tech 06 | Introduction

In the health structure, the medical division is fundamental in the development of these processes, where the paradigm of Clinical Management is increasingly imposed, making it necessary to specialization in this area for physicians who develop or may reach positions of responsibility for care, either as middle management, care or medical management.

The new challenges of the sector, such as the approach to complexity and chronicity, the relationships between professional groups, citizens (as users, – patients, – clients) and providers, the development of new health technologies, the need to increase efficiency in the use of resources, assuming the new leadership, participative and transparent, or gaining its position in the interdisciplinary team, are challenges to be addressed.

This **Postgraduate Diploma in Medical and Clinical Units Management** contains the most complete and up-to-date scientific program on the market. The most important features of the program include:

- Analyze practical cases developed by experts in health management and other specialties. Its graphic, schematic and eminently practical contents, with which they are conceived, gather scientific and assistance information on those situations that occur on a regular basis in the hospital environment.
- Presentation of practical workshops on procedures and decision making.
- Algorithm-based interactive learning system for decision-making in the situations which are presented to the student.
- Action protocols, where you can find the latest trends in health management.
- All this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments.
- With a special emphasis on scientific methods and research methodologies in health management.
- Content that is accessible from any fixed or portable device with an Internet connection.

Increase your competencies in the approach to Medical and Clinical Units Management through this Postgraduate Diploma"

Introduction | 07 tech

This Postgraduate Diploma may be the best investment you can make in the selection of a refresher program for two reasons: in addition to train your knowledge as a Clinical Manager, you will obtain a certificate from TECH - Technological University"

You will be able to take the course 100% online, adapting it to your needs and making it easier for you to take it while you carry out your full-time healthcare activity.

Increase the quality of your management with this training program and improve patient care.

It includes, in its teaching staff, a team of prestigious health management professionals, who pour into this specialization the experience of their work, in addition to recognized health specialists who complement the program in an interdisciplinary way.

The multimedia content developed with the latest educational technology will provide the physician with situated and contextual learning, i.e., a simulated environment that will provide immersive training programmed to train in real situations.

This program is designed around Problem Based Learning, whereby the physician must try to solve the different professional practice situations that arise during the course. For this reason, you will be assisted by an innovative, interactive video system created by renowned and experienced experts in the field of health management with extensive teaching experience.

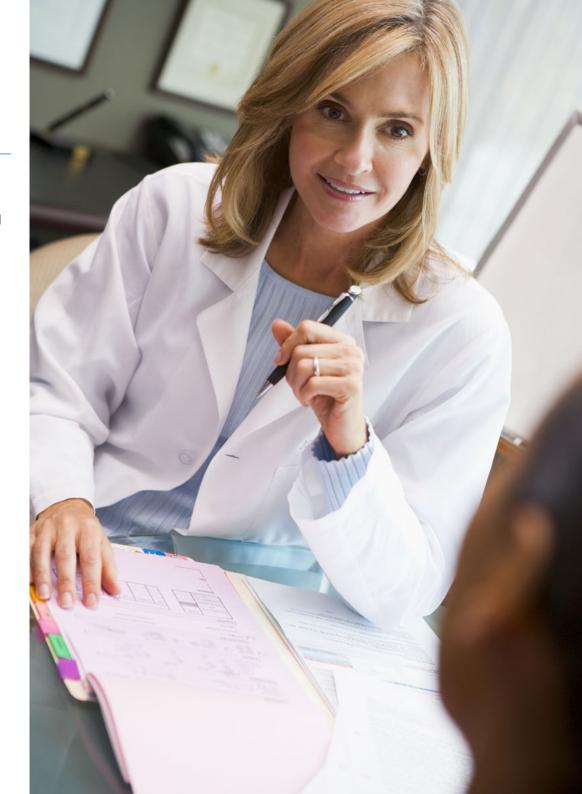

tech 10 | Objectives

General Objectives

- Analyze the theories and models of the organization and the way Welfare Systems work, focusing on their political, social, legal and economic foundations and their organizational structure.
- Improve knowledge and professional skills in health management from a clinical management perspective, while becoming familiar with the practical methodological tools to be applied in the critical areas of health management, both institutional and everyday.
- Approach clinical management using the criteria of efficacy, efficiency, effectiveness, equity, performance and profitability, and problem solving through the appropriate use of information systems.
- Describe the principles of clinical management that facilitate the planning, organization, management and assessment of a center, service or care unit.
- Show and value advanced initiatives and experiences in clinical and health management.

Specific Objectives

- Describe, compare and interpret the characteristics and performance data of different healthcare models and systems.
- Apply the essential concepts and methods of planning, organization and management of health institutions.
- Contextualize the care and medical division in the interdisciplinary team and learn about the new challenges of the health sector.
- Understand, interpret, transmit and apply regulatory norms for the activities and functions
 of health professionals in clinical management, in accordance with the legal framework of
 the health sector.
- Recognize and learn how to apply and interpret health law to contextualize clinical practice in terms of professional and social responsibility, as well as the ethical aspects associated with health care.
- Understand and learn how to carry out an economic analysis of how health institutions
 operate and the economic behavior of the agents involved in health systems.
- Incorporate the fundamental concepts of economic evaluation techniques and tools applied in management practice within health systems.
- Analyze and apply techniques, styles and methods to define, guide and lead professional talent management policies in health institutions.
- Within a clinical context, recognize, apply and learn how to assess the usefulness of different leadership and management tools in that can also be applied to the context of healthcare practice.
- Develop the ability to analyze different health benefits.

With this program you will be able to better manage resources, lead people and improve procedures in your healthcare institution"

03 **Structure and Content**

The structure of the curriculum has been designed by a team of professionals knowledgeable about the implications of medical specialization in clinical management; aware of the relevance of current training and committed to quality teaching through new educational technologies.

tech 14 | Structure and Content

Module 1. Medical and Welfare Management Department in the Health System

- 1.1. Classical Medical Management vs. Welfare Management.
 - 1.1.1. Structure and Content of Health System Governing Bodies. Current Organization Charts and Future Alternatives.
 - 1.1.2. Doctors in Managerial Positions: From Board Members to Welfare Directors and Managers, Including General Management.
 - 1.1.3. Preparation and Value Contribution.
 - 1.1.4. Medical Division: Critical Areas.
 - 1.1.5. Different Organizational Structures within the Medical Division.
- 1.2. Management Information Systems and Electronic Medical Records.
 - 1.2.1. Control Panels.
 - 1.2.2. Electronic Medical Records.
 - 1.2.3. Assisted Prescription Systems.
 - 1.2.4. CMBD, ICD.
 - 1.2.5. Other Useful Information Systems in Health Management.
- 1.3. Care Continuity: Primary Care, Hospital Care and Social Health Care Integration.
 - 1.3.1. Welfare Continuity in the Care Process. Integrated Welfare Processes.
 - 1.3.2. Moving Towards a Socio-healthcare Model.
- 1.4. Bioethics and Humanization in Medical Practice.
 - 1.4.1. Bioethical Principles.
 - 1.4.2. Ethics Committees in Health Organizations.
 - 1.4.3. Humanization of Health Care.
- 1.5. Medical and Welfare Management: Relations with the Nursing Division.
 - 1.5.1. Tools for Knowledge Management in Clinical and Welfare Management.
 - 1.5.2. Medical and Welfare Management: Relations with the Nursing Division.
- 1.6. Public Health, Promotion of Health and Health Education for Welfare Directorates
 - 1.6.1. Public Health Concept and Scope.
 - 1.6.2. Promotion of Health and Heath Education
 - 1.6.3. Types of Prevention Programs.

Structure and Content | 15 tech

Module 2. Managing Special and Hospitalization Services

- 2.1. Emergency Services Management.
 - 2.1.1. The Emergency Department. Physical Structure, Organization and Circuits.
 - 2.1.2. Emergency Patient Care. Circuits and Triage.
 - 2.1.3. Human and Material Resources. Calculations.
 - 2.1.4. Management of Observation and Short Stays in the Emergency Department.
 - 2.1.5. Pre-admission and Early Discharge Units.
 - 2.1.6. Feasible Improvements: Queue Management and Patient Traceability.
 - 2.1.7. Citizen Information in Casualty and Emergencies.
- 2.2. ICU Management.
 - 2.2.1. ICU. Physical Structure, Organization and Circuits.
 - 2.2.2. Human Resource Allocation. Standards. ICU Nurse Competencies.
 - 2.2.3. Material Resources: Technology and Equipment. Monitoring.
 - 2.2.4. Transplant Management. Transplant Patient Care. Transplant Team. Transplant Coordination.
 - 2.2.5. Safety Management in ICU. Zero Bacteriemia Project.
 - 2.2.6. Humanization in ICUs.
- 2.3. Surgical Unit Management.
 - 2.3.1. The Surgical Unit. Physical Structure, Organization and Circuits. Restrictions.
 - 2.3.2. Coordination of Operating Rooms. Surgical Performance and Operation Indicators. Surgical Scheduling.
 - 2.3.3. Improving Performance.
 - 2.3.4. Human Resource Calculation in a Surgical Unit.
 - 2.3.5. Material Resource Calculation: Operating Room Technology and its Maintenance.
 - 2.3.6. Safety Management in ICU. Surgical CHECK LIST. Surgical Hand Scrubs.
 - 2.3.7. Asepsis and Sterilization in Operating Rooms. Environmental Monitoring of the Operating Room.

tech 16 | Structure and Content

- 2.4. Management of Hospital Admission Units.
 - 2.4.1. Clinical Unit Management. Physical Structure, Organization and Circuits.
 - 2.4.2. Patient Admission and Humanization of Inpatient Care.
 - 2.4.3. Human Resources in Inpatient units.
 - 2.4.4. Material Resources: Health Material and Technology.
- 2.5. Other Units or Special Services.
 - 2.5.1. Other Units or Special Services. Physical Structure, Organization and Circuits.
 - 2.5.2. Hemodynamic Units. Physical Structure, Organization and Circuits.
 - 2.5.3. Stroke Units. Physical Structure, Organization and Circuits.
 - 2.5.4. Pain Management Units. Physical Structure, Organization and Circuits.

Module 3. Managing Central Services

- 3.1. Admissions and Clinical Documentation Services.
 - 3.1.1. Admissions and Bed Management.
 - 3.1.2. Clinical Documentation: Medical Record Files.
 - 3.1.3. Computerization and the Digitalization of Records.
 - 3.1.4. Transmission of Information and Reports.
- 3.2. Management of Diagnostic Radiology Services.
 - 3.2.1. Planning and Organization of the Diagnostic Radiology Service. Structure and Circuits.
 - 3.2.2. Radiation Protection. Radiation Safety for Patients and Professionals.
 - 3.2.3. Human and Material Resources. Differences between Collectives and Functions.
 - 3.2.4. Technology in Diagnostic Radiology Services. Digitalization and Information Management.
- 3.3. Laboratory Management.
 - 3.3.1. Laboratory Organization and Operation. Physical Structure, Organization and Circuits
 - 3.3.2. Laboratory Types: Biochemistry, Hematology, Microbiology, Pathology, Genetics.
 - 3.3.3. Human and Material Resources. Recommendations, Functions and Competencies. Technology.
 - 3.3.4. Biological Sample Processing Techniques. Quality Standards.
 - 3.3.5. Biosafety in Laboratories. Prevention of Biological and Chemical Risks.
 - 3.3.6. Laboratory Waste Management. Classification and Disposal.

- 3.4. Hospital and Primary Care Pharmacy Management.
 - 3.4.1. Planning and Organization of Pharmacy Services. Physical Structure, Organization and Circuits.
 - 3.4.2. Management, Traceability and Single Doses. First Aid Kits.
 - 3.4.3. Human and Material Resources. Differences between Collectives and Functions.
 - 3.4.4. Outpatient Management in a Hospital Pharmacy.
 - 3.4.5. Clean Rooms and Other Special Chambers within these Services.
 - 3.4.6. Primary Care Pharmacy.
- 3.5. Hospital Catering Management, Complementary Services and Volunteering.
 - 3.5.1. Organization and Operation of Hospital Catering.
 - 3.5.2. Complementary Services; TV, Patient Library, Hospital Clowns, Hospital Classrooms, etc.
 - 3.5.3. Hospital Volunteering. Type, Benefits and Regulations. Plans to Promote Volunteering.

Module 4. Management of Transversal and Primary Services

- 4.1. Primary Health Care.
 - 4.1.1. Legislation and Regulatory Decrees. Basic Welfare Structures. The Welfare Center and Primary Care Team. Planning, Organisation, and Operation.
 - 4.1.2. PA Resolution Capacity. Scientific Evidence of its Capacity. EAP Performance Indicators
 - 4.1.3. Community Care: Health Programs.
 - 4.1.4. Emergency and Continuous Care. PAC Model and Special Emergency Services Model.
- 4.2. Clinical Management in Primary Care.
 - 4.2.1. PA Management Models. Traditional Direct Management Model.
 - 4.2.2. PA EBAS Self-management Models.
 - 4.2.3. Coordination with Specialist Care and Social Services. Referral and Care Continuity.
 - 4.2.4. Home Care in Primary Care
 - 4.2.5. Special Tests in Primary Care

- 4.3. Complex and Chronic Patient Management.
 - 4.3.1. Chronic Care Model and Population Stratification. Kaiser Permanente.
 - 4.3.2. Management of Population Groups at Risk. Management of Complex and/or Chronic Diseases at Home.
 - 4.3.3. Chronicity, and Health and Social Care.
- 4.4. Experiences in Patient Empowerment: Active Patients, School of Patients.
 - 4.4.1. Active Patient Model. Stanford University.
 - 4.4.2. Self-care Education Program. International and Spanish Experiences.
 - 4.4.3. Patient Schools.
 - 4.4.4. Patient Empowerment and Nursing Input.

Module 5. Managing Outpatients Services

- 5.1. Outpatient Services Management. Day Hospitals and Outpatient Clinics.
 - 5.1.1. Organization and Operation of the Medical Day Hospital.
 - 5.1.2. Management of the Surgical Day Hospital.
 - 5.1.3. Management of the Oncology and Hematology Day Hospital.
 - 5.1.4. Management of Outpatient Clinics and Specialty Centers.
- 5.2. Out-of-Hospital Emergency Management.
 - 5.2.1. Historical Development. Models.
 - 5.2.2. Emergency Coordination Centers. EMUs and Mobile ICUs.
 - 5.2.3. Human Resources and Skills. Team Involved.
 - 5.2.4. Casualty and Emergency Quality Indicators. Coordination with the Rest of Assistance Network Devices.
 - 5.2.5. Disaster and Emergency plans. Managing a Disaster.

- 5.3. Home Care: Models.
 - 5.3.1. Hospital-at-Home Types and Concepts.
 - 5.3.2. Patient Selection Criteria.
 - 5.3.3. Calculation and Management of Human and Material Resources.
 - 5.3.4. Palliative Care at Home. Techniques and Patient Selection.
 - 5.3.5. Family Support and Bereavement Management.
 - 5.3.6. Managing Primary Caregiver Overload. Family Claudication.
- 5.4. Other Outpatient Care Services. Mental Health, Addictive Behavior and Social Work.
 - 5.4.1. Adult, Child and Adolescent Mental Health Units.
 - 5.4.2. Addictive Behavior Units.
 - 5.4.3. Occupational Therapy and Social Work.

A unique, key and decisive master's degree experience to boost your professional development"

tech 20 | Methodology

At TECH we use the Case Method

In a given situation, what would you do? Throughout the program, you will be presented with multiple simulated clinical cases based on real patients, where you will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you can experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching potential or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in professional medical practice.

Did you know that this method was developed in 1912 at Harvard for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method"

The effectiveness of the method is justified by four fundamental achievements:

- Students who follow this method not only grasp concepts, but also develop their mental capacity by evaluating real situations and applying their knowledge.
- 2. The learning process has a clear focus on practical skills that allow the student to better integrate into the real world.
- 3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
- 4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Re-learning Methodology

At TECH we enhance the Harvard case method with the best 100% online teaching methodology available: Re-learning.

Our University is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

The physician will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-theart software to facilitate immersive learning.

Methodology | 23 tech

At the forefront of world teaching, the Re-learning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best Spanish-speaking online university (Columbia University).

With this methodology we have trained more than 250,000 physicians with unprecedented success, in all clinical specialties regardless of the surgical load. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Re-learning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (we learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

tech 24 | Methodology

In this program you will have access to the best educational material, prepared with you in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Latest Techniques and Procedures on Video

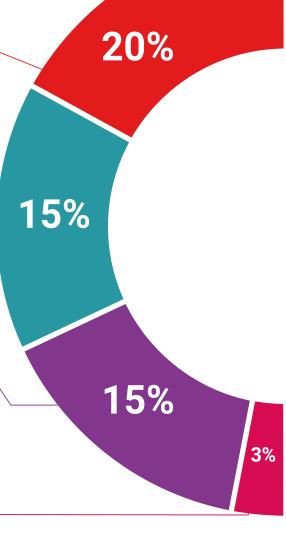

We introduce you to the latest techniques, to the latest educational advances, to the forefront of current medical techniques. All this, in first person, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

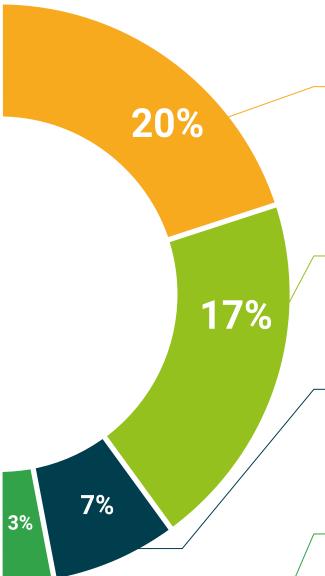

This unique multimedia content presentation training system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides. in our virtual library you will have access to everything you need to complete your training.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, we will present you with real case developments in which the expert will guide you through focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Re-Testing

We periodically evaluate and re-evaluate your knowledge throughout the program, through assessment and self-assessment activities and exercises: so that you can see how you are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an expert strengthens knowledge and memory, and generates confidence in our difficult future decisions.

Quick Action Guides

We offer you the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help you progress in your learning.

tech 28 | Certificate

This Postgraduate Diploma in Medical and Clinical Units Management contains the most complete and up-to-date scientific program on the market.

After the student has passed the evaluations, they will receive their corresponding certificate issued by TECH - Technological University via tracked delivery.

The certificate issued by TECH - Technological University will specify the qualification obtained though the Postgraduate Diploma, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: Postgraduate Diploma in Medical and Clinical Units Management

ECTS: 18

Official Number of Hours: 450

^{*}Apostille Convention. In the event that the student wishes to have their paper diploma Apostilled, TECH EDUCATION will make the necessary arrangements to obtain it at an additional cost of €140 plus shipping costs of the Apostilled diploma.
