01 Introduction

Currently, patients who come to the Traumatology Services receive more accurate diagnoses, with more effective treatments, which significantly reduce iatrogenesis. This is due to technological and technical progress, which forces nursing professionals to keep up to date. To this end, TECH has created this program, where you will not only be able to incorporate into your daily work the most advanced methods and procedures in this field, but you will do it in a practical way, thanks to an intensive 3-week stay in a clinical center of recognized prestige.

Enter into a unique Practical Training, where you will be able to integrate the latest technical advances in the Traumatology Service”

Orthopedic and traumatologic pathologies in the elderly continue to be the most frequent in Traumatology Services, which have improved in recent decades thanks to technological advances. Therefore, the efficiency of the work, diagnostic accuracy and postoperative care has increased. In this scenario, nursing professionals contribute significantly, especially to a greater specialization in the evaluation, examination and care of patients with injuries and fractures.

For this reason, due to the current need of the professionals themselves to be up to date, TECH offers this Practical Training in Nursing in the Traumatology Service. A unique academic option that will allow you, through a stay, to up-to-date your knowledge in this complex field of health. This will be made possible by carrying out various activities in a prestigious clinical center.

In addition, during this eminently practical period, the nursing professional will come into contact with real patients, and will be accompanied by the best experts in this field, who will guide him/her throughout the entire on-site stay.

“

Get up to date with practical activities in a real environment and learn the most advanced techniques in Trauma Nursing”

02

Why Study an Internship Program?

Obtaining a specialization must go far beyond attaining solid theoretical knowledge, since practice, especially in the clinical setting, is key to being able to perform with the utmost excellence. With this in mind, TECH has created this unique program in today's educational landscape. This Practical Training allows the nursing professional to enter a clinical center, where they will be able to directly apply the latest procedures and techniques used in the area of Traumatology. Therefore, during 3 intensive weeks, the professional will become part of an excellent team of experts in this area. of an excellent team of experts in this area, who will show them the tools and methods used, being able to and methods used, being able to integrate them into their daily clinical practice An extraordinary academic option that has revolutionized the traditional pedagogical system, providing nursing with the practical knowledge they need, through a real updating scenario adapted to their needs.

TECH offers you a unique practical program in the academic panorama, where you will be able to perform in a real clinical scenario, applying the latest Nursing techniques in the area of Traumatology"

1. Updating from the Latest Technology Available

The area of Traumatology has undergone a major transformation in recent years thanks to technological advances. This has favored the use of less invasive techniques and the use of materials that favor patient recovery. For this reason, and with the objective of offering the nursing specialist the most current and close knowledge, TECH has created this Practical Training. Here, the graduate will enter a state-of-the-art clinical environment with the latest services and technology used in this area.

2. Gaining In-depth Knowledge from the Experience of Top nursing professional

The professional who takes part in this Practical Training will enter a prestigious clinical center integrated by an excellent team of professionals who will accompany them throughout the stay. With a specifically designated tutor, the graduate will be able to work with real patients in a healthcare environment. This will lead you to incorporate into your daily practice the most effective procedures and approaches in the area of Traumatology.

3. Entering First-Class Clinical Environments

In order to offer a practical training that makes a difference in the pedagogical field, TECH has carefully selected the centers available for this practical stay. Thanks to this, the Communication Management will have guaranteed access to a Traumatology clinical magnificent environment In this way, you will be able to appreciate the daily practice in a work area that requires maximum attention and rigorous care.

4. Putting the acquired knowledge into daily practice from the very first moment

TECH offers through this training, a new model of knowledge update, 100% practical, which has revolutionized the academic panorama. A program that adapts to the needs of professionals who wish to incorporate the latest techniques and innovative methods used in the field of Traumatology in their daily work. All of this, in an intensive 3-week stay with extraordinary nursing specialists.

5. Expanding the Boundaries of Knowledge

TECH opens up a world of possibilities for nursing professionals who decide to take this Practical Training. Up-to-date methodologies, techniques and protocols in a prestigious center provides the opportunity to incorporate the latest developments into daily clinical practice. In addition, the graduate will be updated by the best professionals, who practice in first class hospitals in different continents. A unique opportunity that only TECH, the largest online university in the world, could offer.

*You will have full practical immersion
at the center of your choice"*

03 Objectives

The main objective of this Practical Training in Nursing in the Traumatology Service is to bring the professional closer to the latest developments in this health area in a dynamic way. To this end, it offers you a face-to-face stay in a prestigious clinic where you will be able to work with real patients, using the state-of-the-art equipment provided by the center and receiving the advice of its expert assistants.

General Objectives

- Master the latest techniques and technological instruments used in Traumatology.
- Incorporate the most effective methods into daily work, endorsed by a team of prestigious experts in the field of Traumatology.
- To Knowledge of the specific approach and common cases that occur in the clinical setting of Traumatology Department.

Achieve your professional goals and incorporate into your daily work the latest procedures in this area of nursing. in this area of Nursing”

Specific Objectives

- ◆ Provide the nurse practitioner with more precise theoretical and practical knowledge that will help them in their daily practice in the traumatology service and at all times when patients require their attention in this specialty
- ◆ Describe the role of nursing in each of the trauma services.
- ◆ Perfect the techniques of trauma nursing

Integrate into your professional practice the latest advances in this healthcare field, increasing your professional possibilities thanks to the innovative knowledge that you will be able to acquire throughout this program"

04 Educational Plan

This Practical Training in Nursing in the Traumatology Service is developed over 3 weeks, in a schedule from Monday to Friday, with 8 continuous hours of intensive learning. For this reason, the professional will be able to up-to-date themselves by carrying out activities in a real environment and in a fluid manner, without interruptions, in a specialized clinical space.

In this completely practical Internship Program, the activities are aimed at developing and perfecting the skills necessary to provide healthcare in areas and conditions that require highly qualified professionals, and are oriented towards specific expertise for practicing the activity, in a safe environment for the patient and with highly professional performance.

TECH thus offers an excellent opportunity for graduates to obtain a direct and immediate up-to-date, through leading clinical and hospital centers. In this way, the professional will be able to manage with greater ease in the face of innovations in the area of Traumatology. This academic institution therefore offers an innovative method of integrating concepts and applying them in daily clinical practice.

The practical education will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of teachers and other fellow trainees that facilitate teamwork and multidisciplinary integration as transversal competencies for clinical For Nursing practice (learning to be and learning to relate).

The procedures described below will be the basis of the practical part of the training, and their implementation will be subject to the center's own availability and workload, the proposed activities being the following:

“

Make the most of this opportunity to surround yourself with expert professionals and learn from their work methodology”

06 General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship agreement for the program are as follows:

1. TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07 Certificate

This program will allow you to obtain your **Internship Program diploma in Trauma Nursing** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
