01 Introduction

Occupational nursing plays a very important role in disease prevention and health promotion of workers. and in the promotion of workers' health. It not only uses its techniques in the diagnosis and treatment of diseases and ailments, but also works tirelessly in the field of effective of diseases and ailments, but works tirelessly in the effective orientation for the health and optimal consensus from the point of view of the welfare of the person in the workplace. And since this is a sector that has undergone countless changes in recent years, TECH has decided to launch an exclusively practical program that will help professionals to update their practice in situ, in a clinical center of reference in Occupational Nursing. Therefore you will be able to implement in your practice the most innovative strategies during your 3 weeks of stay.

A unique opportunity to access an unparalleled Practical Training with which you will be updated in situ and in a guaranteed way in everything related to Occupational Nursing"

The effective prevention and protection of workers against the risks that may be encountered in their work environment is the main function of the Nurse who performs his activity in the work area. It is, therefore, a highly demanded professional in the current context, in which entities must comply with very important regulations in favor and for the benefit of the health of their employees. For this reason, it is an area that is constantly changing, adapting its guidelines to the laws and the needs of patients as time goes by.

For this reason, and following the maxim that practice is the best way to catch up, TECH has developed an innovative and pioneering program in the academic market: Practical Training in Occupational Nursing. This degree consists of 120 hours in a reference clinic in this area, in which the graduate will work with a group versed in this area to perfect, little by little, their skills in the comprehensive management of the patient, their orientation and in the communication of care, both personally and with the team of which they are part. In this way, you will have access to the most sophisticated and innovative clinical equipment, which you will learn in depth during the 3 weeks in which this experience is distributed.

On the other hand, you will have the support of an expert tutor in Occupational Nursing, who will be at your complete disposal to solve any doubts that may arise during the course of the program. In addition, its main function will be to ensure that all the objectives for which this Practical Training was designed are met, Therefore, they will provide the graduate with all the resources they need to obtain the best experience they have had so far, which will help them to be up-to-date on the most sophisticated strategies for an innovative and top-level Occupational Nursing practice.

02

Why Study an Internship Program?

Occupational Nursing is one of the most in-demand areas in the clinical setting, due to the countless patients it sees. For this reason, and with the aim of providing graduates with all the information and resources that will allow them to update their practice in this field in a comfortable, versatile and, above all, guaranteed way, TECH has launched this program so that they can achieve this through a theoretical and practical experience that will mark a before and after in their professional career.

An ideal program to update you in the management of prevention services through a practical stay of 120 hours in an international reference clinic"

1. Updating from the Latest Technology Available

The clinic where the graduate will carry out his or her internship will certainly have the most sophisticated and avant-garde clinical equipment in the nursing activity. In this way, the professional will have the opportunity to access its management during the 3 weeks in which the program is developed, improving their skills and allowing them to implement in their practice the best strategies for the comprehensive approach to a greater number of cases.

2. Gaining In-depth Knowledge from the Experience of Top Specialists

The graduate will have the support of a team of experts, as well as the guidance of a tutor who is a reference in the field of Occupational Nursing. In this way TECH guarantees a first class stay, in which all the objectives for which it was designed are fulfilled. In addition, the professional will be able to use the experience of this group to implement the most sophisticated and innovative clinical strategies for the promotion of health and the prevention of occupational hazards.

3. Entering First-Class Clinical Environments

The opportunity TECH offers its graduates to carry out on-site internships to improve their skills is something that any committed professional should not miss. This is the ideal option to get up to date with the strategies for the effective management of the different cases that you may receive from the end of this Practical Training.

4. Putting the acquired knowledge into daily practice from the very first moment

Thanks to the high degree of novelty of these programs, TECH guarantees that during the internships the graduates will have access to the best resources and strategies, which they will be able to apply later in any work environment. This is because they base their activity on international standards of nursing practice.

5. Expanding the Boundaries of Knowledge

TECH's agreements cross national borders. This center establishes agreements with clinics all over the world, giving the graduate the opportunity to take the practical stay in different places. In this way, you can update your practice while enhancing your culture, taking part in an unparalleled experience that will help you grow both personally and professionally.

You will have full practical immersion at the center of your choice"

06 General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship program agreement shall be as follows:

1. TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both *clinical* and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.
