

Internship Program

Gynecological Care for Midwives

A close-up photograph of a woman with blonde hair, wearing a white lab coat and blue gloves, looking through a white and black microscope. The image is partially obscured by a diagonal split: the top-left and bottom-left corners are white, while the bottom-right and top-right corners are a vibrant teal color. The woman's face is in profile, focused on the eyepiece of the microscope. The background is a blurred laboratory setting.

01 Introduction

Women's health care requires specific knowledge, as demanded by the Spanish Society of Gynecology and Obstetrics (SEGO). The professionals in this area need to know in depth the intimate anatomy of women and the pathologies that may affect them, in order to act with greater safety in their interventions. And, for this, it requires professionals with a higher training in which there is a special relevance for this knowledge, betting on Nursing trained in specific areas, but complementary to Gynecology.

“

Incorporate into your daily practice the most relevant advances in the area of Gynecological Care for Midwives thanks to a distinctive, unique and effective practice experience”

The general purpose of this program is to serve as an update for midwives in order , to meet the health needs of women with scientific Academic and the highest professional level. In this way, This program arises as a response to multiple needs in the hospital environment for all midwives, both from those recently incorporated as from those who have been providing their professional services for some time and who require constant up-to-date in this very specific area within the practice of midwifery.

The aim is to respond to the growing need posed by the new challenges imposed by a changing and increasingly demanding society, in order to raise awareness of the importance of incorporating new values, new work systems and new areas of action in our profession. It is therefore essential that the nursing professional can respond adequately to these needs in order to increase gynecological care, through adequate training and education for mothers, for which they have to improve professionally.

In addition to all this, there is the irruption that technological innovation has had in the area of disciplines related to gynecological care. Technology has brought us closer to a better diagnostic and therapeutic knowledge of pregnant, postpartum, newborn and infant patients in a metabolically complex state. This boom in information and knowledge has led universities to adapt their educational programs to the new health and social realities.

Faced with this scenario, TECH Universidad Tecnológica presents this Practical Training program that will allow you to develop, with real patients and in a hospital setting with state-of-the-art resources, your maximum potential and growth in the area of gynecological nursing. You will approach patients with gynecological pathologies from the the hand of the best specialists, using the latest techniques based on scientific evidence, and achieving results that would have been difficult to achieve before.

02

Why Study an Internship Program?

TECH has come up with a new type of program that allows the professional to keep abreast of the latest scientific findings and advances in medicine for the approach of patients who require appropriate gynecological care. This program will allow you to implement in a real scenario with patients from a reference hospital center that will lend its facilities to carry out this training. All of this from the hand of a assigned tutor guide you through the entire process. Promote work strategies based on a comprehensive approach to the patient as a reference model for achieving excellence in care..

This Professional Master's Degree is designed for you to update your knowledge in Gynecological Care for Midwives, with the use of the latest technology, to contribute with quality and confidence to decision-making, care, monitoring and support of the patient"

1. Updating from the Latest Technology Available

For with the aim of bringing the specialist closer to this technology, TECH presents this Practical Training with which the professional will enter a cutting-edge clinical environment, accessing state-of-the-art technology in the field of psychotherapy. Therefore, the nursing professional will be able to enhance their skills and incorporate them immediately.

2. Gaining In-depth Knowledge from the Experience of Top Specialists

This program will allow the nursing professional to develop 3 weeks of practical study with a team of experts in the area of gynecological care. In Asia, the student will have the opportunity to to see real patients in a state-of-the-art environment, which allows, allow incorporate the most effective procedures and approaches in Time-Limited Psychotherapy into their daily practice.

3. Entering First-Class Clinical Environments

TECH carefully selects all available centers for Internship Programs. Thanks to this, the specialist will have guaranteed access to a prestigious clinical environment in the field of Clinical Nutrition. This is how the nursing professional will become up to date with all the most the most modern resources, tools and methodology.

4. Putting the acquired knowledge into daily practice from the very first moment

Thanks to this Hands-on Training program, TECH will allow you to get in front of a real clinical setting with patients in the field of gynecological care for 3 weeks. An exclusive learning model that is only possible here.

5. Expanding the Boundaries of Knowledge

Due to TECH's interest in presenting an efficient and avant-garde proposal, it has established an agreement with the best centers in the world to carry out this Practical Training. Therefore, together with the best professionals in this area of specialization, you will be able to advance precisely towards your goal and expand your frontiers of knowledge.

*You will have full practical immersion
at the center of your choice"*

03 Objectives

The general objective of this program is to ensure that the professional updates the diagnostic and therapeutic procedures of this specialty in exclusively practical and practical way, through a hospital internship designed with clinical and educational rigor, under the guidance of renowned professionals , in a hospital center of the highest scientific quality and technological innovation. Thanks to This Practical Training will enable the professional to improve and enhance his or her skills in nursing care by addressing the main different interventions.

General Objectives

- ♦ Master the latest techniques, modern scientific postulates and application of technologies At the in Gynecological Care for Midwives
- ♦ Incorporate the most effective methods, approaches and clinical analyses into daily work, backed by a team of prestigious experts in the field of Gynecological Care for Midwives
- ♦ To Knowledge of the specific approach and common cases that occur in the clinical setting of Gynecological Care for Midwives Department

Specific Objectives

- ♦ Describe the anatomy and physiology of the male and female sexual apparatus
- ♦ Explain reproductive endocrinology
- ♦ Explain the development of sex differentiation
- ♦ Describe the ovarian and uterine cycle
- ♦ Understand the neurohormonal regulation of reproductive function
- ♦ Describe the physiological process of the climacteric stage
- ♦ Describe the physiology of sexuality
- ♦ Explain the procedure in gynecological examinations
- ♦ Describe the biological process of reproduction and the female sexual cycle, and its psychological and social implications
- ♦ Explain the various pathologies that occur during puberty
- ♦ Describe the different menstrual disorders
- ♦ Describe the various functional uterine hemorrhages
- ♦ Explain the pathologies and treatments during the climacteric stage
- ♦ Describe the various treatments for sexually transmitted infections
- ♦ Preparation health education strategies for at-risk populations
- ♦ Apply the different types of primary prevention methods
- ♦ Recognize pain of pelvic origin
- ♦ Classify the various malformations of the genital apparatus
- ♦ Describe benign gynecologic pathology
- ♦ Explain the various alternations of genital statics
- ♦ Describe vulvovaginal pathology
- ♦ Describe cervical pathology and its treatment
- ♦ To know the uterine and adnexal pathologies, as well as their treatments
- ♦ Up-to-date The knowledge on early diagnosis of breast and gynecological cancer
- ♦ Apply the various diagnostic tests in the detection of gynecologic cancer

06

General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship agreement for the program are as follows:

1. TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07 Certificate

This **Internship Program in Gynecological Care for Midwives** contains the most complete and up-to-date program in the professional and academic landscape
