Introduction

Healthcare institutions are increasingly demanding more professionals who can meet the requirements of the profession's demands and quality. In this sense, it is crucial that nursing up to date their knowledge and acquire new competencies that will enable them to lead and manage the nursing sections of hospitals, clinics and health centers with a greater degree of success. Against this backdrop, TECH offers students this program, with which they will master the most advanced strategies in financial, qualitative or organizational management for health centers 100% online. In addition, after completing this theoretical phase, you will spend 3 weeks in a prestigious hospital where, surrounded by the best specialists, you will put into practice the skills you have acquired.

“

Don't miss this great opportunity and become an expert professional in Nephrology and of nursing Nursing thanks to this complete Hybrid Master's Degree that TECH brings to you”

The new challenges of the profession, such as research, improving nursing care and increasing resource efficiency, assuming a leadership role or gaining a position in an interdisciplinary team, are not easy challenges to overcome. The For Nursing is undergoing a period of change, where moving forward is a major priority and, undoubtedly, there will be difficulties along each step of the way. Therefore, the qualification of nursing professionals is going to be a determining factor in this evolution, and those who are going to perform their activity in positions of responsibility will have to have prepared for it; otherwise, they may fall into inefficiency or ineffectiveness, contributing to hold back growth and delaying the evolution of the profession.

Generally, when a nursing professional is appointed manager of a hospital and does not start from a previous experience, his or her main shortcomings are usually the lack of leadership skills and the problems in terms of negotiations and management of both internal and external relationships that occur.

In view of all this, the study of the management of health institutions can bring a higher degree of quality to the organization of health processes in addition to alleviating the aforementioned professional deficiencies. This Hybrid Master's Degree is aimed at training nursing professionals, developing skills, techniques and methodologies that promote the promotion of their leadership, the management of their activity, and team management, in the most efficient way and with the latest educational technology. In addition, the theoretical contents are taught in a 100% online methodology that makes it possible to make learning compatible with professional and personal life.

In addition, the student will have a 3-week practical stay in a prestigious hospital where, under the guidance of the best specialists, they will observe and carry out real activities related to the financial, human or qualitative management of a health center. In this way, you will acquire the most complete competencies in the market to grow in a sector that demands experts with high skills in Nursing Management.

This **Hybrid Master's Degree in Nursing Management** contains the most complete and up-to-date scientific program on the market. The most important features include:

- ♦ Development of more than 100 clinical cases presented by nursing professionals with expertise in Health Center Management
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Economic and financial management for different types of healthcare entities
- ♦ Perform La quality management in Healthcare institutions
- ♦ Strategies to support decision-making and assertive communication in nursing leadership
- ♦ Special emphasis on methodologies focused on humanization in healthcare management
- ♦ All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection
- ♦ Furthermore, you will be able to carry out a internship in one of the best hospital centers

“

In addition to the theoretical training, you will have the luxury of a 3-week intensive stay where you will acquire all the necessary skills to grow personally and professionally”

In this proposal for a Master's degree, of a professional nature and hybrid learning modality, the program is aimed at updating nursing professionals who perform various functions in the direction and management of health centers and institutions. The contents are based on the latest scientific evidence, and oriented in an educational way to integrate theoretical knowledge into practice, and the theoretical-practical elements will facilitate knowledge updates and decision-making in patient management.

Thanks to their multimedia content developed with the latest educational technology, they will allow the Nursing Management professional to learn in a contextual and situated learning environment, that is to say, a simulated environment that will provide immersive learning programmed to train in real situations. This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise throughout the program. For this purpose, the student will be assisted by an innovative interactive video system created by renowned and experienced experts.

What you study is very important, but knowing how to put it into practice your objective. Take advantage of this opportunity and become a true expert in field thanks to this program.

Expand your knowledge through this Hybrid Master's Degree in Nursing Management, in a theoretical practical way and adapted to your needs.

02

Why Study this Hybrid Master's Degree?

In many areas, theory is not enough to achieve significant professional development. In the world of Nursing Management, it is essential to know the new methodologies and organizational and financial strategies, but it is essential to implement them properly in a real environment. For this reason, TECH has created this program, which that will allow students to combine an excellent theoretical Difficulties with a 3-week stay in a first-level transfer center. In this way, the professional will acquire a series of useful and applicable competencies in daily work, surrounded by the best specialists in the field.

“

This unbeatable opportunity offered by TECH will allow you to acquire the most useful and innovative knowledge in Nursing Management and then put it into practice in a prestigious hospital for 3 weeks”

1. Up-to-date based on the latest strategies in the sector

The area of Nursing Management has undergone a great evolution in recent years thanks to the emergence of new methodologies and strategies for the financial and organizational control of healthcare centers. Therefore, with the intention that the specialist knows all these advances, TECH has created this program in which the student will enter a cutting-edge hospital environment.

2. Gaining In-depth Knowledge from the Experience of Top Specialists

During the practical phase, the student will be accompanied by a large team of professionals, which guarantees the excellent quality of the program and the up to date of the skills offered. With a private tutor, the student will observe real organizational procedures in the healthcare field, which will allow them to incorporate the most up-to-date strategies and tools in Nursing Management into their work methodology.

3. Entering first-class Communication Management environments

TECH carefully selects all the centers that will be part of the practical stay from this Hybrid Master's Degree. Thanks to this, the specialist will have guaranteed access to a prestigious clinical environment in the field of Minimally Invasive Nursing surgery. In this way, you will be able to see the day-to-day work of a demanding, rigorous and exhaustive sector, applying the latest strategies in this In the Field postulates in its work methodology.

4. Combining the Best Theory with State-of-the-Art Practice

Within the academic environment, there is a huge number of programs aimed at offering theoretical contents, with pre-established schedules that make it impossible to make learning compatible with personal and professional life. In view of this, TECH has opted to create an innovative teaching model, which combines a 100% online theoretical teaching with a practical stay of 3 weeks in a prestigious hospital center, where the student will develop all the knowledge acquired.

5. Expanding the Boundaries of Knowledge

TECH offers the possibility of carrying out this Internship Program in centers of international importance. This way, the specialist will be able to expand their frontiers and catch up with the best professionals, who practice in first class centers and in different continents. A unique opportunity that only TECH, the largest online university in the world, could offer.

“

*You will have full practical immersion
at the center of your choice"*

03 Objectives

This Hybrid Master's Degree has been designed with the intention of allowing the student to assimilate the skills required to up to date and expand their knowledge in the field of Nursing Management. Therefore, throughout this degree, you will develop excellent financial, organizational and healthcare skills to help you grow in a versatile and demanding industry. Because of this, TECH determines a series of general and specific objectives to achieve student satisfaction.

“

This program gives you the opportunity not only to up-to-date your theoretical knowledge, but also to put it into practice in front of real patients and with the tutoring of experts in the field”

General Objective

- ♦ The general objective of the Hybrid Master's Degree in Nursing Management is to integrate in nursing professionals a series of competencies that will allow them to successfully manage this health unit. To this end, it offers in detail a cutting-edge of Training program, from both a practical and theoretical point of view, in which the nurse will acquire the knowledge and will be able to put it into practice in front of real patients.. All this, at a time when accreditation of knowledge plays a fundamental role, including the latest trends in Leadership for Healthcare Services Managers

Specific Objectives

Module 1. Health Systems and Policies. Planning and Control of Health Organizations

- ♦ Understand the financial systems of nursing services
- ♦ Discover new alternatives to traditional management models

Module 2. Clinical, Economic and People Management

- ♦ Know how to determine the efficiency and sustainability of health systems
- ♦ Understand everything related to the rights and responsibilities of workers
- ♦ Be able to do cost calculation

Module 3. The Nursing Department in the Health System. Clinical and nursing care management

- ♦ Have Master of the technical language used in the field of nursing
- ♦ Putting care management tools into practice.
- ♦ Apply bioethical criteria in nursing care

Module 4. Quality and Safety Management

- ♦ Apply the highest levels of quality in each of the health services
- ♦ Always keep patient safety in mind as one of the most important considerations before performing any intervention
- ♦ Know the different types of quality accreditation in the health services

Module 5. Hospital Care Management

- ♦ Identify and have an in-depth understanding of all the services available in hospital institutions
- ♦ Control emergency and ICU services and keep track of the resources to be able to redistribute them efficiently
- ♦ Carry out an adequate management of complementary hospital services, such as hospitality or volunteer activities

Module 6. Management in Care Settings

- ♦ manage the need of a chronically ill patient
- ♦ Control and manage outpatient services
- ♦ Take into account all the aspects related to Primary Care and manage them in an efficient way

Module 7. Decision Making and Communication in Nursing Leadership

- ♦ Be able to apply different motivational and leadership techniques
- ♦ Know how to make decisions related to time management
- ♦ Be able to apply effective strategies for resolving possible conflicts

Module 8. Nursing Management Services in Society. Marketing, Communication and mHealth

- ♦ Use technological tools to provide more information to patients
- ♦ Discovering the keys and benefits of healthcare marketing
- ♦ Learn how to perform well in interviews to achieve a managerial position

Module 9. Teaching and Research

- ♦ Master the research methodology applied in health sciences
- ♦ Discriminate between sources of information and select the most appropriate ones
- ♦ Acquire the necessary skills for the communication and distribution of the research results

Module 10. Humanization in Health Management

- ♦ Determine ethical criteria in nurse work
- ♦ Take into account the occupational health of nursing teams
- ♦ Assimilate the new trends in health care, taking into account the different types of patients

“

This program will provide you with a sense of confidence in your Degree in Direction and Management, which will help you grow both personally and professionally”

04 Competencies

After passing the assessments of the Hybrid Master's Degree in Nursing Management, the expert will have excellent competencies and a great performance in this area. This knowledge will enable you to manage and direct the nursing sections of different healthcare institutions in a successful and results-oriented manner. A very complete approach, in a high-level Advanced Master's Degree, which makes the difference between Professionals.

“

The skills you will acquire after completing this program will allow you to enter a labor market that increasingly demands more experts in the field”

General Skills

- Possess and understand knowledge that provides a basis or opportunity to be original when developing and/or applying ideas, often in a research context
- Know how to apply acquired knowledge and problem-solving skills in new or unfamiliar environments within broader (or multidisciplinary) contexts related to their area of study
- Manage all types of resources in the nursing services, from technical and economic to human resources

“

Through this degree, you will increase your knowledge and skills in economic or quality management in hospitals to enhance your professional work in the field of Nursing Management”

Specific Skills

- ♦ Integrate knowledge and face the complexity of making judgments based on incomplete or limited information, including reflections on the social and ethical responsibilities related to the application of their knowledge and judgments
- ♦ To practice the profession with respect for other health professionals, acquiring the skills to work as a team skills to work as a team
- ♦ Recognize the need to maintain your professional skills and keep them up to date, with special emphasis on autonomous and continuous learning of new information
- ♦ Manage the economic resources of a hospital oriented to the provision of nursing services
- ♦ Ensuring the quality of the services offered in a hospital
- ♦ Establish marketing-oriented communication strategies for healthcare institutions
- ♦ Develop the capacity for critical analysis and research in your professional field
- ♦ Evaluate the different health services
- ♦ Boost methodological and instrumental skills in epidemiological research and the evaluation of centers, services, technologies and health programs

05

Educational Plan

The syllabus of this Hybrid Master's Degree is made up of 10 modules through which students will increase and up to date their knowledge in Nursing Management and Administration, based on the current needs of this field of work. The didactic materials available throughout this degree program are available in a wide variety of textual and interactive formats, with the aim of enabling learning adapted to the personal and academic needs of each student.

“

In the theoretical teaching phase, 100% online, you will acquire the most up to date knowledge adapted to the needs of the Nursing Management sector”

Module 1. Health Systems and Policies. Planning and Control of Health Organizations

- 1.1. Health Systems
- 1.2. Healthcare Financing and Provision
- 1.3. Evolution and Other Aspects of Health Systems
- 1.4. Alternatives to the Traditional Management Models
- 1.5. The Process of Strategic Planning
- 1.6. Management by Values and Objectives
- 1.7. Organizational Theory Applied to Healthcare
- 1.8. Management and Direction
- 1.9. Management Control in the Healthcare Sector

Module 2. Clinical, Economic and People Management

- 2.1. Bases of Accounting Applied to Economic Health Management
- 2.2. Efficiency and Sustainability of Health Systems
- 2.3. Budget and Purchasing
- 2.4. Financing and Payment Models
- 2.5. Cost Calculation
- 2.6. Management Agreements
- 2.7. Health Professionals
- 2.8. Rights and Responsibilities. Retributions
- 2.9. Working Day. People Management
- 2.10. Employability Tools in the Private and Public Sector

Module 3. The Nursing Department in the Health System. Clinical and Nursing Care Management

- 3.1. Nursing Department and Strategic Management
- 3.2. Information Systems in Nursing
- 3.3. Normalization of Nursing Language
- 3.4. Nursing Contribution to the Evaluation of Medical Products. Nursing Managers of Material Resources
- 3.5. Information and Registering Systems in Nursing
- 3.6. Health Results
- 3.7. Patient Classification Systems
- 3.8. Tools for Care Address: Clinical and Procedures Management
- 3.9. Joining the Organization: Welcome Manual
- 3.10. Bioethics in Nursing Procedures and Value-Based Management

Module 4. Quality and Safety Management

- 4.1. Quality in Healthcare Organizations
- 4.2. Patient Security
- 4.3. Nosocomial Infections
- 4.4. Prevention
- 4.5. Information and Record Systems
- 4.6. Secondary and Tertiary Victims
- 4.7. Quality Accreditation in Healthcare
- 4.8. Organizations and Criteria. Accreditation Models
- 4.9. Performance Evaluation. Competency Management
- 4.10. Methods and Techniques

Module 5. Hospital Care Management

- 5.1. Emergency Services Management
- 5.2. ICU Management
- 5.3. Surgical Unit Management
- 5.4. Management of Hospitalization Units
- 5.5. Other Units or Special Services
- 5.6. Management of Central or Auxiliary Services
- 5.7. Radio Diagnostic Services Management
- 5.8. Laboratory Management
- 5.9. Pharmacy Hospital Management
- 5.10. Hospitality, Complementary and Voluntary Services Management

Module 6. Management in Care Settings

- 6.1. Health and Social Coordination
- 6.2. Primary Healthcare
- 6.3. Primary Care Clinical Management
- 6.4. Chronic Patient Management. Nurse Leadership in Facing the Challenge of Chronicity
- 6.5. Nursing Managers of Advanced Cases and Practice
- 6.6. Active Patients and Patient school
- 6.7. Outpatient Services Management
- 6.8. Out-of-Hospital Emergencies Management
- 6.9. Home Care: Models
- 6.10. Outpatient Care Services

Module 7. Decision Making and Communication in Nursing Leadership

- 7.1. Leadership and Team Leadership
- 7.2. People-Related Motivation: Stress and Emotion Management
- 7.3. Delegation
- 7.4. Executive Coaching
- 7.5. Decision Making and Time Management
- 7.6. The Decision Process. Complex Care Management
- 7.7. Techniques for Decision-Making
- 7.8. Communication
- 7.9. Meetings
- 7.10. Conflict Management

Module 8. Nursing Management Services in Society. Marketing, Communication and mHealth

- 8.1. Regulatory Aspects in the Management of Health Care Services
- 8.2. Promotion of Health and New Technologies. mHealth. Nursing Care in the Technological Advances in Healthcare
- 8.3. Healthcare Marketing
- 8.4. Technological Changes that Improve Health Care. *Apps* and Social Media in the Field of Health
- 8.5. Digital Skills in Healthcare Directors and Middle Management
- 8.6. Healthcare Market
- 8.7. Corporate Social Responsibility
- 8.8. Nurse Visibility: Social Networks and New Technology. Future of Nursing
- 8.9. The Public Profile of the Health Care Manager and Managerial Staff
- 8.10. The Interview Process to Apply for a Managerial Position

Module 9. Teaching and Research

- 9.1. Critical Thinking in Nursing
- 9.2. Basic Principles of Research Methodology Applied in Health Sciences
- 9.3. Sources of Information for Research and Sourcing Strategies
- 9.4. Critical Reading of Articles
- 9.5. Epidemiology and Research Study Designs and Biases
- 9.6. Communication and Diffusion of Research Findings
- 9.7. Opportunities and Resources for Development of Studies and Research
- 9.8. Nursing Knowledge Management and Evidence-Based Nursing
- 9.9. Care Training. Professional development
- 9.10. Management and Innovation in Continual Professional Development in the Field of Teaching. Innovation in Health Care and Caregiving

Module 10. Humanization in Health Management

- 10.1. Anthropology of Humanization: Health and Illness
- 10.2. Organizational and Transformational Culture in Healthcare Systems
- 10.3. Management of Organizations Based on Humanization
- 10.4. New Trends in Healthcare: the Voice of the Patient and Caregiver, the Active Patient and the Expert Patient
- 10.5. Ethical Considerations in the Healthcare Field
- 10.6. The Ethics of Nursing Care
- 10.7. Occupational Health and Prevention Services in the Healthcare Field
- 10.8. Professional Burn-Out. Care-Associated Costs
- 10.9. Patient and Family Focused Care
- 10.10. A Current Approach to Treatment Support

06

Clinical Internship

After passing the online education period, the program includes a practical training period in a reference clinical center. The student will have at their disposal the support of a tutor who will accompany them during the whole process, both in the preparation and in the development of the clinical practice.

“

Do your clinical internship in one of the best international hospital centers”

This Practical Training consists of a practical phase of 3 weeks duration, from Monday to Friday with 8-hour working days under the guidance of a nursing manager. This stay will allow the professional to observe real organizational situations alongside a team of specialists of reference in the area of Nursing Management, applying the latest techniques and all the management tools and instruments that make it possible to achieve the objectives proposed by a health institution. the achievement of the objectives proposed by a health institution.

In this training proposal, completely practical in nature, the activities are aimed at developing and perfecting the skills necessary for the provision of healthcare in areas and conditions that require a high level of qualification, and which are oriented to the specific training for the exercise of the activity, in a safe environment for the patient and a high professional performance.

It is, without a doubt, an opportunity to learn by working in the innovative hospital of the future, where proper management and optimization of available resources is the key to guaranteeing excellent healthcare services tailored to the needs of all patients.

The practical education will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of teachers and other fellow trainees that facilitate teamwork and multidisciplinary integration as transversal competencies for Current Leadership and management in nursing practice(learning to be and learning to relate).

The procedures described below will form the basis of the practical part of the internship, and their implementation is subject to both the suitability of the patients and the availability of the center and its workload, with the proposed activities being as follows:

Module	Practical Activity
Techniques Planning and control of health organizations	Plan, organize and direct the branches present in a healthcare institution according to the latest postulates in clinical management strategies
	Apply health policies adapted to the context of the organization, interpreting the health system that governs the activity of the clinical center
	Organize and divide existing tasks into an interdisciplinary work team
Clinical, Economic and People Management	Carry out an economic analysis of the functioning of health institutions and the economic behavior of the agents involved in health systems
	Use the instruments of economic evaluation applied in health systems and facilities
	Designing the annual budget for a health care facility
Quality and safety management, communication and decision making	Apply and Lead patient quality and safety systems applied to the context of clinical management units
	Perform the procedures required to apply for quality accreditation in the healthcare environment
	appropriately apply the most appropriate tools in each context for valuation and clinical decision making
	Elaborate communication and marketing tasks oriented to the healthcare field
	Initiate improvement, innovation and transformation processes in the units, services and centers of healthcare

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions for Practical Training

The general terms and conditions of the internship program agreement shall be as follows:

1. TUTOR: During the Hybrid Master's Degree, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Hybrid Master's Degree, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Hybrid Master's Degree will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: the Hybrid Master's Degree shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Hybrid Master's Degree. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Hybrid Master's Degree will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07

Where Can I Do the Clinical Internship?

The nurse has at his disposal the best centers where he can develop his internship. Therefore, TECH has selected most prestigious clinics so that it can delve, in an active and dynamic way, into the management and direction of nursing, attending to all the particularities and complexities of this important area, which is essential in any health center.

“

You will be able to spend your stay in a center of great international prestige, where you will meet real patients and carry out several practical activities”

The student will be able to complete the practical part of this Hybrid Master's Degree at the following centers:

“

Delve into the most relevant theory in this field, subsequently applying it in a real work environment"

08 Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Nursing School we use the Case Method

In a given situation, what should a professional do? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Nurses learn better, faster, and more sustainably over time.

With TECH, nurses can experience a learning methodology that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, in an attempt to recreate the real conditions in professional nursing practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Nurses who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process has a clear focus on practical skills that allow the nursing professional to better integrate knowledge acquisition into the hospital setting or primary care.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine case studies with a 100% online learning system based on repetition combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

The nurse will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 175,000 nurses with unprecedented success in all specialities regardless of practical workload. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Nursing Techniques and Procedures on Video

We introduce you to the latest techniques, to the latest educational advances, to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story"

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

09 Certificate

This Hybrid Master's Degree in Nursing Management guarantees students, in addition to the most rigorous and up-to-date education, access to a Hybrid Master's Degree diploma issued by TECH Global University.

“

*Successfully complete this program
and receive your university qualification
without having to travel or fill out
laborious paperwork"*

This program will allow you to obtain your **Hybrid Master's Degree in Nursing Management** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: **Hybrid Master's Degree in Nursing Management**

Course Modality: **Hybrid (Online + Clinical Internship)**

Duration: **12 months**

Certificate: **TECH Global University**

Recognition: **60 + 5 ECTS Credits**
