01

Introduction

In the new, increasing complex and vast healthcare context, the role of advanced practice nurses is crucial for proper management and leadership of nursing teams, as well as for research and teaching. TECH has prepared a comprehensive program for all nursing professionals seeking an updated and renewed vision of APN by taking an in-depth look at both current and future career opportunities. It also offers a unique opportunity for nurses to broaden and update their knowledge of patient management in chronic pathologies.

“

*You will have the flexibility to balance this
Postgraduate Certificate with your professional
and personal responsibilities”*

There is ample evidence to support that advanced practice nursing care provided by specialty nurses is beneficial to patient health. The more traditional approaches to health care are unable to respond to current circumstances and complexities, so the incorporation of APN is a major step toward improving the coordination, efficiency, accessibility and outcomes of health services.

For this reason, this program compiles the most recent developments in Advanced Practice Nursing, with topics devoted to its fields of application, clinical-financial or hospital management, among others.

Nursing professionals will have access to the most recent advances made in practical clinical applications of APN, as well as the current situation in the field of management, research and teaching.

This is a great opportunity to efficiently and quickly catch up on the most urgent issues in Advanced Practice Nursing with a 100% online program. Students will decide when, where and how to take on the entire course load, without having to adhere to pre-set schedules or classes.

This **Postgraduate Certificate in Advanced Practice Nursing** contains the most complete and up-to-date educational program on the market. Its most notable features are:

- ♦ Practical cases presented by experts in Advanced Practice Nursing
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where self-assessment can be used to improve learning
- ♦ Its special emphasis on innovative methodologies in Advanced Practice Nursing
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

You will learn the most recent developments in Advanced Practice Nursing, with a deep insight into the present and future of the practice"

“ *You will have the continuous support of the best academic and technical team, committed to making the most of the entire program”*

The program's teaching staff includes professionals from sector who contribute their work experience to this training program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive training programmed to train in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise throughout the program. For this purpose, the student will be assisted by an innovative interactive video system created by renowned and experienced experts.

You will incorporate the latest advances in clinical-financial, PCC and hospital APN management into your daily practice.

You will further explore the current situation of APN in Spanish-speaking countries, renewing your vision and perspectives on the subject.

02 Objectives

TECH has set a series of fundamental objectives for this course, guaranteeing nurses the highest quality and suitability to their professional interests. To ensure the objectives are met, TECH has used the most innovative educational technology in the academic landscape. This translates into a multitude of audiovisual aids and complementary readings that students will have access to throughout the program.

“

You will get to update and broaden the role of the most developed APN, with the latest scientific postulates, including both theoretical and practical applications”

General Objectives

- ♦ Train nursing professionals for advanced practice in research, teaching and care
- ♦ Know the most complex specific procedures in nursing practice
- ♦ Acquire advanced knowledge in anatomy, physiology, pathology and pharmacology
- ♦ Adapt professional nursing profiles to perform organizational and/or care positions at the highest level, all related to the most innovative and booming topics in advanced nursing

Specific Objectives

- ◆ Study advanced nursing research in depth
- ◆ Study advanced nursing management
- ◆ Delve into the human aspect of patient care
- ◆ Know the history of advanced nursing practice
- ◆ Analyze clinical administration and accounting

“

You will achieve all the proposed objectives thanks to TECH's meticulous methodology, designed to get the maximum benefit from the effort invested”

03

Course Management

Since Advanced Practice Nursing is an ever-growing field, TECH has chosen the most prominent professionals within it to develop the content on the program. Nurses will be able to appreciate the professors' extensive experience in the completeness of the topics covered, as the technical depth of the topics and the practical vision given of APN are a reflection of the program's high quality.

“

The best professionals choose TECH for the high quality of its studies. You will be advised and guided at all times by a faculty that is aware of your current needs”

Management

Ms. Alonso Díaz, Verónica

- ♦ Advanced Practice Nurse in the Community of Madrid
- ♦ Head of Nursing CAP Santa Isabel
- ♦ Head of Nursing at CAP Cuzco
- ♦ DUE, Escuela Universitaria Cruz Roja, associated to UAM

Mr. Jiménez Vales, Luis

- ♦ EIR training tutor, CTO Nursing Group
- ♦ Pediatrics EIR Teaching Coordinator, CTO Nursing Group
- ♦ Teaching coordinator of Oncohematology and Pain EIR, CTO Nursing Group
- ♦ Nurse in the area of Donors/Blood Bank, Fundación Jiménez Díaz
- ♦ Diploma in Nursing, School of Nursing, Fundación Jiménez Díaz, Universidad Autónoma de Madrid
- ♦ Specialist in Gynecology and Obstetrics, Gregorio Marañón General University Hospital
- ♦ Higher Technician Specialist in Clinical Diagnostic Laboratory, IES SIGLO XXI, Leganés

04

Structure and Content

An avant-garde methodology, TECH uses *Relearning* to build all its academic programs. This greatly favors students, since the most important terms and concepts included in this Postgraduate Certificate will be assimilated and updated in a progressive and natural way. The course load is reduced thanks to this, which means it is not necessary to invest enormous amounts of time or effort to pass the course.

“

You will delve into a multitude of real clinical cases presented by the professors on the program, with the guarantee that you will contextually update your knowledge”

Module 1. Advanced Practice Nursing (APN)

- 1.1. Advanced Practice Nursing (APN)
- 1.2. Advanced Practice in Professional Nursing
- 1.3. Present and Future
- 1.4. Scope of Application
- 1.5. Career Opportunities
- 1.6. APN in Research
- 1.7. APN in Teaching: Doctorate Programs
- 1.8. APN in Management
 - 1.8.1. Clinical Financial Management
 - 1.8.2. Primary Care Center (PCC) Management
 - 1.8.3. Hospital Management
- 1.9. APN in Spanish-Speaking Countries
- 1.10. APN Clinical Practice Application

“

Benefit from the advantages offered by this program, where you will find work guides and complementary readings that will also prove great reference material in your professional future”

05

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Nursing School we use the Case Method

In a given situation, what should a professional do? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Nurses learn better, faster, and more sustainably over time.

With TECH, nurses can experience a learning methodology that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, in an attempt to recreate the real conditions in professional nursing practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Nurses who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process has a clear focus on practical skills that allow the nursing professional to better integrate knowledge acquisition into the hospital setting or primary care.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine case studies with a 100% online learning system based on repetition combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

The nurse will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 175,000 nurses with unprecedented success in all specialities regardless of practical workload. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Nursing Techniques and Procedures on Video

We introduce you to the latest techniques, to the latest educational advances, to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

06 Certificate

The Postgraduate Certificate in Advanced Practice Nursing guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This **Postgraduate Certificate in Advanced Practice Nursing** contains the most complete and up-to-date scientific program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees.
