01

Introduction

Infectious diseases, due to their frequency in the emergency department and primary care, account for more than 60% of consultations. From the end of the neonatal period to 5 years of age, pneumonia, malaria and diarrhea are the main causes of death.

Improve your knowledge in Pediatric Infectious Diseases through this program, where you will find the best teaching material with real clinical cases. Learn here about the latest advances in the specialty to be able to perform a quality medical practice"

At the diagnostic level, the increasingly frequent availability of new techniques allows a more rapid etiological diagnosis or by complementary techniques that require clinical diagnostic orientation such as ultrasound, computed tomography or magnetic resonance imaging. Without forgetting the support that the clinician has in laboratory tests that determine acute phase reactants such as procalcitonin or C-reactive protein, which are sometimes given excessive importance, forgetting that we treat patients and not laboratory results.

All this means that, in order to attend these patients with the maximum guarantee, the clinicians must maintain a continuous preparation, even if they are not specialists, since, as we have mentioned, the percentage of visits or interconsultations related to the infection is very high. If we add to this the increasing amount of information provided by parents, sometimes not always contrasted, professional updating becomes essential to be able to provide adequate information according to the current scientific evidence at all times.

Parents who refuse vaccines, children from war-torn or low-income countries, infections in transplant patients, children with devices, fevers without a focus in children well vaccinated with existing vaccines, use of immunomodulatory therapies are increasingly common situations that we must deal with and provide a rapid response to.

Update your knowledge through the Professional Master's Degree in Pediatric Infectious Diseases"

This **Professional Master's Degree in Pediatric Infectious Diseases** contains the most complete and up-to-date scientific program on the market. The most important features include:

- » Development of more than 75 clinical cases presented by experts in pediatric infectious diseases. The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- » Diagnostic and therapeutic innovations on assessment, diagnosis and treatment in Pediatric Infectious Diseases
- » It contains practical exercises where the self-assessment process can be carried out to improve learning
- » Clinical and radiological imaging iconography with at-a-glance diagnosis presentation
- » An algorithm-based interactive learning system for decision-making in the clinical situations presented throughout the course
- » With special emphasis on evidence-based medicine and research methodologies in pediatric infectious diseases
- » All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- » Content that is accessible from any fixed or portable device with an internet connection

“ *This Professional Master's Degree may be the best investment you can make when selecting a refresher program, for two reasons: in addition to updating your knowledge in Pediatric Infectious Diseases, you will obtain a qualification endorsed by TECH Technological University*”

Its teaching staff includes professionals belonging to the field of Pediatric Infectious Diseases, who bring to this specialization the experience of their work, in addition to recognized specialists belonging to leading scientific societies.

Thanks to its multimedia content developed with the latest educational technology, they will allow the professionals a situated and contextual learning, that is to say, a simulated environment that will provide an immersive learning programmed to train in real situations.

The design of this program is based on Problem-Based Learning, through which the physician must try to solve the different professional practice situations that arise throughout the academic course. For this purpose, the physician will be assisted by an innovative interactive video system developed by renowned experts in the field of pediatric infectious diseases with extensive teaching experience.

Increase your decision-making confidence by updating your knowledge through this Professional Master's Degree.

Make the most of this opportunity to learn about the latest advances in Pediatric Infectious Diseases and improve your patient's care.

02 Objectives

This Professional Master's Degree in Pediatric Infectious Diseases is aimed at facilitating the performance of children's physicians in dealing with infectious diseases, by updating their knowledge in epidemiology, clinical, microbiological diagnosis, preventive methods, nosocomial infection, antibacterial, antiviral or antifungal medications and the role of Public Health.

“

This Professional Master's Degree is designed for you to update your knowledge in Pediatric Infectious Diseases, with the use of the latest educational technology, to contribute with quality and safety to decision-making, diagnosis, treatment and patient support"

General Objective

- » Update the knowledge of the pediatrician or the physician who treats children, through the latest advances in the field of Primary Care or Hospital Infectious Diseases, in order to increase the quality of care, the safety of the physician and to achieve the best outcome for the patient

Specific Objectives

Module 1. Current Overview in Infectious Diseases

- » Describe the current epidemiology with the changes that have occurred in the last decade
- » Identify the epidemiological situation of bacterial meningitis
- » Explain the epidemiology of tuberculosis in our environment and the resistance to treatment
- » Describe the microbiome, its relationship to health and disease
- » Explain the role of fever associated with infection and antipyretic therapeutics
- » Describe the alterations of the immune system that contribute to vulnerability to infection

Module 2. The Laboratory in the Diagnosis of Infectious Diseases

- » Explain the new methods used in blood culture and manage the sample processing technique
- » Define the fundamentals, indications, limitations and cost-effectiveness of rapid virus identification methods and their use in daily practice
- » Discern on the application of IGRAS
- » Analyze the proper interpretation of an antibiogram
- » Identify the limitations of serology
- » Describe genetic methods for the diagnosis of infection

Module 3. Infection in the Neonatal Period

- » Identify risk factors, microorganisms and prevention of infection in neonatology
- » Identify congenital infections
- » Describe the current situation of vertically transmitted infections
- » Practice the algorithms for action against infection in the neonatal period
- » Identify early and late neonatal sepsis
- » Address the diagnostic and therapeutic management of the main community-acquired infections in patients older than 30 days

Module 4. Eye, Skin, Soft Tissue and Skeletal System Infections

- » Analyze the different complementary explorations to be used cost-effectively in community-acquired infections
- » Describe the clinical manifestations of diseases affecting the skin and soft tissues
- » Develop a correct strategy in the differential diagnosis of diseases with exanthema

Module 5. ENT and Respiratory Infections

- » Identify complications of diseases such as community-acquired pneumonia or pyelonephritis
- » Describe the appropriate management of tuberculosis: infection, disease and contact study
- » Acquire current knowledge of Mycoplasma pathology

Module 6. Gastrointestinal and Urinary Tract Infections and STDs

- » Define the procedure for exploratory and preventive actions for renal or urinary malformations, as well as vesicoureteral reflux in urinary tract infections
- » Describe the management of severe sepsis and code sepsis

Module 7. Febrile Syndromes and Exanthems

- » Identify the up-to-date diagnostic criteria for viral hepatitis and its current treatment

Module 8. Nosocomial Infections

- » Discern the use of antibacterial treatments in surgical pathology
- » Differentiate between viral and bacterial respiratory infections by clinical, epidemiological and complementary examinations
- » Address hospital-acquired infection with outbreak control and the topicality of multidrug-resistant bacteria

Module 9. HIV Infection in Pediatrics and Adolescence

- » Diagnose complications of viral diseases
- » Develop a strategy to deal with suspected infection(s) with associated primary immunodeficiency
- » Describe the management of vertically transmitted or adolescent HIV infection
- » Describe the use of antiretrovirals, determination of resistance and side effects

Module 10. Systemic, Cardiovascular and Nervous System Infections

- » Describe the management of central nervous system infections and the differential diagnosis with autoimmune encephalitis

Module 11. Infections Associated with Social Changes or Deficits

- » Develop better skills and working methods related to immunosuppressed patients
- » Describe how to deal with immunosuppressed, hemato-oncologic, transplanted, neutropenic, cystic fibrosis, asplenic or major burns patients
- » Determine the infectiological performance of children from low-income countries, sub-Saharan, refugees, affected by poverty

Module 12. Infection in the Patient at Risk

- » Explain the practical management of parasitic diseases
- » Define the responsibility of the clinician in prescribing antibiotic treatment and its consequences

Module 13. Treatment in Pediatric Infectious Diseases

- » Identify the main groups of antibacterials, antivirals and antifungals with their innovations and the judicious and rational way of drug choice
- » Describe the optimal and rational use of antibacterials against multidrug-resistant bacteria

Module 14. Preventive Measures

- » Describe the current use of vaccines, doses, intervals, side effects, responses to anti-vaccine movements
- » Describe the indications for antibiotic prophylaxis and post-exposure prophylaxis

Module 15. Public Health. Infectious Disease Control and Research

- » Define the situations in which a contact study is indispensable
- » Explain the ethical implications and repercussions in the research of antibacterial, antiviral, antifungal drugs or vaccines

A unique program that will allow you to acquire superior training to develop in this field"

03 Skills

After passing the assessments of the Professional Master's Degree in Pediatric Infectious Diseases, the physician will have acquired the professional skills necessary for a quality and up-to-date practice based on the latest scientific evidence.

“

With this program you will be able to master the new diagnostic and therapeutic procedures in Pediatric Infectious Diseases”

General Skills

- » Understand knowledge in such a way as to be able to generate issues or questions that are amenable to research
- » Know how to apply knowledge with the ability to solve problem cases in daily practice situations
- » Acquire the ability to communicate their diagnostic and therapeutic conclusions clearly and unambiguously to families
- » Acquire the ability to clearly and concisely convey their knowledge in clinical sessions or discussions with colleagues
- » Acquire the ability to continue to prepare autonomously
- » Develop skills in their specialization to recognize the need for teamwork with microbiologists, pharmacologists, imaging or public health professionals
- » Define the need for continuing education both collectively and autonomously in the field of epidemiology, laboratory diagnosis or therapeutics
- » Define the ability to organize a self-critical work system and a system for updating their knowledge
- » Develop critical thinking and research skills
- » Easily adapt to changes in diagnostic, treatment and prevention issues

Specific Skills

- » Assess, implement and formulate clinical guidelines and protocols for infectious diseases or therapeutics
- » Identify the main signs and symptoms of local and imported infectious diseases in the normal and immunocompromised host
- » Identify the current epidemiology of pediatric infectious diseases, with changes, emergencies and variations for various reasons
- » Identify the role of the microbiota in order to be able to establish hypotheses, diagnoses and appropriate therapeutic schemes
- » Explain the situation of immunosuppression, as well as the infections that help in its diagnosis, the associated infections and how to reach the diagnosis
- » Determine at each moment the most appropriate laboratory test for each diagnosis with knowledge of the process, the chronology and its interpretation
- » Correct application of the results of antibiograms and sensitivity studies
- » Identify infectious risk situations during the perinatal period and apply antimicrobials appropriately for this period of life
- » Identify the main infectious syndromes in primary care with correct explanation to family members of the different steps to follow and the evolution of the processes

- » Easily elucidate the need for hospitalization as well as outpatient treatment
 - » Easily establish differential diagnoses and application of scientifically proven algorithms for action
 - » Develop competencies for the management of infectious emergencies such as sepsis, meningitis, respiratory distress in the first months of life
 - » Identify nosocomial infection, the microorganisms in their environment and apply control measures
 - » Define the management of patients at risk due to transplants, oncology, underlying diseases or febrile neutropenia
 - » Safely deal with adolescent infectious problems such as HIV, sexually transmitted infections and explain the different action plans
 - » Identify the infectious problems of internationally adopted children, refugees, immigrants, travelers, and children with social deficits and plan the action to be taken
 - » Safe handling of antibiotics, antiviral and antifungal drugs Gain knowledge about how to establish combinations
 - » Apply antibiotic therapy judiciously and rationally in order to avoid or reduce multi-resistances
 - » Describe the pharmacodynamic and pharmacokinetic basis of antibiotic therapy and apply it in practice
- » Determine the therapeutic of choice for multiresistances
 - » Apply the different prevention strategies (behavioral, vaccination, antibiotic, passive immunoprophylaxis)
 - » Identify vaccine side effects and know how to communicate their possibilities in a rational way
 - » Identify the need for mandatory reporting of certain diseases, those susceptible to contact studies, those susceptible to isolation, etc
 - » Manage scientific databases for carrying out reviews and bibliographic searches of scientific studies
 - » Conduct a critical study on topics of scientific interest in Infectious Diseases
 - » Describe how to communicate the results of a research study after having analyzed, assessed and synthesized the data

04

Course Management

The program includes in its teaching staff reference specialists in Pediatric Infectious Diseases, Pediatrics, Microbiology and other related areas, who bring to this training the experience of their work. Additionally, other recognized specialists participate in its design and preparation, which means that the program is developed in an interdisciplinary manner.

“

Learn from reference professionals, the latest advances in the procedures in the field of Pediatric Infectious Diseases"

Management

Dr. Hernández-Sampelayo Matos, Teresa

- ♦ Head of Pediatrics Service and ACES at the Gregorio Marañón General University Hospital
- ♦ Head of the Pediatric Infectious Diseases Section at the Gregorio Marañón General University Hospital
- ♦ Accreditation by ANECA as a contract professor Doctor of the National Agency for Quality Assessment and Accreditation
- ♦ Emergency Pediatrics of the Autonomous University of Madrid. Medicine
- ♦ Pediatric Gastroenterology of the Autonomous University of Madrid. Medicine
- ♦ Neonatology of the Autonomous University of Madrid. Medicine
- ♦ Pediatric Antifungal Optimization Program at Astllas Pharma Europe Ltd

Dr. Otero Reigada, María Carmen

- ♦ Former chief clinician in infectious diseases and infants at La Fe de Valencia University Hospital
- ♦ Pediatric Infectious Diseases Specialist
- ♦ Specialist in Clinical Microbiology
- ♦ Currently pediatrician and pediatric infectologist at Quironsalud Hospital of Valencia

Professors

Mr. Aguilera Alonso, David

- » Attending Physician in Pediatrics and Specific Areas / Pediatric Infectious Diseases Unit at the Gregorio Marañón General University Hospital
- » Degree in Medicine and Surgery from the Universitat de València
- » Master's Degree in Pediatric Infectious Diseases at the Complutense University of Madrid
- » Professional Master's Degree on HIV infection Rey Juan Carlos University
- » University Expert in Basic Pediatric Infectious Diseases Rey Juan Carlos University

Dr. Calle Miguel, Laura

- » Health Service of the Principality of Asturias, Health Area V, Pediatric Specialist Physician
- » Master's Degree in Research in Medicine from the University of Oviedo
- » Degree in Medicine and Surgery from the University of Oviedo
- » Doctor of Medicine. University of Oviedo Pediatric Diseases
- » Specialist in Pediatrics and Specific Areas of Gijón, Principality of Asturias, Spain

Dr. Hernanz Lobo, Alicia

- » Assistant Pediatric Physician at the Gregorio Marañón General University Hospital
Graduated in Medicine from the Complutense University of Madrid (UCM) in 2012
- » Specialist in Pediatrics and its Specific Areas, having trained as a resident intern at the Gregorio Marañón General University Hospital
- » Master's Degree in Pediatric Infectious Diseases Complutense University of Madrid
- » Degree and Master's Degree in Medicine Complutense University of Madrid
- » Official Doctoral Program in Health Sciences Research Complutense University of Madrid

Ms. Manzanares Casteleiro, Ángela

- » Medical Doctor, Autonomous University of Madrid. Completion of the Pediatrics specialty in May 2020
- » Currently working until 12/31/2020 in the Pediatric Infectious Diseases Section of the 12 de Octubre University Hospital and the Pediatric Clinical Research Unit of the 12 de Octubre Hospital
- » Studying since October 2020 the Master's Degree in Pediatric Infectious Diseases at the Complutense University of Madrid with clinical practice at the Gregorio Marañón Hospital
- » Researcher at the Foundation for Biomedical Research at the 12 de Octubre University Hospital
- » Resident Medical Intern at the 12 de Octubre University Hospital

Dr. Argilés Aparicio, Bienvenida

- » MIR Specialist in Pediatrics and its Specialized Areas at La Fe University Hospital, Valencia

Dr. Bosch Moragas, María

- » Specialist in Pediatrics and its Specialized Areas
- » Catalan Health Institute (ICS). CAP st Anadreu. Barcelona

Dr. Cantón Lacasa, Emilia

- » Research Center (Microbiology Laboratory), La Fe University Hospital (Valencia)

Dr. Cambra Sirera, José Isidro

- » Head of Section, Pediatrics Service, Lluís Alcanyís Hospital (Xàtiva)

Dr. Canyete Nieto, Adela

- » Head of Pediatric Oncology Unit, La Fe Polytechnic and University Hospital (Valencia)

Dr. Couselo Jerez, Miguel

- » Doctor of Medicine
- » Specialist in Pediatric Surgery
- » Pediatric Surgery Service, La Fe University and Polytechnic Hospital (Valencia)

Dr. Cortell Aznar, Isidoro

- » Specialist in Pediatric Pulmonology, La Fe University and Polytechnic Hospital (Valencia)

Dr. Dasí Carpio, María Ángeles

- » Head of Hematology Unit, La Fe Polytechnic and University Hospital (Valencia)
- » Professor at the Universitat de València

Dr. Fonseca Martín, Rosa

- » Specialist in Pediatric Surgery
- » Pediatric Surgery Service, La Fe University and Polytechnic Hospital (Valencia)

Dr. Gobernado Serrano, Miguel

- » Specialist in Clinical Microbiology, attached to the University and Polytechnic Hospital of La Fe (Valencia)

Dr. González Granda, Damiana

- » Microbiology Unit of the Xàtiva Hospital (Valencia)

Dr. Ibáñez Martínez, Elisa

- » Specialist in Clinical Microbiology and Parasitology, La Fe University and Polytechnic Hospital (Valencia)

Dr. Izquierdo Macián, Isabel

- » Head of the Neonatology Service of the Child Disease Area, La Fe Polytechnic and University Hospital (Valencia)

Dr. Martínez Morel, Héctor

- » Area Specialist Physician (FEA) in Preventive Medicine and Public Health, La Fe Polytechnic and University Hospital (Valencia)

Dr. Meyer García, M Carmen

- » Area Specialist Physician (FEA) in Preventive Medicine and Public Health, La Fe Polytechnic and University Hospital (Valencia)

Dr. Modesto i Alarcón, Vicente

- » Head of Section of Pediatric ICU and Resuscitation, La Fe Polytechnic and University Hospital (Valencia)

Dr. Mollar Maseres, Juan

- » Doctor of Medicine. Head of Section of Preventive Medicine, La Fe University and Polytechnic Hospital (Valencia)

Dr. Monte Boquet, Emilio

- » Head of Department Pharmacy Service, La Fe University and Polytechnic Hospital (Valencia)

Dr. Monteagudo Montesinos, Emilio

- » Head of the Pediatrics Department, La Fe University and Polytechnic Hospital (Valencia)

Dr. Negre Policarpo, Sergio

- » PhD in Medicine and Surgery from the University of Valencia
- » Head of the Pediatric Gastroenterology and Nutrition Section at the Quironsalud Hospital (Valencia)

Dr. Oltra Benavent, Manuel

- » Pediatric Specialist Physician in Pediatrics and its Specialized Areas, Francesc de Borja Hospital
- » Gandía Health Department

Dr. Ortí Martín, Ana

- » Specialist in Pediatrics and its Specialized Areas
- » Padre Jofré Health Center (Valencia)

Dr. Peiró Molina, Esteban

- » Specialist Physician
- » Pediatric Cardiology Section, La Fe University and Polytechnic Hospital (Valencia)

Dr. Rincón López, Elena

- » Assistant Physician, Pediatric Infectious Diseases Section, Gregorio Marañón General University Hospital (Madrid)
- » Master's Degree in Pediatric Infectious Diseases at the Complutense University of Madrid

Dr. Rodríguez, Héctor

- » Specialist in Pediatrics and its Specialized Areas
- » Aldaya Health Center, Manises Hospital (Valencia, Spain)

Ms. Sastre Cantón, Macrina

- » Vaccine Research Area
- » Foundation for the Promotion of Health and Biomedical Research of the Valencian Community (FISABIO)

05

Structure and Content

The structure of the contents has been designed by a team of professionals from the best hospitals and universities, aware of the relevance of current education in order to intervene in the prevention, diagnosis and treatment of infection in pediatric patients, and committed to quality teaching through new educational technologies.

“

This Professional Master's Degree in Pediatric Infectious Diseases contains the most complete and up-to-date scientific program on the market"

Module 1. Current Overview in Infectious Diseases

- 1.1. Update on Epidemiological and Public Health Aspects
 - 1.1.1. Current Status of the Epidemiology of Vaccine-Preventable Diseases in the World
- 1.2. Current Epidemiology of Relevant Infectious Pathologies in our Environment
 - 1.2.1. Current Epidemiology of Bacterial Meningitis
 - 1.2.2. Current Epidemiology of Poliomyelitis and Flaccid Paralysis due to Non-Poliovirus and Live Attenuated Virus Vaccine
 - 1.2.3. Epidemiology of Tuberculosis and its Resistance in High-Income Countries
 - 1.2.4. Epidemiology of Sexually Transmitted Infections in Adolescents
- 1.3. Transmission Mechanisms in Pediatrics
 - 1.3.1. Dynamics and Transmission Mechanisms of the Most Common Agents in Pediatrics Today (Includes Intrafamily Transmission)
 - 1.3.2. Seasonality of Infection in Pediatrics Outbreak Management
 - 1.3.2.1. Temporal Epidemiological Parameters in the Most Common Infections in the Community, Common Point Sources, Continuous, Propagative and Mixed exposure
- 1.4. Microbiota, Defensive and Immunomodulatory Function
 - 1.4.1. Composition of the Intestinal Flora, Modification with Age
 - 1.4.2. Defensive and Immunomodulatory Role of the Microbiota
- 1.5. Fever and Inflammatory Response
 - 1.5.1. Update on the Role of Fever in Infection and Antipyretic Therapeutics
 - 1.5.2. Inflammatory Response and Systemic Inflammatory Response Syndrome
- 1.6. Infections in the Immunocompromised Patient
- 1.7. Image Interpretation of Infectious Diseases in the Pediatric Age
 - 1.7.1. Interpretation of Ultrasound Images Applied to Infectious Pathology
 - 1.7.2. Interpretation of CT Applied to Infectious Pathology
 - 1.7.3. NMR Interpretation Applied to Infectious Pathology

Module 2. The Laboratory in the Diagnosis of Infectious Diseases

- 2.1. Sample Collection
 - 2.1.1. Urine Culture
 - 2.1.2. Stool Culture
 - 2.1.3. Graham's Test
 - 2.1.4. Blood Cultures
 - 2.1.5. Catheters
 - 2.1.6. Ocular System
 - 2.1.7. Upper Respiratory Tract
 - 2.1.8. Lower Respiratory Tract
 - 2.1.9. Cerebrospinal Fluid
 - 2.1.10. Skin and Soft Tissues
 - 2.1.11. Osteoarticular Infections
 - 2.1.12. Bone Marrow
- 2.2. Current Application of Rapid Infection Diagnosis Methods in Primary and Specialized Care
 - 2.2.1. Antigen Detection
 - 2.2.2. Direct Sample Staining
 - 2.2.3. Urgent Serology
 - 2.2.4. Molecular Biology Techniques
 - 2.2.5. Accelerating Antimicrobial Susceptibility Testing
 - 2.2.6. Current Proteomic Techniques for the Diagnosis of Infectious Diseases
 - 2.2.7. Shared Microbiologist-Clinician Decisions in Diagnosis and Treatment of Infectious Diseases
- 2.3. Antibigrams
 - 2.3.1. Interpretation of Antibigrams. Practical Guide
 - 2.3.2. Clinical Significance of Bacterial Resistance
- 2.4. Interpretation of the Microbiological Report of Respiratory Specimens
- 2.5. Interpretation of the Microbiological Report of Specimens from the Genitourinary Tract and Gastrointestinal Tract
- 2.6. Interpretation of the Microbiological Blood Culture Report
- 2.7. Interpretation of Cerebrospinal Fluid Microbiology Report
- 2.8. Interpretation of the Microbiological Report in Osteoarticular Infection
- 2.9. Interpretation of the Microbiological Report of Skin and Soft Tissue Samples

Module 3. Infection in the Neonatal Period

- 3.1. Neonatal Infection
 - 3.1.1. Current Obstetric Factors Conditioning Neonatal Infection
 - 3.1.2. Causative Agents
- 3.2. Antibiotherapy in Pregnancy
 - 3.2.1. Current Role of Antibiotherapy During Pregnancy
 - 3.2.2. Current Prophylaxis of Group B Streptococcus Infection
- 3.3. Emerging Congenital Infections
 - 3.3.1. Chagas Disease
 - 3.3.2. Zika
- 3.4. Classical Neonatal Infections and Current Epidemiologic Changes
 - 3.4.1. Herpes Virus Infections
 - 3.4.2. Rubella
 - 3.4.3. Cytomegalovirus
 - 3.4.4. The Son of a Mother with Tuberculosis
 - 3.4.5. Update on Necrotizing Enterocolitis
- 3.5. Vertical Infection
 - 3.5.1. Update on Vertical Infection by Hepatitis B Virus and its Detection
- 3.6. Neonatal Sepsis
 - 3.6.1. Early Sepsis
 - 3.6.2. Late Onset Sepsis
- 3.7. Infections in the Neonatal Intensive Care Unit
 - 3.7.1. Current Algorithm of Action for Fever in Children under 30 Days of Age
 - 3.7.2. Neonatal Fungal Infection
- 3.8. Laboratory Studies in Neonatology Units
 - 3.8.1. Etiological Identification
 - 3.8.2. Inflammatory Markers
 - 3.8.3. Multiorgan Markers

Module 4. Eye, Skin, Soft Tissue and Skeletal System Infections

- 4.1. Bacterial or Viral Conjunctivitis
- 4.2. Dacryocystitis
- 4.3. Endophthalmitis
- 4.4. Preseptal and Postseptal Orbital Cellulitis
- 4.5. Bacterial Skin Infections
- 4.6. Viral Skin Infections
- 4.7. Parasitic Skin Infections
- 4.8. Dermatophyte Skin Infections
- 4.9. Candida and Malassezia Skin Infections
- 4.10. Involvement of Methicillin-Resistant Staphylococcus Aureus (MRSA) in Pediatric Skin and Soft Tissue Infections in our Environment
- 4.11. Adenitis
- 4.12. Lymphangitis
- 4.13. Necrotizing Fasciitis
- 4.15. Bite Infections
 - 4.15.1. Bites in Urban Environment
 - 4.15.2. Bites in Rural Environment
- 4.16. Osteomyelitis and Arthritis
- 4.17. Myositis and Pyomyositis
- 4.18. Spondylodiscitis

Module 5. ENT and Respiratory Infections

- 5.1. Pharyngotonsillitis
- 5.2. Peritonsillar Regional Abscesses and Lemierre's Syndrome
 - 5.2.1. Abscesses in Peritonsillar Region
 - 5.2.2. Mastoiditis
- 5.3. Otitis and Mastoiditis
- 5.4. Sinusitis
- 5.5. Update on Diphtheria
- 5.6. Oral Mucosa Infections. Odontogenic Infections
- 5.7. Common Cold
- 5.8. Influenza in Pediatrics
- 5.9. Pertussis Syndrome
- 5.10. Update on Bronchiolitis Treatment
- 5.11. Community-Acquired Pneumonia (CAP)
 - 5.11.1. Etiological Agents by Age
 - 5.11.2. Diagnosis
 - 5.11.3. Severity Factors
 - 5.11.4. Treatment
- 5.12. Pleural Empyema
- 5.13. TB
 - 5.13.1. Current Guidelines
 - 5.13.2. Infections
 - 5.13.3. Disease
 - 5.13.4. Diagnosis
 - 5.13.5. Treatment

Module 6. Gastrointestinal and Urinary Tract Infections and STDs

- 6.1. Acute Gastroenteritis
 - 6.1.1. Current Management
- 6.2. Traveler's Diarrhea in Children
- 6.3. Current Role of Parasites in Diarrheal Syndromes in our Environment
- 6.4. Update on Hepatitis A and E
- 6.5. Hepatitis B and Hepatitis C
 - 6.5.1. Current Treatment Options
 - 6.5.2. Risk Factors for Disease Progression
 - 6.5.3. Current Treatment Options
- 6.6. Update on Clostridium Difficile in Pediatrics
- 6.7. Acute Appendicitis in Children
 - 6.7.1. Need or Not of Antibiotic Treatment
- 6.8. Urinary Infection
 - 6.8.1. Current Treatment Management
 - 6.8.2. Complementary Examinations
 - 6.8.3. Prophylaxis
 - 6.8.4. Role of Vesicoureteral Reflux
- 6.9. Epidemiology, Clinical Manifestations, Diagnosis and Treatment of the Most Common Sexually Transmitted Infections
 - 6.9.1. Syphilis
 - 6.9.2. Gonorrhea
 - 6.9.3. Papillomavirus
 - 6.9.4. Chlamydia Trachomatis
 - 6.9.5. Herpes Virus 1 and 2
- 6.10. Perirectal Abscesses

Module 7. Febrile Syndromes and Exanthems

- 7.1. Fever Without a Focus in Children Less than 3 Months Old
 - 7.1.1. Algorithm of Action
 - 7.1.2. Fever of Unknown Origin in Pediatrics
- 7.2. Recurrent and Periodic Fever
 - 7.2.1. Differential Diagnosis
- 7.3. Leishmaniasis
- 7.4. Exanthematous Diseases and Differential Diagnosis
- 7.5. Mycoplasma Pneumoniae Non-Pulmonary Pathology

Module 8. Nosocomial Infections

- 8.1. Healthcare Associated Infections (HAIs) in Pediatrics
- 8.2. Device-Associated Infections
 - 8.2.1. Infections Associated with Intravascular Devices
 - 8.2.2. Ventilator-Associated Infections
- 8.3. Infection of Surgical Wounds Current Management

Module 9. HIV Infection in Pediatrics and Adolescence

- 9.1. Vertical Transmission
 - 9.1.1. Current Situation of Vertical Transmission in our Environment
 - 9.1.2. Prevention and Management
- 9.2. Infection in Adolescents
- 9.3. Antiretrovirals in Pediatrics
 - 9.3.1. Updates
 - 9.3.2. Combinations
 - 9.3.3. Determination of Resistance
 - 9.3.4. Side Effects and Metabolic Alterations
- 9.4. Pharmacokinetics
 - 9.4.1. Interactions
 - 9.4.2. Level Monitoring
- 9.5. When and How to Start HAART
- 9.6. Current Management of HBV and HCV Coinfection

Module 10. Systemic, Cardiovascular and Nervous System Infections

- 10.1. Endocarditis
- 10.2. Bacterial Meningitis
 - 10.2.1. Action in Case of Suspicion
- 10.3. Viral Meningitis
 - 10.3.1. Current Agents
- 10.4. Cerebral Abscess
 - 10.4.1. Infections Associated with Surgical Procedures
 - 10.4.2. Venous Thrombosis
- 10.5. Cat Scratch Disease
- 10.6. Mononucleosis Syndromes
- 10.7. Hemorrhagic Fevers
 - 10.7.1. Diagnosis
 - 10.7.1. Treatment
- 10.8. Endocarditis
- 10.9. Pericarditis
- 10.10. Encephalitis
- 10.11. Sepsis, Severe Sepsis and Septic Shock in Pediatrics

Module 11. Infections Associated with Social Changes or Deficits

- 11.1. Infections Associated with Social Deficits
 - 11.1.1. Infections Associated with Social Deficits
 - 11.1.2. Current Child Poverty and Infections in our Environment
- 11.2. Tropical Diseases
 - 11.2.1. Initial Infectological Examination of Newly Arrived Immigrant Children and Children from International Adoptions
 - 11.2.2. Febrile Syndrome in the Child Coming from a Low-Income Country or from the Tropics, Regardless of the Reason for the Trip
 - 11.2.3. Malaria Current Diagnostic and Therapeutic Management
 - 11.2.4. Vector-Borne Infections. Dengue. Chikungunya Zika
 - 11.2.5. Vector-Borne Diseases. Schistosomiasis Onchocerciasis
 - 11.2.6. Parasitic Diseases. Ascaris, Amoebas, Tenias, Oxyuris, Strongyloides, Trichuris Trichiura

Module 12. Infection in the Patient at Risk

- 12.1. Children with Immunomodulatory Treatments in Rheumatology
 - 12.1.1. Management of Patients Undergoing Immunomodulatory Treatments
- 12.2. Current Empiricism of Infections in Oncology Patients
 - 12.2.1. Adenovirus Infections in Hemato-Oncology
 - 12.2.2. Diagnostic and Therapeutic Approach to Febrile Neutropenia in Cancer Patients
 - 12.2.3. Empirical and Targeted Treatment of Infections in Cancer Patients
- 12.3. Infections and Current Response to Children with Underlying Pathology
 - 12.3.1. Risk Infections in Patients with Hemolytic Anemias (Hemoglobinopathies and Membranopathies)
 - 12.3.2. Treatment of Severe Neutropenia and Congenital and Functional Asplenia
 - 12.3.3. Infections in Children with Cystic Fibrosis
- 12.4. Current Approach to Infections in the Transplanted Child
 - 12.4.1. Cytomegalovirus and BK Virus Infections in Transplant Recipients

Module 13. Treatment in Pediatric Infectious Diseases

- 13.1. Pharmacokinetics and Pharmacodynamics of Antibacterial Agents in Pediatrics
- 13.2. Bacterial Resistance and Antibiotherapy
 - 13.2.1. Carbapenem-Resistant Enterobacteriaceae, BLES, MRSA, Vancomycin-Resistant
 - 13.2.2. Resistance to Antifungals
- 13.3. Choice of Antibiotics in the Different Families
 - 13.3.1. Beta-Lactams
 - 13.3.2. Macrolides
 - 13.3.3. Aminoglycosides
 - 13.3.4. Fluoroquinolones
- 13.4. Choice Among the Different Families of Antifungals
 - 13.4.1. Azoles
 - 13.4.2. Echinocandins
 - 13.4.3. Polyenes
- 13.5. Resurrection of Old Therapeutic Agents
- 13.6. New Antibiotics or Families

- 13.6.1. Ceftobiprole, Ceftaroline, Doripenem, Dalbavancin, Talavacina, Teixobactin, Ceftolozane-Tazobactam, Ceftazidime-Avibactam, Lugdunin, Oritavancin, Iclaprim, Ramoplanin, Fidaxomicin, Fidaxomicin
- 13.7. New Tuberculostatics
- 13.8. Antibiotherapy in Obese Pediatric Patients
- 13.9. New Requirements for the Rational and Judicious Choice of Suitable Treatment
 - 13.9.1. Antibiotic Policy in Hospitals and Primary Care. Optimization Program
- 13.10. Role of Agriculture and Animal Husbandry in Antibiotic Resistance
- 13.11. Use of Antivirals
 - 13.11.1. In Immunocompetent Patients
 - 13.11.2. Use of Antivirals in Immunocompromised Patients
- 13.12. Essential Antiparasitic Drugs in Pediatrics
- 13.13. Update on Allergy to Anti-Infectives. Alternatives
- 13.14. Monitoring of Anti-Infectives
- 13.15. Update on the Duration of Antibiotic Treatments

Module 14. Preventive Measures

- 14.1. Control and Response to Hospital Outbreaks of Infection
 - 14.1.1. Common Microorganisms
 - 14.1.2. Current Multidrug-Resistant Microorganisms (Including Decontamination in the MRSA Patient)
- 14.2. Hospital Organization and Control of Today's Multidrug-Resistant Microorganisms
- 14.3. Current Indications for Isolation in Hospital Pediatrics
- 14.4. Current Vaccines
 - 14.4.1. Prematurity
 - 14.4.2. Immunodeficient Child
 - 14.4.3. Child Undergoing Immunosuppressive Treatments
 - 14.4.4. Splenectomized Patients
 - 14.4.5. Transplant Recipients
 - 14.4.6. HIV
- 14.5. Update on Vaccination of Children in Special Situations
- 14.6. Current Indications for Antibiotic Prophylaxis

- 14.7. Indications for Prophylaxis
 - 14.7.1. In case of Accidental Puncture
 - 14.7.2. Indications for Sexual Abuse Prophylaxis
- 14.8. Post-Exposure Performance
 - 14.8.1. Chickenpox
 - 14.8.2. Measles
 - 14.8.3. In Hepatitis B
 - 14.8.4. In Hepatitis A
 - 14.8.5. TB
 - 14.8.6. Tetanus
 - 14.8.7. Rabies
- 14.9. Current Status of Perioperative Prophylaxis of the Surgical Patient
- 14.10. Update on Antibiotic Prophylaxis in Transplant Children and Patients Treated for Atypical Hemolytic Uremic Syndrome

Module 15. Public Health. Infectious Disease Control and Research

- 15.1. Emerging Infectious Diseases
- 15.2. Diseases in Which Contact Study is Currently Indicated
- 15.3. Mandatory Disease Reporting and its Practical Significance
- 15.4. Indications of Directly Observed Treatment
- 15.5. Ethics in the Research of New Antibiotics, Antivirals, Antifungals or Vaccines
- 15.6. How to Plan a Study in Infectious Diseases?
- 15.7. Evaluation and Critical Reading of Scientific Publications
- 15.8. Current Morbidity and Mortality of Pediatric Infectious Diseases
- 15.9. Seasonality of Infection in Pediatrics

“

A unique, key, and decisive preparation experience to boost your professional development”

06

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the physician's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that evaluate real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

Professionals will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology, more than 250,000 physicians have been trained with unprecedented success in all clinical specialties regardless of surgical load. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and relearn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Surgical Techniques and Procedures on Video

TECH introduces students to the latest techniques, the latest educational advances and to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence on the usefulness of learning by observing experts. The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

07 Certificate

The Professional Master's Degree in Pediatric Infectious Diseases guarantees you, in addition to the most rigorous and updated training, access to a Professional Master's Degree issued by TECH Technological University.

“

*Successfully complete this program
and receive your university degree
without travel or laborious paperwork”*

This **Professional Master's Degree in Pediatric Infectious Diseases** contains the most complete and updated scientific program on the market.

After the student has passed the evaluations, they will receive their corresponding **Professional Master's Degree** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Professional Master's Degree, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Professional Master's Degree in Pediatric Infectious Diseases**

Official N° of hours: **1,500 h.**

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
