01 Introduction

Intraoperative care has become one of the most complex practices in the clinical area, not only because of the responsibility of its professionals, but also because of the specificity of the techniques that must be carried out for an adequate praxis. This is an area that has also undergone several changes in recent years, implementing increasingly specific and effective guidelines to its strategies. In order for the graduate to learn about them and improve their management, TECH has decided to offer them a 120-hour practical stay in a reference center where they can actively participate, together with a team of nurses of the highest level, in the updating of their knowledge for care in the surgical and intraoperative environment.

Would you like to be part of a team at the highest level in the field of intraoperative care? TECH offers you the possibility to get it through the launching of this Practical Training"

The field of surgery has specific characteristics different from the rest of the departments where La nursing activities are carried out. The evolution of techniques, as well as technological advances, means professionals need to undergo constant training, to be able to provide excellent surgical care. The field of surgical technology is constantly expanding, and hospital managers are increasingly looking to recruit professionals whose profile is adapted to the requirements of their job, and who are qualified and endorsed for carrying out this type of work.

In this sense, being up to date with state-of-the-art procedures makes it easier to provide quality care throughout the surgical process. Aware of this, TECH presents this Practical Training program consisting of a practical stay of 3 weeks in a center of maximum prestige where the nurse will be able to see real cases accompanied and tutored by experts in the field.

This is an unprecedented academic option where you will be able to develop in a real environment your maximum potential and growth in the operating room and intraoperative care area. Thanks to this, you will be able to take the latest advances and innovations in operating room nursing and intraoperative care to your workplace. This will not only position you as a much more prepared professional, but will also open the door to major job opportunities.

During the 120 hours of your stay, you will work side by side with a top-level team, managing all types of cases and contributing to the promotion of your health through the use of the most innovative and effective clinical strategies. You will thus be able to perfect your skills in working in stressful situations, as well as in conditions in which rigor and confidence are two indispensable tools for top-level nursing practice.

02

Why Study an Internship Program?

Practice is undoubtedly the best way to acquire and update knowledge. For this reason, TECH places special emphasis on launching this type of program, in which the graduate can find the most avant-garde and complex information through his or her own experience, actively participating in the clinical management of real patients. This is a unique opportunity to be part of a top-level team in the nursing field. nursing area.

Working actively in the clinical management of patients is the best way to update your practice. That is why this Practical Training is the best option"

1. Updating from the Latest Technology Available

Access to the internships offered by TECH also guarantees access to the most advanced clinical technology. In this way, the graduate not only works in a protagonist and intensive way in the updating of his knowledge, but also deepens in the improvement of his competencies through his own experience and the exhaustive handling of the most innovative concepts of in-hospital care.

2. Gaining In-depth Knowledge from the Experience of Top Specialists

The experience of the professionals who will accompany the graduate during the course of this program will serve as a guide to get the most out of it, as well as to implement the best and most effective strategies for intraoperative care in their practice. Having the support of the best experts can only mean one thing: achieving success through an unparalleled academic experience.

3. Entering First-Class Clinical Environments

During the practical stay, the graduate will have access to dozens of different clinical cases, in which they will have to apply different nursing approach strategies according to the requirements of each one. Therefore, you will be able to put into practice your adaptability skills, working under pressure and perfecting your competencies in the specialized performance of the different situations that may arise in the operating room.

4. Putting the acquired knowledge into daily practice from the very first moment

When designing this type of program, TECH places special emphasis on ensuring that the knowledge and techniques acquired by graduates are perfectly applicable to the current clinical environment beyond the context in which they carry out their internships. This ensures that everything you learn during your 3-week stay will be optimal for your work in other clinical centers and hospitals.

5. Expanding the Boundaries of Knowledge

The design of this type of program is carried out as a sign of TECH's commitment to clinical activity, giving its graduates the opportunity to up-to-date their knowledge in safe environments, both for the patient and for themselves. Therefore, they are able to project their skills in a guaranteed way, expanding the frontiers of their knowledge without limits, and motivating their desire to continue perfecting the necessary skills for a practice of the highest level according to the latest developments in Nursing.

You will have full practical immersion at the center of your choice"

03 Objectives

This Practical Training program was created with the primary objective of enabling the nursing professional to be fully capable of providing quality care in their work as a surgical and intraoperative nurse. This will be done through a 100% practical methodology where students will enjoy a hospital stay designed with clinical and academic rigor that will allow them to work hand in hand with renowned professionals and up-to-date their knowledge in the field. In this Practical Training, the Nurse will approach the main interventions of the specialist, which will allow them to improve and enhance their skills in the medical care of their patients. from surgical pathologies.

General Objectives

- ♦ To up-to-date the necessary knowledge in the nursing care of pediatric patients in emergency situations
- ♦ To increase the quality and safety of nursing practice during surgery and subsequent rehabilitation of the patient
- ♦ Develop the necessary guidelines to carry out effective clinical interventions in the care performed within the surgical block in the hospital environment

Specific Objectives

- ♦ Apply the scientific method as a way of developing diverse surgical procedures and routines while updating all your knowledge and practical skills in response to the new care trends within the surgical field
- ♦ Implement different strategies to meet the requirements of new healthcare demands
- ♦ Analyze the ethical aspects involved both in patient care and in research procedures related to surgical activity in the different stages of care
- ♦ Analyze and implement new care models based on psychosocial factors involved in health problems, favoring a multidisciplinary approach and promoting patient participation in their own health care process
- ♦ Identify opportunities in the application of acquired theoretical knowledge and the tasks and techniques carried out in the operating room
- ♦ Assess the success of teamwork with the aim of achieving set goals
- ♦ Correctly plan surgical techniques to achieve end results quickly and efficiently
- ♦ Identify the key elements to reduce surgical times as much as possible, applying the above points for the benefit of patients, the team and the hospital
- ♦ Prevent mistakes and accidents which could jeopardize the general objective of nursing professionals: protect the patient undergoing surgery
- ♦ Establish a treatment with the patient and their family that goes beyond the simple application of nursing techniques, and consider all aspects of the patient's condition as whole
- ♦ Gain up to date knowledge on drug management procedures and patient control during anesthesia
- ♦ Describe the role of the nurse in the integral care of a patient during the surgical process.
- ♦ Revise the key principles of surgical asepsis
- ♦ Recognize and classify the general and specific surgical material and instruments in each specialty based on their functionality
- ♦ Analyze the inherent risks of surgery (biological, electric, etc.)
- ♦ Apply the necessary communication skills to provide adequate and personalized care to the surgical patient. and personalized to the surgical patient
- ♦ Design and plan nursing care for pre-, intra- and post-operative periods

Don't miss the opportunity and become an expert in the mastery of the new procedures in Operating Room Nursing and Intraoperative Care through this very complete Practical Training"

04 Educational Plan

The Practical Training period of this Surgery and Intraoperative Care program consists of a 3-week clinical practicum, Monday through Friday, with 8 consecutive hours of practical training with an attending specialist. This Rooms allow you to deal with real patients with a team of reference professionals in the of area, applying the most innovative diagnostic procedures and planning the latest generation Therapeutics in each Intervention.

In this training proposal, completely practical in nature, the activities are aimed at developing and perfecting the skills necessary for the provision of healthcare in areas and conditions that require a high level of qualification, and which are oriented to the specific training for the exercise of the activity, in a safe environment for the patient and a high professional performance.

It is undoubtedly an opportunity to learn by working in the innovative hospital of the future where real-time health monitoring of patients is at the center of the digital culture of its professionals.

The practical education will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of teachers and other fellow trainees that facilitate teamwork and multidisciplinary integration as transversal competencies for Current The nursing practice Care(learning to be and learning to relate).

Receive specialized education in an institution that can offer you all these possibilities, with an innovative academic program and a human team that will help you develop your full potential"

The procedures described below will be the basis of the practical part of the training, and their implementation will be subject to the center’s own availability and workload, the proposed activities being the following:

Module	Practical Activity
Basic concepts and contextualization of nursing practice in intraoperative care.	debate with professionals the guidelines of the applicable legislation and the ethical codes of the health professions into nursing practice, referring to clinical assistance and research. General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship agreement for the program are as follows:

1. TUTORING: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCES: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07 Certificate

This **Internship Program Nursing in Surgery and Intraoperative Care** contains the most complete and up-to-date program on the professional and academic field.

After the student has passed the assessments, they will receive their corresponding Internship Program certificate issued by TECH Technological University via tracked delivery*.
