01 Introduction

Within Preventive Medicine, vaccination plays a very important role since its efficiency in the prevention and eradication of deadly infectious diseases has been proven throughout history. The role of the nurse within the vaccination service is fundamental, since they are in charge of attending the patient for the supply of the corresponding doses according to an epidemiological calendar. Keeping up to date with knowledge and practices is indispensable for these health professionals. That is why, with this program, you will be able to achieve the goal of preparing yourself intensively, over 3 weeks, in a reference health center, attending real cases under the guidance of an expert tutor, who will guide you throughout the whole process.

“

Integrate into your daily professional practice the latest advances in vaccination from an intensive stay in a prestigious clinical center, where you will be accompanied at all times by experienced experts in this health area”

Recent international health crises have highlighted the importance of vaccination among the population. Therefore, the commitment of the different pharmaceutical, clinical and technological companies to develop vaccines and different drugs has also led to a change in the protocols for the administration of these types of substances. For this reason, healthcare professionals urgently need to be updated on this subject.

In addition, the vaccination process is intrinsic to the performance of nurses, and acquiring new skills, as well as keeping up to date on such an important topic for the health system, will provide you with a professional background that will open doors in your work environment.

With this in mind, TECH has designed this 100% practical program that will allow the student to participate, in a face-to-face and intensive way, in the day-to-day of a clinical center carrying out the vaccination process. This stay will be carried out over a period of 3 weeks, with a fixed schedule of 8 hours a day from Monday to Friday, thus guaranteeing a real learning experience with the constant accompaniment of great experts in this health area.

Enroll now in this Practical Vaccine Training in Nursing and get first-hand the knowledge you need to achieve your career goals"

02

Why Study an Internship Program?

In the healthcare field, traditional education has often failed to be eminently theory-oriented. However, healthcare professionals understand the need to be able to update themselves in dynamic environments that resemble their daily work. For this reason, TECH has designed this 100% practical program that will allow the nurse to work in a prestigious clinical center, providing care to real patients, and applying the latest scientific postulates on vaccines. In addition, they will be accompanied at all times by experts from the hospital itself, ensuring the proper development of this learning experience.

TECH offers you this unique opportunity to get up to date in a 100% real and face-to-face way in the application of vaccines, by giving you access to a clinical center of recognized prestige in this health area"

1. Updating from the Latest Technology Available

Immunology has undergone a revolution in recent years, implementing novel techniques and procedures such as RNA vaccines. For this reason, being able to participate in innovative environments is a basic requirement for nurses today. And that is precisely what TECH offers: a professional environment where the student will be in contact with the most advanced techniques in vaccine administration.

2. Gaining In-depth Knowledge from the Experience of Top Specialists

The student will be accompanied by a large team of professionals, who will be in charge of guiding them throughout the internship period. Therefore, the nurse is facing a great opportunity to be up-to-date by the hand of great experts in the administration of vaccines, thus ensuring a participatory and dynamic learning that will serve him later in his day to day.

3. Entering First-Class Clinical Environments

TECH carefully selects all available centers for Internship Programs. Thanks to this, the specialist will have guaranteed access to a prestigious clinical environment in the field of Time-Limited Administration.. In this way, you will be able to see the day-to-day work of a demanding, rigorous and exhaustive sector, always applying the latest theses and scientific postulates in its work methodology.

4. Putting the acquired knowledge into daily practice from the very first moment

The perspective with which this program has been designed will allow the professional to integrate in his daily work all the techniques, procedures and protocols acquired throughout the internship. For this reason, the stay in a center of recognized prestige will allow him to immediately apply the latest scientific and clinical postulates to his daily work.

5. Expanding the Boundaries of Knowledge

TECH offers the possibility of doing this Internship Program, not only in national, but also in international centers. In this way, the specialist will be able to expand his frontiers and keep up to date with the best professionals, who practice in first class hospitals and in different continents. A unique opportunity that only TECH, the largest online university in the world, could offer.

*You will have full practical immersion
at the center of your choice"*

03

Objectives

The main objective of this Practical Training in Vaccines in Nursing is to provide its students with the latest developments in this discipline, so that they can achieve progress in their professional careers. For this purpose, it offers them a practical stay in which they will learn the appropriate procedures, always from the nurse's point of view. Therefore, they will get the upgrade and the boost they are looking for.

General Objectives

- Learn about the latest advances in Vaccines and as their application
- Integrate the latest immunization postulates into daily practice
- Master the application process of the different vaccines according to the patient's age and health conditions

Practicing in the vaccination process and knowing all the methodologies in this area will allow you to perform your daily work according to the latest advances in this clinical area"

Specific Objectives

- ♦ Up-to-date the knowledge and relation to the vaccination process and disease prevention and its applicability in the population served that will allow the nursing professional to improve their skills when exercising their professional activity
- ♦ Know in depth and apply the research methodology at the clinical-care and methodological level in the field of the vaccination process
- ♦ Develop skills to transmit and sensitize the population to the importance and need for vaccines and the vaccination process itself, through health promotion strategies
- ♦ Training in the management of vaccines and vaccine management and prevention strategies for communicable diseases susceptible to vaccination

Learn about the latest scientific evidence on the vaccination process in a prestigious hospital center and in a 3-week intensive stay"

04

Educational Plan

This practical teaching program is designed to enable nursing professionals to specialize and update their knowledge in the field of vaccination. For this purpose, they are offered a 3-week stay in a prestigious center, with an intensive schedule of 8 consecutive hours from Monday to Friday. During this stay they will have access to a practical education in which they will come into contact with professional experts in this discipline who will guide them through all the stages, through which they will learn about and observe real cases of this type of patients.

In this training proposal, each activity is designed to strengthen and refine the key competencies required for specialized practice in this field. In this way, the professional profile will be enhanced, driving a strong, efficient, and highly competitive performance.

The opportunity to participate in a program of these characteristics is a boost in the career of every nursing professional, since it will allow them to see real cases first hand and to update themselves in one of the most important areas of preventive medicine.

They will be able to understand the fundamentals and epidemiology of immunization, check the whole process of vaccination from the transportation and conservation of vaccines to their application. You will learn the proper methodology for the application of routine vaccines in children and adults, as well as non-systematic vaccines. All this and more about the vaccination process guided by experts who will accompany you throughout the process.

The practical education will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of teachers and other fellow trainees that facilitate teamwork and multidisciplinary integration as transversal competencies for Current nursing practice in the Canary Islands Health of Diet Therapy(learning to be and learning to relate).

Up-to-date yourself with an innovative academic program and with the support of great professionals specialized in the application of Vaccines in Nursing"

The procedures described below will form the basis of the practical part of the internship, and their implementation is subject to both the suitability of the patients and the availability of the center and its workload, with the proposed activities being as follows:

Module	Practical Activity

06

General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship program agreement shall be as follows:

.1 TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07 Certificate

This program will allow you to obtain your **Internship Program diploma in Vaccines in Nursing** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: **Internship Program in Vaccines in Nursing**

Duration: **3 weeks**
