01

Introduction

The role of advanced nursing professionals has been gaining prominence in recent years, where the prevailing clinical reality is increasingly demanding high-capacity nurses who have managerial skills. In this context, the area of minor surgeries and dressings presents an excellent updating opportunity for nursing professionals who want to continue offering the best professional practice. For this very reason, TECH has prepared a complete program that includes the main developments in debridement techniques, advanced burn management or negative pressure therapy.

“

*Access to the most recent studies
on the different types of wounds
and how to approach them from
advanced practice nursing”*

Since minor surgery and dressings are particularly relevant within Advanced Practice Nursing, it is imperative for nursing professionals to have access to the latest scientific news and developments within the specialty.

The advances made in the treatment of complex chronic wounds or foreign body extractions open an unparalleled framework for nursing professionals to incorporate the advances and current scientific postulates into their daily practice.

That is why TECH has created this program, aided by a widely versatile teaching team in the field of Advanced Practice Nursing. The professors have combined their vision and successful practical experience with the latest scientific theory, providing nursing professionals with a complete update on both theoretical and practical matters.

This course is offered in a 100% online format, making it a preferential option to balance academic and professional updating with the most demanding daily work. All the didactic content is available for download from the first day from any device with an Internet connection.

This **Postgraduate Certificate in Advanced Practice Nursing in Minor Surgery and Dressings** contains the most complete and up-to-date educational program on the market. Its most notable features are:

- ♦ Practical cases presented by experts in Advanced Practice Nursing
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where self-assessment can be used to improve learning
- ♦ Its special emphasis on innovative methodologies in Advanced Practice Nursing
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

You won't have to attend classes or adhere to pre-set schedules, you'll have the freedom to undertake the course load at your own pace"

“

*Study the current role of
Advanced Practice Nursing
in the management of
chronic complex wounds”*

The program's teaching staff includes professionals from sector who contribute their work experience to this training program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive training programmed to train in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise throughout the program. For this purpose, the student will be assisted by an innovative interactive video system created by renowned and experienced experts.

Update and expand your knowledge of the latest developments regarding incision with drainage, skin biopsy and subcutaneous tissues.

Choose when, where and how to study, because you will have the total flexibility required by a professional with high work demands like you.

02

Objectives

Aware of the importance this refresher program has for professional nursing, TECH has made sure to incorporate the most current and in-demand knowledge in the field of minor surgery and dressings. Nurses have the quality guarantee of a teaching team entirely committed to providing the best possible update.

“

You will be supported by a complete technical and teaching team that will assist you at all times to ensure you achieve all the objectives laid out in the program”

General Objectives

- ♦ Train nursing professionals for advanced practice in research, teaching and care
- ♦ Know the most complex specific procedures in nursing practice
- ♦ Acquire advanced knowledge in anatomy, physiology, pathology and pharmacology
- ♦ Adapt professional nursing profiles to perform organizational and/or care positions at the highest level, all related to the most innovative and booming topics in advanced nursing

Specific Objectives

- ◆ Learn advanced techniques in chronic wound care Delve into dressings and vacuum cures
- ◆ Learn procedures in minor dermatological surgery, such as excision of small tumors like warts and condylomas
- ◆ Master different suture techniques
- ◆ Professionalize the performance of biopsy sample collection

“

You will complete this course with a more current and up-to-date body of knowledge of all aspects in minor surgery and dressings”

03

Course Management

The coordinators on the program have been carefully selected by TECH for their merits in both the professional and academic fields. This guarantees that the theoretical contents respond to the most urgent current issues in Advanced Practice Nursing. Moreover, the professionalism of our teaching staff is made evident throughout the syllabus, as it is designed to provide nurses with the most efficient update.

“

You will benefit from the personalized advice of professionals committed and knowledgeable about your current reality as an advanced practice nurse”

Management

Ms. Alonso Díaz, Verónica

- Advanced Practice Nurse in the Community of Madrid
- Head of Nursing CAP Santa Isabel
- Head of Nursing at CAP Cuzco
- DUE, Escuela Universitaria Cruz Roja, associated to UAM

Mr. Jiménez Vales, Luis

- EIR training tutor, CTO Nursing Group
- Pediatrics EIR Teaching Coordinator, CTO Nursing Group
- Teaching coordinator of Oncohematology and Pain EIR, CTO Nursing Group
- Nurse in the area of Donors/Blood Bank, Fundación Jiménez Díaz
- Diploma in Nursing, School of Nursing, Fundación Jiménez Díaz, Universidad Autónoma de Madrid
- Specialist in Gynecology and Obstetrics, Gregorio Marañón General University Hospital
- Higher Technician Specialist in Clinical Diagnostic Laboratory, IES SIGLO XXI, Leganés

Professors

Ms. Amores Ordóñez, Cristina

- ◆ Primary Care Nurse at the Santa Isabel Health Center
- ◆ Nurse in the Traumatology and Geriatrics Unit, Severo Ochoa University Hospital
- ◆ Nurse in the Psychiatry and Eating Disorders Unit, Quirón Madrid Hospital
- ◆ Diploma in Nursing, Francisco de Vitoria University
- ◆ Expert in International Cooperation and Health Promotion, Francisco de Vitoria University
- ◆ Expert in Family and Community Nursing Updates at the Universidad Autónoma de Madrid

04

Structure and Content

The structure and contents respond to the most successful technology and pedagogical methodology in the educational landscape. TECH is the only university in Spanish licensed to use Relearning, which provides a unique and distinctive quality. Thanks to this method, students will incorporate all the updated knowledge the program offers into their daily practice even before finishing the course.

“

*Expand and update your knowledge
with the latest advances in suturing
and wart treatment”*

Module 1. Minor Surgery and Dressings

- 1.1. Types of Wounds
- 1.2. Complex Chronic Wounds
- 1.3. Advanced Practice Nursing in Chronic Complex Wound Care
- 1.4. Debridement Techniques
- 1.5. Advanced Burn Management
- 1.6. Negative Pressure Therapy
- 1.7. Incision with Drainage, Skin and Subcutaneous Tissue Biopsy
- 1.8. Treating Warts, Molluscum Contagiosum and Papilloma
- 1.9. Extraction of Foreign Bodies
- 1.10. Sutures

“

Great audio-visual support throughout the program is essential to ease the course load, giving you access to top-quality interactive workbooks and summaries”

05

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Nursing School we use the Case Method

In a given situation, what should a professional do? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Nurses learn better, faster, and more sustainably over time.

With TECH, nurses can experience a learning methodology that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, in an attempt to recreate the real conditions in professional nursing practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Nurses who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process has a clear focus on practical skills that allow the nursing professional to better integrate knowledge acquisition into the hospital setting or primary care.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine case studies with a 100% online learning system based on repetition combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

The nurse will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 175,000 nurses with unprecedented success in all specialities regardless of practical workload. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Nursing Techniques and Procedures on Video

We introduce you to the latest techniques, to the latest educational advances, to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06 Certificate

The Postgraduate Certificate in Advanced Practice Nursing in Minor Surgery and Dressings guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"

This **Postgraduate Certificate in Advanced Practice Nursing in Minor Surgery and Dressings** contains the most complete and up-to-date scientific program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees.

Title: **Postgraduate Certificate in Advanced Practice Nursing in Minor Surgery and Dressings**

Official N° of hours: **150 h.**

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
