01

Introduction

Continuous training is nowadays required to achieve professional development and to be fully qualified to face the daily challenges of a constantly changing field such as healthcare. The surgical area is an environment whose characteristics differentiate it from the rest of the services where the majority of nursing professionals habitually develop competencies in their care, management, teaching and research functions. The evolution of techniques and technological advances make it essential for nursing professionals to update their knowledge in order to provide excellent surgical care.

“

This Postgraduate Certificate in Thoracic Surgery for Nurses contains the most complete and up-to-date scientific program on the market”

Each of the wide variety of surgical interventions that are performed requires a specific procedure, a specific technique and the exclusive surgical material for that intervention. One thing they all have in common is a series of steps and rules that all team members should know in detail. They must also know the general functioning of the surgical department in order to prevent and avoid common risks while carrying out professional work. Being institutions aware of this, they demand academic profiles with a training that adapts to the requirements of their job and that are qualified and endorsed for the performance of the same.

This knowledge will facilitate the provision of quality care throughout the surgical process to ensure the safety of the patient and the professional at all times.

This **Postgraduate Certificate in Thoracic Surgery for Nurses** contains the most complete and up-to-date scientific program on the market. The most important features of the program include:

- ♦ Clinical cases presented by experts in the different fields of multidisciplinary knowledge. The graphic, schematic, and eminently practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional.
- ♦ Novelties on Thoracic Surgery for Nurses
- ♦ An algorithm-based interactive learning system for decision-making in the clinical situations presented throughout the course.
- ♦ With special emphasis on evidence-based and surgical nursing research methodologies.
- ♦ All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments.
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

Increase your skills in the approach to Thoracic Surgery for Nurses through this program"

“

This Postgraduate Certificate may be the best investment you can make in the selection of a refresher program for two reasons: in addition to updating your knowledge in Thoracic Surgery for Nurses you will obtain a certificate issued by TECH Technological University"

Forming part of the teaching staff is a group of professionals in the world of surgical nursing who bring to this training their work experience, as well as a group of renowned specialists, recognised by esteemed scientific communities.

The multimedia content developed with the latest educational technology will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive training program to train in real situations.

The design of the program is based on Problem-Based Learning, by means of which the nursing professional must try to solve the different professional practice situations that arise throughout the course. For this reason, you will be assisted by an innovative, interactive video system created by renowned and experienced experts in the field of nephrology with extensive teaching experience.

Increase your decision-making confidence by updating your knowledge with this Postgraduate Certificate in Thoracic Surgery for Nurses.

Don't miss the opportunity to update your knowledge in Thoracic Surgery for Nurses to improve patient care.

02 Objectives

The main objective of the program is the development of both theoretical and practical learning, so that nurses in can master, in a practical and rigorous way, the study of Thoracic Surgery for Nurses.

“

This refresher program will generate a sense of security when practising nursing, which will help you grow both personally and professionally”

General Objectives

- ♦ Update your knowledge on advanced nursing practice in perioperative care within the different medical-surgical specialities through nursing based on evidence
- ♦ Promote work strategies based on perioperative patient care, as a reference model in the achievement of healthcare excellence.
- ♦ Encourage the acquisition of technical skills and abilities, through a powerful audiovisual system, and the possibility of development through online simulation workshops and/or specific training
- ♦ Encouraging professional development through research and dynamic and up-to-date continuous training

Specific Objectives

- ♦ List the prerequisites of a hospital to be able to house such a specialty.
- ♦ Correctly complete administrative documents for subsequent processing.
- ♦ Collect samples for later processing in the necessary sub-department.
- ♦ Describe the surgical material used in each intervention.
- ♦ Control the assembling and use of the specific equipment and devices used in each intervention.
- ♦ Solve different incidents related to equipment and expendable or non-expendable material.

- ♦ Identify the need for certain devices in the operating room.
- ♦ Decide appropriately on the use of suture for each procedure.
- ♦ Identify the component structures of the respiratory apparatus.
- ♦ Create diagrams showing the relationship between the structures.
- ♦ Describe the use of each medication specific to this specialty.
- ♦ Differentiate tracheal stenosis with and without prosthetic implant, as well as the rest of prosthetic implants, and know their peculiarities.
- ♦ Explain the correct preparation and handling of the material to perform a rigid bronchoscopy.
- ♦ Explain the handling of mechanical and chemical pleurodesis.
- ♦ Prepare and describe the correct functioning of the thoracic drainage system.
- ♦ Differentiating between open and minimally invasive surgeries.
- ♦ Correctly prepare and label intraoperative and post-procedure specimens.
- ♦ Justify the need to treat a pathology with thoracic surgery.
- ♦ Describe the VATS technique.
- ♦ Differentiate between the clinical manifestations of each pathology.
- ♦ Differentiate between segmentectomy and lobectomy and know when and how to proceed in each case
- ♦ Identify and manage the symptoms for programmed and emergency interventions early on.
- ♦ Anticipate which material is likely to be used in each surgery.
- ♦ Know the proper use and maintenance of different optical fibers used in surgery.
- ♦ Reorganize human resources in the surgical area.
- ♦ Set up an instrument table suitable for the surgery to be performed.
- ♦ Apply surgical protection and extra measures to ensure patient safety.
- ♦ Anticipate possible surgical and anesthetic complications that could arise during the surgery and the transfer of the patient afterwards.
- ♦ Assist in the surgical technique by helping with the necessary equipment.
- ♦ Transmit the necessary information to the ward nurse who will continue caring for the patient after surgery.
- ♦ Relay the necessary information to the Post-Surgical Recovery services nurse and/or ward nurse for continuity of care.
- ♦ List the nursing interventions to carry out.
- ♦ Confirm the results to be obtained after surgery.
- ♦ Have knowledge of anesthesia in thoracic surgery: systematics, pharmacology, devices likely to be used.

Seize the opportunity and take the step to get up-to-date on the latest developments in Thoracic Surgery for Nurses”

03

Course Management

This program includes highly regarded health professionals in the field of healthcare in its teaching staff, who bring the experience of their work to this training.

In addition, renowned specialists, members of prestigious national and international scientific communities, are involved in designing and preparing the program.

“

Learn the latest advances in Thoracic Surgery for Nurses from leading professionals"

Management

Guzmán Almagro, María Isabel

- ♦ Diploma in Nursing
- ♦ Master's Degree in Social Gerontology: Longevity, Health and Quality of Life
- ♦ Postgraduate Diploma in Urgent and Emergency Care. Complutense University of Madrid
- ♦ Professional Master's Degree in Comprehensive Nursing Care in Critical and Emergency Situations in Adults
- ♦ Surgical Block Nurse at the La Paz University Hospital. Madrid

Bárzano Saiz, Mª Estela

- ♦ Diploma in Nursing
- ♦ Diploma in Physiotherapy
- ♦ Current Operating room nurse with several years of experience in Orthopaedic and Traumatological Surgery, Plastic Surgery and General Surgery operating rooms at University Hospital La Paz of Madrid
- ♦ Master's Degree in Counselling. San Camilo Health Humanization Center.

Alba López, Alicia

- Diploma in Nursing
- More than 10 years of experience as a Surgical Block Nurse in Orthopedic and Traumatologic Surgery, Plastic Surgery and General Surgery operating rooms at "La Paz" Hospital University, Madrid

04

Structure and Content

The structure of the contents has been designed by a team of professionals who recognise the implications of training in the daily praxis of the nurse, aware of the relevance of current specialization to treat surgical patients and are committed to quality teaching using new educational technologies.

“

This Postgraduate Certificate in Thoracic Surgery for Nurses contains the most complete and up-to-date scientific program on the market”

Module 1. Thoracic Surgery

- 1.1. Particularities in Thoracic Surgery
 - 1.1.1. Structure and Organisation of the Neurosurgery Operating Room
 - 1.1.2. Equipment and Materials
 - 1.1.2.1. Expendable Material
 - 1.1.2.2. Non-Expendable Material
 - 1.1.2.2.1. Specific Instruments: Tools, Separators
 - 1.1.2.2.2. Devices
 - 1.1.2.3. Specific Sutures
 - 1.1.2.4. Specific Drugs
- 1.2. Anatomophysiology
 - 1.2.1. Upper Respiratory Tract
 - 1.2.1.1. Nasal Fossa
 - 1.2.1.2. Pharynx
 - 1.2.1.3. Larynx.
 - 1.2.2. Lower Respiratory Tract
 - 1.2.2.1. Trachea.
 - 1.2.2.2. Lungs
 - 1.2.2.3. Muscles of the Thoracoabdominal Wall
 - 1.2.2.4. Vessels and Nerves
 - 1.2.2.5. Thoracic Cavity
 - 1.2.3. Respiratory Mechanism
 - 1.2.4. Respiratory Functional Examination Concepts
 - 1.2.5. Gas Pressures Exchange Assessments
- 1.3. Tracheal Surgeries
 - 1.3.1. Rigid Bronchoscopy (with/without Prosthetic Implant) + Tracheal Canal Dilatation
 - 1.3.2. Open Surgery with Tumor Resection and/or Secondary Tracheal Anastomosis

- 1.4. Pulmonary Surgery (Open and Closed)
 - 1.4.1. Extirpation of Bullae and/or Pleurectomy With/Without Mechanical or Chemical Pleurodesis
 - 1.4.2. Open Segmentectomy
 - 1.4.3. Segmentectomy by Videothoracoscopy
 - 1.4.4. Open Lobectomy (Thoracotomy)
 - 1.4.5. Closed Lobectomy (by VATS or Minimally Invasive Surgery)
- 1.5. Other Surgeries
 - 1.5.1. Bilateral Sympathectomy by Videothoracoscopy
 - 1.5.2. Thoracic Cavity Correction and Osteosynthesis
 - 1.5.3. Chest Tube Insertion

“*A unique, key, and decisive training experience to boost your professional development*”

05

Methodology

This training provides you with a different way of learning. Our methodology uses a cyclical learning approach: ***Re-learning***.

This teaching system is used in the most prestigious medical schools in the world, and major publications such as the ***New England Journal of Medicine*** have considered it to be one of the most effective.

“

Discover Re-learning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Nursing School we use the Case Method

In a given clinical situation, what would you do? Throughout the program, you will be presented with multiple simulated clinical cases based on real patients, where you will have to investigate, establish hypotheses and, finally, resolve the situation. There is abundant scientific evidence on the effectiveness of the method. Nurses learn better, faster, and more sustainably over time.

With TECH, nurses can experience a learning methodology that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, in an attempt to recreate the real conditions in professional nursing practice.

“

Did you know that this method was developed in 1912 at Harvard for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Nurses who follow this method not only grasp concepts, but also develop their mental capacity by evaluating real situations and applying their knowledge.
2. The learning process has a clear focus on practical skills that allow the nursing professional to better integrate knowledge acquisition into the hospital setting or primary care.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the university program.

Re-learning Methodology

At TECH we enhance the Harvard case method with the best 100% online teaching methodology available: Re-learning.

Our University is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

The nurse will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Re-learning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best Spanish-speaking online university (Columbia University).

With this methodology we have trained more than 175,000 nurses with unprecedented success, in all specialties regardless of from the workload. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Re-learning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (we learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

In this program you will have access to the best educational material, prepared with you in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Nursing Techniques and Procedures on Video

We introduce you to the latest techniques, to the latest educational advances, to the forefront of current nursing procedures and techniques. All this, in first person, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This unique multimedia content presentation training system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides. in our virtual library you will have access to everything you need to complete your training.

06 Certificate

The Postgraduate Certificate in Thoracic Surgery for Nurses guarantees, in addition to the most rigorous and updated specialization, access to a university title university of Postgraduate Certificate issued by TECH Technological University.

“

*Successfully complete this training and receive
your university degree without travel or laborious
paperwork"*

This **Postgraduate Certificate in Thoracic Surgery for Nurses** contains the most complete and up-to-date scientific program on the market.

After students have passed the assessments, they will receive by certified mail their **Postgraduate Certificate** issued by **TECH Technological University**.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professionals career evaluation committees.
