only the theoretical information that makes up the agenda, but use cases based on real situations and hours of additional material of high quality. Thanks to this, it is possible to offer highly capacitating academic experiences compacted in a comfortable and flexible format that facilitates the specialization of the graduate from anywhere, without schedules through any device with internet connection.

“

The Virtual Campus includes detailed videos, research articles, complementary readings and much more additional material so you can personalize your study of each section”

Module 1. Approach to Frequent Chronic Diseases in Integrative Medicine I

- 1.1. Environmental Illnesses
 - 1.1.1. Fibromyalgia
 - 1.1.2. Chronic Fatigue
 - 1.1.3. Electrosensitivity
 - 1.1.4. Multiple Chemical Sensitivity

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gervas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the physician's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that evaluate real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

Professionals will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology, more than 250,000 physicians have been trained with unprecedented success in all clinical specialties regardless of surgical load. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

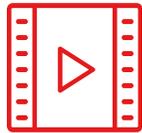

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Surgical Techniques and Procedures on Video

TECH introduces students to the latest techniques, the latest educational advances and to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

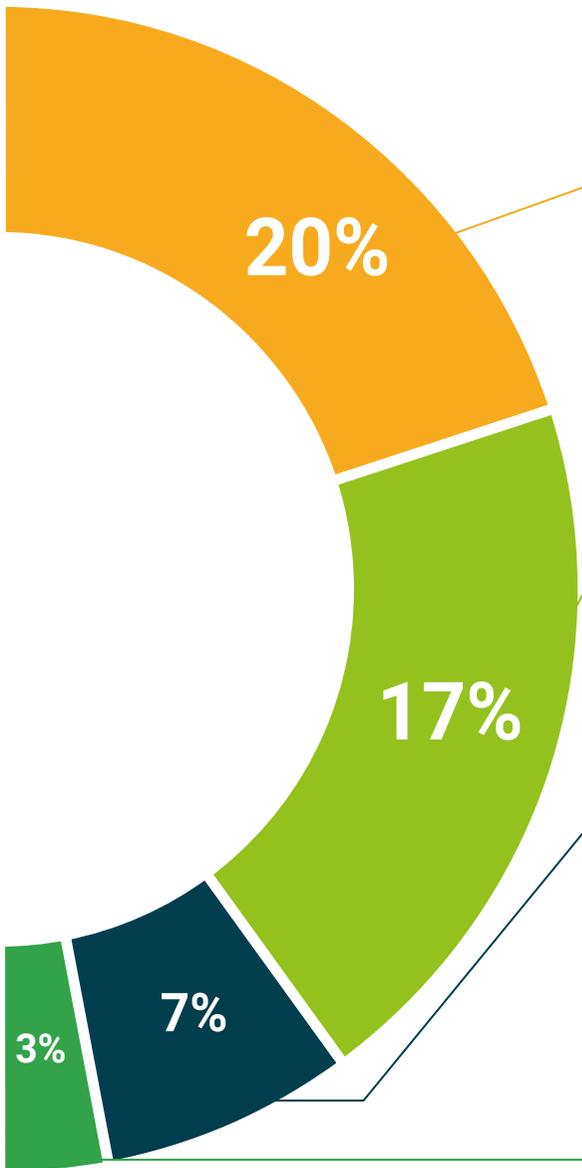

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence on the usefulness of learning by observing experts. The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06 Certificate

The Postgraduate Diploma in Approach to Chronic Diseases from Integrative Medicine guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Diploma issued by TECH Global University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"

This private qualification will allow you to obtain a **Postgraduate Diploma in Integrative Medicine Approach to Chronic Diseases** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** private qualification is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
