Introduction to the Program

The skin, in addition to being the largest organ in the body, is the visible reflection of health and beauty. Interest in dermoesthetic treatments has grown exponentially in recent years, with a market that demands highly specialized professionals in this field. According to the Spanish Society of Aesthetic Medicine, in recent years, medical-aesthetic procedures have increased by more than 30%, establishing themselves as a growing trend. In response to this, TECH offers a high-level academic experience designed to provide healthcare professionals with access to the most advanced knowledge in Aesthetics. All in a convenient, fully online format!

“

A comprehensive, 100% online program, available exclusively through TECH with the backing of the National League for Nursing”

In today's society, where appearance plays a decisive role, skincare has evolved from being merely an aesthetic concern to a reflection of well-being and health. In this context, aesthetic medicine has rapidly evolved, incorporating new techniques, products, and approaches that require highly skilled professionals. The demand for experts in this field has grown not only in clinics and specialized centers but also in hospital settings and private practices, where aesthetic care is combined with dermatological and therapeutic treatments.

In this context, aesthetic medicine has rapidly evolved, incorporating new techniques, products, and approaches that require highly skilled professionals.

Aware of this transformation, TECH has developed the Master's Degree in Aesthetic Nursing, designed to provide healthcare professionals with comprehensive knowledge of the skin, its characteristics, and the most innovative procedures to address each need with precision and safety. This program offers an academic journey through skin anatomy, common pathologies, and the latest trends in facial and body rejuvenation. It also explores less conventional but highly impactful areas, such as the application of these procedures in oncology patients, addressing specific dermatological conditions, and interventions in female intimate health.

TECH provides its graduates with a 100% online knowledge update methodology, with no set hours and continuous access to materials. Thanks to its innovative Relearning system, it offers an efficient learning experience tailored to the professional reality of nurses, enabling them to stand out in a rapidly growing sector.

As a member of the **National League for Nursing** (NLN), TECH offers students access to assessment tools, digital libraries, webinars, and conferences focused on nursing educational excellence. This membership promotes professional development, networking with industry leaders, and the opportunity to join high-impact academic and clinical networks.

This **Master's Degree in Aesthetic Nursing** contains the most complete and up-to-date university program on the market. Its most notable features are:

- ♦ The development of practical case studies presented by experts in Aesthetic Nursing
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where the self-assessment process can be carried out to improve learning
- ♦ Special emphasis on innovative methodologies in Aesthetic Nursing
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

*You will develop skills
in planning aesthetic
treatments, considering the
individual characteristics of
each patient"*

“

The specialized readings will allow you to further deepen your knowledge of advanced Aesthetic Nursing techniques, expanding your expertise in this growing field”

The faculty includes professionals from the field of Aesthetic Nursing, who bring their practical experience to the program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive learning experience designed to prepare for real-life situations.

This program is designed around Problem-Based Learning, whereby the student must try to solve the different professional practice situations that arise throughout the program. For this purpose, the professional will be assisted by an innovative interactive video system created by renowned and experienced experts.

With this comprehensive syllabus, you will apply aesthetic therapies that not only improve the skin but also transform the patient's appearance and confidence.

Thanks to the Relearning method, you will be able to consolidate the key concepts offered by this university education.

02

Why Study at TECH?

TECH is the world's largest online university. With an impressive catalog of more than 14,000 university programs, available in 11 languages, it is positioned as a leader in employability, with a 99% job placement rate. In addition, it has a huge faculty of more than 6,000 professors of the highest international prestige.

“

Study at the world's largest online university and secure your professional success. Your future starts at TECH”

The world's best online university, according to FORBES

The prestigious Forbes magazine, specialized in business and finance, has highlighted TECH as "the best online university in the world" This is what they have recently stated in an article in their digital edition in which they echo the success story of this institution, "thanks to the academic offer it provides, the selection of its teaching staff, and an innovative learning method oriented to form the professionals of the future".

The best top international faculty

TECH's faculty is made up of more than 6,000 professors of the highest international prestige. Professors, researchers and top executives of multinational companies, including Isaiah Covington, performance coach of the Boston Celtics; Magda Romanska, principal investigator at Harvard MetaLAB; Ignacio Wistumba, chairman of the department of translational molecular pathology at MD Anderson Cancer Center; and D.W. Pine, creative director of TIME magazine, among others.

The world's largest online university

TECH is the world's largest online university. We are the largest educational institution, with the best and widest digital educational catalog, one hundred percent online and covering most areas of knowledge. We offer the largest selection of our own degrees and accredited online undergraduate and postgraduate degrees. In total, more than 14,000 university programs, in ten different languages, making us the largest educational institution in the world.

The most complete syllabuses on the university scene

TECH offers the most complete syllabuses on the university scene, with programs that cover fundamental concepts and, at the same time, the main scientific advances in their specific scientific areas. In addition, these programs are continuously updated to guarantee students the academic vanguard and the most demanded professional skills. and the most in-demand professional competencies. In this way, the university's qualifications provide its graduates with a significant advantage to propel their careers to success.

A unique learning method

TECH is the first university to use Relearning in all its programs. This is the best online learning methodology, accredited with international teaching quality certifications, provided by prestigious educational agencies. In addition, this innovative academic model is complemented by the "Case Method", thereby configuring a unique online teaching strategy. Innovative teaching resources are also implemented, including detailed videos, infographics and interactive summaries.

The official online university of the NBA

TECH is the official online university of the NBA. Thanks to our agreement with the biggest league in basketball, we offer our students exclusive university programs, as well as a wide variety of educational resources focused on the business of the league and other areas of the sports industry. Each program is made up of a uniquely designed syllabus and features exceptional guest hosts: professionals with a distinguished sports background who will offer their expertise on the most relevant topics.

Leaders in employability

TECH has become the leading university in employability. Ninety-nine percent of its students obtain jobs in the academic field they have studied within one year of completing any of the university's programs. A similar number achieve immediate career enhancement. All this thanks to a study methodology that bases its effectiveness on the acquisition of practical skills, which are absolutely necessary for professional development.

Google Premier Partner

The American technology giant has awarded TECH the Google Premier Partner badge. This award, which is only available to 3% of the world's companies, highlights the efficient, flexible and tailored experience that this university provides to students. The recognition not only accredits the maximum rigor, performance and investment in TECH's digital infrastructures, but also places this university as one of the world's leading technology companies.

The top-rated university by its students

Students have positioned TECH as the world's top-rated university on the main review websites, with a highest rating of 4.9 out of 5, obtained from more than 1,000 reviews. These results consolidate TECH as the benchmark university institution at an international level, reflecting the excellence and positive impact of its educational model.

03 Syllabus

The syllabus of this Aesthetic Nursing program has been designed to provide medical and healthcare personnel with a comprehensive understanding of dermo-aesthetics, combining theory and practical application. Through a structured journey, graduates will explore everything from the physiology of the skin to the most innovative treatments in rejuvenation, hair removal, and aesthetic massages. Key areas such as nutrition, patient psychology, and care in advanced procedures will also be covered.

“

You will receive an academic path to master dermo-aesthetics with an innovative syllabus that will position you at the forefront of the industry”

Module 1. Aesthetic Nursing

- 1.1. Aesthetic Nursing: New Developments in the Profession
- 1.2. Nursing Care Process (NCP) Applied to Aesthetics
- 1.3. Diagnosis and Nursing Record
- 1.4. Hygiene in an Aesthetic Consultation Office
 - 1.4.1. Antiseptics
 - 1.4.2. Hand Hygiene
 - 1.4.3. Utensil Hygiene
 - 1.4.4. Sanitary Waste Management
- 1.5. Organization of the Aesthetic Consultation Office
- 1.6. Management of the Aesthetic Consultation Office
- 1.7. Urgent Care in the Aesthetic Nurse's Practice
- 1.8. Complications in Aesthetic Nursing

Module 2. Aging and Cosmetic Assessment in Aesthetic Nursing

- 2.1. History of Antiaging Medicine
- 2.2. Theories of Aging. Pathophysiology
- 2.3. Species and Longevity
- 2.4. Mechanisms of Cellular Aging
- 2.5. Mitochondrias
- 2.6. Chronobiology I. Suprachiasmatic Pineal Nucleus. Circadian Rhythm
- 2.7. Chronobiology II Sleep and Wakefulness
- 2.8. Immunity. Immunosenescence
- 2.9. Telomeres and Telomerase
- 2.10. Exposome and Aging

Module 3. The Skin

- 3.1. Skin Anatomy and Structure of the Skin
- 3.2. Skin Appendages
 - 3.2.1. Hair
 - 3.2.2. Nails
 - 3.2.3. Sebaceous Glands
 - 3.2.4. Sweat Glands

- 3.3. Skin Functions and Elementary Lesions
 - 3.3.1. Protection
 - 3.3.2. Metabolism
 - 3.3.3. Temperature Regulation
 - 3.3.4. Sensory
 - 3.3.5. Excretory
 - 3.3.6. Energy Reserve
- 3.4. Care of the Skin in the Different Stages of Life: Neonatal, Pediatrics, Adolescent, Adult, Geriatric, Pregnancy
 - 3.4.1. Neonatal
 - 3.4.2. Gastroenterology
 - 3.4.3. Adolescent
 - 3.4.4. Adult
 - 3.4.5. Geriatric
 - 3.4.6. Pregnancy
- 3.5. Embryology of the Skin and Skin Appendages
 - 3.5.1. Skin Development
 - 3.5.2. Hair Development
 - 3.5.3. Nail Development
 - 3.5.4. Skin Gland Development
- 3.6. Skin Types
 - 3.6.1. Density
 - 3.6.2. Skin Emulsion
 - 3.6.3. Skin Phototype
 - 3.6.4. Status
- 3.7. Skin Hygiene
- 3.8. Skin Hydration
 - 3.8.1. Manual Techniques
 - 3.8.2. Materials and Technical Methods
 - 3.8.3. Specific Cosmetics
 - 3.8.4. Equipment

Module 4. Most Common Dermatological Pathologies

- 4.1. Acne
- 4.2. Rosacea
- 4.3. Seborrheic Dermatitis
- 4.4. Atopic Dermatitis
- 4.5. Contact Dermatitis
- 4.6. Pigmentation Disorders. Hyperpigmentation
- 4.7. Pigmentation Disorders. Hypopigmentation
- 4.8. Psoriasis
- 4.9. Skin Infections and Infestations Caused by Pathogenic Agents: Bacteria
- 4.10. Skin Infections and Infestations Caused by Pathogenic Agents: Viruses
- 4.11. Ichthyosis
- 4.12. Urticaria and Angioedema
- 4.13. Scars
- 4.14. Nail and Appendage Conditions

Module 5. Nursing in Hair Removal

- 5.1. Laser in Hair Removal and Influencing Factors
 - 5.1.1. Factors That Influence Laser Hair Removal
- 5.2. Intense Pulsed Light Hair Removal and Influence Factors
 - 5.2.1. Factors That Influence Pulsed Light Hair Removal
- 5.3. Objectives of Laser Hair Removal and IPL (Intense Pulsed Light)
- 5.4. Procedure for Performing Laser and IPL Hair Removal
- 5.5. First Visit
 - 5.5.1. Client Information
 - 5.5.2. Technical Data and Follow-up Records
 - 5.5.3. Informed Consent

- 5.6. Technique Procedure
 - 5.6.1. Cleansing, Shaving and Disinfection
 - 5.6.2. Delimitation of the Area
 - 5.6.3. Protection
 - 5.6.4. Application of Cooling Gel
 - 5.6.5. Using Equipment
 - 5.6.5. Removal of Gel and Application of Decongestant Product
- 5.7. Risks and Side Effects
- 5.8. Precautions, Post-Laser Hair Removal Care and After-Sessions
- 5.9. Protection Measures for Professionals and Clients
 - 5.9.1. Clothing
 - 5.9.2. Recommended Postural Hygiene at Work

Module 6. Aesthetic Massage Techniques in Aesthetic Nursing

- 6.1. The Application of Aesthetic Massage Techniques and the Immediate, Delayed, Local and General Effects of Massage on the Various Organs and Systems
- 6.2. Classification of Massages According to Their Action and the Different Applicable Techniques
- 6.3. Effects, Indications, Precautions and Contraindications of Aesthetic Massage Procedures
- 6.4. Application Parameters of Massage Procedures and Selection Criteria for Aesthetic Massage Procedures
- 6.5. Techniques for Performing Body Aesthetic Massage Procedures
- 6.6. Zone Massage: Specific Procedures and Time of Execution
- 6.7. Aesthetic Massage With Mechanical Effect Equipment
- 6.8. Aesthetic Massage With Mechanical Effect
- 6.9. Application Techniques of the Different Equipment
- 6.10. Indications for Mechanical Aesthetic Massage

Module 7. Peeling in Dermocosmetics

- 7.1. General Overview
- 7.2. Previous Preparation
- 7.3. Superficial Peeling
- 7.4. Medium Peeling
- 7.5. Deep Peeling
- 7.6. Post-Peeling Care. Adverse Effects and Their Treatment
- 7.7. Introduction to Dermocosmetics
- 7.8. General Cosmetic Skin Care
- 7.9. Specific Cosmetic Care

Module 8. Nutrition Applied to Aesthetic Nursing. Psychological Aspects of the Patient

- 8.1. Nursing Care in Anti-Aging Nutricosmetics
- 8.2. Orthomolecular Dermocosmetics
- 8.3. Microbiota
- 8.4. Prebiotics and Probiotics
- 8.5. Nutrigenetics. Nutrigenomics
- 8.6. Supplementation
- 8.7. Food Additives
- 8.8. Most Common Nutritional Disorders Related to Aesthetics
- 8.9. Psychological Aspects of Aging

Module 9. Physical Activity. Sedentary Lifestyles and Obesity

- 9.1. Physiology of Physical Activity
- 9.2. Physiological Evaluation and Interpretation I
- 9.3. Physiological Evaluation and Interpretation II
- 9.4. Personalized Prescription of Physical Activity in Young Adults
- 9.5. Personalized Prescription of Physical Activity for the Elderly
- 9.6. Physical Activity, Longevity and Quality of Life
- 9.7. Strategies for Rehabilitation and Recovery from Exertion
- 9.8. Sedentary Lifestyles and Obesity
- 9.9. Pharmacological Treatment of Obesity. GLP1 - Liraglutide
- 9.10. Dietary Supplementation

Module 10. Nursing Care in Other Procedures and Treatments

- 10.1. Facial Fillers
- 10.2. Bioplasty
- 10.3. Botulinum Toxin
- 10.4. Sustaining Wires
- 10.5. Radiofrequency, Technology and Biological Effects
- 10.6. Facial Rejuvenation
- 10.7. Rhinomodeling and Mentoplasty
- 10.8. Facial and Body Carboxitherapy
- 10.9. PRP (Platelet Rich Plasma)
- 10.10. Mesotherapy

Master the most advanced techniques to deliver optimal results to your patients by combining manual techniques and advanced equipment in Aesthetic Nursing"

04 Teaching Objectives

This academic experience is designed to equip healthcare professionals with the most advanced skills and knowledge in the field of aesthetics. Through a theoretical-practical approach, this university program covers everything from skin assessment to the application of innovative treatments, ensuring high-level specialization. Upon completion, graduates will be prepared to lead their own practice, apply cutting-edge techniques, and offer a differentiated service in a growing sector. Additionally, they will acquire key competencies to optimize their professional performance and expand their career opportunities in the field of dermo-aesthetics.

“

*You will ensure safety in
Aesthetic Nursing practice by
applying health regulations and
risk prevention techniques”*

General Objectives

- ♦ Acquire the fundamental knowledge of all anti-aging modalities and aesthetic treatments, incorporating the necessary tools to perform this specialty in daily practice
- ♦ Comprehensively manage the esthetic patient, being able to make an accurate diagnosis and apply the most appropriate treatment
- ♦ Update and reinforce the knowledge in dermatology necessary for the correct care of aesthetic nursing patients
- ♦ Provide nurses with the necessary tools and guidelines to deal efficiently with the different dermatological pathologies
- ♦ Reinforce the role of the nurse in the treatment of these pathologies
- ♦ Identify the role of treatments in the prevention and treatment of dermatological pathologies
- ♦ Learn about the general characteristics of the skin and its anatomy

You will handle sophisticated technological tools such as laser, radiofrequency or ultrasound”

Specific Objectives

Module 1. Aesthetic Nursing

- ♦ Understand the fundamentals of dermo-aesthetic nursing
- ♦ Know how to structure the organization of a dermatological aesthetic medicine consultation
- ♦ Correctly manage the hygienic and sanitary protocols in the dermo-aesthetic nursing consultation office
- ♦ Know how to manage sanitary waste

Module 2. Aging and Cosmetic Assessment in Aesthetic Nursing

- ♦ Present the historical background upon which Anti-Aging Medicine is based
- ♦ Define and become familiar with the most commonly used concepts in Anti-Aging Medicine
- ♦ Examine the most accepted theories of aging and interrelate them with each other
- ♦ Understand the aging mechanisms associated with mitochondria
- ♦ Define telomere-related aging processes
- ♦ Establish the relationship between immunosenescence, aging and disease onset

Module 3. The Skin

- ♦ Get to know the anatomical structures of the skin
- ♦ Delve into other areas related to the skin: hair, nails, sebaceous and sweat glands, etc
- ♦ Analyze the different functions of the skin
- ♦ Know which are the different skin treatments according to the patient's stage of life
- ♦ Delve into the knowledge of the effects of solar radiation on the skin and the different means of photoprotection
- ♦ Learn about the different types of skin

Module 4. Most Common Dermatological Pathologies

- ♦ Update knowledge on the different pathologies that can be consulted in the Community Pharmacy, analyzing the different existing therapeutic approaches, both for their treatment and prevention
- ♦ Develop a proposal of action protocols for each pathology described
- ♦ Define what is known as sensitive or reactive skin
- ♦ Analyze the different types of acne, and which ones we can address from the community pharmacy
- ♦ Delve into the study of alopecia, the differential characteristics between men and women and its evolution
- ♦ Approach the study of xerosis from a dermatological point of view, analyzing which diseases or treatments most commonly produce it, and what symptoms they present

Module 5. Nursing in Hair Removal

- ♦ Delve into the aspects, classification and influence of laser hair removal
- ♦ Know the aspects, classification and influence of photoepilation with pulsed light
- ♦ Understand the objectives of laser hair removal
- ♦ Know how to program and work with laser hair removal equipment
- ♦ Manage the correct procedures and informed consent for performing laser hair removal
- ♦ Know the protection measures for both professionals and clients in laser hair removal procedures

Module 6. Aesthetic Massage Techniques in Aesthetic Nursing

- ♦ Know how to apply aesthetic massages for immediate effects
- ♦ Understand the classification of massage techniques
- ♦ Know the maneuvers applied to aesthetic body massage
- ♦ Gain in-depth knowledge of the different types of massages available, their effects and application methods

Module 7. Peeling in Dermocosmetics

- ♦ Properly select the patient, prepare the skin beforehand, and ensure correct follow-up and post-peeling treatment prescription, tailored to the typical progression following the use of each selected chemical agent or combination
- ♦ Understand the possible adverse effects of peels and their treatments
- ♦ Delve into the types of peeling and common indications
- ♦ Examine the proper pre-treatment preparation of the skin
- ♦ Delve into general cosmetic skin care
- ♦ Address pathologies such as acne or aging

Module 8. Nutrition Applied to Aesthetic Nursing. Psychological Aspects of the Patient

- ♦ Establish the contribution of micronutrients to normal nutritional status
- ♦ Present the different types of functional foods, nutraceuticals, as well as the differences between the two
- ♦ Examine the health contribution of prebiotics and probiotics
- ♦ Identify the different food additives and their functions in foods
- ♦ Present specific types of diets and their contribution to improving the body's functions
- ♦ Gain in-depth knowledge about the intestinal microbiota as the main axis of the Human Microbiota and its interrelation with the rest of the body, its study methods and its applications in clinical practice to maintain a good state of health

Module 9. Physical Activity. Sedentary Lifestyles and Obesity

- ♦ Examine the metabolic response during physical exercise
- ♦ Determine the different techniques for the physiological assessment of the patient
- ♦ Analyze the basic principles of sports training to develop an adapted physical activity plan
- ♦ Get to know the importance of physical activity on certain pathologies such as cancer, musculoskeletal, cardiovascular and respiratory pathologies
- ♦ Analyze trends for recovery and readaptation to effort
- ♦ Establish how obesity and sedentary lifestyles contribute to accelerated aging

Module 10. Nursing Care in Other Procedures and Treatments

- ♦ Acquire in-depth knowledge of different procedures and treatments such as fillers, botulinum toxin or support threads
- ♦ Deepen in the use of carboxytherapy, rhinomodeling and mentoplasty

05 Study Methodology

TECH is the world's first university to combine the **case study** methodology with **Relearning**, a 100% online learning system based on guided repetition.

This disruptive pedagogical strategy has been conceived to offer professionals the opportunity to update their knowledge and develop their skills in an intensive and rigorous way. A learning model that places students at the center of the educational process giving them the leading role, adapting to their needs and leaving aside more conventional methodologies.

“

TECH will prepare you to face new challenges in uncertain environments and achieve success in your career”

The student: the priority of all TECH programs

In TECH's study methodology, the student is the main protagonist.

The teaching tools of each program have been selected taking into account the demands of time, availability and academic rigor that, today, not only students demand but also the most competitive positions in the market.

With TECH's asynchronous educational model, it is students who choose the time they dedicate to study, how they decide to establish their routines, and all this from the comfort of the electronic device of their choice. The student will not have to participate in live classes, which in many cases they will not be able to attend. The learning activities will be done when it is convenient for them. They can always decide when and from where they want to study.

“

*At TECH you will NOT have live classes
(which you might not be able to attend)”*

The most comprehensive study plans at the international level

TECH is distinguished by offering the most complete academic itineraries on the university scene. This comprehensiveness is achieved through the creation of syllabi that not only cover the essential knowledge, but also the most recent innovations in each area.

By being constantly up to date, these programs allow students to keep up with market changes and acquire the skills most valued by employers. In this way, those who complete their studies at TECH receive a comprehensive education that provides them with a notable competitive advantage to further their careers.

And what's more, they will be able to do so from any device, pc, tablet or smartphone.

“*TECH's model is asynchronous, so it allows you to study with your pc, tablet or your smartphone wherever you want, whenever you want and for as long as you want*”

Case Studies and Case Method

The case method has been the learning system most used by the world's best business schools. Developed in 1912 so that law students would not only learn the law based on theoretical content, its function was also to present them with real complex situations. In this way, they could make informed decisions and value judgments about how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

With this teaching model, it is students themselves who build their professional competence through strategies such as Learning by Doing or Design Thinking, used by other renowned institutions such as Yale or Stanford.

This action-oriented method will be applied throughout the entire academic itinerary that the student undertakes with TECH. Students will be confronted with multiple real-life situations and will have to integrate knowledge, research, discuss and defend their ideas and decisions. All this with the premise of answering the question of how they would act when facing specific events of complexity in their daily work.

Relearning Methodology

At TECH, case studies are enhanced with the best 100% online teaching method: Relearning.

This method breaks with traditional teaching techniques to put the student at the center of the equation, providing the best content in different formats. In this way, it manages to review and reiterate the key concepts of each subject and learn to apply them in a real context.

In the same line, and according to multiple scientific researches, reiteration is the best way to learn. For this reason, TECH offers between 8 and 16 repetitions of each key concept within the same lesson, presented in a different way, with the objective of ensuring that the knowledge is completely consolidated during the study process.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

A 100% online Virtual Campus with the best teaching resources

In order to apply its methodology effectively, TECH focuses on providing graduates with teaching materials in different formats: texts, interactive videos, illustrations and knowledge maps, among others. All of them are designed by qualified teachers who focus their work on combining real cases with the resolution of complex situations through simulation, the study of contexts applied to each professional career and learning based on repetition, through audios, presentations, animations, images, etc.

The latest scientific evidence in the field of Neuroscience points to the importance of taking into account the place and context where the content is accessed before starting a new learning process. Being able to adjust these variables in a personalized way helps people to remember and store knowledge in the hippocampus to retain it in the long term. This is a model called Neurocognitive context-dependent e-learning that is consciously applied in this university qualification.

In order to facilitate tutor-student contact as much as possible, you will have a wide range of communication possibilities, both in real time and delayed (internal messaging, telephone answering service, email contact with the technical secretary, chat and videoconferences).

Likewise, this very complete Virtual Campus will allow TECH students to organize their study schedules according to their personal availability or work obligations. In this way, they will have global control of the academic content and teaching tools, based on their fast-paced professional update.

The online study mode of this program will allow you to organize your time and learning pace, adapting it to your schedule”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that assess real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

The university methodology top-rated by its students

The results of this innovative teaching model can be seen in the overall satisfaction levels of TECH graduates.

The students' assessment of the teaching quality, the quality of the materials, the structure of the program and its objectives is excellent. Not surprisingly, the institution became the top-rated university by its students according to the global score index, obtaining a 4.9 out of 5.

Access the study contents from any device with an Internet connection (computer, tablet, smartphone) thanks to the fact that TECH is at the forefront of technology and teaching.

You will be able to learn with the advantages that come with having access to simulated learning environments and the learning by observation approach, that is, Learning from an expert.

As such, the best educational materials, thoroughly prepared, will be available in this program:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Practicing Skills and Abilities

You will carry out activities to develop specific competencies and skills in each thematic field. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop within the framework of the globalization we live in.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides... In our virtual library you will have access to everything you need to complete your education.

06 Certificate

The Master's Degree in Aesthetic Nursing guarantees students, in addition to the most rigorous and up-to-date education, access to a diploma for the Master's Degree issued by TECH Global University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"

This private qualification will allow you to obtain a **Master's Degree diploma in Aesthetic Nursing** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** private qualification is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
