01

Introduction

This program is designed to provide an in-depth understanding of the emotional approach in music therapy as a tool to maintain, recover, and improve health through sounds and music tailored to different emotional situations. Learn and update your knowledge on the possibilities of music therapy in a practical way, using the latest educational technology, 100% online, and tailored to the professional's needs.

“

The field of natural therapies is an emerging field of health sciences, which is being incorporated gradually and complementarily to traditional health structures. But in order to be able to respond to this emerging need, it is essential to have an adequate specialization”

The National Center for Complementary and Alternative Medicine (NCCAM) was established in the United States in 1998 due to the growing need for information and research in the field of Natural Therapies. Its mission is to explore practices for complementary and alternative healing within the context of rigorous science, as well as to train researchers and inform both the general public and healthcare professionals about the results of studies in natural therapies.

In this regard, the NCCAM has proposed a pragmatic classification of natural therapies into five areas, one of which is the Mind-Body Techniques Area, which includes practices focused on the interaction between the mind, body, and behavior. It also covers techniques for mental control to affect physical functions and promote health, such as music therapy.

This Postgraduate Certificate in Emotional Approaches in Music Therapy constitutes an educational program, updated based on the latest scientific evidence and the experience of recognized professionals in the field of Natural Therapies. The program promotes the application of various music therapy techniques for the emotional approach to patients, as this therapy is designed to achieve relaxation, well-being, and improvement of mental and physical functions. This makes it potentially useful in certain clinical situations.

The course content is based on the latest scientific evidence and the expertise of renowned professionals in music therapy, giving it a practical and easily transferable approach to everyday clinical work.

This **Postgraduate Certificate in Emotional Approach in Music Therapy** contains the most complete and up-to-date scientific program on the market. The most important features include:

- ♦ This program includes music therapy techniques presented by experts
- ♦ Procedures developed in real environments and in an eminently practical and useful way to enhance the desired therapeutic action
- ♦ Includes questionnaires and self-assessment exercises on the contents presented to improve understanding of the concepts and enhance learning
- ♦ Video lessons about the different techniques and their approach
- ♦ Theoretical lessons questions to the expert, discussion forums on controversial issues, and individual reflection work
- ♦ The program allows access to content from any fixed or portable device with an Internet connection

Update your knowledge through the Postgraduate Certificate in Emotional Approaches in Music Therapy in a practical way, tailored to your needs"

“

This Postgraduate Certificate is the best investment you can make when selecting an update program for two reasons: in addition to updating your knowledge in Emotional Approaches in Music Therapy, you will receive a university diploma from TECH Global University”

The program's teaching staff includes professionals from the sector who contribute their work experience to this specializing program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the course. For this purpose, students will be assisted by an innovative interactive video system created by renowned experts.

The Postgraduate Certificate includes real practical cases and exercises to bring the development of the program closer to everyday clinical practice.

Take advantage of this opportunity to update your knowledge in emotional approaches in music therapy to improve patient care and complement therapeutic indications.

02 Objectives

The main objective of the program is to develop theoretical-practical learning, allowing healthcare professionals to rigorously and practically master the procedures for applying music therapy.

“

*This continuing education program
will instill a sense of confidence in the
practice of medical care, helping you to
grow both personally and professionally”*

General Objective

- ♦ Provide the knowledge and skills necessary for the proper development, application, and integration of music therapy in the clinical setting to address the emotional needs of patients in the hospital environment

“

Take this opportunity and step forward to update your knowledge with the latest advancements in music therapy”

Specific Objectives

- ♦ Describe the most important components in the basic systems of regulation, symbiosis, and homeostasis
- ♦ Define the anatomical, biochemical, and nutritional functions of the human body, identifying different biorhythms and their pathognomonic components
- ♦ Describe the basic aspects of Integrative Medicine
- ♦ Define the concept of music therapy and its applications to improve health
- ♦ Establish the foundations of music therapy
- ♦ Address the psychosocial aspects with the neurophysiology of Soundtherapy
- ♦ Describe the physiological mechanisms of human health
- ♦ Define white noise therapy in a clinical setting
- ♦ Explain music therapy in different evolutionary stages
- ♦ Outline the intervention strategies of music therapy in the hospital setting
- ♦ Define the global anatomical structure of the human body
- ♦ Describe the beliefs surrounding Integrative Medicine

03

Structure and Content

The structure of the content has been designed by a team of professionals knowledgeable about the implications of training in daily medical practice, particularly in out-of-hospital emergencies and major disasters. They are fully aware of the importance of up-to-date training to effectively respond to patients with urgent conditions and are committed to delivering high-quality education through the use of the latest educational technologies.

“

This Postgraduate Certificate in Emotional Approach in Music Therapy contains the most complete and up-to-date program on the market”

Module 1. Introduction to Integrative Medicine

- 1.1. Anatomy and Global Anatomical Structure of the Human Body
- 1.2. Chemical Fundamentals
- 1.3. Biology of Life
- 1.4. Microbiology
- 1.5. Psychology
- 1.6. Beliefs
- 1.7. Medical History
- 1.8. Social Life, Behavior, and Conduct
- 1.9. Basic Aspects of Integrative Medicine

Module 2. Music Therapy and Sound Therapy

- 2.1. Music Therapy
- 2.2. Music and Human Behavior
- 2.3. Music Therapy in Evolutionary Stages
- 2.4. Musician and Sound in Health
- 2.5. Music Therapy in the Hospital Setting
- 2.6. Neurophysiology of Sound Therapy
- 2.7. White Noise Therapy in Clinical Settings

“

A unique, essential and decisive learning experience to boost your professional development”

04 Study Methodology

TECH is the world's first university to combine the **case study** methodology with **Relearning**, a 100% online learning system based on guided repetition.

This disruptive pedagogical strategy has been conceived to offer professionals the opportunity to update their knowledge and develop their skills in an intensive and rigorous way. A learning model that places students at the center of the educational process giving them the leading role, adapting to their needs and leaving aside more conventional methodologies.

“

TECH will prepare you to face new challenges in uncertain environments and achieve success in your career”

The student: the priority of all TECH programs

In TECH's study methodology, the student is the main protagonist.

The teaching tools of each program have been selected taking into account the demands of time, availability and academic rigor that, today, not only students demand but also the most competitive positions in the market.

With TECH's asynchronous educational model, it is students who choose the time they dedicate to study, how they decide to establish their routines, and all this from the comfort of the electronic device of their choice. The student will not have to participate in live classes, which in many cases they will not be able to attend. The learning activities will be done when it is convenient for them. They can always decide when and from where they want to study.

“

*At TECH you will NOT have live classes
(which you might not be able to attend)”*

The most comprehensive study plans at the international level

TECH is distinguished by offering the most complete academic itineraries on the university scene. This comprehensiveness is achieved through the creation of syllabi that not only cover the essential knowledge, but also the most recent innovations in each area.

By being constantly up to date, these programs allow students to keep up with market changes and acquire the skills most valued by employers. In this way, those who complete their studies at TECH receive a comprehensive education that provides them with a notable competitive advantage to further their careers.

And what's more, they will be able to do so from any device, pc, tablet or smartphone.

“*TECH's model is asynchronous, so it allows you to study with your pc, tablet or your smartphone wherever you want, whenever you want and for as long as you want*”

Case Studies and Case Method

The case method has been the learning system most used by the world's best business schools. Developed in 1912 so that law students would not only learn the law based on theoretical content, its function was also to present them with real complex situations. In this way, they could make informed decisions and value judgments about how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

With this teaching model, it is students themselves who build their professional competence through strategies such as Learning by Doing or Design Thinking, used by other renowned institutions such as Yale or Stanford.

This action-oriented method will be applied throughout the entire academic itinerary that the student undertakes with TECH. Students will be confronted with multiple real-life situations and will have to integrate knowledge, research, discuss and defend their ideas and decisions. All this with the premise of answering the question of how they would act when facing specific events of complexity in their daily work.

Relearning Methodology

At TECH, case studies are enhanced with the best 100% online teaching method: Relearning.

This method breaks with traditional teaching techniques to put the student at the center of the equation, providing the best content in different formats. In this way, it manages to review and reiterate the key concepts of each subject and learn to apply them in a real context.

In the same line, and according to multiple scientific researches, reiteration is the best way to learn. For this reason, TECH offers between 8 and 16 repetitions of each key concept within the same lesson, presented in a different way, with the objective of ensuring that the knowledge is completely consolidated during the study process.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

A 100% online Virtual Campus with the best teaching resources

In order to apply its methodology effectively, TECH focuses on providing graduates with teaching materials in different formats: texts, interactive videos, illustrations and knowledge maps, among others. All of them are designed by qualified teachers who focus their work on combining real cases with the resolution of complex situations through simulation, the study of contexts applied to each professional career and learning based on repetition, through audios, presentations, animations, images, etc.

The latest scientific evidence in the field of Neuroscience points to the importance of taking into account the place and context where the content is accessed before starting a new learning process. Being able to adjust these variables in a personalized way helps people to remember and store knowledge in the hippocampus to retain it in the long term. This is a model called Neurocognitive context-dependent e-learning that is consciously applied in this university qualification.

In order to facilitate tutor-student contact as much as possible, you will have a wide range of communication possibilities, both in real time and delayed (internal messaging, telephone answering service, email contact with the technical secretary, chat and videoconferences).

Likewise, this very complete Virtual Campus will allow TECH students to organize their study schedules according to their personal availability or work obligations. In this way, they will have global control of the academic content and teaching tools, based on their fast-paced professional update.

The online study mode of this program will allow you to organize your time and learning pace, adapting it to your schedule"

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that assess real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

The university methodology top-rated by its students

The results of this innovative teaching model can be seen in the overall satisfaction levels of TECH graduates.

The students' assessment of the teaching quality, the quality of the materials, the structure of the program and its objectives is excellent. Not surprisingly, the institution became the top-rated university by its students according to the global score index, obtaining a 4.9 out of 5.

Access the study contents from any device with an Internet connection (computer, tablet, smartphone) thanks to the fact that TECH is at the forefront of technology and teaching.

You will be able to learn with the advantages that come with having access to simulated learning environments and the learning by observation approach, that is, Learning from an expert.

As such, the best educational materials, thoroughly prepared, will be available in this program:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Practicing Skills and Abilities

You will carry out activities to develop specific competencies and skills in each thematic field. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop within the framework of the globalization we live in.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides... In our virtual library you will have access to everything you need to complete your education.

05 Certificate

The Postgraduate Certificate in Emotional Approach in Music Therapy guarantees students, in addition to the most rigorous and up-to-date education, access to a diploma for the Postgraduate Certificate issued by TECH Global University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This private qualification will allow you to obtain a diploma for the **Postgraduate Certificate in Emotional Approach in Music Therapy** endorsed by TECH Global University, the world's largest online university.

TECH Global University, is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** private qualification, is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
