01

Introduction

Pediatric nursing is the part of the nursing discipline that focuses on providing care to newborns, promoting health and dealing with the potential pathological situations of the initial stage of the child's birth. This Postgraduate Certificate is oriented to update the nursing professional's knowledge, in a practical way, so that they can provide care to newborns based on the latest scientific evidence.

“

With the Postgraduate Certificate in Newborn Nursing Care you have the opportunity to update your knowledge in a practical way and without sacrificing scientific accuracy, to incorporate the latest advances in neonatal patient care”

Pediatric nursing is responsible for the care and management of the newborn. Problems in the early stages of their lives will influence their future development, so it is very important that the care provided by professionals is based on the latest scientific evidence, in order to contribute with quality and confidence to the proper development of the child.

The Pediatric Nursing professional, among all their attributions, should be able to provide comprehensive care to children in the different initial stages of their lives, including all aspects related to the provision of care in the birth period.

This Postgraduate Certificate is oriented to facilitate the updating of the nursing professional's knowledge, in order to be able to perform the necessary interventions in each case, improving the child's development and preventing potential pathological situations that could occur in the newborn child.

This **Postgraduate Certificate in Newborn Nursing Care** contains the most complete and up-to-date scientific program on the market. Its most notable features are:

- ◆ Clinical cases presented by experts in the different specialties. The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- ◆ New developments in nursing care for the main pathologies in newborn patients
- ◆ Presentation of practical workshops on procedures, nursing care and diagnosis and treatment techniques
- ◆ An algorithm-based interactive learning system for decision-making in the clinical situations presented throughout the course
- ◆ All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ◆ Content available from any fixed or portable device with internet connection

Update your knowledge through the Postgraduate Certificate in Newborn Nursing Care in a practical way and adapted to your needs"

“

This Postgraduate Certificate may be the best investment you can make when selecting a refresher program for two reasons: in addition to updating your knowledge of Newborn Nursing Care, you will obtain a qualification from TECH Global University”

Its teaching staff includes renowned specialists in the field of neonatology, who contribute the experience of their work in the country's leading medical centers to this program.

The multimedia content developed with the latest educational technology will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive academic experience programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the nursing professional must try to solve various typical professional practice situations that arise during the course. In order to do this, the nursing professional will be assisted by an innovative interactive video system, created by renowned and experienced experts in treating critical neonatal patients and with extensive teaching experience.

This course allows for learning in simulated environments, which provide immersive learning programmed to train for real situations.

It includes clinical cases to bring the program's degree as close as possible to the reality of care in Nursing.

02

Objectives

The main objective of the program is the development of theoretical and practical learning, so that the nursing professional can master in a practical and rigorous way the interventions and techniques in the newborn pediatric patient, in order to provide quality care.

“

This refresher program will generate a sense of security when practising nursing, which will help you grow both personally and professionally”

General Objective

- Update the nursing professional's knowledge to be able to provide specialized nursing care to the newborn, including prevention of pathological situations and caring for newborns with health problems and supporting them through their rehabilitation

Specific Objectives

- ◆ Determine newborn screening tests
- ◆ Establish the main health problems of newborns
- ◆ Identify the state of the new born post partum
- ◆ Develop rapid action protocols for emergencies in newborns

Take advantage of the opportunity and take the step to get up-to-date on the latest developments in Newborn Nursing Care”

03

Course Management

The program's teaching staff includes renowned specialists in pediatric nursing, who carry out their clinical practice in the leading hospital centers, and who contribute the experience of their work to this program. In addition, other professional members of national and international scientific societies participate in its design and elaboration, complementing the teaching staff in an interdisciplinary manner.

“

*Learn the latest advances in Newborn
Nursing Care from leading professionals”*

Guest Director

Dr. Garcia Briñón, Miguel Ángel

- ◆ Emergency Services Supervisor at HCSC
- ◆ Supervisor at the Neonatal Unit at HCSC
- ◆ Degree in Nursing
- ◆ Master's Degree in Health Services and Health Companies Management
- ◆ Expert in Out-of-Hospital Accidents and Emergencies at the European University of Madrid
- ◆ Nurse collaborator in the Multipharma pharmaceuticals "InMEDIATE" study

Management

Ms. Alfaro Ramírez, Concepción

- ◆ Diploma in Nursing from the Catholic University of Valencia
- ◆ Specialist Nurse in Pediatric Nursing
- ◆ Nursing Supervisor for Pediatric Services at 9 de Octubre NISA Hospital in Valencia
- ◆ University Professor in: Diploma in Neonatal Nursing and Neonatal Intensive Care CEU - Cardenal Herrera University, Moncada, Valencia
- ◆ Lecturer in Child Nutrition Course at Nisa Hospital Foundation

Professors

Dr. Estevez García, Adolfo

- ◆ Nurse in the Emergency Department, Hospital Clínico San Carlos, Madrid
- ◆ Diploma in Nursing from the European University of Madrid
- ◆ Specialist in Emergency Nursing and Outpatient Emergencies from the European University of Madrid
- ◆ Course on Pediatric Triage at Gregorio Marañón Hospital
- ◆ Laboratory technician specialized in Anatomic Pathology
- ◆ Nurse teaching collaborator at the Faculty of Nursing, Physiotherapy and Podiatry, Complutense University of Madrid for the clinical practice teaching of the nursing degree

Dr. Cozar López, Gabriel

- ◆ Nurse in the Emergency Department at Clinical Hospital San Carlos
- ◆ Diploma in Nursing from the University of Alcalá
- ◆ Master's Degree in Emergency and Critical Care in Nursing from the European University of Madrid
- ◆ Collaborator with the Health Research Institute at the Clinical Hospital San Carlos in Madrid
- ◆ Member of the teaching body of the Foundation for the Development of Nursing

Ms. Lorenzo Salinas, Almudena

- ◆ Nurse in the Emergency Department for adult and pediatric patients at Clinical Hospital San Carlos in Madrid
- ◆ Graduate in Nursing from the University School of Nursing Fundación Jiménez Díaz
- ◆ Specialist in Accidents and Emergencies at the School of Health Sciences of the Nursing Collegiate Organization, Center attached to the Complutense University of Madrid
- ◆ Course in Nursing in the neonatal adaptation to extrauterine life

Ms. Espílez Laredo, Irene

- ◆ Nurse in the Emergency Department at Clinical Hospital San Carlos in Madrid
- ◆ Degree in Nursing from the Complutense University of Madrid
- ◆ Master's Degree in Intensive Care from the University of Avila
- ◆ Pediatric Specialist in life-threatening situations with CODEM
- ◆ Expert in Out-of-Hospital Accidents and Emergencies

Ms. Alonso Pérez, Marta

- ◆ Nurse in the Emergency Department at Clinical Hospital San Carlos in Madrid
- ◆ Degree in Nursing from the Complutense University of Madrid
- ◆ Master's Degree in Intensive Care Nursing from CEU San Pablo University
- ◆ Postgraduate Diploma in Nursing Processes and Interventions for Pediatric Patients in Life-threatening situations from the University of Avila
- ◆ Expert in Out-of-Hospital Accidents and Emergencies with FUDEN
- ◆ Course on Advanced Cardiopulmonary Resuscitation in Pediatrics and Neonatology

Ms. Lospitao Gómez, Sara

- ♦ Cardiac Surgery Post-Surgical Intensive Care Unit (PCU) at 12 de Octubre Hospital
- ♦ Coronary Intensive Care Unit at 12 de Octubre Hospital
- ♦ Master's Degree in Critical Care from the Rey Juan Carlos I University
- ♦ Degree in Humanities from the European University of Madrid
- ♦ Degree in Nursing from the European University of Madrid
- ♦ Postgraduate Diploma in Continuing Training from the Complutense University of Madrid
- ♦ Internship tutor for undergraduate and graduate students in Nursing at the European University of Madrid (UEM) and Juan Carlos I University (URJC)
- ♦ Instructor for SVA by the National CPR Plan of SEMICYUC

Dr. López Ruiz, María Amparo

- ♦ Degree in Medicine and Surgery from the University of Valencia
- ♦ Pediatric Services at the 9 de Octubre University Hospital, Valencia
- ♦ University Professor in the Biomedical Sciences department at the CEU University of Cardenal Herrera-Moncada
- ♦ Postgraduate course director: Diploma in Neonatal Nursing and Neonatal Intensive Care at CEU Cardenal Herrera-Moncada University (Valencia) and NISA Hospitals Foundation (Valencia)

Mr. Mora Rivero, Jorge

- ◆ Diploma in Nursing from the University of Alicante
- ◆ Master's Degree in Nursing Sciences
- ◆ Emergency Department Nurse in Elche University General Hospital
- ◆ University tutor for clinical training
- ◆ Professional teaching experience in University Masters and Postgraduate Courses
- ◆ Postgraduate Diploma in Primary Care Emergencies
- ◆ Degree in Emergency Medical Transportation (SAMU)

Ms. Roldán del Amo, Adela

- ◆ Specialist Nurse in Pediatric Nursing
- ◆ University Diploma in Nursing from the University School of Nursing "Nuestra Señora de los Desamparados" of Valencia
- ◆ Pediatric Nurse in the Pediatric Hospitalization Unit at NISA 9 de Octubre Hospital
- ◆ University Professor in "Diploma in Neonatal Nursing and Neonatal Intensive Care" at CEU-Cardenal Herrera University, Valencia
- ◆ University professor in the "First Aid, Cardiopulmonary Resuscitation and Emergency Situations" Course at CEU-Cardenal Herrera, Valencia

04

Structure and Content

The structure of the contents has been designed by a team of professionals who are knowledgeable about the implications of education in the daily practice of pediatric nursing, who are aware of the current relevance of professional training, ensuring that the main issues in the current development of pediatric patient care are addressed.

“

This Postgraduate Certificate in Newborn Nursing Care contains the most complete and up-to-date scientific program on the market”

Module 1. Newborn Nursing Care

- 1.1. General Concepts of Perinatology
- 1.2. Physical Examination of Newborns
- 1.3. Health Problems in Newborns
- 1.4. Immediate Nursing Care Immediately after Birth
- 1.5. Newborn Care and Hygiene
- 1.6. Newborn Nursing Care in Premature Newborns
- 1.7. Breastfeeding
- 1.8. Post-Term Newborn
- 1.9. Identification and Custody of the Newborn
- 1.10. Donation of Umbilical Cord Blood

“

A unique, key, and decisive educational experience to boost your professional development”

05

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Nursing School we use the Case Method

In a given situation, what should a professional do? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Nurses learn better, faster, and more sustainably over time.

With TECH, nurses can experience a learning methodology that is shaking the foundations of traditional universities around the world.

According to Dr. Gervas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, in an attempt to recreate the real conditions in professional nursing practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Nurses who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process has a clear focus on practical skills that allow the nursing professional to better integrate knowledge acquisition into the hospital setting or primary care.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine case studies with a 100% online learning system based on repetition combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

The nurse will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 175,000 nurses with unprecedented success in all specialities regardless of practical workload. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Nursing Techniques and Procedures on Video

We introduce you to the latest techniques, to the latest educational advances, to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06 Certificate

The Postgraduate Certificate in Newborn Nursing Care guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Global University.

“

*Successfully complete this program
and receive your university degree
without travel or laborious paperwork”*

This program will allow you to obtain your **Postgraduate Certificate in Newborn Nursing Care** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: **Postgraduate Certificate in Newborn Nursing Care**

Modality: **online**

Duration: **6 weeks**

Accreditation: **6 ECTS**

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH Global University will make the necessary arrangements to obtain it, at an additional cost.
