01

Introduction

Infectious diseases, due to their frequency in emergency department and primary care, account for more than 60 percent of consultations. From the end of the neonatal period to 5 years of age, pneumonia, malaria and diarrhea are the main causes of death. As can be intuited, this leads to a therapeutic approach, which in many cases will be with antibacterial, antiviral or antifungal agents.

“

The Postgraduate Diploma in Infection in Primary Care the most complete and up-to-date scientific program on the market”

Infectiology is constantly undergoing changes. At the epidemiological level, with the emergence or re-emergence of certain diseases that are unknown or have little practice (zika, chikungunya, hemorrhagic fevers, among others), others that have fallen into oblivion or are unknown to younger physicians such as diphtheria, measles, whooping cough or flaccid paralysis associated with the polio vaccine virus.

At the therapeutic level, the emergence of resistance (BLEES, MRSA, carbapenem-resistant enterobacteria, etc.), often caused by our unwise and rational use of drugs, creates problems for the clinician when it comes to initial empirical treatment in certain situations.

At the diagnostic level, the increasingly frequent availability of new techniques allows a more rapid etiological diagnosis or by complementary techniques that require clinical diagnostic orientation such as ultrasound, computed tomography or magnetic resonance imaging. Without forgetting the support that the clinician has in laboratory tests that determine acute phase reactants such as procalcitonin or C-reactive protein, which are sometimes given excessive importance, forgetting that we treat patients and not laboratory results.

All this means that, in order to attend these patients with the maximum guarantee, the clinician must maintain a continuous training, even if they are not a specialist, since, as we have mentioned, the percentage of visits or interconsultations related to the infection is very high. If we add to this the increasing amount of information provided by parents, sometimes not always contrasted, professional updating becomes essential to be able to provide adequate information according to the current scientific evidence at all times.

The **Postgraduate Diploma in Infection in Primary Care** the most complete and up-to-date scientific program on the market. The most important features of the program include:

- ♦ Clinical cases presented by experts in the different specialties. The graphic, schematic, and eminently practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice.
- ♦ Developments on Infections in Primary Care
- ♦ Algorithm-based interactive learning system for decision-making in the presented clinical situations.
- ♦ With a special emphasis on evidence-based medicine and research methodologies in Primary Care Infections.
- ♦ All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments.
- ♦ Content that is accessible from any fixed or portable device with an Internet connection.

Update your knowledge through the Postgraduate Diploma in Infection in Primary Care in a practical way and adapted to your needs"

“

This Postgraduate Diploma may be the best investment you can make in the selection of an updated program for two reasons: in addition to updating your knowledge in Infection in Primary Care , you will obtain a Postgraduate Diploma from TECH - Technological University"

It includes in its teaching staff health professionals belonging to the field of Primary Care Infection, who pour into this training the experience of their work, in addition to recognized specialists belonging to scientific societies of reference.

The multimedia content developed with the latest educational technology will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive training program to train in real situations.

This program is designed around Problem Based Learning, whereby the physician must try to solve the different professional practice situations that arise during the course. For this reason, you will be assisted by an innovative, interactive video system created by renowned and experienced experts in the field of Infectious Diseases in Primary Care and with great teaching experience.

Increase your decision-making confidence by updating your knowledge with this Postgraduate Diploma in Infection in Primary Care.

Don't miss the opportunity to update your knowledge in Infection in Primary Care to improve patient care.

02 Objectives

The main objective of the program is the development of theoretical and practical learning, so that the physician can master in a practical and rigorous way the study of Infection in Primary Care.

“

This refresher program will generate a sense of security in the performance of the physician's praxis, which will help you grow personally and professionally"

General Objectives

- Update the knowledge of the pediatrician or the physician who treats children, through the latest advances in the field of Primary Care Infectious Diseases, in order to increase the quality of care, the safety of the physician and achieve the best outcome for the patient.

Specific Objectives

- Describe the current epidemiology with the changes that have occurred in the last decade.
- Identify the epidemiological situation of bacterial meningitis.
- Explain the epidemiology of tuberculosis in our environment and the resistance to treatment.
- Describe the microbiome, its relationship to health and disease.
- Describe the clinical manifestations of diseases affecting the skin and soft tissues.
- Develop a correct strategy in the differential diagnosis of diseases with exanthema.
- Identify complications of diseases such as community-acquired pneumonia or pyelonephritis.
- Describe the management of central nervous system infections and the differential diagnosis with autoimmune encephalitis.
- Define the procedure for exploratory and preventive actions for renal or urinary malformations, as well as vesicoureteral reflux in urinary tract infections.
- Describe the management of severe sepsis and code sepsis.

- ◆ Identify the updated diagnostic criteria for viral hepatitis and its current treatment.
- ◆ Describe the appropriate management of tuberculosis: infection, disease and contact study.
- ◆ Acquire current knowledge of Mycoplasma pathology.
- ◆ Describe the current use of vaccines, doses, intervals, side effects, responses to anti-vaccine movements.
- ◆ Describe the indications for antibiotic prophylaxis and post-exposure prophylaxis.
- ◆ Define the situations in which a contact study is indispensable.

“

Take advantage of the opportunity and take the step to get up to date on the latest developments in Infection in Primary Care”

03

Course Management

This program includes in its teaching staff health professionals of recognized prestige, who belong to the field of Infectious Diseases in Primary Care and who pour into this training the experience of their work. In addition involved, renowned specialists, members of prestigious national and international scientific communities, are in designing and preparing the program.

“

*Learn the latest advances in
Infection in Primary Care from
leading professionals"*

Guest Director

Dr. Hernández-Sampelayo Matos, Teresa

- ♦ Head of Pediatrics Service and ACES at the Gregorio Marañón General University Hospital.
- ♦ Head of the Pediatric Infectious Diseases Section at the Gregorio Marañón General University Hospital.
- ♦ Accreditation by ANECA as a contract professor Doctor of the National Agency for Quality Assessment and Accreditation.
- ♦ Emergency Pediatrics of the Autonomous University of Madrid. Medicine.
- ♦ Pediatric Gastroenterology of the Autonomous University of Madrid. Medicine.
- ♦ Neonatology of the Autonomous University of Madrid. Medicine.
- ♦ Project on Determination of free cytokine profile in plasma and specific response against Mycobacterium tuberculosis. Utility as biomarkers in children with active tuberculous disease and latent tuberculous infection.
- ♦ Pediatric Antifungal Optimization Program at Astillas Pharma Europe Ltd.

Management

Dr. Otero Reigada, María Carmen

- ♦ Former chief clinician in infectious diseases and infants at La Fe de Valencia University Hospital.
- ♦ Pediatric Infectious Diseases Specialist.
- ♦ Specialist in Clinical Microbiology.
- ♦ Currently pediatrician and pediatric infectologist at Quironsalud Hospital of Valencia.

Teachers

Dr. Aguilera Alonso, David

- ♦ Attending Physician in Pediatrics and Specific Areas / Pediatric Infectious Diseases Unit at the Gregorio Marañón General University Hospital.
- ♦ Degree in Medicine and Surgery from the Universitat de València.
- ♦ Master's Degree in Pediatric Infectious Diseases at the Complutense University of Madrid.

Dr. Calle Miguel, Laura

- ♦ Health Service of the Principality of Asturias, Health Area V, Pediatric Specialist Physician.
- ♦ Master's Degree in Research in Medicine from the University of Oviedo
- ♦ Degree in Medicine and Surgery from the University of Oviedo.

Dr. Hernanz Lobo, Alicia

- ♦ Assistant Pediatric Physician at the Gregorio Marañón General University Hospital.

Graduated in Medicine from the Complutense University of Madrid (UCM) in 2012.

- ♦ Specialist in Pediatrics and its Specific Areas, having trained as a resident intern at the Gregorio Marañón General University Hospital.
- ♦ Master's Degree in Pediatric Infectious Diseases Complutense University of Madrid.

Dr. Manzanares Casteleiro, Ángela.

- ♦ Medical Doctor, Autonomous University of Madrid. Completion of the Pediatrics specialty in May 2020.
- ♦ Currently working until 12/31/2020 in the Pediatric Infectious Diseases Section of the 12 de Octubre University Hospital and the Pediatric Clinical Research Unit of the 12 de Octubre Hospital.
- ♦ Studying since October 2020 the Master's Degree in Pediatric Infectious Diseases at the Complutense University of Madrid with clinical practice at the Gregorio Marañón Hospital.

Dr. Fonseca Martín, Rosa

- ♦ Pediatric surgeon. Pediatric Surgery Service. La Fe Polytechnic and University Hospital

Dr. Martínez Morel, Héctor

- ♦ Doctor of Medicine
- ♦ Specialist in Preventive Medicine and Public Health.
- ♦ Specialist Area Physician (University and Polytechnic Hospital La Fe).

Dr. Mollar Maseres, Juan

- ♦ Head of Section of Preventive Medicine (University and Polytechnic Hospital La Fe).
- ♦ Doctor of Medicine

Dr. Meyer García, Mari Carmen

- ♦ Specialist in Preventive Medicine and Public Health.
- ♦ Specialist Area Physician (University and Polytechnic Hospital La Fe).

Dr. Gobernado Serrano, Miguel

- ♦ Specialist in Clinical Microbiology, attached to the University and Polytechnic Hospital La Fe, of Valencia.

Dr. Monteagudo Montesinos, Emilio

- ♦ Head of Pediatric Services (University and Polytechnic Hospital La Fe).

Dr. Rincón Lopez, Elena María

- ♦ Attending Physician Department Pediatric Infectious Diseases, Gregorio Marañón General University Hospital

Dr. Modesto i Alarcón, Vicente

- ♦ Head of Section of the Pediatric ICU and Resuscitation (University and Polytechnic Hospital La Fe).

Dr. Couselo Jerez, Miguel

- ♦ PhD in Medicine
- ♦ Pediatric surgeon. Pediatric Surgery Service. La Fe Hospital

04

Structure and Content

The structure of the contents has been designed by a team of professionals knowledgeable about the implications of training in daily medical practice, aware of the current relevance of training to be able to act before the pediatric patient with infectious pathology in Primary Care and committed to quality teaching through new educational technologies.

“

The Postgraduate Diploma in Infection in Primary Care the most complete and up-to-date scientific program on the market”

Module 1. Current Overview in Infectious Diseases

- 1.1. Update on Epidemiological and Public Health Aspects.
 - 1.1.1. Current Status of the Epidemiology of Vaccine-Preventable Diseases in the World.
- 1.2. Current Epidemiology of Relevant Infectious Pathologies in our Environment.
 - 1.2.1. Current Epidemiology of Bacterial Meningitis.
 - 1.2.2. Current Epidemiology of Poliomyelitis and Flaccid Paralysis due to Non-Poliovirus and Live Attenuated Virus Vaccine.
 - 1.2.3. Epidemiology of Tuberculosis and its Resistance in High-Income Countries.
 - 1.2.4. Epidemiology of Sexually Transmitted Infections in Adolescents.
- 1.3. Transmission Mechanisms in Pediatrics.
 - 1.3.1. Dynamics and Transmission Mechanisms of the Most Common Agents in Pediatrics Today (Includes Intrafamily Transmission).
 - 1.3.2. Seasonality of Infection in Pediatrics Outbreak Management
 - 1.3.2.1. Temporal Epidemiological Parameters in the Most Common Infections in the Community, Common Point Sources, Continuous, Propagative and Mixed Exposure.
- 1.4. Microbiota, Defensive and Immunomodulatory Function.
 - 1.4.1. Composition of the Intestinal Flora, Modification With Age.
 - 1.4.2. Defensive and Immunomodulatory Role of the Microbiota.
- 1.5. Fever and Inflammatory Response.
 - 1.5.1. Update on the Role of Fever in Infection and Antipyretic Therapeutics.
 - 1.5.2. Inflammatory Response and Systemic Inflammatory Response Syndrome.
- 1.6. Infections in the Immunocompromised Patient.
- 1.7. Image Interpretation of Infectious Diseases in the Pediatric Age.
 - 1.7.1. Interpretation of Ultrasound Images Applied to Infectious Pathology.
 - 1.7.2. Interpretation of TC Applied to Infectious Pathology.
 - 1.7.3. Interpretation of RNM Applied to Infectious Pathology.

Module 2. Eye, Skin, Soft Tissue and Skeletal System Infections.

- 2.1. Bacterial or Viral Conjunctivitis.
- 2.2. Dacryocystitis.
- 2.3. Endophthalmitis.
- 2.4. Preseptal and Postseptal Orbital Cellulitis.
- 2.5. Bacterial Skin Infections.
- 2.6. Viral Skin Infections.
- 2.7. Parasitic Skin Infections.
- 2.8. Dermatophyte Skin Infections.
- 2.9. Candida and Malassezia Skin Infections.
- 2.10. Involvement of Methicillin-Resistant Staphylococcus Aureus (MRSA) in Pediatric Skin and Soft Tissue Infections in our Environment.
- 2.11. Adenitis.
- 2.12. Lymphangitis.
- 2.13. Necrotising fasciitis.
- 2.15. Bite Infections.
 - 2.15.1. Bites in Urban Environment.
 - 2.15.2. Bites in Rural Environment.
- 2.16. Osteomyelitis and Arthritis.
- 2.17. Myositis and Pyomyositis.
- 2.18. Spondylodiscitis

Module 3. Oral and Respiratory Infections

- 3.1. Pharyngotonsillitis.
- 3.2. Peritonsillar Regional Abscesses and Lemierre's Syndrome.
 - 3.2.1. Abscesses in Peritonsillar Region.
 - 3.2.2. Mastoiditis.
- 3.3. Otitis and Mastoiditis.
- 3.4. Sinusitis.
- 3.5. Update on Diphtheria.
- 3.6. Oral mucosa infections Odontogenic Infections.
- 3.7. Common Cold.
- 3.8. Influenza in Pediatrics.
- 3.9. Pertussis Syndrome.
- 3.10. Update on Bronchiolitis Treatment.
- 3.11. Community-Acquired Pneumonia (CAP)
 - 3.11.1. Etiological Agents by Age.
 - 3.11.2. Diagnosis.
 - 3.11.3. Severity Factors.
 - 3.11.4. Treatment.
- 3.12. Pleural Empyema.
- 3.13. TB.
 - 3.13.1. Current Guidelines.
 - 3.13.2. Infection.
 - 3.13.3. Disease.
 - 3.13.4. Diagnosis.
 - 3.13.5. Treatment.

Module 4. Gastrointestinal and Urinary Tract Infections and STDs

- 4.1. Acute Gastroenteritis.
 - 4.1.1. Current Management.
- 4.2. Traveler's Diarrhea in Children.
- 4.3. Current Role of Parasites in Diarrheal Syndromes in our Environment..
- 4.4. Update on Hepatitis A and E
- 4.5. Hepatitis B y Hepatitis C.
 - 4.5.1. Current Treatment Options.
 - 4.5.2. Risk Factors for Disease Progression.
 - 4.5.3. Current Treatment Options.
- 4.6. Update on Clostridium Difficile in Pediatrics.
- 4.7. Acute Appendicitis in Children.
 - 4.7.1. Need or Not of Antibiotic Treatment.
- 4.8. Urinary Infection
 - 4.8.1. Current Treatment Management.
 - 4.8.2. Complementary Evaluations.
 - 4.8.3. Prophylaxis
 - 4.8.4. Role of Vesicoureteral Reflux.
- 4.9. Epidemiology, Clinical Manifestations, Diagnosis and Treatment of the Most Common Sexually Transmitted Infections.
 - 4.9.1. Syphilis.
 - 4.9.2. Gonorrhea.
 - 4.9.3. Papillomavirus.
 - 4.9.4. Chlamydia Trachomatis.
 - 4.9.5. Herpes Virus 1 and 2.
- 4.10. Perirectal Abscesses.

Module 5. Febrile Syndromes and Exanthems**Febrile Syndrome**

- 5.1. Fever Without a Focus in Children Less than 3 Months Old.
 - 5.1.1. Algorithm of Action.
 - 5.1.2. Fever of Unknown Origin in Pediatrics.
- 5.2. Recurrent and Periodic Fever.
 - 5.2.1. Differential Diagnosis.
- 5.3. Leishmaniasis.
- 5.4. Exanthematous Diseases and Differential Diagnosis.
- 5.5. Mycoplasma Pneumoniae Non-Pulmonary Pathology.

Module 6. Preventive Measures

- 6.1. Control and Response to Hospital Outbreaks of Infection.
 - 6.1.1. Common Microorganisms.
 - 6.1.2. Current Multidrug-Resistant Microorganisms (Including Decontamination in the MRSA Patient).
- 6.2. Hospital Organization and Control of Today's Multidrug-Resistant Microorganisms.
- 6.3. Current Indications for Isolation in Hospital Pediatrics.
- 6.4. Current Vaccines.
 - 6.4.1. Prematurity.
 - 6.4.2. Immunodeficient Child.
 - 6.4.3. Child Undergoing Immunosuppressive Treatments.
 - 6.4.4. Splenectomized Patients.
 - 6.4.5. Transplant Recipients.
 - 6.4.6. HIV.
- 6.5. Update on Vaccination of Children in Special Situations.
- 6.6. Current Indications for Antibiotic Prophylaxis.
- 6.7. Indications for Prophylaxis.
 - 6.7.1. In case of Accidental Puncture.
 - 6.7.2. Indications for Sexual Abuse Prophylaxis.
- 6.8. Post-Exposure Performance.
 - 6.8.1. Chickenpox.
 - 6.8.2. Measles.
 - 6.8.3. In Hepatitis B.
 - 6.8.4. In Hepatitis A.
 - 6.8.5. TB.
 - 6.8.6. Tetanus:
 - 6.8.7. Anger
- 6.9. Current Status of Perioperative Prophylaxis of the Surgical Patient.
- 6.10. Update on Antibiotic Prophylaxis in Transplant Children and Patients Treated for Atypical Hemolytic Uremic Syndrome.

“

A unique, key, and decisive training experience to boost your professional development”

05

Methodology

This training program provides you with a different way of learning. Our methodology uses a cyclical learning approach: *Re-learning*.

This teaching system is used in the most prestigious medical schools in the world, and major publications such as the *New England Journal of Medicine* have considered it to be one of the most effective.

“

Discover Re-learning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

In a given situation, what would you do? Throughout the program, you will be presented with multiple simulated clinical cases based on real patients, where you will have to investigate, establish hypotheses and, finally, resolve the situation. There is abundant scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you can experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gervas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching potential or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in professional medical practice.

“

Did you know that this method was developed in 1912 at Harvard for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only grasp concepts, but also develop their mental capacity by evaluating real situations and applying their knowledge.
2. The learning process has a clear focus on practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Re-Learning Methodology

At TECH we enhance the Harvard case method with the best 100% online teaching methodology available: Re-learning.

Our University is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

The physician will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Re-learning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best Spanish-speaking online university (Columbia University).

With this methodology we have trained more than 250,000 physicians with unprecedented success, in all clinical specialties regardless of the surgical load. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Re-learning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (we learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

In this program you will have access to the best educational material, prepared with you in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Latest Techniques and Procedures on Video

We introduce you to the latest techniques, to the latest educational advances, to the forefront of current medical techniques. All this, in first person, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This unique multimedia content presentation training system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides. in our virtual library you will have access to everything you need to complete your training.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, we will present you with real case developments in which the expert will guide you through focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Re-testing

We periodically evaluate and re-evaluate your knowledge throughout the program, through assessment and self-assessment activities and exercises: so that you can see how you are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an expert strengthens knowledge and memory, and generates confidence in our future difficult decisions.

Quick Action Guides

We offer you the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help you progress in your learning.

06 Certificate

The **Postgraduate Diploma in Infection in Primary Care** guarantees you, in addition to the most accurate and up-to-date training, access to a Postgraduate Diploma issued by **TECH - Technological University**.

“

Successfully complete this training and receive your university degree without travel or laborious paperwork”

The **Postgraduate Diploma in Infection in Primary Care** the most complete and up-to-date scientific program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Diploma** issued by **TECH - Technological University** via tracked delivery.

The certificate issued by **TECH - Technological University** will specify the qualification obtained through the Postgraduate Diploma, and meets the requirements commonly demanded by labor exchanges, competitive examinations university, and professional career evaluation committees.

Title: **Postgraduate Diploma in Infection in Primary Care**

ECTS: **26**

Official Number of Hours: **650 hours**.

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
