Introduction

Fluency in different languages is a prerequisite in an increasingly globalized world. Specifically, the healthcare field frequently uses the English language and is confronted in its professional performance with situations that require communication in this language, not only with patients, but also with the rest of the healthcare personnel. Therefore, it is necessary to keep up to date with the specific English vocabulary of this discipline. And this Internship Program is the perfect option to meet this objective, allowing you to develop, in a practical way and thanks to a 3-week stay in a clinical center, a fluent level of expression in this internationally used language.

66

Get up to date, in a 100% practical way and in a prestigious clinical center, in the use of English in the healthcare field thanks to this intensive TECH program"

The new professional reality demands, in every area of work, the mastery of certain languages of global use. The main one is English, which for decades has become an indispensable tool for progress in fields such as science, sports, tourism and health. Therefore, researchers, athletes, hospitality workers and nurses need to keep up to date with the specific use of this language in their professions.

Therefore, this program is proposed as a response to this situation, providing the professional with the opportunity to update in the use of specific clinical vocabulary in English, as well as allowing them to improve their fluency with the language in a real scenario, interacting with other professionals in the center and with patients.

The nursing professional will therefore improve their language skills in a 100% real and practical setting, in a reference health center and with a team in the nursing area that will accompany them during the 3 weeks of this training. Upon completion, students will be able to function fluently and with an advanced level of English, in order to be able to perform their duties in any hospital in the world.

procedures to grow professionally"*

02

Why Study an Internship Program?

Compared to other academic options that offer students a theoretical approach to the subject, this TECH program focuses on placing students in a real clinical scenario where they will work with patients in English. This experience will allow you to improve your fluency in the language, while updating you in its specific use in the healthcare context. In addition, the professional will be accompanied at all times by other experts from the internship center, guaranteeing a dynamic learning process that will allow him/her to aspire to work in international contexts.

66

TECH will allow you to update and perfect your use of English specific to the healthcare field in a real professional environment, thanks to the 3-week internship offered in this intensive program"

1. Get Up to Date in a Participatory and Practical Way

This program takes into account the particularities of nursing and English language learning that require an eminently practical perspective to provide an effective teaching experience for the student. For this reason, the internships proposed by TECH are completely participative and will allow the professional to develop their language skills in a demanding work environment, updating and perfecting their command of the language while attending to real patients.

2. Gaining In-depth Knowledge from the Experience of Top Specialists

Through these internships, students will be able to update their knowledge of the use of English in nursing under the guidance of leading professionals in the discipline. You will be able to keep up to date thanks to the extensive experience of the large team of nurses and specialists who will accompany you. In addition, you will have a specific tutor who will guide you throughout your stay at the clinical center of your choice.

3. Entering First-Class Clinical Environments

TECH carefully selects all available centers for Internship Programs. Thanks to this, the Nurse will have guaranteed access to a prestigious clinical environment in the field of Aesthetic Medicine. In this way, you will be able to see the day-to-day work of a demanding, rigorous and exhaustive sector, always applying the latest theses and scientific postulates in its work methodology.

4. Putting the Acquired Knowledge into Daily Practice from the Very First Moment

Thanks to the approach of these internships, the student will be able to apply all the knowledge acquired to their work from the very beginning. This is because, in addition to taking place in a real clinical environment, its activities are oriented to professional life, so that, at the end of the stay, the nurse will be ready to integrate the new uses of health English into their daily work.

5. Expanding the Boundaries of Knowledge

TECH offers the possibility of doing this Internship Program, not only in national, but also in international centers. This way, the Nurse will be able to expand their frontiers and catch up with the best professionals who practice in first class centers and in different continents. A unique opportunity that only TECH, the largest online university in the world, could offer.

66

*You will have full practical immersion
at the center of your choice"*

03

Objectives

The nursing professional will be able, at the end of the three-week practical training, to deal with everyday situations in English and to face specific situations in the health care field, thanks to the mastery of a wide range of technical vocabulary. At the end of the Practical Training you will be able to provide better care to the patient, family members, medical staff and other healthcare personnel that can be found in a healthcare center and hospital anywhere in the world.

General Objectives

- Master the common language used in a predominantly English-speaking clinic
- Communicate with patients in a fluent manner, analyzing their ailments and providing care based on their requirements
- Work in the day-to-day running of a clinic with international projection

Specific Objectives

- ◆ Understand and answer questions related to natural disasters and different social and health policies
- ◆ Express cause-effect relationships and use the passive voice to describe situations
- ◆ Understand and use specialised vocabulary in exchanges with other departments
- ◆ Be able to develop a more patient-centered approach to patient needs
- ◆ Use circumlocutions to express ideas with a negative connotation in a standard and formal way
- ◆ Be able to understand specialised vocabulary related to medical treatments, the parts and systems of the body, as well as different departments
- ◆ Understand and effectively use present and recent past tenses, as well as continuous and perfect tenses common during patient appointments
- ◆ Be able to talk to co-workers and patients, using a standard standardised norm
- ◆ Be able to explain and describe your professional and academic background in detail, whether in the past, present or future
- ◆ Have the ability to communicate and explain claims, accidents and personal matters

04

Education

Plan

TECH offers a 3-week Internship Program for nurses to improve their English language communication skills in a healthcare environment. This program, which takes place in a referral health center, will be carried out from Monday to Friday, in 8-hour consecutive days.

During this stay, students will be accompanied by health personnel in the nursing area with whom they will be able to work as a team and care for patients in the different specializations of the hospital, where the training will be carried out.

The activities to be implemented in this training are oriented to the improvement of essential competencies for the provision of medical and nursing care with a high level of English. All this with the aim of being able to count on even more qualified professionals in a globalized world.

In this completely practical Internship Program, the activities are aimed at developing and perfecting the skills necessary to provide healthcare in areas and conditions that require highly qualified professionals, and are oriented towards specific expertise for practicing the activity, in a safe environment for the patient and with highly professional performance.

It is undoubtedly an opportunity to learn by working in the innovative hospital of the future where real-time health monitoring of patients is at the center of the digital culture of its professionals. This is a new way of understanding and integrating healthcare processes, and turns a reference center into the ideal teaching scenario for this innovative experience in the improvement of professional skills.

The practical education will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of teachers and other fellow trainees who facilitate teamwork and multidisciplinary integration as transversal competencies for the practice of Clinical Nursing (learning to be and learning to relate).

The procedures described below will form the basis of the practical part of the internship, and their implementation is subject to both the suitability of the patients and the availability of the center and its workload, with the proposed activities being as follows:

Diagnostic tests, treatments, data collection, your day-to-day life, but improving your level of English"

Module	Practical Activity
Patient Communication and Standardized Language Practice in Clinical Settings	<p>Provide guidance, through the use of English, to different patients who need information related to various aspects such as: complaints, the development of doctoral theses, complaints and inconveniences, available services, etc.</p> <p>Indicate, if necessary, how to reach the different areas of the clinic through a fluent conversation of the clinic through a fluent conversation.</p> <p>Engage in conversations with patients and their families in order to provide them with information about the diagnosis or therapies to be followed for their recovery.</p> <p>Practice intonation and phonetics through communication with English-speaking patients from different regions.</p>

Make the most of this opportunity to surround yourself with expert professionals and learn from their work methodology"

06

General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship program agreement shall be as follows:

1. TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. 3.- DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.
