06 Certificate

p. 28

tech 06 | Introduction

Currently, pathologies of the digestive system represent a major challenge for the healthcare system. According to the World Health Organization (WHO), gastrointestinal diseases are the second leading cause of mortality worldwide, with more than 3 million deaths annually. For this reason, it is essential for nursing professionals to have a solid knowledge of nutrition and pathologies of the digestive system, since their intervention is essential in prevention, diagnosis and treatment.

The Postgraduate Certificate in Nutrition in Pathologies of the Digestive Tract for Nurses offers specialized training in this field, providing updated tools and knowledge to successfully address the challenges posed by these pathologies. This program responds to the current needs of nurses, as it provides them with the possibility of acquiring skills and abilities that allow them to improve their daily practice and provide quality care to patients with gastrointestinal diseases.

The program is developed in a 100% online format, which allows for greater flexibility and convenience, without having to comply with pre-established schedules or attend to preset schedules or to attend on-site centers. In addition, it uses the Relearning methodology, which focuses on repetition and experience on repetition and experience, confronting the professional with real cases and simulations.

This Postgraduate Certificate in Nutrition in Pathologies of the Digestive Tract for Nursing contains the most complete and up-to-date scientific program on the market. The most important features include:

- Clinical cases presented by experts in nutrition. The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- The latest diagnostic and therapeutic information on how to approach Nutrition in Pathologies of the Digestive Tract in Nursing
- An algorithm-based interactive learning system for decision-making in the clinical situations presented throughout the course
- Special emphasis on test-based medicine and research methodologies in Clinical Nutrition
- All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

With this Course you will be able to combine high intensity training with your personal and professional life, achieving your goals in a simple and real way"

Our innovative telepractice concept will give you the opportunity to learn through an immersive experience, which will provide you with a faster integration and a much more realistic view of the contents: learning from an expert"

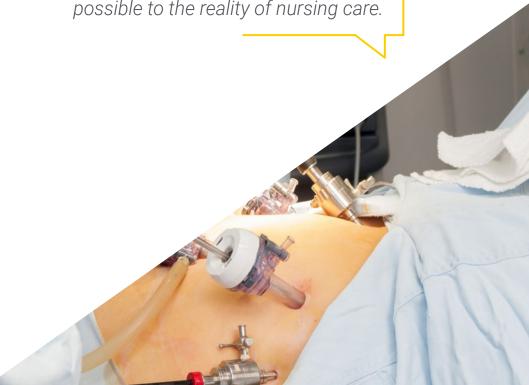

The program's teaching staff includes professionals from the field who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

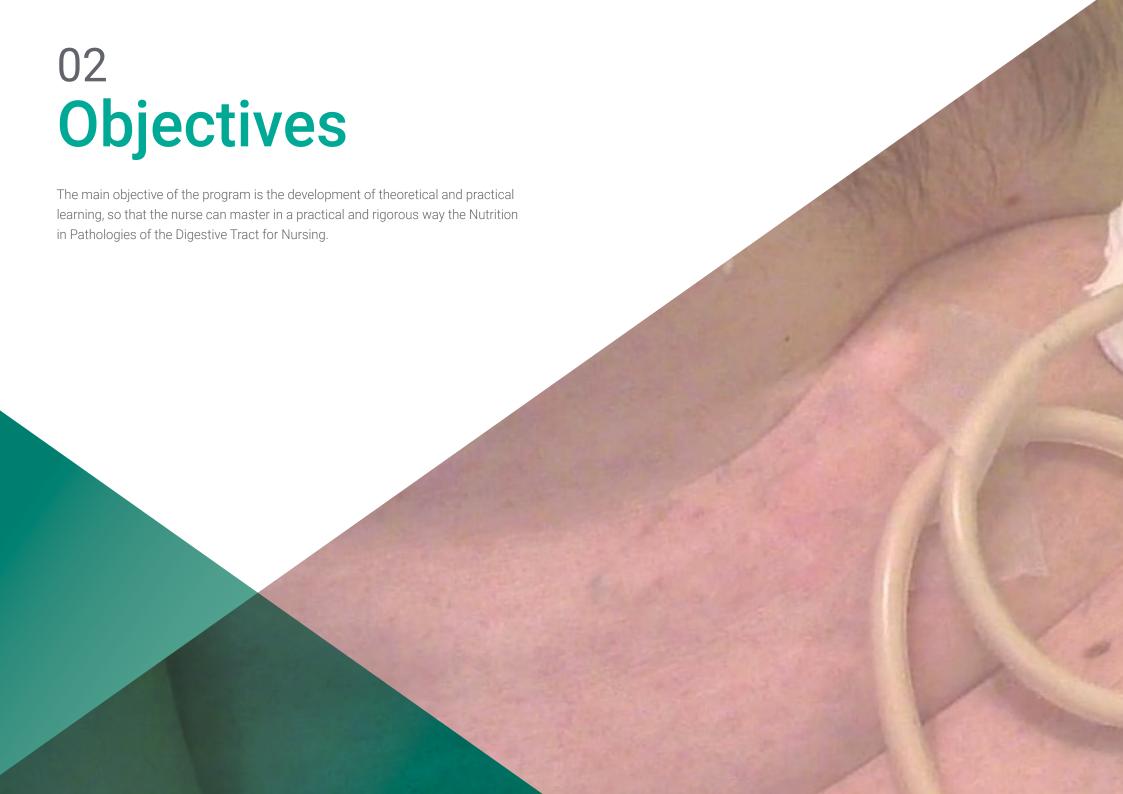

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

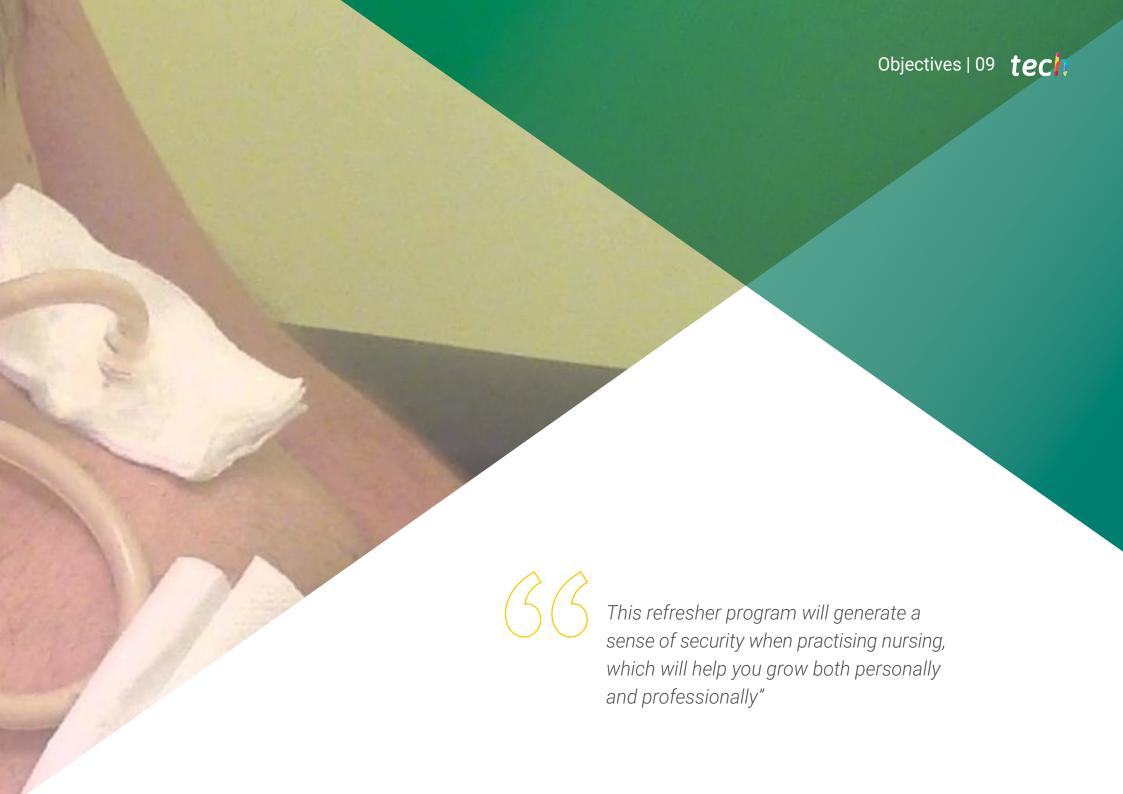

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the academic year For this purpose, the students will be assisted by an innovative interactive video system created by renowned and experienced experts.

The learning of this course is developed through the most developed didactic means in online teaching to guarantee that your effort will have the best possible results.

It includes clinical cases to bring the development of the program as close as possible to the reality of nursing care.

tech 10 | Objectives

General Objectives

- Actualizar los conocimientos del profesional de enfermería en las nuevas tendencias en nutrición humana, tanto en la salud como en situaciones patológicas a través de la enfermería basada en la evidencia
- Promote work strategies based on the practical knowledge of the new trends in nutrition and its application to child and adult pathologies, where nutrition plays a fundamental role in treatment
- Encourage the acquisition of technical skills and abilities, through a powerful audiovisual system, and the possibility of development through online simulation workshops and/or specific training
- Encourage professional stimulation through continuing education and research
- Prepare the professional for research into patients with nutritional problems

Specific Objectives

- Analyze the different methods for assessing nutritional status
- Interpret and integrate anthropometric, clinical, biochemical, hematological, immunological, and pharmacological data in the patient's nutritional assessment and dietary-nutritional treatment
- Early detection and evaluation of quantitative and qualitative deviations from the nutritional balance due to excess or deficiency
- Describe the composition and utilities of new foods
- Gain up-to-date knowledge on the dietetic treatment of oral cavity pathologies in adults paying special attention to sensory disorders and mucositis
- Study the interrelationship between diet and oral disease
- Identify nutritional factors involved in gastroesophageal reflux and ulcers
- Gain up-to-date knowledge of the management of patients with swallowing problems
- Understand the implications that nutrition can have in the treatment of liver diseases
- Describe the management of nutritional support in inflammatory diseases
- Reflect on the etiology of constipation and its relationship to diet in adults
- Determine the dietary guidelines for adults with chronic renal failure and on dialysis
- Gain up-to-date knowledge on the most common food allergies and intolerances

- Reflect on new techniques in digestive and intestinal surgery and their impact on patient nutrition
- Determine the management of the small intestine
- Know the dietary treatment for biliary and pancreatic pathologies
- Describe the main malabsorption syndromes and how they are treated
- Identify the signs and symptoms of the most prevalent colonic pathology and its nutritional treatment
- Determine the role of the intestinal microbiota and its implications in pathologies

Make the most take the opportunity and take the step to get up to date on the latest developments in Nutrition in Pathologies of the Digestive Tract for Nursing"

tech 14 | Course Management

Management

Ms. Aunión Lavarías, María Eugenia

- Pharmacist Clinical Nutrition Expert
- Author of the reference book in the field of Clinical Nutrition Dietary, Management of Overweight in the Pharmacy Office".
 (Editorial Médica Panamericana)
- Pharmacist with extensive experience in the public and private sector
- Head Pharmacist
- Pharmacy Assistant. Pharmacy Chain. British Health and Beauty Retailers Boots UK. Oxford Street Centro de Londres
- Bachelor 's Degree in Food Science and Technology. University of Valencia
- Course Management Pharmacy Office

tech 18 | Structure and Content

Module 1. Assessment of Nutritional Status and Diet. Practical Application

- 1.1. Bioenergy and Nutrition
 - 1.1.1. Energy Needs
 - 1.1.2. Methods of Assessing Energy Expenditure
- 1.2. Assessment of Nutritional Status
 - 1.2.1. Body Composition Analysis
 - 1.2.2. Clinical Diagnosis. Symptoms and Signs
 - 1.2.3. Biochemical, Hematological and Immunological Methods
- 1.3. Intake Assessment
 - 1.3.1. Methods for Analyzing Food and Nutrient Intake
 - 1.3.2. Direct and Indirect Methods
- 1.4. Update on Nutritional Requirements and Recommended Intakes
- 1.5. Nutrition in a Healthy Adult. Objectives and Guidelines. Mediterranean Diet
- 1.6. Nutrition in Menopause
- 1.7. Nutrition in the Elderly

Module 2. Nutrition in Digestive Tract Pathologies

- 2.1. Nutrition in Oral Disorders
 - 2.1.1. Taste
 - 2.1.2. Salivation
 - 2.1.3. Mucositis
- 2.2. Nutrition in Esophageal and Gastric Disorders
 - 2.2.1. Gastroesophageal Reflux
 - 2.2.2. Gastric Ulcers
 - 2.2.3. Dysphagia
- 2.3. Nutrition in Post-Surgical Syndromes
 - 2.3.1. Gastric Surgery
 - 2.3.2. Small Intestine
- 2.4. Nutrition in Bowel Function Disorders
 - 2.4.1. Constipation
 - 2.4.2. Diarrhea

Structure and Content | 19 tech

- 2.5. Nutrition in Malabsorption Syndromes
- 2.6. Nutrition in Colonic Pathology
 - 2.6.1. Irritable Bowel
 - 2.6.2. Diverticulosis
- 2.7. Nutrition in Inflammatory Bowel Disease (IBD)
- 2.8. Most Frequent Food Allergies and Intolerances with Gastrointestinal Effects
- 2.9. Nutrition in Liver Diseases
 - 2.9.1. Portal Hypertension
 - 2.9.2. Hepatic Encephalopathy
 - 2.9.3. Liver Transplant
- 2.10. Nutrition in Biliary Diseases. Biliary Lithiasis
- 2.11. Nutrition in Pancreatic Diseases
 - 2.11.1. Acute Pancreatitis
 - 2.11.2. Chronic Pancreatitis

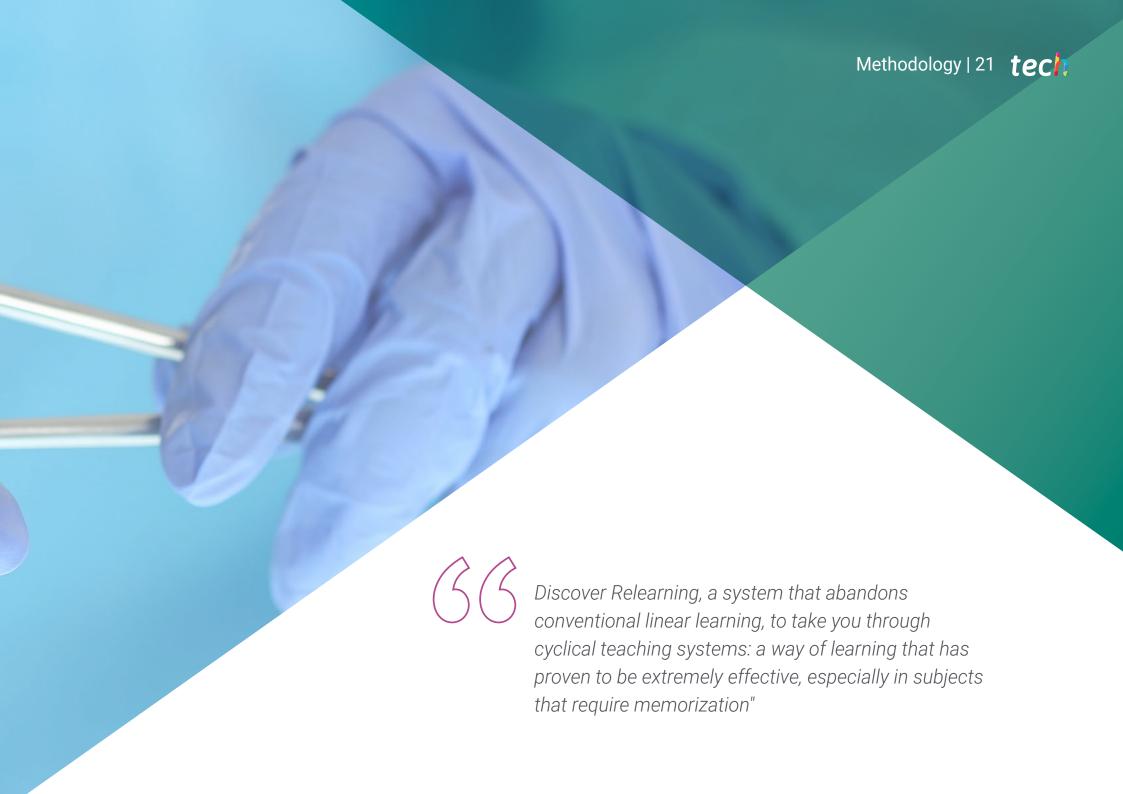

A unique, essential, and decisive learning experience to enhance your professional development"

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

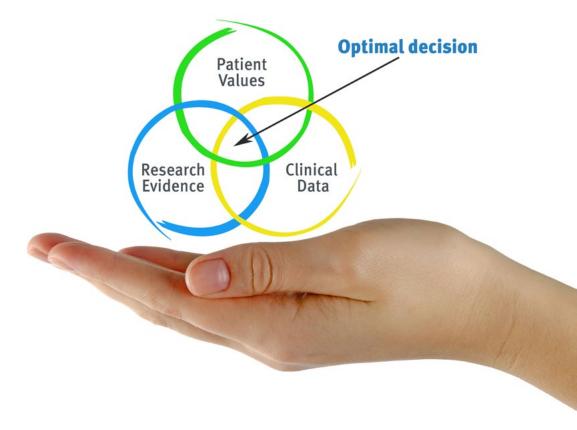

tech 22 | Methodology

At TECH Nursing School we use the Case Method

In a given situation, what should a professional do? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Nurses learn better, faster, and more sustainably over time.

With TECH, nurses can experience a learning methodology that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, in an attempt to recreate the real conditions in professional nursing practice.

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method"

The effectiveness of the method is justified by four fundamental achievements:

- Nurses who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
- 2. The learning process has a clear focus on practical skills that allow the nursing professional to better integrate knowledge acquisition into the hospital setting or primary care.
- 3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
- 4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine case studies with a 100% online learning system based on repetition combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

The nurse will learn through real cases and by solving complex situations in simulated learning environments.

These simulations are developed using state-of-the-art software to facilitate immersive learning.

Methodology | 25 tech

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 175,000 nurses with unprecedented success in all specialities regardless of practical workload. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Nursing Techniques and Procedures on Video

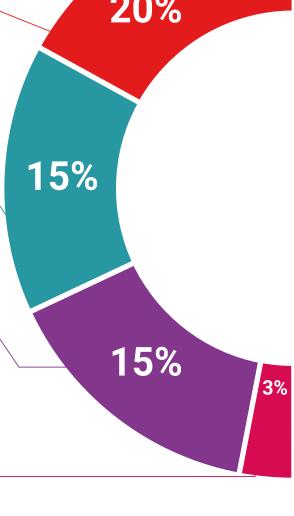

We introduce you to the latest techniques, to the latest educational advances, to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

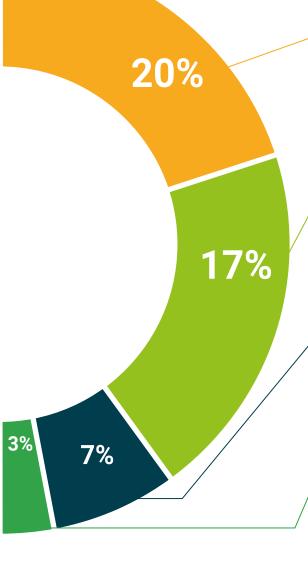

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

tech 30 | Certificate

This program will allow you to obtain your **Postgraduate Certificate in Nutrition in Pathologies of the Digestive Tract for Nursing** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra (*official bulletin*). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: Postgraduate Certificate in Nutrition in Pathologies of the Digestive Tract for Nursing Modality: online

Duration: 6 weeks

Daration: O Weeks

Accreditation: 7 ECTS

Mr./Ms. _____, with identification document _____ has successfully passed and obtained the title of:

Postgraduate Certificate in Nutrition in Pathologies of the Digestive Tract for Nursing

This is a program of 210 hours of duration equivalent to 7 ECTS, with a start date of dd/mm/yyyy and an end date of dd/mm/yyyy.

TECH Global University is a university officially recognized by the Government of Andorra on the 31st of January of 2024, which belongs to the European Higher Education Area (EHEA).

In Andorra la Vella, on the 28th of February of 2024
