Introduction

The specialty of Legal and Forensic Medicine has been one of the most mistreated branches in recent years due to its complicated access via MIR, where it has not been accepted for years, but has continued to be necessary especially in the judicial field after the latest legislative changes. Many physicians and specialists wish to specialize in this field in order to expand or begin their specialization in the field of Forensic Science.

“

Improve your knowledge in Thanatology and Criminalistics in Forensic Medicine through this program, where you will find the best didactic material with real clinical cases. Learn here about the latest advances in the specialty to be able to perform a quality medical practice"

This Postgraduate Diploma allows to unite the scientific application with the practical part already performed, adding at the same time an adaptation to the new technologies with the implementation of the online specialization. It allows the student to learn the basic principles necessary for the study of forensic thanatology, forensic pathology, forensic sexology, forensic toxicology, forensic psychiatry, damage assessment, anthropology, and criminalistics.

The Postgraduate Diploma meets the needs of professionals who demand adequate knowledge to enable them to perform forensic assessments, expert reports as well as the ability and fluency to ratify the opinion and understand the stages of the legal proceedings when necessary. At the same time, it offers the possibility for all students to learn how to assess not only bodily injury, but also to quantify negligence, assess disability, and determine disabilities.

Currently, law firms and private clients require a forensic expert examination for most of their procedures. It is for this reason, in addition to the lack of existing professionals, that we consider it appropriate to implement a correct, up-to-date, and especially useful syllabus for the daily practice of this activity.

Update your knowledge through the Postgraduate Diploma in Thanatology and Criminalistics in Forensic Medicine program"

This **Postgraduate Diploma in Thanatology and Criminalistics in Forensic Medicine** contains the most complete and up-to-date scientific program on the market. The most important features of the program include:

- ♦ Development of more than 75 clinical cases presented by experts in Thanatology and Criminalistics in Forensic Medicine.
- ♦ The graphic, schematic, and eminently practical contents of which they are composed provide scientific and practical information on the disciplines that are essential for professional practice.
- ♦ Diagnostic-therapeutic developments on evaluation, diagnosis and intervention in Thanatology and Criminalistics in Forensic Medicine.
- ♦ It contains practical exercises where the self-evaluation process can be carried out to improve learning.
- ♦ Algorithm-based interactive learning system for decision-making in the presented clinical situations.
- ♦ With special emphasis on evidence-based medicine and research methodologies in Thanatology and Criminalistics in Forensic Medicine.
- ♦ All this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments.
- ♦ Content that is accessible from any fixed or portable device with an Internet connection.

“

This Postgraduate Diploma may be the best investment you can make in the selection of a training program for two reasons: in addition to updating your knowledge in Thanatology and Criminalistics in Forensic Medicine, you will obtain a certificate from TECH - Technological University"

It includes in its teaching staff professionals belonging to the field of Thanatology and Criminalistics in Forensic Medicine, who pour into this specialization the experience of their work, in addition to recognized specialists belonging to scientific societies of reference.

The multimedia content developed with the latest educational technology will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive training program to train in real situations.

This program is designed around Problem Based Learning, whereby the physician must try to solve the different professional practice situations that arise during the course. For this purpose, the physician will be assisted by an innovative interactive video system developed by renowned experts in the field of Thanatology and Criminalistics in Forensic Medicine with extensive teaching experience.

Increase your decision-making confidence by updating your knowledge through this Postgraduate Diploma.

Make the most of this opportunity to learn about the latest advances in Thanatology and Criminalistics in Forensic Medicine and improve the care of your patients.

02

Objectives

The **Postgraduate Diploma in Thanatology and Criminalistics in Forensic Medicine** is oriented to facilitate the performance of the physician in all types of patients at serious toxicological risk or with acute intoxication.

“

This Postgraduate Diploma is designed for you to update your knowledge in Thanatology and Criminalistics in Forensic Medicine, with the use of the latest educational technology, in order to contribute with quality and safety to the decision making, diagnosis, treatment and patient's support"

General Objectives

- Update the knowledge of the professional with specialization and interest in the field of Legal and Forensic Medicine.
- Promote work strategies based on a comprehensive approach to the expert witness as a reference model in the achievement of expert excellence.
- Encourage the learning of technical skills and abilities, through a powerful audiovisual system, and the possibility of development through online workshops for simulation and/or specific specialization.
- Encourage professional stimulation through continued specialization and research.

Specific Objectives by Modules

- ♦ Define the different personality types of the subjects.
 - ♦ Describe the components of antisocial personality.
 - ♦ Define the different investigative techniques used in forensic medicine.
 - ♦ Define the process for conducting criminological examinations.
 - ♦ Define the parameters for determining certain aspects of the subject according to forensic anthropology.
 - ♦ Describe the medical/forensic aspects of opiate- and cocaine-related disorders.
 - ♦ Define the medical/forensic aspects of disorders related to cannabis and other drugs.
 - ♦ Explain how to act in cases of post-traumatic stress.
 - ♦ Define the medical/forensic aspects of personality disorders.
 - ♦ Identify the toxicokinetics of herbicides and how to treat cases of acute intoxication.
 - ♦ Explain the toxicokinetics of pyrethroids and insect repellents and how to treat cases of acute intoxication.
 - ♦ Identify the toxicokinetics of organochlorines and how to treat cases of acute intoxication.
 - ♦ Explain the toxicokinetics of organophosphates and carbamates and how to treat cases of acute intoxication.
 - ♦ Explain the toxicokinetics of pyrethroids and insect repellents and how to treat cases of acute intoxication.
 - ♦ Identify the toxicokinetics of amphetamines and designer drugs and how to treat cases of acute intoxication.
 - ♦ Explain the toxicokinetics of inhalants and how to treat cases of acute intoxication.
 - ♦ Explain the toxicokinetics of ethanol and how to treat cases of acute intoxication.
 - ♦ Define the nature of crimes against sexual freedom and indemnity.
 - ♦ Define relevant aspects for identifying possible attacks.
- ♦ Define relevant aspects to identify possible attackers.
 - ♦ Explain the mechanisms of the most common vehicular traffic injuries.
 - ♦ Define the mechanisms of death.

This Postgraduate Diploma is the best way to get you up to date on Thanatology and Criminalistics in Forensic Medicine"

03

Structure and Content

The structure of the contents has been designed by a team of professionals from the best hospitals and universities of the national territory, aware of the relevance of the current specialization to intervene in the diagnosis, treatment and monitoring of Thanatology and Criminalistics in Forensic Medicine and committed to quality teaching through new educational technologies.

“

This Postgraduate Diploma in Thanatology and Criminalistics in Forensic Medicine, contains the most complete and up-to-date scientific program on the market”

Module 1. Update

- 1.1. Medical Expert Evidence in the Different Fields of Law.
 - 1.1.1. The Concept of Expert Evidence.
 - 1.1.2. Sections of Expert Evidence.
 - 1.1.3. Legal Applications of Expert Evidence.
- 1.2. Forensic Medicine Systems in America and Europe.
 - 1.2.1. Main Differences between Systems.
 - 1.2.2. Legal Amendments between Countries.
- 1.3. Expert Investigation and Method.
 - 1.3.1. Research Techniques.
 - 1.3.2. Research Limits.
 - 1.3.3. Legal Aspects of Research.

Module 2. Forensic Thanatology

- 2.1. General Aspects.
 - 2.1.1. Concept and Content.
 - 2.1.2. Concepts of Death.
 - 2.1.3. Degrees of Death.
- 2.2. Legal Transcendence.
- 2.3. Mortuary Progression.
 - 2.3.1. Signs of Agony.
 - 2.3.2. Precedence in Multiple Deaths.
- 2.4. How is Death Diagnosed?
 - 2.4.1. Concept and Methodology.
- 2.5. Death Demonstrated.
 - 2.5.1. Encephalic Death.
 - 2.5.2. Death in Cardiac Arrest.
- 2.6. Cadaveric Phenomena.
 - 2.6.1. Concept.
 - 2.6.2. Classification.
- 2.7. Cooling.
 - 2.7.1. Mechanism of Production.
- 2.8. Dehydration, Lividity, and Hypostasis.
 - 2.8.1. Mechanism of Production.
- 2.9. Stiffness and Spasm.
 - 2.9.1. Mechanism of Production.
- 2.10. Autolysis and Putrefaction.
 - 2.10.1. Chronology of Putrefaction.
- 2.11. Preservative and Transformative Phenomena of the Cadaver. Saponification.
 - 2.11.1. Concept and Classification.
- 2.12. Preservative and Transformative Phenomena of the Cadaver. Mummification.
 - 2.12.1. Concept.
 - 2.12.2. Phases of the Process.
- 2.13. Preservative and Transformative Phenomena of the Cadaver. Corification.
 - 2.13.1. Concept.
 - 2.13.2. Phases of the Process.
- 2.14. Other Cadaveric Phenomena.
 - 2.14.1. Concept.
 - 2.14.2. Phases.
- 2.15. Duration of Death.
 - 2.15.1. Concept and Importance.
 - 2.15.2. Routines and Means of Dating Death.
- 2.16. Criminal Judicial Autopsy and Civil Judicial Autopsy.
 - 2.16.1. Definition and Methodology.
 - 2.16.2. Forms of Action.
- 2.17. Autopsy Times.
 - 2.17.1. External Cadaveric Examination.
 - 2.17.2. Internal Cadaveric Examination.
- 2.18. Auxiliary Techniques for Forensic Medical Necrodiagnosis.
 - 2.18.1. Classification and Concept.
- 2.19. Vital, Perimortal, and Postvital injuries.
 - 2.19.1. Origin.
 - 2.19.2. Routines.
 - 2.19.3. Diagnostic Methods.

- 2.20. Discovery of the Corpse.
 - 2.20.1. Removal of the Corpse.
 - 2.20.2. Site Inspection.

Module 3. Criminalistics

- 3.1. Evidence at the Scene.
 - 3.1.1. Biological Evidence.
 - 3.1.2. Non-Biological Evidence.
 - 3.1.3. Sample Collection.
 - 3.1.4. Chain of Custody.
 - 3.1.5. Classification.
- 3.2. The Study of Prints.
 - 3.2.1. Classification.
 - 3.2.2. Sample Collection.
 - 3.2.3. Methodology.
- 3.3. Bloodstain Investigation.
 - 3.3.1. Classification.
 - 3.3.2. Sample Collection.
- 3.4. Other Biological Stains.
 - 3.4.1. Classification.
 - 3.4.2. Sample Collection.
- 3.5. Forensic Genetics.
 - 3.5.1. Classification.
 - 3.5.2. Collecting Samples for the Laboratory.

04

Methodology

This training program provides you with a different way of learning. Our methodology uses a cyclical learning approach: ***Re-learning***.

This teaching system is used in the most prestigious medical schools in the world, and major publications such as the ***New England Journal of Medicine*** have considered it to be one of the most effective.

“

Discover Re-learning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

In a given situation, what would you do? Throughout the program, you will be presented with multiple simulated clinical cases based on real patients, where you will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you can experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching potential or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in professional medical practice.

“

Did you know that this method was developed in 1912 at Harvard for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only grasp concepts, but also develop their mental capacity by evaluating real situations and applying their knowledge.
2. The learning process has a clear focus on practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Re-learning Methodology

At TECH we enhance the Harvard case method with the best 100% online teaching methodology available: Re-learning.

Our University is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

The physician will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Re-learning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best Spanish-speaking online university (Columbia University).

With this methodology we have trained more than 250,000 physicians with unprecedented success, in all clinical specialties regardless of the surgical load. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Re-learning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (we learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

In this program you will have access to the best educational material, prepared with you in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Latest Techniques and Procedures on Video

We introduce you to the latest techniques, to the latest educational advances, to the forefront of current medical techniques. All this, in first person, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This unique multimedia content presentation training system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides. in our virtual library you will have access to everything you need to complete your training.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, we will present you with real case developments in which the expert will guide you through focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Re-Testing

We periodically evaluate and re-evaluate your knowledge throughout the program, through assessment and self-assessment activities and exercises: so that you can see how you are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.
Learning from an expert strengthens knowledge and memory, and generates confidence in our difficult future decisions.

Quick Action Guides

We offer you the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help you progress in your learning.

05 Certificate

The Postgraduate Diploma in Thanatology and Criminalistics in Forensic Medicine guarantees you, in addition to the most accurate and up-to-date specialization, access to a certificate issued by **TECH - Technological University**.

“

Successfully complete this specialisation and receive your certificate without travel or laborious paperwork”

This **Postgraduate Diploma in Thanatology and Criminalistics in Forensic Medicine** contains the most complete and up-to-date scientific program on the market.

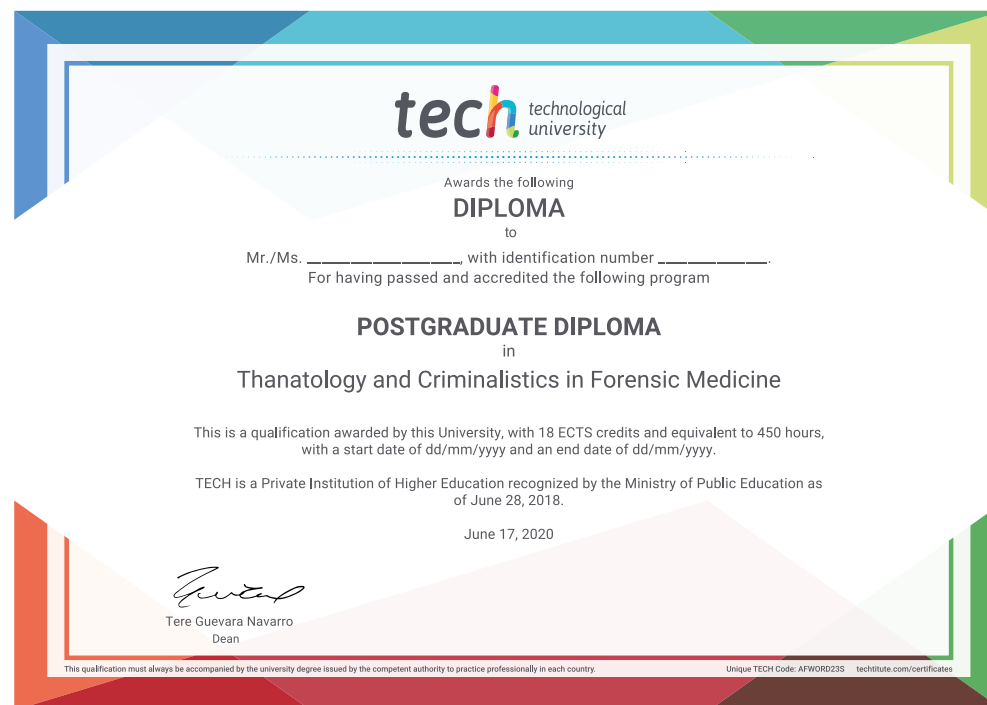

After the student has passed the evaluations, they will receive their corresponding **certificate** issued by TECH - Technological University via tracked delivery.

The diploma issued by TECH - Technological University will express the qualification obtained in the Specialist Diploma, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees.

Title: Postgraduate Diploma in Thanatology and Criminalistics in Forensic Medicine

ECTS: 18

Official Number of Hours: 450

*Apostille Convention. In the event that the student wishes to have their paper diploma Apostilled, TECH EDUCATION will make the necessary arrangements to obtain it at an additional cost of €140 plus shipping costs of the Apostilled diploma.
