01 Introduction

Assistance, information, education, counseling and, above all, support are the main functions of the nursing professional in the field of clinical nutrition. In this way, it enhances the biopsychosocial aspect of the patient, designing a structured planning by stages according to their health requirements and the objectives to be achieved with the customized diet. For this reason, and in view of the continuous changes that have taken place in this area in favor of an increasingly specialized assistance, TECH has developed a complete practical program with which the graduate will have access to 120 hours of stay in a reference clinical center. Thanks to these opportunities, will be able to be updated from the novelties of their profession by the hand of the best experts in nursing care.

“

A program that offers you 120 hours of practical training in a clinical center of reference in the area of Clinical Nutrition through a single click"

Nutrition intervenes in the evolution of various pathologies, in some cases as an etiological factor and in others as a complication. In this sense, the specialization is possible essential for professionals in can provide order to address the care and preventive needs of the population in matters of food and health. Faced with this scenario, TECH presents this program, which will allow the nurse to develop in a hospital setting with state-of-the-art resources and a cadre of highly trained professionals. In this way, you will be able to incorporate the latest advances and innovations in Clinical Nutrition into your work, including the design of treatments and the application of rigorous dietary techniques.

Given that dietary problems are a growing concern for a large part of the population, nursing professionals are facing a favorable scenario to continue to deepen in this area and to know, first hand, the most recent pathologies and conditions in this field. The irruption of new technologies in the nutritional area also implies an unstoppable advance in this area. This program provides a unique opportunity for Nursing who wish to acquire expert knowledge and experience in the field of Clinical Nutrition, seeing real patients and learning about the latest developments in nutritional behaviors and dietary treatments.

In addition to actively participating in the management of hundreds of cases with diverse clinical requirements, you will have the referential support of a tutor specialized in the area, who will ensure that all the purposes for which this academic experience was designed are fulfilled. In this way, you will be able to improve your skills in a guaranteed way and in only 120 hours of the best practical training.

02

Why Study an Internship Program?

TECH's commitment to the advancement of science, especially in the healthcare field, is reflected in the launching of programs such as this Practical Training. This is a unique opportunity to gain access to a clinical center of international reference in the field of Nutrition, especially in terms of nursing activity. Thanks to this and to the support you will receive, both from the team you will be part of and from the tutor who will guide you during the 3 weeks, you are guaranteed to improve your professional skills, surpassing even your most ambitious goals.

A pioneer and unique degree in the entire academic panorama that will give you the opportunity to grow professionally with the best experts in Clinical Nutrition today"

1. Updating from the Latest Technology Available

The center where the internships for this program will take place is equipped with the most advanced and sophisticated clinical technology. Therefore, the graduate who decides to do the practical period with TECH will have access to the best and most innovative tools for the management of Clinical Nutrition in the current hospital environment, which will help them to improve their competencies and implement their exhaustive management.

2. Gaining In-depth Knowledge from the Experience of Top Specialists

Thanks to the support you will receive from your classmates and internship mentor, you will be able to get the most out of this academic experience. In addition, they will provide the graduate with their own experience, with special emphasis on tips for a top level practice, avoiding those aspects that are far from it in the day-to-day work of the nursing profession.

3. Entering First-Class Clinical Environments

TECH carefully selects all available centers for Internship Programs. Thanks to this, the specialist will have guaranteed access to a prestigious clinical environment in the field of Clinical Nutrition. In this way, you will be able to see the day-to-day work of a demanding, rigorous and exhaustive sector, always applying the latest theses and scientific postulates in its work methodology.

4. Putting the acquired knowledge into daily practice from the very first moment

The eminently practical nature of this program contemplates an exhaustive updating of the professional's competencies and capabilities, implementing the most innovative concepts for a top-level praxis in the current clinical environment. Therefore, at the end of the experience, he will be able to extrapolate everything he has worked on to any clinical or hospital context he may be part of in the future.

5. Expanding the Boundaries of Knowledge

TECH goes further with the launch of this type of program. It offers the graduate the opportunity to carry out a practical stay not only in national but also in international reference environments, giving him/her the opportunity to know in detail the clinical vanguard that is marking the nursing activity in different parts of the world.

“

You will have full practical immersion at the center of your choice”

03 Objectives

This Practical Training program was created with the objective of updating the knowledge of nursing professionals in the field of clinical nutrition. Therefore, and through a unique and eminently practical methodology, the professional will improve his daily practice, incorporating to his work new tools in the diagnosis and treatment of pathologies through clinical nutrition. This will be done by the hand of the best professionals in the sector and having as a guarantee a first class hospital institution with the latest and most effective technology in the sector.

General Objectives

- Up-to-date the nursing professional's knowledge on new trends in human nutrition, in both health and disease situations, through evidencebased nursing
- Promote work strategies based on the practical knowledge of the new trends in nutrition and their application to adult and child pathologies, where these strategies play an essential role in treatment
- Encourage the acquisition of technical skills and abilities, through a powerful audiovisual system, and the possibility of development through online simulation workshops and/or specific education

General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship agreement for the program are as follows:

1. TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07 Certificate

This program will allow you to obtain your **Internship Program diploma in Clinical Nutrition for Nursing** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: **Internship Program in Clinical Nutrition for Nursing**
