01 Introduction

The complexity of many surgical procedures highlights the importance of the tasks performed by nurses. Therefore, their work requires a meticulous use of the most advanced techniques and tools to guarantee the patient's well-being and to carry out the operation successfully. Given this need for constant updating, TECH has created this degree, which will provide students with the latest procedures in orthopedic and traumatological or cardiac surgery through the combination of an excellent theoretical education with a practical phase of 3 weeks in a highly prestigious hospital. During this stay, surrounded by the best professionals in the field, the nurse will expand his or her skills in Advanced Operating Room Nursing to apply them in his or her work methodology.

You will master, thanks to this program, the most up-to-date nursing procedures when performing trauma or cardiac surgery"

The provision of healthcare services in the surgical area requires a wide range of specific knowledge and skills to successfully resolve all interventions. In this line, due to scientific and technological advances, this sector is continually evolving to ensure safety and optimize patients' postoperative recovery. Given this situation, nurses specialized in this field require constant learning in order to respond to the new challenges of their profession. This programme in Advanced Operating Room Nursing is designed so that nurses who carry out surgical procedures can update their knowledge and increase their level of professional performance in a practical way, adapted to their needs.

It is a practical stay of 3 weeks in a highly prestigious hospital center that will allow the nurse to develop, in real patients and with state-of-the-art resources, the maximum potential in the area of nursing and surgical patient care. In this environment, the student will be integrated into a multidisciplinary work team made up of the best experts in the healthcare field, with whom they will use the latest preoperative, intraoperative and postoperative techniques based on scientific evidence.

Throughout this practical period, the student will be guided and accompanied by a tutor designated specifically for them, who will be in charge of resolving all their concerns so that the learning process meets their expectations to the millimeter. In this way, in a short period of time and with the advice of the best professionals in Advanced Operating Room Nursing, the nurse will assimilate all the advances and innovations in this field in order to offer his patients services completely adapted to their needs.

02

Why Study an Internship Program?

In the world of surgical nursing, it is imperative to master the latest techniques and procedures that allow you to assist specialist physicians or patients with maximum efficiency, but it is essential to know how to apply this knowledge appropriately in the work environment. Because of this, TECH has created a completely new academic product, with which the nurse will be able to put all these advances into practice in a prestigious hospital center. During 3 weeks, you will have access to a multidisciplinary work team where you will observe cases with real patients and adopt the most valuable skills to enhance your professional performance in the field of Advanced Operating Room Nursing.

TECH offers you the exclusive opportunity to immerse yourself, for 120 hours, in a state-of-the-art hospital environment to assimilate the latest techniques in Advanced Operating Room Nursing"

1. Updating from the Latest Technology Available

The area of Advanced Operating Room Nursing has been revolutionized in recent times thanks to the emergence of new surgical instrumentation or updated preoperative and postoperative protocols. Given this situation, in order for the nurse to master all these advances in a first level hospital environment, TECH has created this program.

2. Delving from the experience of the best experts

The excellent team of Assignments who will accompany the expert throughout their Phase guarantees the high quality of the degree offers. Accompanied at all times by a private tutor, the student will have access to real patients and will incorporate the most updated procedures and techniques in Advanced Surgical Nursing into his or her work methodology.

3. Entering First-Class Clinical Environments

TECH carefully selects all available centers for Internship Programs. Thanks to this, the expert will have guaranteed access to a prestigious clinical environment in the field of Intensive Care Nursing. In this way, you will be able to see the day-to-day work of a demanding, rigorous and exhaustive sector, always applying the latest theses and scientific postulates in its work methodology.

4. Putting the acquired knowledge into daily practice from the very first moment

In the academic market, there are numerous educational programs that require immense hours of study and are incompatible with professional and personal life. For this reason, TECH has created a teaching model, 100% practical, that will allow the nurse to assimilate the latest techniques and procedures in Advanced Operating Room Nursing in only 3 weeks.

5. Expanding the Boundaries of Knowledge

TECH offers the possibility of carrying out this Internship Program in centers of international importance. This way, the specialist will be able to expand their frontiers and catch up with the best professionals, who practice in first class centers and in different continents. A unique opportunity that only TECH could offer to their students.

You will have full practical immersion at the center of your choice"

03

Objectives

The general objective of this Practical Training in Advanced Operating Room Nursing is to ensure that the professional up-to-date their knowledge and learns everything necessary to develop successfully in surgical environments. All this will be done through an eminently practical program that will allow you to learn in real, everyday environments that you will have to face in your work as a surgical nurse.

General Objectives

- ♦ To up-to-date the knowledge of advanced practice nurses in perioperative care in the different medical-surgical specialties, through evidence-based nursing
- ♦ Promote work strategies based on perioperative patient care, as a reference model in the achievement of healthcare excellence
- ♦ Encourage the acquisition of technical skills and abilities, through a powerful audio-visual system, and the possibility of development through online simulation workshops and/or specific training
- ♦ Encouraging professional development through research and dynamic and up-to-date continuous training

Specific Objectives

- ♦ Define the perioperative surgical process, the three stages involved and identify the different areas in which they take place
- ♦ Become highly qualified in microsurgery for free flap and reimplantation procedures
- ♦ Master the surgical technique in arthroscopy, as well as the positioning of the different devices and the layout of the operating room, which is very different from other surgeries in orthopedic and trauma surgery
- ♦ Manage the correct preparation and handling of the material to perform a rigid bronchoscopy
- ♦ Explain the handling of the different mechanical suture systems for anastomosis, vessel sealing and cutting forceps, and their peculiarities depending on whether they are used in laparoscopic or laparotomy surgeries
- ♦ Acquire the necessary skills to collaborate in cornea transplants, intrastromal rings and arcuate incisions with a laser
- ♦ Describe the general aspects of any Anesthesia surgery performed by laparoscopy and the characteristics of each of these interventions
- ♦ Collaborate with the rest of the team in both scheduled and emergency cesarean sections
- ♦ Learn the surgical technique in limb amputation and handle the subsequent identification, management and transport
- ♦ Handle intraoperative specimens during surgeries involving the thyroid and other neck interventions
- ♦ Use about the specific instruments used in ear surgery, implants and the use of the microscope
- ♦ Prepare any of the surgeries performed via transurethral route, whether diagnostic, curative, or catheter placement/removal

General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship agreement for the program are as follows:

1. TUTORING: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCES: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07 Certificate

This **Internship Program in Advanced Operating Room Nursing** contains the most complete and up-to-date program on the professional and academic field.

After the student has passed the assessments, they will receive their corresponding Internship Program certificate issued by TECH Technological University via tracked delivery*.

The diploma issued by TECH will reflect the grade obtained in the test.
