tech 06 | Introduction

Over the last few years, it has become evident that natural childbirth has several advantages over the one performed in hospitals and clinics, not only in terms of its benefits and reduction of trauma, but also in terms of comfort and convenience for the mother and the baby. Neuroscientists have shown that during natural childbirth there is a release of hormones such as oxytocin, which has an analgesic effect and reduces stress during the procedure.

As such, nurses dedicated to this area should be aware of the latest scientific evidence that will allow them to offer the best care to their patients. Therefore, this program developed by TECH becomes an updating tool, aimed at presenting the most notorious and most influential advances on natural childbirth.

All this through an informative compendium of great impact, accompanied by audiovisual resources, complementary readings and a convenient 100% online format, easily accessible from any device with an internet connection. This will allow professionals to take the program at any time of the day, balancing their daily tasks with the updating of their knowledge.

In addition, it relies on the innovative Relearning methodology, offering a more immersive experience and of greater benefit by confronting the graduate with real and simulated situations. It is worth mentioning the participation of experts and specialists who have contributed their years of experience and knowledge to the study material.

This Postgraduate Diploma in Scientific and Neuroscientific Evidence on Natural Childbirth for Nursing contains the most complete and up-to-date scientific program on the market. The most important features include:

- The development of case studies presented by experts in Scientific and Neuroscientific Evidence on Natural Childbirth for Nursing
- The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- Practical exercises where the self-assessment process can be carried out to improve learning
- Its special emphasis on innovative methodologies
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

You will have access to scientific evidence that will show you the brain changes in humans during pregnancy and postpartum"

Download the content of this program to your device of choice, being tablet, computer or mobile and review it as many times as you need"

The program's teaching staff includes professionals from the sector who bring to this program the experience of their work, in addition to recognized specialists from prestigious reference societies and universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the course. For this purpose, the students will be assisted by an innovative interactive video system created by renowned and experienced experts.

Get up to date with the latest scientific information on the Neuroscience of pregnancy and motherhood.

You will have access to the most relevant findings that have contributed to the professional field for the sanitary procedure of natural childbirth.

tech 10 | Objectives

General Objectives

- Acquire fundamental knowledge about the physiology of Natural Childbirth, ancestral cultural practices and the emotional needs of women during childbirth, as well as the implications of medical interventions
- Acquire essential skills and knowledge in the care of pregnant women and their fetuses, including the promotion of healthy pregnancies and the identification of possible complications
- Acquire fundamental knowledge and skills in the diagnosis, management and prevention of emergencies in childbirth, with a focus on interprofessional collaboration and advocacy for patients' rights
- Acquire fundamental knowledge and skills in the assessment, diagnosis, and management of neonatal emergencies, with a focus on early recognition of problems and application of appropriate interventions
- Focus on fundamental knowledge about the neuroscience of pregnancy, motherhood and perinatal care, as well as the scientific evidence related to Natural Childbirth and evidence-based care practices
- Acquire fundamental knowledge about home labor and birth, including team
 management and organization, preparation and accompaniment during pregnancy,
 labor and puerperium, and identification and management of special situations and
 home obstetric emergencies
- Acquire fundamental knowledge about Natural Childbirth units, such as birthing homes
 and hospital units, and develop skills to assess, plan and manage these environments,
 ensuring a high level of care and satisfaction for women and their families

- Acquire fundamental knowledge and practical skills in newborn care, as well as the ability to provide comprehensive and safe care at this critical stage of life and how to collaborate with other healthcare professionals and families to ensure the wellbeing of the newborn
- Acquire knowledge of the physical and emotional needs of the mother in the perinatal period
- Develop skills to provide comprehensive support and care for the mother during the postpartum period, including difficult and emotionally intense situations
- Promote prevention and care of maternal mental health in the perinatal period, including the detection and treatment of mood disorders and the management of obstetric trauma and obstetric violence
- Analyze the stages of labor and pain management and relaxation techniques
- Develop skills in the development and monitoring of individualized birth plans
- Examine the importance of interdisciplinary collaboration in childbirth care
- Encourage emotional preparation and support for women and their families during the birthing process
- Acquire skills in identifying and managing high-risk situations during pregnancy and childbirth

Specific Objectives

Module 1. Natural Childbirth

- Analyze the science and evolution of Natural Childbirth, and how current medical practices compare to historical and global statistics
- Examine the physiology of normal childbirth in the human species, including the hormonal cocktail, positions, and female sexuality
- Analyze childbirth practices in ancestral cultures and their relevance today
- Identify and address the emotional needs of women during childbirth and how professionals can support them
- Take an in-depth analysis of the role of Oxytocin in Natural Childbirth and the differences between endogenous and exogenous Oxytocin
- Examine current pandemics related to childbirth and their impact on the health of women and newborns
- Delve into the needs of the newborn during and after childbirth, including gut and epidermal flora, the umbilical cord, and placental blood
- Analyze interventionism in childbirth and how it affects the environment and safety in childbirth, as well as the importance of respecting the nature of the process

Module 2. Scientific and Neuroscientific Evidence

- Analyze brain plasticity during maternity and the importance of animal and human research in this field
- Examine brain changes in rodents and humans during pregnancy and postpartum and the involvement of hormones in Motherhood
- Examine the Neurobiology of Breastfeeding and how empathy and altruism influence baby care
- Trace neuroscientific research to psychoeducational interventions and emotional and cognitive support for expectant mothers and fathers

- Analyze the scientific evidence on Natural Childbirth and evidence-based care practices
- Examine the use of non-invasive technology and analgesia and anesthesia in Natural Childbirth
- Identify the benefits and risks of Natural Childbirth and tailor care according to the setting, including both the hospital and at home

Module 3. Delivery Preparation

- Convey to the pregnant woman the ability to understand the changes in the maternal body and fetal development
- Examine in depth the different techniques in the stages of labor and delivery
- Delve into prenatal exercises and physical preparation
- Identify nutrition needs during pregnancy
- In-depth discussion of preferences in the development of the labor and delivery plan
- Delve into emotional preparation for childbirth
- Delve into the integration of the family in education and preparation for childbirth

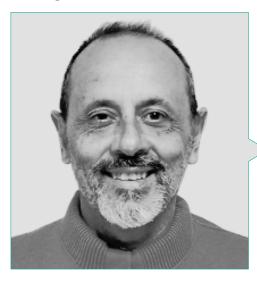

You will delve into the protocols of action for a newborn after the delivery process"

tech 14 | Course Management

Management

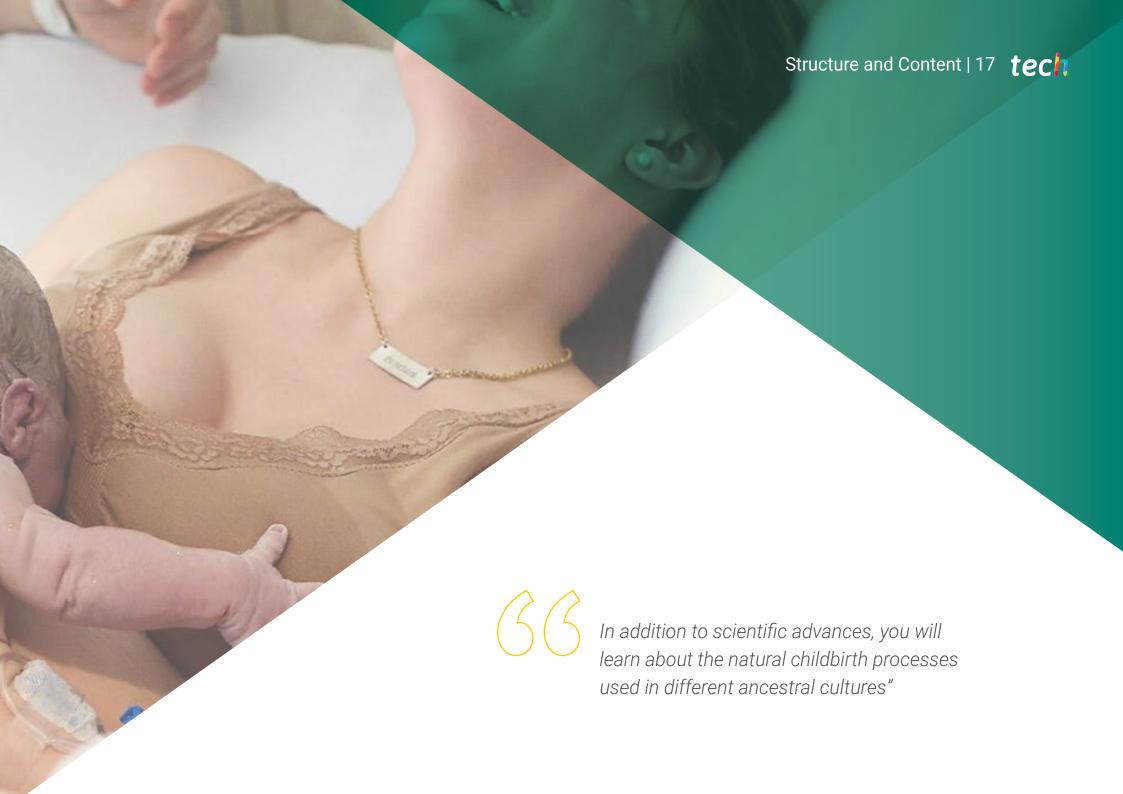

Dr. Santos Leal, Emilio

- Medical Director of the International Medical Technology Center
- Specialist Doctor at Alcorcón Foundation University Hospita
- Medical specialist at Consorcio University General Hospital of Valencia
- Medical specialist at Pius Hospital de Valls
- Medical specialist at Perpetuo Socorro Clinic
- · Specialty in Gynecology and Obstetrics by San Carlos Clinical Hospital
- Degree in Medicine and Surgery from the University of Cantabria

tech 18 | Structure and Content

Module 1. Natural Childbirth

- 1.1. Natural Childbirth
 - 1.1.1. Science versus Dogma
 - 1.1.2. Evolution as a Species
 - 1.1.3. Statistics in the World: Oxytocin, Analgesia, Episiotomies, Caesarean Sections
 - 1.1.4. Improving Statistics
- 1.2. Normal Childbirth in the Human Species
 - 1.2.1. Hormone Cocktail in Normal Childbirth
 - 1.2.2. Positions in Normal Childbirth
 - 1.2.3. Female Sexuality
 - 1.2.4. Physiology of Sexual Intercourse
- 1.3. Childbirth in Ancestral Cultures
 - 1.3.1. Childbirth among the Taínos, Guanajatabeyes, and Siboneyes
 - 1.3.2. Childbirth before the Sumerians
 - 1.3.3. Orgasmic Childbirth
 - 1.3.4. Michel Odent
- 1.4. Emotional Needs of Laboring Women
 - 1.4.1. Empowerment
 - 1.4.2. Privacy
 - 1.4.3. Delivery
 - 1.4.4. Majesty
- 1.5. Needs of the Professional Attending Laboring Women
 - 1.5.1. Secrecy
 - 1.5.2. Professional Attitude Towards Pain
 - 1.5.3. Respect for the Majesty of the Moment
 - 1.5.4. Priviledge
- 1.6. The Reasons for Emotional Needs
 - 1.6.1. Comfort
 - 1.6.2. Privacy
 - 1.6.3. Connection with the most Primal
 - 1.6.4. Connection with the most Spiritual

Structure and Content | 19 tech

- 1.7. Oxytocin
 - 171 The Hemato-Placental Barrier
 - 1.7.2. The Blood-Brain Barrier
 - 1.7.3. Endogenous Oxytocin
 - 1.7.4. Exogenous Oxytocin
- 1.8. Current Pandemics
 - 1.8.1. The Cesarean Pandemic
 - 1.8.2. The Immunological Disorders Pandemic
 - 1.8.3. The Autism Pandemic
 - 1.8.4. The Hyperactivity and Attention Deficit Pandemic
- 1.9. Requirements of the New-Born
 - 1.9.1. Intestinal Flora
 - 1.9.2. Skin Flora
 - 1.9.3. The umbilical cord
 - 1.9.4. Placental Blood
- 1.10. Interventions
 - 1.10.1. Amending Nature
 - 1.10.2. Intervening Calls for Intervention
 - 1.10.3. The Chain of Interventionism
 - 1.10.4. Environment and Safety in Childbirth

Module 2. Scientific and Neuroscientific Evidence

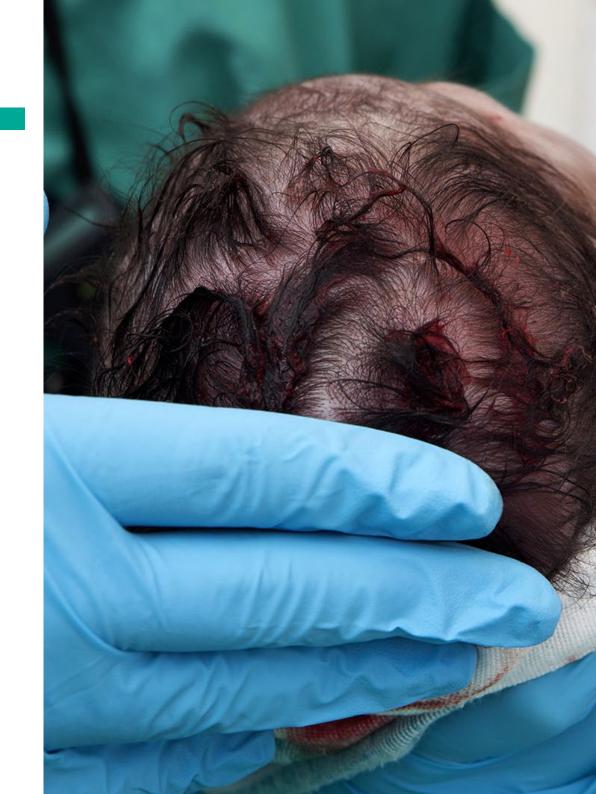

- 2.1. Neuroscience of Pregnancy and Motherhood
 - 2.1.1. Brain Plasticity During the Transition to Motherhood
 - 2.1.2. Comparison of Studies in Animals and Humans
 - 2.1.3. Evolution and Biological Mechanisms of Maternal Care
 - 2.1.4. Hormones and Their Role in Motherhood
- 2.2. Animal Models in Maternity Research
 - 2.2.1. Brain Changes in Animals During Pregnancy and Offspring Care
 - 2.2.2. Hormones and Regulation of Maternal Behavior in Animals
 - 2.2.3. Applications of Animal Findings to Human Research

- 2.3. Brain Changes in Human During Pregnancy and Postpartum
 - 2.3.1. Brain Reorganization During Pregnancy
 - 2.3.2. Limbic System and Mother-Child Connection
 - 2.3.3. Social Cognition, Empathy, and Maternal Adaptations
- 2.4. Clinical Implications and Practical Applications
 - 2.4.1. Impact of Breastfeeding and Care on Caregiver's Brain
 - 2.4.2. Neurobiology of Breastfeeding
 - 2.4.3. Clinical Approach to Behavioral Changes in Motherhood
- 2.5. Oxytocin and Its Role in Bonding
 - 2.5.1. Oxytocin in Humans
 - 2.5.2. Oxytocin in Babies
 - 2.5.3. Oxytocin in Maternal Care
- 2.6. Scientific Evidence in Pregnancy Monitoring
 - 2.6.1. Nutrition in Pregnancy
 - 2.6.2. Diabetes Screening
 - 2.6.3. Weight Gain
- 2.7. Evidence-Based Delivery Care Practices
 - 2.7.1. Labor Monitoring
 - 2.7.2. Non-Invasive Technology
 - 2.7.3. Analgesia and Anesthesia
- 2.8. Evidence-Based Intervention L
 - 2.8.1. Large Babies
 - 2.8.2. Prolonged Pregnancy
 - 2.8.3. Rupture of Membranes
- 2.9. Evidence-Based Intervention II
 - 2.9.1. Oxytocin IV
 - 2.9.2. Fetal Distress
 - 2.9.3. Labor Induction
- 2.10. Evidence-Based Intervention III
 - 2.10.1. Cord Cutting
 - 2.10.2. Delivery

tech 20 | Structure and Content

Module 3. Delivery Preparation

- 3.1. Pregnancy Anatomy and Physiology
 - 3.1.1. Changes in the Maternal Body
 - 3.1.2. Fetal Development
 - 3.1.3. Hormonal Process
 - 3.1.4. Preparation for Labor
- 3.2. Stages of Labor
 - 3.2.1. First Stage: Dilatation
 - 3.2.2. Second Stage: Expulsion
 - 3.2.3. Third Stage: Delivery
 - 3.2.4. Fourth Stage: Recovery
- 3.3. Relaxation and Breathing Techniques
 - 3.3.1. Deep and Controlled Breathing
 - 3.3.2. Visualization Techniques
 - 3.3.3. Massages and Muscle Relaxation Techniques
 - 3.3.4. Mindfulness and Meditation
- 3.4. Prenatal Exercises and Physical Preparation
 - 3.4.1. Muscle Strengthening
 - 3.4.2. Flexibility and Mobility
 - 3.4.3. Specific Exercises for Childbirth
 - 3.4.4. General Physical Activity Recommendations
- 3.5. Nutrition during pregnancy
 - 3.5.1. Specific Nutritional Needs
 - 3.5.2. Recommended and Not Recommended Foods
 - 3.5.3. Weight Control
 - 3.5.4. Vitamin and Mineral Supplements
- 3.6. Birth Plan Development
 - 3.6.1. Personal Preferences
 - 3.6.2. Pain Relief Methods
 - 3.6.3. Birth Positions
 - 3.6.4. Contingency Plans

Structure and Content | 21 tech

- 3.7. Interdisciplinary Collaboration in Childbirth Care
 - 3.7.1. Role of Each Professional in Childbirth Care
 - 3.7.2. Development of Clinical Skills in Childbirth Care
 - 3.7.3. Childbirth Care in Interdisciplinary Teams
 - 3.7.4. Leadership Skills in Obstetric Care
- 3.8. Emotional Preparation for Childbirth
 - 3.8.1. Managing Fear and Anxiety
 - 3.8.2. Emotional Support from the Partner and Family
 - 3.8.3. Coping Techniques
 - 3.8.4. Emotional Connection with the Baby
- 3.9. Childbirth Preparation for High-Risk Patients
 - 3.9.1. Identification and Management of Risk Factors
 - 3.9.2. Medical Planning and Follow-Up
 - 3.9.3. Specific Interventions and Care
 - 3.9.4. Emotional Support and Additional Resources
- 3.10. Family Involvement in Childbirth Education and Preparation
 - 3.10.1. Family Involvement in Childbirth Education and Preparation
 - 3.10.2. Prenatal Classes and Joint Educational Activities
 - 3.10.3. Preparation for Emotional and Practical Support
 - 3.10.4. Adaptation and Family Roles in the Postpartum

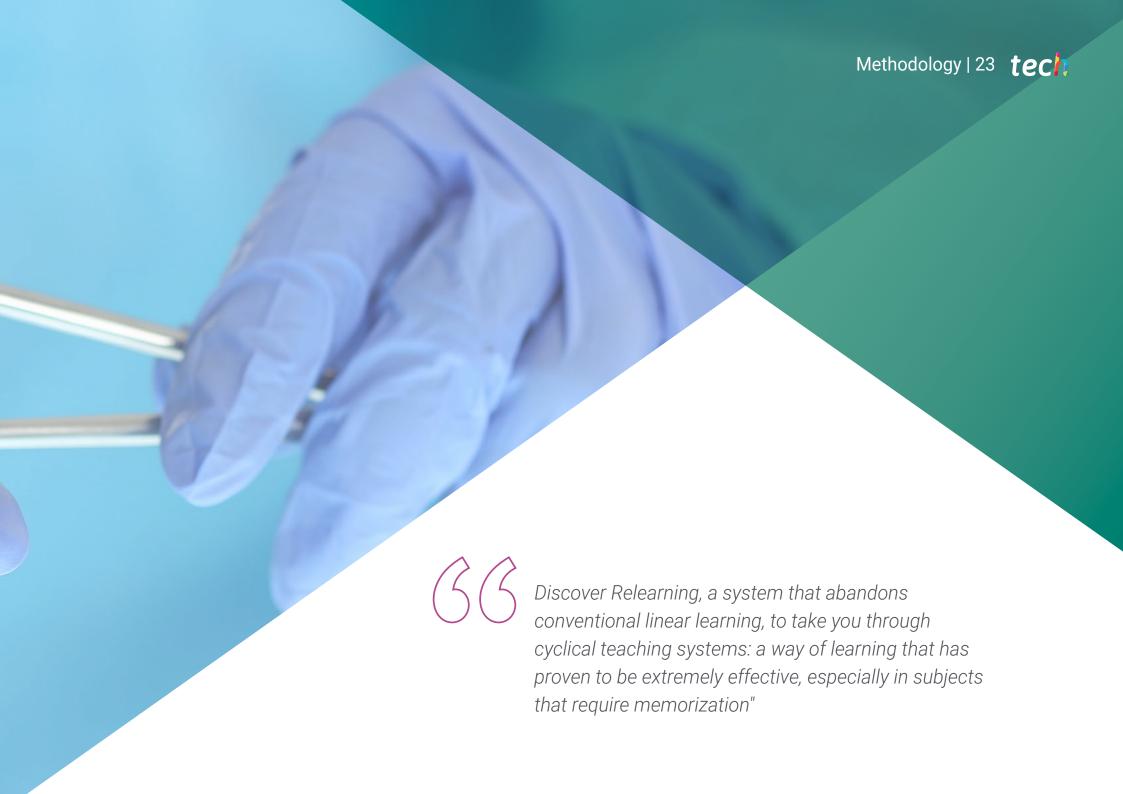

You will face real and simulation cases, obtaining an immersive experience with greater benefits"

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

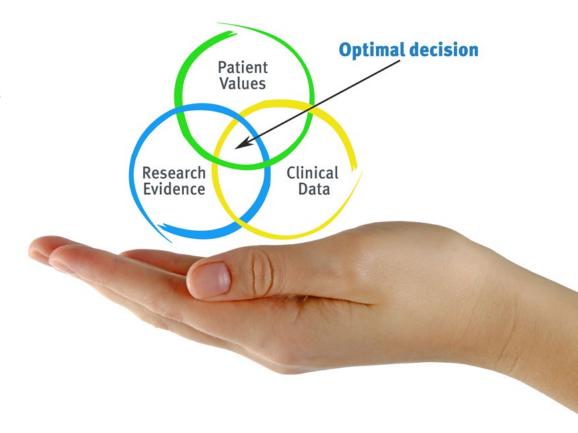

tech 24 | Methodology

At TECH Nursing School we use the Case Method

In a given situation, what should a professional do? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Nurses learn better, faster, and more sustainably over time.

With TECH, nurses can experience a learning methodology that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, in an attempt to recreate the real conditions in professional nursing practice.

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method"

The effectiveness of the method is justified by four fundamental achievements:

- Nurses who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
- 2. The learning process has a clear focus on practical skills that allow the nursing professional to better integrate knowledge acquisition into the hospital setting or primary care.
- **3.** Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
- 4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine case studies with a 100% online learning system based on repetition combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

The nurse will learn through real cases and by solving complex situations in simulated learning environments.

These simulations are developed using state-of-the-art software to facilitate immersive learning.

Methodology | 27 tech

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 175,000 nurses with unprecedented success in all specialities regardless of practical workload. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Nursing Techniques and Procedures on Video

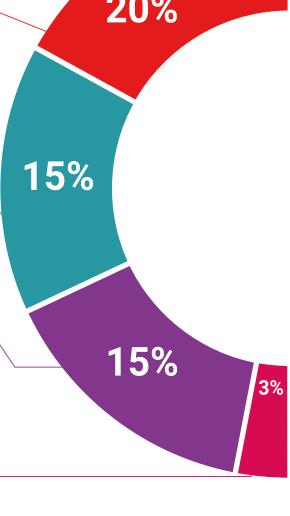

We introduce you to the latest techniques, to the latest educational advances, to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

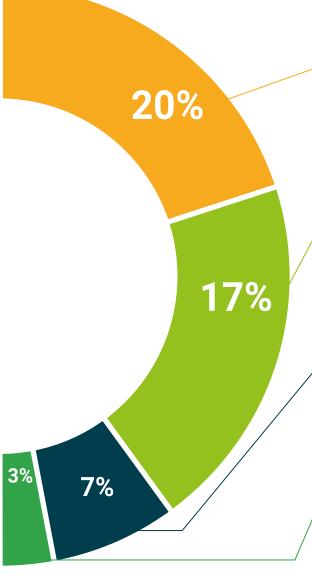

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

tech 32 | Certificate

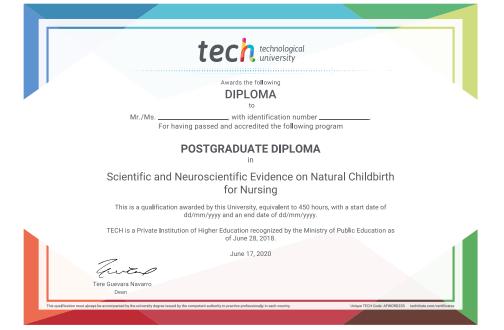

This Postgraduate Diploma in Scientific and Neuroscientific Evidence on Natural Childbirth for Nursing contains the most complete and up-to-date scientific on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Diploma** issued by **TECH Technological University** via tracked delivery*.

The diploma issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Diploma, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: Postgraduate Diploma in Scientific and Neuroscientific Evidence on Natural Childbirth for Nursing

Official No of Hours: 450 h.

^{*}Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
