Introduction

Physicians working in the care of burn patients must be highly qualified in the epidemiology and classification of burns, enabling them to identify the severity of the injury and, therefore, to perform appropriate interventions for each patient. Increase your specialization with TECH thanks to the success of this very complete educational program.

“

At TECH, we offer the chance to specialize in the Epidemiology and Classification of burns, meaning you can attend to your patients with more confidence”

The objective of this Postgraduate Certificate in Burns: Epidemiology, Classification and Referral Centers is to prepare physicians in the care of patients who have suffered burns and who may be in a serious condition. Therefore, only a thorough and up-to-date knowledge of this pathology will allow the application of the most advanced treatments, which will allow an effective recovery of patients.

The Postgraduate Certificate begins with an epidemiological topic that seeks to highlight the importance of this type of pathology. Subsequently, the different depth classifications are presented, and a table of equivalences is made to facilitate their understanding. It also includes a section on the use of new technologies in the diagnosis of burn depth. This training places special emphasis on patients with extensive burns or those who, even with less extensive burns, may be considered critical patients.

In addition to the complete and fully updated information, it offers the greatest experience from the teaching staff in the treatment of this type of patient. This experience is very valuable since there are very few burn units and, therefore, the possibility of training in them is scarce. As a main advantage, it is a 100% online specialization, so the student can decide from where to study and at what time to do it, in this way, they can flexibly self-direct their study hours.

This **Postgraduate Certificate in Burns: Epidemiology, Classification and Referral Centers** contains the most complete and up-to-date scientific program on the market.

The most important features include:

- ♦ The development of clinical practical case studies presented by experts in burns
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ The presentation of practical workshops on procedures and techniques
- ♦ An algorithm-based interactive learning system for decision-making in the clinical situations presented throughout the course
- ♦ Action protocols and clinical practice guidelines, which cover the most important latest developments in this specialist area
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Special emphasis on test-based medicine and research methodologies
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

Increase your proficiency in treating patients with major burns and give your career a boost"

“

This Postgraduate Certificate is the best investment you can make in a specialization to update your knowledge in the care of patients with major burns”

This Postgraduate Certificate allows you to study from anywhere in the world. All you need is a computer or mobile device with an internet connection.

Our innovative teaching methodology will allow you to study as if you were dealing with real cases, and therefore increasing your training.

The teaching staff includes a team of prestigious doctors, who bring their experience to this program, as well as renowned specialists from leading scientific societies.

Its multimedia content, developed with the latest educational technology, will allow professionals to learn in a contextual and situated learning environment, i.e., a simulated environment that will provide immersive specialization for real situations.

The design of this program focuses on Problem-Based Learning, by means of which professionals must try to solve the different professional practice situations that are presented to them throughout the academic year. For this reason, you will be assisted by an innovative, interactive video system created by renowned and experienced experts in radiology centers with extensive teaching experience.

02 Objectives

This Postgraduate Certificate in Burns: Epidemiology, Classification and Referral Centers is aimed at facilitating the performance of the healthcare professional with the latest advances and newest treatments in the sector.

“

This program will both bring a sense of confidence in your daily healthcare activities and will help you grow professionally"

General objectives

- Learn to manage and treat this complex pathology in which Intensive Care Medicine Specialists and plastic surgeons are fundamentally involved, but also other specialists such as anesthesiologists, infectologists, rehabilitators, psychiatrists, etc., and, of course, specialized nurses
- Offer a complete, integrated and multidisciplinary specialization that enables the care of patients with severe burns and that, through a multidisciplinary knowledge, facilitates the collaboration with other specialists

Specific objectives

- ♦ Familiarization with burn-related skills
- ♦ Gain an in-depth understanding of the latest developments in classifications and severity scores
- ♦ Clearly outline the actions required for on-site care and transfer of the burned patient
- ♦ Provide the student with the criteria for patient referral to referral centers

Our goal is to achieve academic excellence and to help you achieve it too"

03

Course Management

A team of leading professionals in the field of burns, who work in major hospitals of great prestige, have created the syllabus, transferring to the program their experience gained in their jobs throughout their careers.

“

The best professionals in this area have come together to offer you the most specialized expertise in burns"

International Guest Director

Dr. Jeremy Goverman is recognized internationally as a leading authority in the field of Plastic and Reconstructive Surgery, with a particular specialization in the treatment of Burns and Complex Wounds. Indeed, his professional career is a testament to his commitment to academic and clinical excellence.

With outstanding clinical work, he has served as a Burn Surgeon at Shriners Hospitals for Children and Massachusetts General Hospital (MGH), where he also holds the senior position of Associate Director of the MGH Wound Center. His depth of knowledge and experience is reflected in his ability to provide the highest quality care to his patients, from the time of the accident to their reintegration into the community.

In addition to his clinical activities, Dr. Jeremy Goverman has made an outstanding contribution to research in his field. His focus on the use of lasers for the treatment of burn scars and trauma has resulted in numerous successful treatments and renowned publications in peer-reviewed journals, such as the Journal of Burn Care & Research and Surgical Clinics of North America. In fact, he has performed more than 2,000 laser treatments specifically for scars of various causes.

Likewise, his leadership in the development of scar treatment programs, at the MGH Burn Center, reflects his commitment to innovation and continuous improvement in patient care. It is no wonder he was awarded Boston's Top Plastic Surgeon Award (2016-2021).

Dr. Jeremy, Goverman

- Associate Director of the Wound Center at Massachusetts General Hospital, U.S.A.
- Burn Surgeon at MGH and Shriners Hospital for Children
- Care of Calpifilaxis Patients at MGH
- Burn Care Provider at Sumner Redstone Burn Center
- Boston Plastic Surgeon of the Year Award (2016-2021)
- Surgical Critical Care Specialist by the American Board of Surgery
- Fellowship in General Plastic Surgery from the American Board of Plastic Surgery
- Fellow in General Surgery by the American Board of Surgery
- Doctor of Medicine, Sackler School of Medicine, Tel Aviv University

“

Thanks to TECH, you will be able to learn with the best professionals in the world”

Management

Dr. Rubio Mateo-Sidró, Jose Alfonso

- ♦ Attending Physician in Intensive Care Medicine University Hospital 12 de Octubre
- ♦ Fellowship in Cardiothoracic Critical Care. Papworth Hospital. Cambridge UK
- ♦ Extracorporeal Life Support Organization (ELSO)
- ♦ Specialist in Intensive Care Medicine
- ♦ Degree in Medicine. Cádiz University

Dr. Sánchez Sánchez, Santos Manuel

- ♦ Head of Section of Intensive Care Medicine La Paz University Hospital
- ♦ Doctor of Medicine from the Autonomous University Madrid. Outstanding Cum Laude
- ♦ Master's Degree in Clinical, Medical and Healthcare Management. CEU Cardenal Herrera University
- ♦ Medical Specialist in Intensive Care Medicine. La Paz University Hospital
- ♦ Degree in Medicine and Surgery. University of Salamanca

Professors

Dr. Rodríguez Peláez, Jorge

- ♦ Resident of Intensive Care Medicine at La Paz University Hospital
- ♦ Degree in Medicine from the University of Oviedo
- ♦ Advanced CPR Instructor. Autonomous University of Barcelona
- ♦ Teaching assistant for the Master in Critical Illness and Emergencies

Dr. Flores Cabeza, Eva

- ♦ Specialist in Intensive Care Medicine in the Burn Unit at the La Paz University Hospital
- ♦ Member of the High-Level Isolation Unit La Paz-Carlos III
- ♦ Certified Expert in Emerging and High-Risk Virus Pathology in the UAM

Dr. Ruiz Barranco, Inés

- ♦ Specialist in Intensive Care Medicine in the Burn Unit at the La Paz University Hospital
- ♦ Head of the ICU service in the Multidisciplinary Critical Care Unit COVID-19, newly created

Dr. García Muñoz, Andoni

- ♦ Associate of Intensive Care Medicine
- ♦ Degree in Medicine and Surgery, University of the Basque Country
- ♦ Master's Degree in Clinical Ultrasound for Emergency and Intensive Care CEU

04

Structure and Content

The structure of the curriculum has been designed by a team of professionals knowledgeable about the implications of medical specialization in the approach to the patient, aware of the relevance of current training and committed to quality teaching through new educational technologies.

“

*This Postgraduate Certificate contains
the most complete and up-to-date
scientific program on the market”*

Module 1. Burns: Epidemiology, Classification and Reference Centers

- 1.1. Epidemiology
 - 1.1.1. Incidence
 - 1.1.2. Economic Importance
 - 1.1.3. Major Disasters
- 1.2. Classification of Burns
 - 1.2.1. Histological Classification
 - 1.2.2. Clinical Classification
 - 1.2.3. Grading
 - 1.2.4. Equivalence Between the Different Classifications
 - 1.2.5. Particular Areas of Burn Incidence
 - 1.2.6. New Technologies in Depth Diagnostics
- 1.3. Extension of Burns
 - 1.3.1. Rule of 9
 - 1.3.2. Lund and Browder Chart
 - 1.3.3. Right Hand Rule
 - 1.3.4. New Methods
- 1.4. Location and Severity of Burns
 - 1.4.1. Importance of localization
 - 1.4.2. Minor Burns
 - 1.4.3. Moderate Burns
 - 1.4.4. Severe Burns
- 1.5. The way they are formed
 - 1.5.1. Importance of the Mechanism
 - 1.5.2. Epidemiological Impact on the Different Mechanisms
 - 1.5.3. Main Mechanisms
- 1.6. Severity Scores
 - 1.6.1. Baux Score
 - 1.6.2. ABSI Severity Index
 - 1.6.3. Other Methods

- 
- 1.7. Management of Burn Patients
 - 1.7.1. Brief History
 - 1.7.2. Decisive Historic Moments
 - 1.8. Treatment at the Place of Accident
 - 1.8.1. Separation from Place of Accident
 - 1.8.2. Assessment
 - 1.8.2.1. ABCDE
 - 1.8.2.2. Polytraumatized
 - 1.8.2.3. Specific
 - 1.8.3. Start of Treatment
 - 1.9. Transfer
 - 1.9.1. Transfer to Hospital
 - 1.9.2. Criteria for the Transfer to Referral Centers
 - 1.10. Referral Centers
 - 1.10.1. Necessity
 - 1.10.2. Members
 - 1.10.3. Structure

A unique, key, and decisive educational experience to boost your professional development”

05 Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the physician's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that evaluate real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

Professionals will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology, more than 250,000 physicians have been trained with unprecedented success in all clinical specialties regardless of surgical load. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Surgical Techniques and Procedures on Video

TECH introduces students to the latest techniques, the latest educational advances and to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

06 Certificate

The Postgraduate Certificate in Burns: Epidemiology, Classification and Referral Centers guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Global University.

“

*Successfully complete this program
and receive your university degree
without travel or laborious paperwork”*

This program will allow you to obtain your **Postgraduate Certificate in Burns: Epidemiology, Classification and Referral Centers** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
