Developing countries or countries in conflict often need the humanitarian work of other communities in order to continue advancing and to be able to count on basic resources. Healthcare is essential for the survival of the inhabitants, and it is here that physicians play a fundamental role in helping these countries to move forward and achieve a better future. For this reason, TECH, in its commitment to promote the academic and professional careers of its students, has developed this program with professionals with extensive experience in this field.

### tech 06 | Introduction

Developed countries must rely on international cooperation to improve the living conditions of people who do not have sufficient resources to be able to support themselves. International Cooperation helps to improve the living conditions of the most disadvantaged people through different areas: social, economic and health, taking into account a sustainable and egalitarian point of view. One of the fundamental needs of any society is healthcare, which is why it is the area in which most resources must be contributed to improve the health and quality of life of citizens.

For this reason, TECH offers this Professional Master's Degree for doctors who wish to specialize in the humanitarian field and International Cooperation, with the aim of allowing them to work in regions with great needs. Thus, this program is created by professionals in the world of training and International Development Cooperation. Each module is written from the experience and reality encountered in different regions of the world. By studying this program, the student will acquire the necessary skills to work and apply the knowledge acquired in all types of roles within national and international, public and private organizations.

In addition, as it is a 100% online program, the physician will be able to combine the study of this very complete program with the rest of their daily obligations, choosing at all times where and when to study. A high-level qualification that will take the medical professional to the highest level in their field of practice.

This **Professional Master's Degree in International Development Cooperation** contains the most complete and up-to-date scientific program on the market. The most important features of the program include:

- Practical cases presented by experts in International Development Cooperation
- The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- Latest developments in International Development Cooperation
- Practical exercises where the self-assessment process can be carried out to improve learning
- Emphasis on innovative methodologies in International Development Cooperation
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

International Cooperation helps to improve the living conditions of people living in developing countries, which is why it is a fundamental task in both social and health matters"

This Professional Master's Degree is the best investment you can make when selecting a refresher program, for two reasons: in addition to updating your knowledge in International Development Cooperation, you will obtain a qualification from TECH Technological University"

The program's teaching staff includes professionals from the sector who contribute their work experience to this training program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive training programmed to train in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise throughout the program. This will be done with the help of an innovative system of interactive videos made by renowned experts.

Increase your decision-making confidence by updating your knowledge through this Professional Master's Degree.

Take the opportunity to learn about the latest advances in this field and apply it to your daily practice.

### tech 10 | Objectives

### **General Objectives**

- Provide students with an advanced qualification in International Development
  Cooperation, specialized and based on theoretical and instrumental knowledge that
  will allow them to acquire and develop the skills necessary to obtain a qualification
  as a professional in international cooperation
- Provide the student with basic knowledge of the cooperation and development process based on the latest advances in policies on the sustainability processes involved in both economic and social aspects
- Improve professional performance and develop strategies for adapting and solving the problems of today's world by means of scientific research in cooperation and development processes
- Disseminate the basics of the current system and develop the critical and entrepreneurial spirit necessary to adapt to political changes, within the framework of international law

Get up to date on the latest developments in International Development Cooperation"

#### Module 1. The Development of Peoples: Introduction and Challenges

- Understand the importance of the development of peoples
- Become aware of the actors involved in development, the why and its consequences
- Know and clarify such basic concepts as poor and impoverished
- Become aware of the world situation and development
- Familiarize the student with the economic structure of the world
- Manage the concepts of sustainable development, sustainable objectives, etc. to meet their goals and objectives
- Know the basic theories of development in its economic, social, cultural and political aspects
- Know the current system of international relations and the different actors, both official and unofficial, that comprise it

#### Module 2. International Development Cooperation

- Know different methods of research in International Development Cooperation
- Gain knowledge on methodologies for public policy advocacy, social communication, political change, etc
- Know the evolution and status of current debates on development
- Know the system and policies of International Development Cooperation
- Understand the causes, dynamics and consequences of human mobility and migration
- Become familiar with the instruments of international cooperation for development, as well as the types of projects and existing NGOs
- Develop skills to work with the main vulnerable subjects involved in Development Cooperation actions and programs
- Understand the international cooperation system and the different members that make it up

# Module 3. Design, Monitoring and Assessment of International Development Cooperation Projects

- Know the management cycle of a development project
- Know how to analyze public policies within the Logical Framework in development cooperation policies
- Know the techniques, trends and projects of international cooperation for development
- Understand the socio-cultural reality of the different regional and international environments
- Understand the main problems of the different regional and international environments
- Have the skills to develop new tools for development cooperation and to intervene in public and private management of development cooperation projects in different regional areas
- Know the different systems, modalities and basic actors of International Development Cooperation
- Know the regional particularities of development and cooperation

#### Module 4. Education for Human and Sustainable Development

- Promote a critical analysis and reflection of the problems and their causes that affect individuals, groups and societies, especially children, fostering a change of attitudes and behaviors in our society
- Carry out actions and programs aimed at raising awareness of certain situations of injustice and changing values to combat them
- Promote the participation of society, especially children and adolescents and entities in the sector, in transforming the world
- Create empowerment processes and spaces for active democratic participation for children, aimed at transforming policies and the decision-making model on issues that affect them
- Promote research and reflection on issues related to childhood and development, supporting different proposals to promote human development
- Encourage networking with other entities in the sector, to achieve a greater impact in our actions
- Analyze the social, economic, political and cultural reality of the different societies in which the work
  of development cooperation agents is contextualized
- Analyze and understand global initiatives to fight poverty

### tech 12 | Objectives

#### Module 5. Humanitarian Action and International Development Cooperation

- Identify the processes of design, monitoring and assessment of development cooperation actions, so that they have a complete understanding of what a cooperation project is
- Develop attitudes and skills for the fight against poverty and equity awareness through development education, and for the processes of initiation and development of cooperation projects, with values such as motivation, intercultural dialogue and solidarity
- Acquire the necessary knowledge for the management of humanitarian action (humanitarian aid and emergencies), from the analysis of the basic needs of the population and the management of the main risks
- Develop a global vision on the nature, perspective and objectives of development cooperation actions
- Analyze and assess the sense of sectoral and geographic priorities of international development cooperation, identify the strategic axes that guide cooperation policies and actions, the sectors of action and the instruments for their implementation
- Design cooperation projects in public, private and non-governmental entities
- Promote debate and analysis on aspects related to the development of cooperation policies and actions and strategies aimed at improving their quality and effectiveness
- Knowledge of project development methodologies and mastery of technical skills for the identification, formulation, planning, programming, management and monitoring of development cooperation projects
- Ability to understand in depth the context and nature of humanitarian aid actions
- Design and manage technical instruments that gather in a clear, precise and updated way, the necessary information for the assessment, planning and decision making in cooperation projects
- Evaluate the process and final result of the different development cooperation projects

#### Module 6. Human Rights (HR) and International Humanitarian Law (IHL)

- Understand, provide or collaborate in humanitarian activities directed to the victims of armed conflicts under the coverage of International Humanitarian Law
- Qualify the different types of armed conflicts by distinguishing them from other situations of armed violence; identify and classify the victims of such conflicts; know and understand the victim protection system and be able to apply it
- Be aware of the limitations that humanitarian law imposes on combatants in relation to the conduct of hostilities, respect for zones, places and installations marked with a protection sign, and the requirement of a code of conduct relating to victims, medical and religious personnel, and humanitarian organizations
- Identify situations and persons who are particularly vulnerable in armed conflicts, knowing the protection afforded to them by International Humanitarian Law
- Respond to crisis and humanitarian emergency situations by assessing the urgency of the situation and planning and developing actions to deal with them
- Stimulate the participation of the people and groups with whom cooperation activities are
  developed, enabling them to identify their problems and needs, lead their processes of
  change, assess their evolution and decide on new courses of action

#### Module 7. Social and Transformative Communication

- Meet the current requirements of specialization in social communication in view of the diversification and revaluation of communication
- Prepare social communicators who can apply their knowledge at the following levels
- Identify, understand and know how to use sources, statistical techniques and computer tools to organize selected information and plan development and cooperation reports, analyses and actions
- Conduct an ethical reflection on cooperation, information, images and their applicability in specific contexts and information sources

#### Module 8. Equality and Cooperation

- Internalize, analyze and understand what we mean when we talk about gender, development and women's rights
- Know the role of feminist movements in the processes of social advancement and transformation
- Reflect on the practical application areas of the Sevillian society that can be shared and extrapolated to other realities
- Promote work in professional teams, taking advantage of its benefits as a space for reflection, orientation of the practice of development cooperation and as an instrument for the analysis of situations and the design of work and intervention alternatives
- Intervene under gender perspectives in international development cooperation

#### Module 9. Environmental Rights

- Know the interrelationship between all the elements of the environment and how they influence each other
- Recognize the different types of pollution and how they affect the environment
- Analyze the regulations and legislation in force on the subject
- Incorporate the notions of sustainability and environmental and ecological sustainability into cooperation projects and actions in a cross-cutting manner
- Understand the link between migration and the development of countries of origin and destination
- Know the migratory processes of refuge and asylum at world level and the different policies and actions carried out in the field of development cooperation with these groups

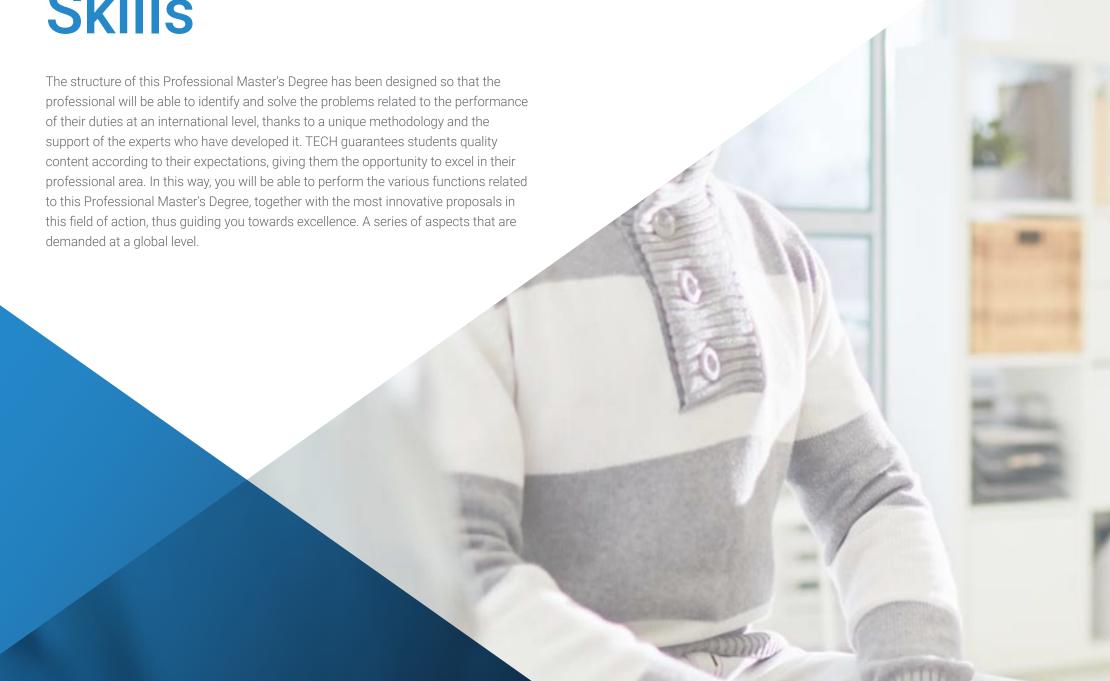

#### Module 10. NGDOs and Local, Regional and International Solidarity

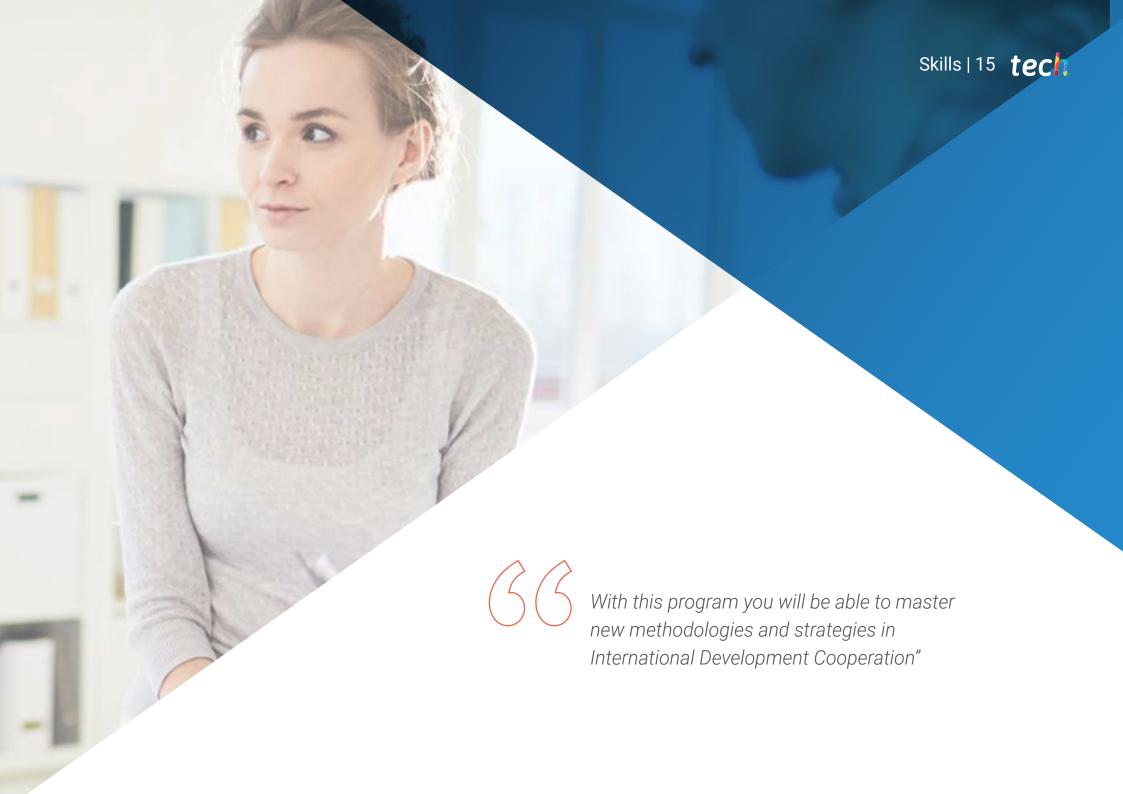

- Understand the concepts and definitions of NGOs
- Know the diversity of NGOs and their field or work
- Internalize the legislation of national and international NGOs, associations and foundations

- Learn the broad outlines of NGO management
- Work in multidisciplinary and multicultural teams as an expert in international development cooperation
- Identify, understand and know how to use sources and tools to identify international development cooperation projects

### tech 16 | Skills

#### **Basic Skills**

- Analyze and understand global initiatives to fight poverty
- Know the basic theories of development in its economic, social, cultural and political aspects
- Understand the socio-cultural reality of the different regional and international environments

Seize the moment and take the step to get up to date on the latest developments in International Development Cooperation"

#### **Specific Skills**

- Know the current system of international relations and the different actors, both official and unofficial, that comprise it
- Know the system and policies of International Development Cooperation
- Understand the causes, dynamics and consequences of human mobility and migration
- Develop skills to work with the main vulnerable subjects involved in development cooperation actions and programs
- Know how to analyze public policies within the logical framework in development cooperation policies
- Understand the main problems of the different regional and international environments
- Have the skills to develop new tools for development cooperation and to intervene in public and private management of development cooperation projects in different regional areas
- Promote a critical analysis and reflection of the problems and their causes that affect individuals, groups and societies, especially children, fostering a change of attitudes and behaviors in our society
- Carry out actions and programs aimed at raising awareness of certain situations of injustice and changing values to combat them
- Create empowerment processes and spaces for active democratic participation for children, aimed at transforming policies and the decision-making model on issues that affect them
- Analyze the social, economic, political and cultural reality of the different societies in which the work of development cooperation agents is contextualized

### tech 18 | Skills

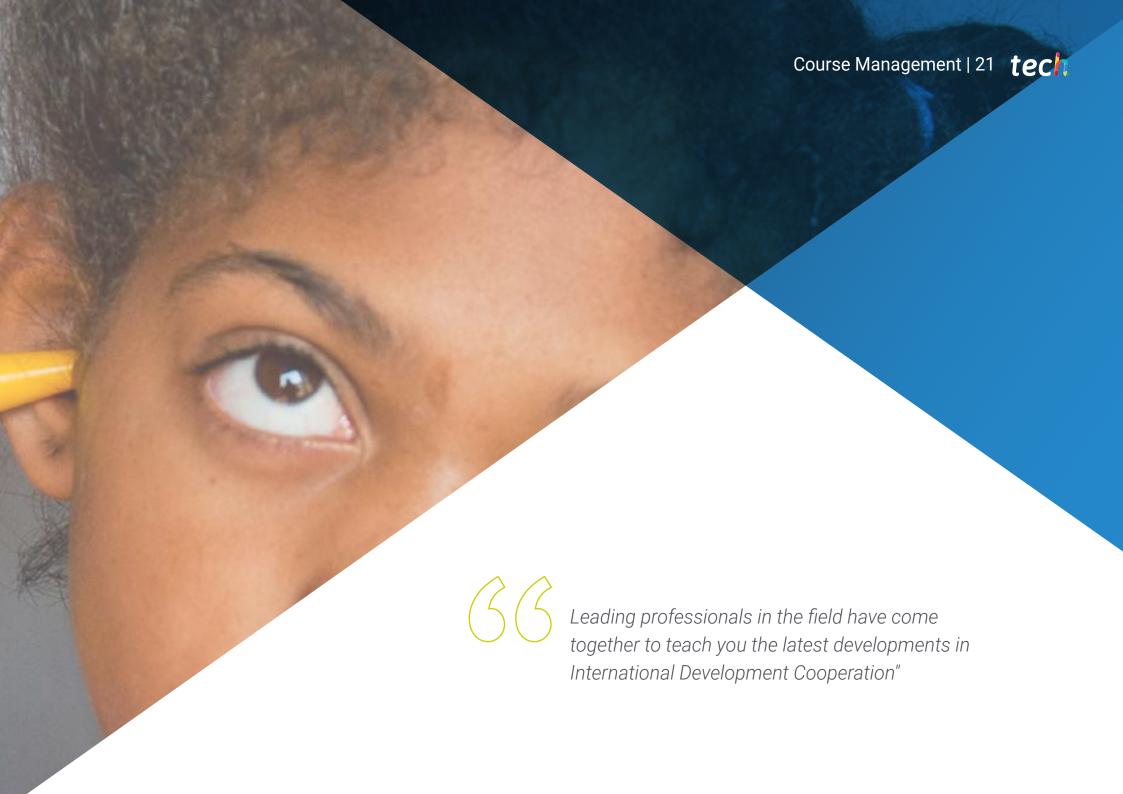

- Develop attitudes and skills for the fight against poverty and equity awareness through
  development education, and for the processes of initiation and development of
  cooperation projects, with values such as motivation, intercultural dialogue and solidarity
- Acquire the necessary knowledge for the management of humanitarian action (humanitarian aid and emergencies), from the analysis of the basic needs of the population and the management of the main risks
- Analyze and assess the sense of sectoral and geographic priorities of international development cooperation, identify the strategic axes that guide cooperation policies and actions, the sectors of action and the instruments for their implementation
- Design cooperation projects in public, private and non-governmental entities
- Design and manage technical instruments that gather in a clear, precise and updated way, the necessary information for the assessment, planning and decision making in cooperation projects
- Understand, provide or collaborate in humanitarian activities directed to the victims of armed conflicts under the coverage of International Humanitarian Law
- Be aware of the limitations that humanitarian law imposes on combatants in relation
  to the conduct of hostilities, respect for zones, places and installations marked with a
  protection sign, and the requirement of a code of conduct relating to victims, medical and
  religious personnel, and humanitarian organizations

# **Module 3.** Design, Monitoring and Assessment of International Development Cooperation Projects

- 3.1. Fundamental Knowledge for the Design of International Development Cooperation Projects
  - 3.1.1. Introduction
  - 3.1.2. Meaning of the Project
  - 3.1.3. Types of Projects
  - 3.1.4. The Project Cycle
  - 3.1.5. Steps to Elaborate a Project
  - 3.1.6. Identification
  - 3.1.7. Design
  - 3.1.8. Execution and Follow-Up
  - 3.1.9. Assessment
  - 3.1.10. Bibliography
- 3.2. The Logical Framework Approach
  - 3.2.1. Introduction
  - 3.2.2. What Is the Logical Framework Approach?
  - 3.2.3. Approaches to the Method
  - 3.2.4. Definitions of the Method
  - 3.2.5. Steps of the Method
  - 3.2.6. Conclusion
  - 3.2.7. Bibliography
- 3.3. Project Identification According to LFA (I)
  - 3.3.1. Introduction
  - 3.3.2. Participation Analysis
  - 3.3.3. Criteria for the Selection of Project Beneficiaries
  - 3.3.4. Outline of the Results of the Participation Analysis
  - 3.3.5. Difficulties in Participation Analysis
  - 3.3.6. Golden Rule of Participation Analysis
  - 3.3.7. Case Study
    - 3.3.7.1. Diseases in the Montecito Community
    - 3.3.7.2. Participation Analysis
  - 3.3.8. Bibliography

## tech 52 | Methodology

### At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the physician's professional practice.

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method"

### The effectiveness of the method is justified by four fundamental achievements:

- Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that evaluate real situations and the application of knowledge.
- 2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
- 3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
- 4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

### **Relearning Methodology**

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

Professionals will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

### Methodology | 55 tech

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology, more than 250,000 physicians have been trained with unprecedented success in all clinical specialties regardless of surgical load. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

## tech 56 | Methodology

This program offers the best educational material, prepared with professionals in mind:

### **Study Material**

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

### **Surgical Techniques and Procedures on Video**

TECH introduces students to the latest techniques, the latest educational advances and to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

#### **Interactive Summaries**

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

### **Additional Reading**

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

### **Expert-Led Case Studies and Case Analysis**

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

### **Testing & Retesting**

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

### Classes

There is scientific evidence on the usefulness of learning by observing experts.

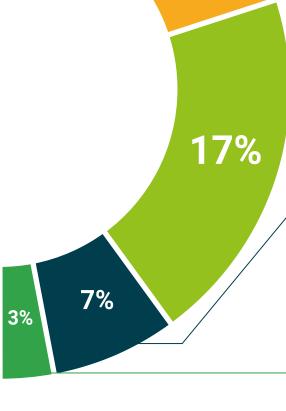

The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

#### **Quick Action Guides**

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

### tech 60 | Certificate

This **Professional Master's Degree in International Development Cooperation** contains the most complete and up-to-date scientific program on the market.

After the student has passed the assessments, they will receive their corresponding **Professional Master's Degree** diploma issued by **TECH Technological University** via tracked delivery\*.

The diploma issued by **TECH Technological University** will reflect the qualification obtained in the **Professional Master's Degree**, and meets the requirements commonly demanded by job exchanges, competitive examinations, and professional career evaluation committees.

Title: **Professional Master's Degree in International Development Cooperation**Official N° of Hours: **1,500 h.** 

<sup>\*</sup>Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.

## Professional Master's Degree International Development Cooperation

- » Modality: online
- » Duration: 12 months
- » Certificate: TECH Technological University
- » Dedication: 16h/week
- » Schedule: at your own pace
- » Exams: online
