Introduction

Technology is increasingly entering our lives, and nursing education and learning are no exception to this advancement. This highlights the importance of staying informed about the latest developments in this area in order to learn how to make the most of them in the field of nursing.

“

*Learn about the latest advancements in
Digital Teaching for Nursing Professionals
and take a quality step in your training”*

An essential complement for those who want to venture into the world of digital education, understanding the specifics of teaching, and learning about the technological tools applied to education.

This Postgraduate Certificate offers a practical and comprehensive view of digital teaching, starting from the most basic tools and progressing to the development of digital teaching skills. An advance over the eminently theoretical programs, focused on teaching work in physical classrooms, which do not address in depth the use of technology in the educational context, without forgetting the role of teaching innovation. The approach provides a far deeper understanding of how technology works at the different educational levels, so that the professional, depending on his or her interests, can have various options for its application in the workplace.

In this course, the studies required to specialize in digital teaching are addressed from a practical perspective, emphasizing the most innovative aspects of the field. Students will access knowledge both at a theoretical and applied level, ensuring its relevance for their current or future roles, thus gaining a qualitative advantage over other professionals in the sector. This advantage will also facilitate entry into the job market or promotion within it, offering extensive theoretical and practical knowledge that will enhance daily work skills.

This **Postgraduate Certificate in Digital Teaching for Nursing Professionals** contains the most complete and up-to-date scientific program on the market.

The most important features include:

- ♦ Development of over 75 practical cases presented through digital teaching courses
- ♦ The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Updates on digital teaching
- ♦ It contains practical exercises where the self-assessment process can be carried out to improve learning
- ♦ Algorithm-based interactive learning system for decision making in the situations that are presented to the student
- ♦ With a special focus on evidence-based methodologies in digital teaching
- ♦ All this will be complemented with theoretical lessons, course questions, discussion forums on controversial issues and individual reflection papers
- ♦ Content that is accessible from any fixed or portable device with an internet connection

Update your knowledge through the Postgraduate Certificate in Digital Teaching for Nursing Professionals program"

“

This Postgraduate Certificate may be the best investment you can make when selecting an update program for two reasons: in addition to refreshing your knowledge in Digital Teaching for Nursing Professionals, you will receive a diploma for the Postgraduate Certificate awarded by TECH Global University, the leading educational institution”

Increase your decision-making confidence by updating your knowledge through this program.

Take advantage of the opportunity to learn about the latest advancements in Digital Teaching for Nursing Professionals and enhance the training of your students.

The program includes faculty members from the field of digital teaching, who share their professional experience in this training, as well as recognized specialists from reference societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive program designed to learn in real situations.

The design of this program focuses on Problem-Based Learning, by means of which nurses must try to solve the different professional practice situations that arise throughout the program. For this, the professional will have the support of an innovative interactive video system created by renowned experts in the field of digital teaching with extensive teaching experience.

02 Objectives

The Postgraduate Certificate in Digital Teaching for Nursing Professionals is designed to support professionals working with adolescents and/or guiding them in their future careers.

“

This course is aimed at helping you update your knowledge in Digital Teaching for Nursing Professionals, using the latest educational technology to contribute with quality and safety to decision-making and monitoring your students”

General Objectives

- ♦ Introduce students to the world of teaching from a broad perspective that prepares them for future professional practice
- ♦ Familiarize students with new tools and technologies applied to teaching Explore digital competencies in depth
- ♦ Present the different methods and approaches teachers can apply in their professional environments
- ♦ Promote the acquisition of communication and knowledge transmission skills
- ♦ Encourage continuous training of students and an interest in teaching innovation

Take advantage of the opportunity and take the step to update yourself on the latest advancements in managing Digital Teaching for Nursing Professionals”

Specific Objectives

- ◆ Establish the defining characteristics of educational technology
- ◆ Describe the advantages and disadvantages of educational technology
- ◆ Discern the defining characteristics of distance learning
- ◆ Discover the advantages and disadvantages of distance learning over traditional education
- ◆ Explain the defining characteristics of blended learning
- ◆ Define the advantages and disadvantages of blended learning compared to traditional teaching
- ◆ Classify the defining characteristics of virtual learning
- ◆ Explain the advantages and disadvantages of virtual learning compared to traditional teaching
- ◆ Describe the new trends in digital communication
- ◆ Define the new perspectives in teaching, training, and work within the digital framework
- ◆ Explain the evolution of Facebook, how to create and manage a profile, how to use the internet search engine, and its use as a teaching tool

03

Structure and Content

The structure of the contents has been designed by a team of professionals from the best educational institutions and universities worldwide, who are aware of the relevance of up-to-date, innovative education and are committed to quality teaching using new educational technologies.

“

This Postgraduate Certificate in Digital Teaching for Nursing Professionals contains the most complete and up-to-date scientific program on the market”

Module 1. Digital Teaching

- 1.1. Technology in Education
 - 1.1.1. History and Evolution of Technology
 - 1.1.2. New Challenges
- 1.2. Internet in Schools
 - 1.2.1. Internet Use in Schools
 - 1.2.2. The Impact of the Internet on Education
- 1.3. Devices for Teachers and Students
 - 1.3.1. Devices in the Classroom
 - 1.3.2. The Electronic Whiteboard
 - 1.3.3. Devices for Students
 - 1.3.4. Tablets
- 1.4. Online Tutoring
 - 1.4.1. Advantages and Disadvantages
 - 1.4.2. Implementation
- 1.5. Creativity in Schools
- 1.6. Parents and Teachers as Digital Migrants
 - 1.6.1. Technology Training for Adults
 - 1.6.2. How to Overcome the Technology Barrier
- 1.7. Responsible Use of New Technologies
 - 1.7.1. Privacy
 - 1.7.2. Data Protection
 - 1.7.3. Cyber Crimes at School

- 1.8. Addictions and Pathologies
 - 1.8.1. Definition of Technology Addiction
 - 1.8.2. How to Avoid Addiction
 - 1.8.3. How to Get Out of an Addiction
 - 1.8.4. New Pathologies Produced by Technology
- 1.9. Cyberbullying
 - 1.9.1. Definition of Cyberbullying
 - 1.9.2. How to Avoid Cyberbullying
 - 1.9.3. How to Act in Cases of Cyberbullying
- 1.10. Technology in Education

A unique, essential and decisive learning experience to boost your professional development"

04

Study Methodology

TECH is the world's first university to combine the **case study** methodology with **Relearning**, a 100% online learning system based on guided repetition.

This disruptive pedagogical strategy has been conceived to offer professionals the opportunity to update their knowledge and develop their skills in an intensive and rigorous way. A learning model that places students at the center of the educational process giving them the leading role, adapting to their needs and leaving aside more conventional methodologies.

“

TECH will prepare you to face new challenges in uncertain environments and achieve success in your career”

The student: the priority of all TECH programs

In TECH's study methodology, the student is the main protagonist.

The teaching tools of each program have been selected taking into account the demands of time, availability and academic rigor that, today, not only students demand but also the most competitive positions in the market.

With TECH's asynchronous educational model, it is students who choose the time they dedicate to study, how they decide to establish their routines, and all this from the comfort of the electronic device of their choice. The student will not have to participate in live classes, which in many cases they will not be able to attend. The learning activities will be done when it is convenient for them. They can always decide when and from where they want to study.

“

*At TECH you will NOT have live classes
(which you might not be able to attend)”*

The most comprehensive study plans at the international level

TECH is distinguished by offering the most complete academic itineraries on the university scene. This comprehensiveness is achieved through the creation of syllabi that not only cover the essential knowledge, but also the most recent innovations in each area.

By being constantly up to date, these programs allow students to keep up with market changes and acquire the skills most valued by employers. In this way, those who complete their studies at TECH receive a comprehensive education that provides them with a notable competitive advantage to further their careers.

And what's more, they will be able to do so from any device, pc, tablet or smartphone.

“*TECH's model is asynchronous, so it allows you to study with your pc, tablet or your smartphone wherever you want, whenever you want and for as long as you want*”

Case Studies and Case Method

The case method has been the learning system most used by the world's best business schools. Developed in 1912 so that law students would not only learn the law based on theoretical content, its function was also to present them with real complex situations. In this way, they could make informed decisions and value judgments about how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

With this teaching model, it is students themselves who build their professional competence through strategies such as Learning by Doing or Design Thinking, used by other renowned institutions such as Yale or Stanford.

This action-oriented method will be applied throughout the entire academic itinerary that the student undertakes with TECH. Students will be confronted with multiple real-life situations and will have to integrate knowledge, research, discuss and defend their ideas and decisions. All this with the premise of answering the question of how they would act when facing specific events of complexity in their daily work.

Relearning Methodology

At TECH, case studies are enhanced with the best 100% online teaching method: Relearning.

This method breaks with traditional teaching techniques to put the student at the center of the equation, providing the best content in different formats. In this way, it manages to review and reiterate the key concepts of each subject and learn to apply them in a real context.

In the same line, and according to multiple scientific researches, reiteration is the best way to learn. For this reason, TECH offers between 8 and 16 repetitions of each key concept within the same lesson, presented in a different way, with the objective of ensuring that the knowledge is completely consolidated during the study process.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

A 100% online Virtual Campus with the best teaching resources

In order to apply its methodology effectively, TECH focuses on providing graduates with teaching materials in different formats: texts, interactive videos, illustrations and knowledge maps, among others. All of them are designed by qualified teachers who focus their work on combining real cases with the resolution of complex situations through simulation, the study of contexts applied to each professional career and learning based on repetition, through audios, presentations, animations, images, etc.

The latest scientific evidence in the field of Neuroscience points to the importance of taking into account the place and context where the content is accessed before starting a new learning process. Being able to adjust these variables in a personalized way helps people to remember and store knowledge in the hippocampus to retain it in the long term. This is a model called Neurocognitive context-dependent e-learning that is consciously applied in this university qualification.

In order to facilitate tutor-student contact as much as possible, you will have a wide range of communication possibilities, both in real time and delayed (internal messaging, telephone answering service, email contact with the technical secretary, chat and videoconferences).

Likewise, this very complete Virtual Campus will allow TECH students to organize their study schedules according to their personal availability or work obligations. In this way, they will have global control of the academic content and teaching tools, based on their fast-paced professional update.

The online study mode of this program will allow you to organize your time and learning pace, adapting it to your schedule"

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that assess real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

The university methodology top-rated by its students

The results of this innovative teaching model can be seen in the overall satisfaction levels of TECH graduates.

The students' assessment of the teaching quality, the quality of the materials, the structure of the program and its objectives is excellent. Not surprisingly, the institution became the top-rated university by its students according to the global score index, obtaining a 4.9 out of 5.

Access the study contents from any device with an Internet connection (computer, tablet, smartphone) thanks to the fact that TECH is at the forefront of technology and teaching.

You will be able to learn with the advantages that come with having access to simulated learning environments and the learning by observation approach, that is, Learning from an expert.

As such, the best educational materials, thoroughly prepared, will be available in this program:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Practicing Skills and Abilities

You will carry out activities to develop specific competencies and skills in each thematic field. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop within the framework of the globalization we live in.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides... In our virtual library you will have access to everything you need to complete your education.

05

Certificate

The Postgraduate Certificate in Digital Teaching for Nursing Professionals guarantees students, in addition to the most rigorous and up-to-date education, access to a diploma for the Postgraduate Certificate issued by TECH Global University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This private qualification will allow you to obtain a diploma for the **Postgraduate Certificate in Digital Teaching for Nursing Professionals** endorsed by TECH Global University, the world's largest online university.

TECH Global University, is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** private qualification, is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
